T. T. on London ready	...	1-6$\frac{3}{32}$	1-6$\frac{3}{32}$	1-6$\frac{3}{32}$
3 Months Bill rate ready	...	1-6$\frac{7}{32}$	1-6$\frac{7}{32}$	1-6$\frac{7}{32}$

Calcutta, Friday Evening.

Credits have continued in plethoric supply ; and the rates are the same as in earlier weeks, that is, ¼ per cent. in Bombay and ½ per cent. in Calcutta, lenders over in both the centres. Banks have no use for funds for shorter periods than three months ; and the rate paid for three months deposits is ¾ per cent. These deposits will mature in February and will thus be of use in the early period of the so-called busy season. Busy season in the accepted sense of the term is now a long-ago experience for the market. Trade activity has been quiescent for a few years ; and most of the demand for financing trade is met from the resources available in the bazars themselves. Recourse to banks in respect of the financing of the movement of commodities has been, even in the height of the busy season, markedly on the small side. There has, therefore, been hardly any difference worth mention between the advances made by banks during the slack season and the advances during the busy season. In normal times, there is a striking difference between the advances in the monsoon months and those in the cold weather. The disappearance of these huge fluctuations in the advances portfolios of banks accounts for the maintenance of the bank rate at a dead level of 3½ per cent. On the other hand, Government's policy and Government's operations in the past years have, on occasions, caused an artificial stringency in the short loans market. This kind of stringency has had no relation to the intrinsic demand for finance on trade account. It is to be hoped that, with the improved technique which is usually associated with the working of a Reserve Bank, there will be no repetition of artificial phases of monetary pressure.

At the present moment, the indications are that, unless prices record substantial rises, such finance as may be required during the export season will be fully within the ability of the banks to find without any discomfort. From this point of view, there should be nothing like a squeeze for money at least for the next three months. The floating debt has now reached the total of Rs. 32½ crores, that is, nearly Rs. 15 crores higher than the level envisaged in the budget programme. In spite of so big a drain of the surplus resources of banks into the coffers of the Treasury, there has been absolutely no change in money conditions. For another four weeks, there will be no Treasury Bills maturities. At the same time, the Reserve Bank will be selling Treasury Bills at the rate of Rs. 2 crores per week. By early December, Treasury Bills outstandings are, therefore, likely to touch the high level of Rs. 40 crores. That the money will find the additional Rs. 8 crores without feeling any strain, may be taken as certain. In the first place, the Imperial Bank is still afflicted with unsatisfied hunger for Treasury Bills. In the week ended October 25, Investments held by the Bank amounted to Rs. 46.95 crores. On November 1, they had risen to Rs. 48.33 crores. It is obvious that the Imperial has taken a big whack of the Treasury Bills of last week. Even so, the cash balance of the Bank is not less than Rs. 19.18 crores. The capacity of the Bank to absorb Treasury Bills has certainly not reached the saturation point. In the second place, the consolidated statement of the position of Scheduled Banks reveals an interesting state of affairs. Demand Liabilities have gone up from Rs. 120.97 crores on October 25, to Rs. 124.89 crores on November 1. There has thus been an increase of anything like Rs. 4 crores. Perhaps, a portion of this represents funds brought in from London for investment in Treasury Bills. To the extent that a considerable part of the future sales of Treasury Bills will be absorbed by these London funds and by the spare funds of the Imperial Bank, the market resources will remain more or less unaffected.

The same conclusion is stressed by the increase in the cash balances of Scheduled Banks from Rs. 4.39 crores to Rs. 5.41 crores and by the increase in the balances with the Reserve Bank from Rs. 28.04 crores to Rs. 31.64 crores. It is also significant that advances in India by Scheduled Banks have gone down from

Rs. 83.69 crores to Rs. 82.57 crores. The decline in this regard is all the more glaring if we compare the figures for last week with those at the end of the first week after the Scheduled Banks joined the reserve banking system. Advances of banks on July 5, were Rs. 102.85 crores and on November 1, were Rs. 82.57 crores. There has thus been a decline of Rs. 20 crores. There has also been a considerable shrinkage in the trade bills. To the extent that there has been a cut in the advances made by banks, Treasury Bills came as a God-send.

The Weekly Air-Mail contributions of Dr. Paul Einzig and Mr. Francis Williams did not arrive up to the time of going to press owing to the plane being held up on the way. These features do not, therefore, appear this week.

In the light of these factors, it is not surprising that the giltedge market has been registering sharp advances in all descriptions of securities. Short-term, medium-term, long-term and interminable securities have all shared in the booming conditions. The New Loan is now quoting Rs. 98-14. This is really the level at which the loan must have been issued. But for the bad handling of the loan and the bad handling of the market in the days immediately following the loan, the government securities market need not have undergone these setbacks. 3½ per cent. Rupee Paper is now quoting Rs. 94-4. It is difficult to see what can arrest its rise to Rs. 97. 4 per cent. 1960/70 is now quoting Rs. 108-15; only a few days ago, it was 105. 3½ per cent. 1947/50 is Rs. 104-4. 4 per cent. 1943 is Rs. 107-14. Bombay has been a strong buyer of 5½ per cent. 1938/40 at Rs. 108-14 and of 5 per cent. 1940-43 at Rs. 110-6. 5 per cent. 1945-55 is firmly held and sellers are loath to part even at Rs. 118-14. There is demand for every short-term and medium-term scrip; and hardly any scrip is forthcoming. This is the condition of the market to-day. From January onwards, due to the larger collection of revenue, the Government will be reducing the size of the floating debt. When these funds are being released from Treasury Bills maturities, it will be hard job to find remunerative investment unless trade activity gives up its taciturn behaviour. The chief fly in the ointment is the known clumsy credit policy of the authorities.

The exchange market has been dull all week—very dull indeed; and it is, therefore, surprising that the Reserve Bank was able to get tenders for £1,055,000 at 1s. 6 1/8d. Allotment was on the basis of 95 per cent. It is doubtful if the Bank will be able to get its quota of sterling next week.

The closing rates are: 1s. 6 3/32d., for T.T. right up to the end of 1936; 1s. 6 1/8d., was available for January/March T.T. but this was not an open rate.

Bills may be quoted: 1s. 6 7/32d., right through. But there was not much doing.

Interbank call money continued unlendable. The quotable rate is ½ per cent.

Firms' money for call, three days' notice, seven days' notice and term deposits for one-month, two-months and three-months quoted ¾ per cent. Banks showed some interest in three-months deposits. Twelve-months deposits quoted 2 per cent. to 2¼ per cent.

LLOYDS BANK
LIMITED

INCORPORATED IN ENGLAND
1677

SAVINGS

It may not be easy to save money at the present time, but it is even more necessary than in the past.

A convenient method of preparing for the payment of periodical demands for such purposes as holidays, insurance premiums, income tax, passages, medical expenses and school fees is to open a SAVINGS BANK ACCOUNT with Lloyds Bank and to place a small sum away regularly.

Interest is allowed at the rate of 2½% per annum. WITHDRAWALS CAN BE MADE BY CHEQUE.

Branches in the East:

Thursday Evening.

The international exchanges have, generally speaking, maintained their even tenor during the week under review. The fluctuations have been within a narrow range ; it seems reasonable to suppose that the multiplicity and complexity of the forces which are at work have tended to create a rough equilibrim in the principal exchanges. The sterling-dollar rate rose to 4.92 5/16 from 4.91 9/16 on November 1, but latterly fell off to 4.91 15/16. The sterling-franc rate rose steadily from 74.59 at the beginning of the week under review to 74.72, at which level it maintained itself on November 4th and 5th. Since then, there has been a slight falling off till the sterling-franc rate stands at 74.65. This, it will be seen, compares with 74.54 a week ago. One can see, beneath the fluctuations recorded above, a definite undertone of strength in sterling. This may appear somewhat strange in view of the fact that people have been generally led to expect a flight from the £ and the consequent weakening of sterling during this period.

There is at present no means of deciding how the strength in sterling has arisen. So far as the period under review is concerned, one may suppose that the British control had been acting with particular vigour. But it is doubtful whether the authorities would have proceeded to the length of bringing about an appreciation in the sterling exchanges. The improvement in the sterling-franc and the sterling dollar rates is, by no means, considerable and should normally suffice to convey to the market the determination of the authorities that sterling should not suffer an undue decline as a result of the present political situation. But it is incumbent on us to examine the question whether the general elections, as they are now being fought in Great Britain, should at all exert a downward pressure on the pound. It seems to us that it has been too readily assumed that an election at the present pass of international politics should necessarily weaken the British currency. A general election can lead to a flight from the pound only if it raises the fear of a new government which is likely to follow a socialist or a confiscatory policy or otherwise make serious modifications on the present monetary policy. The reports, which have so far been received about the course of the elections, seem to suggest that the fear of heavy Labour gains, not to speak of a Labour maority in the House, has considerably abated.

Foreigners are hardly likely to continue, in the face of these reports, to entertain the fear of a Leftist Government in Britain. The business classes within the country must feel reassured about the continuance of the Conservative Government. The only question that they might put to themselves is whether another quinquenniae lease of life for the present Government would not induce Mr. Neville Chamberlain to reconsider his monetary policy and effect material changes. The sincerity of Mr. Chamberlain's professions is quite relevant to a consideration of this question. Judging from the London papers, this apparently leaves much room for difference of opinion. It is believed, on the one hand, that Mr. Chamberlain's monetary policy is largely the result of expediency—political and economic—and that it has no grounding in deep-rooted convictions. If that were so, the return of a Conservative majority to Parliament might concievably mean a reconsideration of his policy by Mr. Chamberlain. But there are other sections, which feel no doubt that Mr. Chamberlain has bestowed deep thought on the question relating to money and exchange and that the policy which he has announced frequently is one that he has chosen of his own free will. To the extent that the general elections promise to end in favour of the National Government, the fear of the flight from the Pound must decrease and the Control would find it easier to maintain sterling.

It is important to note that, quite apart from the views of Mr. Neville Chamberlain, the general current of international affairs has helped to sweep aside the question of the stabilisation of international currencies. Each nation is now content to limit within a narrow range the objectives of its exchange policy. And as we have always taken the view that only the more severe crises can force the stabilisation issue, we see little prospect of the nations agreeing to deliberate on this major problem. Meanwhile, the gold bloc countries have begun to act as if they have had a valuable respite from their earlier trials and tribulations. On November 4th last, the Netherlands Bank lowered its discount rate from 4½ per cent. It was only on October 21 that the Bank effected a reduction of half per cent, and less than week before, the rate was reduced by one per cent. from 6 per cent. at which level it had stood from September 17.

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of buisness-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours?

You have only to let us know your requirement and leave the rest to us.

RETORT—AND COUNTER-RETORT

By all tokens, the authorities of the Indian Jute Mills Association do not propose to let the grass grow under their feet. If the Government showed inexcusable dilatoriness in formulating a reply to the request of the Association for State action in the matter of restriction of output of jute manufactures, the Association has shown commendable alacrity in furnishing a detailed—and we think, a convincing—answer to the criticism of the Government about the lack of rationalisation in the working of jute mills in India. It will be remembered that the Government of India's memorandum laid stress on three factors, namely, that the industry stands in need of rationalisation and must devise a scheme towards this end ; that the interests of labour should engage a larger measure of solicitude on the part of jute mill administrations ; and that the interests of the jute-growers should be adequately safeguarded. The communication, which the Committee of the Association have addressed to the Government this week, discusses the proposals for rationalisation in great detail, and the incidental bearing of these proposals on the labourers and the agriculturists is indicated. So far as the main question of rationalisation is concerned, the Association has no difficulty in tearing the Government's views to pieces. In our discussion of the Government of India's memorandum, which appeared in the issue of August 31, we could not make out what exactly were the intentions of the Government in this regard. We expressed our views in the following terms:

> "While we agree that the jute industry does stand in need of reorganisation or rationalisation, we do not think that the lead that the Government had given in this matter can either be easily understood or easily followed. It should, therefore, be necessary for the authorities of the Indian Jute Mills Association to arrange for a conference with the Government's spokesmen and arrive at a clear understanding as to what exactly is meant by rationalisation."

The Indian Jute Mills Association arrives at a similar conclusion. It ends up its communication with the suggestion that the main points of difficulty would be settled more expeditiously in a personal interview than by further correspondence ; and it is, therefore, requested that the Government of Bengal should arrange for an opportunity for a delegation of the Associaion to be sent to the Government of India for the purpose of discussing the position with them in greater detail.

* * *

At the outset, the present reply of the Association submits to a searching examination the Government's statement that the existing demands for jute manufactured goods could possibly be supplied by a quarter of the machinery now available and that the largest demand ever reached so far could probably be satisfied by one-third of the existing mills. This statement of the Government is true only in an extremely hypothetical sense, that is to say, in the sense that the total amount of machinery possessed by the industry is hundred per cent. efficient in every unit and that the number of hours for which such machinery is made to run is fully twenty-four hours in the day. Bearing this in mind, the subtle sarcasm in the following paragraph cannot be lost on the reader:—

> "The potential productive capacity of the industry working twenty-four hours a day is 1,043 crore yards in a year. The existing demand is approximately 250 crore yards and on this basis—that is to say, taking the capacity of the industry at its maximum possible figure—it is true to say that three quarters of the existing machinery is redundant. Similarly, since the highest demand ever reached—in 1929—was 305 crore yards, it is also true to say that that demand could probably be satisfied by one-third of the existing mills and that the other two-thirds are superfluous."

After this leg-pulling, the Association proceeds to show that, in no circumstances that can with reasonable foresight be imagined, the jute mills are ever likely to be called upon to work to their extreme capacity. The real question is how far the output of the mills, working under normal conditions, and in accordance with the current views regarding employment and the hours of work for labour, proves to be in excess of the normal demand. The recent trends in factory legislation all over the world emphasise two points, namely: (*a*) that the hours of work in a week shall be as short as possible ; and (*b*) that the workers are not employed at night work unless, owing to demand or the nature of the industry, this is unavoidable. In view of these trends to which the Government of India have professed their loyalty, the normal conditions of employment must be understood as envisaging a maximum working week of 54 hours, with no night work. On the basis of 54 hours per week, the industry in India is capable of producing 391 crore yards a year. The recent demand has been shown to be only 250 crore yards ; but it is safe to assume that, given a return to normal conditions, world demand is likely to be in the vicinity of 300 crore yards. This means that if the mills work 54 hours per week, there would be an excess of output of 25 per cent. in relation to demand in normal times and an excess of 35 per cent. on the basis of the present reduced offtake. The mills belonging to the Indian Jute Mills Association have been working 40 hours per week ; and the Association urges, and urges rightly, that a 40 hours a week working basis for all mills in India should be aimed at if it is granted that modern conditions of employment accept the principle that hours of work per week for each worker should be as short as possible provided a fair living wage is paid. On the basis of 40 hours per week, the Indian industry is capable of producing 290 crore yards per year. This is slightly in excess of the demand as we have known it in recent years ; but the output will be about equal to the consumption that may be expected in normal conditions. The Association is thus in a position to prove that, provided there is no addition to existing loomage, the redundant machinery in the industry is nowhere near the proportions suggested by the Government.

* * *

As for the suggestion of the Government that rationalisation should take the form of the closing down of redundant machinery and the concentration of production in a limited number of mills, the Association is able to demonstrate conclusively that rationalisation of the nature visualised by the Government is outside the realm of practical politics. Even if this were practicable, it is difficult to see how, with rationalisation carried out on these lines, the interests of labour could be safeguarded. We agree with the Association that the permanent closing down of a number of mills would throw out of employment a great body of labour, the whole of which could not, except perhaps over a long period, be absorbed again into the industry by the remaining mills even although these were working to abnormal capacity. Nor would the rationalisation scheme outlined by the Government protect cultivators. The best guarantee of a fair price for raw jute is the maintenance of stable conditions in the jute manufactures' market. The main consideration in this connection in regard to raw jute as well as jute manufactures is that suitable machinery is set up for balancing supply and demand in both the commodities. If restriction in the working hours of jute mills can ensure a fair price for the jute mills, restriction of the area under jute cultivation should be of like value to the growers.

* * *

When the problem is viewed this way, it is easy to realise that the interests of the Government, the jute mills and the cultivators of Bengal have a measure of common ground. The public should support the demand of the industry for State legislation to prevent the starting of any more new mills, the addition of any more looms, and the working of mills beyond, say, 54 hours. By the same token, it is the duty of the industry to support the Indian demand that there should be compulsory restriction of the jute crop. If there can be a more widespread understanding of this reciprocal obligation, the problem of the jute cultivators and the jute manufacturers can be solved at one stroke. And that is the only way of solving it. When there is this mutual backing for restriction proposals from the public and from the industry, the Government will not find it easy to take a supercilious attitude.

* * *

We have no sympathy with the apprehension which the Government have expressed to the effect that if they agreed to use legislation to restrict production of jute manufactures, other industries could claim similar assistance. The assistance which the jute industry has been seeking from the Government is comparatively trivial compared to the insistent and persistent demand for protection which has emanated from many another industry. As the Committee of the Association point out, several other industries have applied for varying degrees of protection and have been granted it in abundant measure. The Government need not affect so patronising a pose to the jute industry. The fact is that Clive Street bosses are too self-conscious of their dignity and too full of their self-esteem to do anything which savours of agitation. In these days, seemly conduct of this nature is of little practical help. It is only agitation that pays. Clive Street will do well to learn a lesson or two in this regard from Bombay. The Western Capital has specialised in agitation and propaganda ; and it has always got whatever it set about getting. The two important occasions on which Clive Street sought the assistance of Government were in regard to the coal industry and the jute industry. Even though 95 per cent. of the coal interests expressed agreement on the scheme that was put forward to the Government, the latter turned it down without much formality. So far as the jute industry is concerned, all that the Association has received is a harangue on what constitutes good conduct. Let Clive Street realise that the Government take their friends for granted and are more anxious to placate their enemies. Let Clive Street also learn that the only way by which they can make it impossible for the Government to treat them in this cavalier fashion is to make common cause with the jute cultivators on a scheme which brings about compulsory restriction for raw jute and jute manufactures and which ensures a fair price for the jute-growers and the jute-manufacturers.

* * *

We shall conclude by addressing a word to the Government. We would like to commend to their attention a magnificent book by Mr. Harold MacMillan under the name *Restriction—A Plea For A National Policy*. Mr. MacMillan visualises the state of affairs in which, in the efforts of any industry to carry through re-organisation, the more progressive leaders may find their efforts frustrated by a recalcitrant minoriy, or, if they succeed in establishing stable and orderly production and marketing conditions, new producers outside the agreement will be attracted to the industry and the old competitive redundancy will be re-created. In simple terms, Mr. MacMillan is discussing, in his book, just the situation that prevails to-day in the jute industry. Mr. MacMillan's solution, with which we agree, and on which we commented nearly two years ago in reviewing the book, is as follows:

> "It is in this connection that Government assistance is required. The Government could invite each industry by majority vote to submit its scheme for the integration of the industry into a national unit subject to a suitable central control. In the interests of the nation as a whole it ought to place a time limit on the discussions and reserve the right itself to prepare a scheme if the industry fails to respond. When the scheme has been formulated and the National Council for the industry appointed, then the Government should confer on that authority the necessary statutory powers to carry through the scheme of integration and thereafter to preserve stability by the exercise of regulative powers."

The Government should realise that their interest and the interest of the province are equally involved in a proper and satisfactory solution of the problems confronting the Indian Jute Mills Association. We should, therefore, stress both the gravity of the issues and the urgency of the matter.

ECONOMIC RESOURCES AND POLITICAL BOUNDARIES

One of the important problems which Italian intransigence has, for the moment at any rate, swept out of consideration is that which relates to the apportionment among the nations of the world's resources of raw materials. Sir Samuel Hoare attempted to relieve that vigour of his treatment of the Italian problem by suggesting that the nations must at one time sit together to consider the steps necessary for a more equitable distribution of raw materials among the nations with a view to remove the present feeling of embitterment. At that time, Sir Samuel naturally could not give any indication of the proposals which he, personally or as a representative of Great Britain, would be prepared to consider. And since then, there has been no opportunity for Sir Samuel to express himself in further exposition of his original idea. It may also be that the powers will never agree to determine or to effect the adjustments that may be called for in this regard. Nevertheless, it is a problem vital to world economic equilibrium. The concentration of resources of whatever kind in any one group of political units must naturally have its repercussions on international trade relations. It would jeopardise the geographical division of labour on which international trade can find a stable equilibrium. It is a different question, of course, whether there is such dangerous concentration of raw material resources and whether that the apportionment of such resources is called for in the present state of world economy. In other words, it remains to be decided whether the measures suggested by Sir Samuel Hoare at Gevena are the real objective needs of world economy in its present position or whether it is merely a sop to the discontented powers like Germany, Italy and Japan.

* * *

Before attempting to examine the question, it is necessary to know the extent to which the principal political divisions control the world's resources of important raw materials. *The Economist* has afforded a very useful survey of the position on the basis that the principal divisions comprise the three great empires —British, French and Dutch-the United States of America and the U. S. S. R., the rest of the world being treated as a heterogenous unit by itself. Egypt is thrown in with the British Empire, in spite of the fact that legally she is a sovereign state, as the discontented nations are apt to regard Egypt as a mere British protectorate.

* * *

On this basis, the "rest of the world" has 39 per cent. of the world's area and 53 per cent. of the world's population as its share, with the British Empire coming next with 27 per cent. of the area and 25 per cent. of the population. The French Empire has a larger share of the area (9 per cent.) that of the population (4 per cent). The Dutch Empire possesses 3 per cent. of the world's population, though the area occupied by it is only 2 per cent. of the earth's surface. The U. S. A. has 7 per cent. alike of the world's population and of its area ; and the U. S. S. R. holds sway over only 8 per cent. of the population though the area under its control is as much as 16 per cent. Among the countries which are included in the rest of the world, China calls for special mention, as her population of 475 millions, which is 23 per cent. of the world's population, occupies only 8.3 per cent. of the world's land surface. None of the principal political divisions is known to have put forward in recent times any demand for changes in the area which they govern on the strength of the relation between their population and the geographical extent of the area over which they rule. It is, however, quite different with the countries included in "the rest of the world." Japan, Italy and Germany are in desperate need of outlets for their surplus population ; and there are, on the other hand, countries included in, say the British Empire,

which could take a hand in solving the problem of excess population by suitable alterations in their laws of immigration. The distribution of the world's population over the habitable land surface is a far larger problem than what was indicated by Sir Samuel Hoare at Geneva. History affords many instances of a natural, though violent, solution at various periods. The test of a world civilisation, of course, is a proper regulation of the movements of population; and it is unquestionably premature to hope for such progress.

* * *

What is important to note at present is that the claims to changes in political borders are based on grounds of insufficiency of raw material resources. There is implicit in this claim the assumption that those areas of the world, which are earmarked by nature for production of raw materials, ought to have no better status in international life than that of protectorates under the industrialised nations. That is part of the mental make-up of European politicians which can be corrected only by the logic of events. Without complicating the issue by introducing the rights of the tropical areas, it must still be useful to examine the position as it obtains now. *The Economist* brings out the fact clearly that, in the case of many commodities, "the rest of the world" produces more than any single political division. Of wheat, it has 35.1 per cent. to its credit. It has half the world's annual production of barley and it produces the bulk of the world's production of soya beans, coffee, sulphur, lignite and linseed. But as among the other five divisions, there is a notable disparity. The British Empire, as one can easily guess from the discussions on Empire trade, has the most considerable and most comprehensive resources. The Empire produces nearly a fourth of the world's wheat and cotton, a fifth of the vegetable oils, more than a half of the world's cocoa, groundnuts, wool, the whole of its jute, two-thirds of its rubber and it has a preponderant share of the total annual production of rubber, nickel and gold. The French Empire has rich supplies of vegetable oils, cocoa, groundnuts, iron ore, bauxite and potash. The Dutch Empire can influence vitally the copra, rubber and tin markets. The U. S. A. can control, to a large extent, the world's supplies of cotton, petroleum, lead, zinc and silver. Russia is in a position to affect the fortunes of wheat, linseed, petroleum and manganese ore.

* * *

While these facts are undoubtedly interesting, it would be grossly unscientific to rush on their strength to any conclusions. In the first place, these proportions are deceptive, if only because these resources are in different stages of economic development. The purposes which their development should subserve also vary from country to country. What matters is whether the present division of resources tends to impede the re-establishment of the equilibrium of international trade. That equilibrium clearly depends on a fair division of productive effort among the nations, from which it would follow that there is an economic division of labour and a proper division of purchasing power. No one will contend that, if Japan had more cotton-producing tracts in her Empire, her foreign trade would be in a better position. Germany's problems would not be rendered lighter by a larger supply

of raw materials within her own boundary, though such supply might relieve the pressure on her exchanges. What is required is the ability to pty for raw materials and, what is even more important, the markets in which to dispose off the finished products. As pointed out already, a market is created not by mere political suzerainty but by the institution of productive effort and the creation of values for exchange.

FINANCIAL REFORM IN CHINA

The tangible result of the visit of Sir Frederick Leith-Ross as financial adviser to the Chinese Government is seen in the order recently issued outlining the measures of currency and banking reform. It is clear from a perusal of the order that China has at long last cried halt to the deliberations on her financial problems and has decided to act. For years she has been considering how to bring a silver standard country in line with a world which has adopted the gold standard in some form or another. She has consulted a variety of experts ; and the only one who was able to take a comprehensive view of the position and clarify the approach to its solution was Prof. Kemmerer. But the Kemmerer report could do little to bring about a practical solution, as the contours of international finance since its submission have been changing in a most violent and unexpected manner. The distortion of international finance since the depression and the advent of silver bloc in the counsels of the American Government have hopelessly complicated the financial tangle in China. Sir Frederick Leith-Ross has apparently refused to be drawn into the wider issues so beloved of the academic economist and has been content only to find a practical policy the pursuit of which would remove the existing complexities and bring the country nearer to a system of stable currency.

* * *

Those, who are familar with China's monetary problems, are aware that the principal obstacle in the way is the multiplicity of note issues. The Government have at last decided to deal with this in a drastic manner. The bank notes issued by the three Government banks, the Central Bank of China, the Bank of China and the Bank of Communications, shall be legal tender and the bank notes reserves of the three banks shall be placed under a unified control. The Central Bank of China will be reorganised as the Central Reserve Bank of China and will be owned principally by the banks and the general public thus becoming an independennt institution devoting itself chiefly to maintaining the stability of the nation's currency. The notes of all the issuing banks will be allowed to continue in circulation but will be gradually withdrawn and replaced by the notes of the Central Bank of China. Banks other than the three mentioned above are forbidden to issue new notes and their unissued notes and bank note reserves shall be deposited with the Central Bank of China. Thus China has attempted for the first time to unify the note issue and vest it in the hands of a central banking institution which will act as the depository of all public funds and discharge the functions of a Central Bank. After a period of two years the Bank will enjoy the sole right of note issue. And, presumably, it is expected that within this period the task of recovering and replacing the note issues of other banks will be completed.

* * *

Of equal importance with the unification of the note issues is the provision for the nationalisation of silver. Taking the cue from countries like the United States, the Chinese order provides that all debts expressed in terms of silver shall be discharged by the payment of legal tender notes of the nominal amount due and all holders of silver will be required to exchange the silver for the legal tender notes. The idea behind such nationalisation of silver is not only to give the fullest validity to the legal tender currency, but also to acquire the concentration of the country's silver resources necessary for obtaining the requisite foreign credits for maintaining the exchange value of national currency. The Government order makes no reference to the measures contemplated by the Government for maintaining the currency. But it has been announced that the exchange value of the Chinese dollar will be stabilised at the present level and that for this purpose the Government banks will buy and sell foreign exchange in unlimited quantities. The other aspects of any scheme of national financial reconstruction are also present in the Chinese programme. The public has been assured that measures are being prepared for strengthening the commercial banking system and giving increased liquidity, under sound conditions, on a commercial basis. These measures also include the creation of a special institution to deal exclusively with mortgage business. The national budget, it is expected, will be balanced within eighteen months. The Government are determined to avoid inflation and will take energetic measures to deal with speculation and all attempts to procure unwarranted increase of prices.

Geneva is a beehive of activity—mostly vocal, you might say—in troublous times like these. It is the cynosure of all eyes; and eyes all over the world are straining to peer into the doings and goings-on in that international centre. In routine conditions and normal times, it is the Mecca of those who are bent on joyous pilgrimages at somebody else's cost. And on their return, the pilgrims have every cause to wax eloquent on the good time they have had, free and gratis. They are also wont to claim paramount importance for their mission. The one has its spring in gratitude; the other in self-esteem. Geneva has been both lauded and decried—extravagantly lauded and unrestrainedly decried. The enthusiasts are those who have had the luck to be in the happy throng nominated by the State for the periodical joy-ride. The critics are those who have not had such luck; and they remind one of sour grapes. As is usual, the truth lies midway between the advertisers and the denouncers. Geneva ensures international contacts of inestimable value; but it cannot guarantee world peace of any enduring value. Geneva will ever stand for promise, never for performance; for abounding goodwill, never for concrete action; it is a gesture, a symbol, a strategic mystery, a spear-head of sentiment. If the nations of the world understand Geneva in these terms, they will not be disappointed. If they expect aught else or aught more, they are only courting disillusionment.

It is this chastened understanding which lends force and significance to the observations of the Hon. Mr. B. K. Basu, who was a substitute delegate in the last session of the League of Nations Assembly. Mr. Basu's commonsense has ever been his chief ally; and commonsense is another description for poise, for mental balance. He is, in no sense, hysterical over the transcendental glory of Geneva or of the heroic deeds of those who foregather there on occasions. He stresses the opportunities which Geneva provides as a meeting-place of the representatives of almost all the nations on a footing of equality and in an atmosphere of cordiality. He suggests that the influence of the League of Nations centre is in the subtler realm of psychology rather than in the sterner realm of practical politics. Let me allow Mr. Basu to explain his view-point in his own simple and convincing way. Mr. Basu, on the eve of his departure from Geneva, said to a press representative:—

> "The value of the League in my opinion consists in the opportunity one has of securing international contacts with the leading statesmen, diplomats, economists and scientists of the various countries of the world. The social side of our stay here cannot be over-estimated. I find a great deal more work is done across the luncheon and dinner tables than can be done either in the Assembly or in the Committee meetings. During my stay I have come in contact with people of various nationalities, some of whom had very hazy ideas about India and its people. Likewise I received a lot of information about various countries about which I had very little information before. This exchange of information amongst the delegates is a priceless boon that is conferred by the League."

ICE

Rates and Particulars from—
Balmer Lawrie & Co., Ltd.
103, Clive Street, Calcutta.

India makes, it is true, a considerable annual contribution to the League—in fact, the largest contribution paid by any State which is not a permanent member of the Council of the League. But why should not India try to take better advantage of the multifarious activities of the League? We only complain about our contribution; we do not know how, on our own initiative, we may get the *quid pro quo.* Mr. Basu suggests that even as Sir Arthur Salter's services were availed of for investigating the possibility of an economic council in India, we may "call upon the League for investigation of the problems of, say, educated unemployment, illiteracy, preventible diseases, rural hygiene and thousand other important problems." At the same time, he reiterates his chief demand for having more Indians on the staff of the Geneva organisations. If, for example, an economist of the type of Professor V. R. K. V. Rao were to be associated with the Economic Section of the League Secretariat for a year or two, won't he become a national asset? His contribution to the League studies would be invaluable; and, with the richer equipment thus assured, he should be just the type of man who could plan and develop an economic intelligence and statistical department for the Reserve Bank.

In this regard, the Bank is still groping in the dark; it has not, perhaps, even realised the need or the importance of this development. But the League of Nations Secretariat will be the fittest training ground for the economist who is to give shape and form to this essential activity of the Reserve Bank. American banks were the first to appreciate the utility of an economic adviser and an apt economic organisation. The Bank of England fell into line half a decade ago and requisitioned the services of Professor Sprague from America. On the return of the latter to his country, Professor Henry Clay has taken his place. If the League of Nations could be utilised for training the men who could thereafter take the necessary steps for the strengthening and expanding of economic statistics in India, it would be some manner and measure of return for the contribution we are making.

Mr. Basu urges, also, a plea for increasing the points of contact of the League with Indian centres of culture. Dr. P. P. Pillai has done yeoman service as a liaison officer between the International Labour Office and India. Paddy, as he is affectionately known amongst one and all, had an arduous

absence. There was general scepticism, even suspicion, about the activities of the Internal Labour Conference. He set to work patiently and intelligently. But his plan of work carried its own guarantee of success. Alike with the Government and the popular representatives, alike with capital and labour, Paddy is popular; and he is appreciated as a mine of information on all topics of international import, as a friend who can always appreciate and harmonise diverse points of view, as an "international nationalist," if I may coin such an expression. The result is that the old suspicion has disappeared, scepticism has yielded place to faith in the *bona fides* of the International Labour Office, and everyone is agreed that the Geneva conferences have done much to alleviate the lot of labour in India.

A similar mission for the League of Nations is now entrusted to Mr. Venkateswaran; coming later in the field, his work is yet in the formative stage. But he has vastly popularised the League literature; he has propagandised the League ideals; and everyone knows where he may get correct and reliable information about League activities. But worthwhile results can be looked for only if Mr. Venkateswaran's organisation is strengthened and if he be given facilities for setting up branches in other important centres. The experiment has been, even in the elementary stages, so successful that the League Authorities will do well to pay due heed to the advice of Mr. Basu to increase the points of contact between the League and the Indian centres.

Equally thought-provoking was the speech which Mr. Basu made in the Second Committee (Financial and Economic Questions) of the League of Nations Assembly. He drew attention to the elementary fact—a fact forgotten by the great industrial powers—that we cannot export unless we import and that we cannot ask our debtor nations to pay their debts unless we are prepared to accept their products, with which only they can ultimately make their payment. From this point of view, he trounces the agricultural protectionism which has been introduced in an extreme form in the industrial countries of the West. Mr. Basu says:

> "I do not think that it is difficult to see that the agricultural countries will be unable to purchase the products of industrial countries if the latter refuse to accept in payment the agricultural products of the former. But this is being shut out by agricultural protection. This inevitably reduces the export of industrial countries and thereby brings about industrial depression."

Depressed industries, depressed agriculture, lower and lower prices, larger and larger unemployment, piling-up of indebtedness, protectionism run mad—these are the order of the day. What next?—asks Mr. Basu. A solution is bound to be found, asserts Mr. Basu, sooner or later. Whether the solution will be smoothly brought about or will follow a terrific crash, is the issue which the nations must seriously ponder over. "The dawn will come even if the cock does not crow." With this philosophic comfort, he advised his colleagues in Geneva to do all they can to let the normal day break as the morning cock crows loud. Exit agricultural protectionism, enter dawn—this was the parting advice of Mr. Basu; and, I suppose, each one of his hearers felt that it was the neighbour who needed advice. What has brought the world to this sorry plight is that the big fish were, in pre-war years, fattening on the little fish. They wish to do so again and keep doing so for aye and for ever. The little fish protest that they, too, have a say in the matter. The big fish retaliate by agricultural protectionism. Herein is havoc for both. May not the big fish agree to a new world where they and the little ones together live and have their being?

In the death of Mr. Herbert Robinson, Spencer and Company with its extensive and varied ramifications is bereft of the head that planned and the hand that guided every activity both in the broad sense of policy and the tinier sense of detailed administration. Mr. Robinson's success was due to an intense human understanding. He understood human wants and catered to them just in the way that human nature appreciates. This is how Spencers came to stand for upright and comprehensive service. Last cold weather, we were lunching at the Savoy; and the fare we were concentrating our attention on was a plate of curry and rice. And we were asked to tackle it with a knife and fork. "Fancy taking good, hot Madras curry and rice with a knife and fork", exclaimed Mr. Robinson. "You require a hefty spoon and fork. I like Madras, and Madras curry. Both hot and homely". I was in South India in the Summer; and during the few days I spent in the Connemara Hotel, he insisted on my dining at his table. And he gave me, at every meal, far better Madras curry than we in Madrasee households are accustomed to. That was Robinson all over. He studied his clients and his establishments grew in popularity with increasing number of satisfied clients. He was hale and hearty—full of bonhomie and keen on a good joke. Whoever could have foreseen so early an end to so vivacious a nature! Our fullest sympathies go to Mrs. Robinson and their little son.

The description of the Bengal Steel Corporation, which I gave in these columns early in September, has attracted considerable attention and been largely quoted in London papers. At that time, the *Statesman* was not willing to recognise the importance of the news. But its London correspondent would appear to have sent an Air-mail cutting from the *Financial Times* which was duly featured in the telegram page of our contemporary. Two months ago, its own sleuths could have, had they cared or had they nosed, worked up a story fit to be embellished with two-column headlines. But it has, evidently, more confidence in the news sense of the London breed of reporters. Additional testimony to this self-diffidence is to be found in the inconspicuous place which was given to its own exclusive news item contradicting a portion of the account given in the *Financial Times*. Our Chowringhee oracle has, in most things, a good and proper self-esteem; but where any matter impinges on Clive Street, nervousness, thy name is *Statesman*! Which reminds me that while the local market for raw jute and jute manufactures is never honoured with a weekly commentary in its columns, its Dundee Correspondent writes a detailed Air-mail account of foreign jute markets. Say nuffin lest you rub the Clive Street bosses the wrong way—seems a safe policy, but hardly justifies the claim of any paper for complete news service.

OLYMPUS

(From Our Correspondent)

New Delhi, November 6.

Officials here are having a laugh at the expense of the democratic electorate for the Reserve Bank. Say they, "You accuse us of bad nominations; well, compare those nominated by the public for election to the local boards of the Bank". It must be conceded that, all told, the candidates for election to the Boards of the various territorial groups are not men, except a few, who are known outside their province; and some of them are not known even in their own territory.

The North India Electorate, for instance, has not a single candidate, to vote for, whose name can be put forward as an authority on banking system or practice. Indeed, it has caused some amazement why Seth Padampet did not stand for election. I am told, he forgot the date to put in his nomination! The result is that the public who hold the shares are in the dark as to whom to back and votes are being acquired through proxies by those who have unloosened their purse strings.

The Government can certainly claim with pride that, at any rate, their nominations to the Central Board did not suffer from the lack of experience and knowledge which might be betrayed by a large number of those who might be elected to the local Boards. One definite reason for this state of affairs is that the public mind has, for too long, been occupied with political issues and all the other interests which vitally affect the progress of the nation have been ignored.

This point is further strengthened by the fact that the public opinion has not yet expressed itself strongly regarding the need for the Reserve Bank losing no time in organising its agricultural credit department. The Assembly certainly attached the greatest importance to the subject and insisted on a special section being inserted laying this solemn obligagtion on the Bank. Mr. Darling's Report has been studied by the Government and is now in the hands of the Reserve Bank Directors. The Board can sit over the matter, or it may expedite it. All will depend on how much and how far public opinion is alive to the gravity of the issues.

The position is simply told. The so-called cheap money exists in the cities; it does not exist in the urban and rural areas. Why, the Reserve Bank should easily be in a position to place at the disposal of agricultural credit any thing up to Rs. 20 crores but who will carry this money to the countryside. (Easier said than done!—*Ed., I. F.*) The Co-operative Banks can do it most effectively, provided they are remodelled on the lines which would make them well-run organisations, and provided the money-lending classes are roped in into the scheme of finance.

* * *

If only one studies the statement published in *Indian Finance* showing the extent to which trade is financed by the scheduled banks, it is clear that they hardly provide funds to any appreciable extent. The indegenous banker does the major part of business in this line. How is he to be brought into the stream of credit. This question has already been visualised but the Reserve Bank must be pressed to undertake special enquiry on this subject too.

There is no running away from the fact that the Reserve Bank can be made to expand its activities to become coterminous with the duties of a real national bank. And unless agricultural credit is provided for and all the money resources are brought into the main stream, banking on modern lines would hardly justify itself as a national asset. Indian public opinion has always felt the need for reorganisation of the system of credit in this country and the officials here declare that the question is one which the Central Board of the Reserve Bank must tackle. Indeed, if the Board fails to tackle it, it would fall below the expectations held here.

The Industries Conference is over. It ran through the Agenda without difficulty and there was a feeling of satisfaction among most of the Delegates that they had done their job. But all were not satisfied. Some of them expressed their views thus: "What is the fun of calling a Conference of this kind if we are not to face the issue of freights which operate against industrial advancement. If such a subject is taken up, it is tabooed as being outside the scope of the Conference! Then it comes to this that the subsidies for handloom industry are aimed politically to show that Government is doing something for the industry which Mahatma Gandhi has patronised. If political objective is to be served, the purpose may be clearly understood but the Conference must aim at a national industrial plan. It has no such mission and it will have no appeal to the nation."

* * *

A certain section of the press has already begun to speculate about the leave of absence which Sir James Grigg may take next summer. There is no other basis for it than that every member of the Government does take advantage of four months leave out of India and no doubt Sir James would do the same. Generally, such leave is taken in the third or fourth year of the tenure of office. It is most unlikely that Sir James will take leave next summer, more especially as problems arising out of the Niemeyer enquiry and the Wheeler Report would need his personal attention and he would hardly be able to get away from India.

In fact, next summer would need his presence in India, most particularly because it will constitute the formative stage of provincial autonomy and problems connected with separation of financial resources and adjustment of deficits both at the centre and in the subvention provinces would need careful attention. The Finance Member loves his work too much to think of leaving India at such a juncture. It may, thedefore, be taken as certain that he would not take leave next summer.

* * *

Of course, when he does go on leave, Mr. Nixon is likely to succeed him in temporary capacity while Mr. Raisman, who has been looking forward to fill the post of Finance Secretary one day, may act as Secretary and acquire the necessary experience of that important office.

Nawab of Pataudi has been selected skipper of the Indian Cricket team. Whatever may be the view of the Board of Control, the man in the street here has resented his selection for the reason that the Nawab gave India the go-by when the last Test team was organised. Certainly, the choice is not popular in the popular sense.

A new hostel for the Y.M.C.A. has been opened this week through the generosity of Sir Dossabhai Bhiwandiwala who gave a lakh and a quarter of rupees. Why this Association should, even after this gift, introduce commercial principles of profiteering passes one's comprehension. Perhaps, Sir Frank Noyce will look into the matter.

(From Our Correspondent)

Bombay, Nov. 6.

After the recent unhappy experience, not the first, Stock Exchange reform is one of Bombay's major business problems. The case for reform has received a fillip which, the Stock Exchange is hoping, will lead to a cleaning up. Mr. K. R. P. Shroff, the President, has explained in the Press the real position, answering critics who would place the odium of over-trading on the Exchange management. Margins are introduced to protect brokers from possible default on the part of a client and the most substantial margins cannot prevent crises. The Atlay Commission pointed out that "it was open to any broker to decline to do business for a client without a margin." The system of margins discourages over-trading ; but, as Mr. Shroff says, it is impossible for the Association to make it compulsory on all business, because it is a question of credit. Brokers have to guarantee the fulfilment of contracts, but this guarantee is only of value if the broker is rich. Actually, in spite of violent fluctuations, brokers, with the exception of a microscopic minority, meet their obligations. There are, of course, malpractices which no Association can wholly obliterate. Such of these malpractices as exist in Bombay can be obliterated only by Government action. With that object, the Association has proposed, for the safety of the public, a rule under which, if it is apparent a member cannot meet his obligations or is financially weak, he shall not be permitted to do business except on a cash basis. Defaulters, on re-admittance, are prohibited from doing forward business for a period fixed by the Committee. The Atlay Committee found that the face value of most of the quoted shares was too high and it would be desirable to reduce it to smaller denominations, say of Rs. 50 or Rs. 100 instead of Rs. 500 or Rs. 1,000. This would, in their opinion, minimise gambling. These reforms cannot be carried out without Government sanction.

* * *

The absence of stabilisation relating to wages has hitherto hampered the complete consideration of the labour problem. So far as Bombay is concerned, this lacuna in industrial investigation will cease to exist in a few weeks, when the first of the reports arising out of the wage census undertaken by the Labour Office will be published. The undertaking is unique. No country has attempted to collect wage statistics for every workman in every factory in the country. That is what the Bombay Government have undertaken and the first fruits of their labour will soon be given out. In most countries, where wage statistics are collected, they are based upon rates of wages and hours of work fixed by trade agreements and the awards of trade boards. Information of this kind is not available in India ; while the other method, sometimes adopted, of covering a specified number of factories and workers in each industry, was not regarded as a possibility in the Bombay Presidency. The first report to be issued deals with the engineering industry in its widest sense. Not only are all engineering concerns and workshops covered ; but into this report has been brought all those workers engaged on engineering work in non-engineering factories, such as mills. The total number of workers concerned is over 75,000, of whom over 48,000 are in purely engineering establishments.

* * *

Bombay's concern is to be partly relieved at the idea of having a modern cancer hospital. The Trustees of the Sir Dorabji Tata Trust have announced the plans for the erection of such a hospital in the Parel Hospital area. The hospital is expected to begin work some time in 1937. For a period of years the Trustees have been studying the need for such an institution in Bombay and have consulted experts in England, America and the Continent regarding the preliminary plans. For the last two months an American expert has been surveying the Bombay situation, and his findings have now been accepted by the Trust as a method of procedure. The plans call for the erection of a modern hospital and the use of the latest methods employed in cancer treatment. While radium will of necessity play an important part in the treatment, the new hospital will not simply be a radium institute. Surgery, X-Ray and all other known methods of effective treatment will be employed. The hospital will be an independent institution, specialising in the attack upon cancer and allied diseases. Provision is being made for the treatment of both free and paying patients. An out-patients department will also be maintained.

* * *

At the annual general meeting of the Buyers and Shippers' Chamber, Mr. H. N. E. Dinshaw, the President, stressed the need of a Sind-Bombay broad gauge railway. Sind, Mr. Dinshaw declared, was short of roads. He urged the adoption of a co-ordinated programme for the construction of roads in districts not served by railways which could serve as routes for the transport of the produce of zemindaris. Another pressing need was the construction of feeder lines and simultaneously the construction of the proposed Sind-Bombay broad gauge railway. The latter scheme had been pending before the Railway Board for over 25 years. A report of the survey traffic officer in regard to the scheme had been submitted, but that was as far as the matter had progressed.

* * *

The revelations of "repellant Bombay" in a note issued by Mr. Nariman, the Mayor, has shocked the civic sense of the city. "F" and "G" wards figure repellantly in the note. Unlicensed milch cattle stables, in the midst of a congested area, breed unrestrained mass insanitation : all kinds of unhealthy and disgusting practices are carried on unchecked, because these establishments, being unauthorised and unlicensed, are immune from Municipal inspection. The Mayor visited about a dozen places, all of which were veritable plague spots. The danger to public health, not only from insanitary environments, but from what cannot be other than poisonous milk, is so grave that preventive measures must soon be taken, now that the menace is located. A large number of poor people reside in the adjacent areas in ill-ventilated filthy tin sheds which are as insanitary as the cattle stables. "All these structures" states the Mayor's note "admittedly are unauthorised, erected without permission by violating almost each and every requirement of the building rules and bye-laws of the Municipality." The Mayor says that drastic action is necessary : the Municipal Act amply empowers the Corporation to protect citizens from an insanitary danger. The public feeling is one of amazement that these plague spots should have allowed to exist so long.

SOUTH INDIA

(From Our Correspondent)

Madras, 4th November, 1935.

Local Governments seek to relieve the dreadful monotony of day-to-day administration by formulating proposals to amend existing Acts. This, undoubtedly, provides the escape from boredom which those strange offsprings of the Montford Scheme, our ministers, so frantically desire. But the question as to how far the proposals improve existing statutes or confer any additional benefit on those who come under the jurisdiction of the Acts which are sought to be amended is one that even fails to be posed in that form. An instance in point is the Madras City Municipal Act. The Act is in the process of transformation. A Select Committee of the Madras Legislative Council sat in judgment over the Act and has published a list of its proposed amendments. Among the more interesting of the amendments proposed is one for metering the houses of the city in respect of the Water Supply. The scheme will cost the Corporation of Madras approximately Rs. 40 lakhs. If the proposal goes through, the Corporation will have to issue a loan. This will, of course, provide the hungry capital market with execellent food. But what about the return on the outlay? There are some who would even urge with singular ignorance of the fallacy of misplaced correctness that it is wrong to look for return on capital schemes of public bodies.

As for the scheme itself, any thoughtful corporation will pause before thinking of regulating her water supply at the ridiculously high cost of Rs. 40 lakhs. The absurdity of the idea will become apparent when one realises that the Corporation has more pressing and important schemes to consider, like the housing scheme and the road programme—which affect the citizens more vitally, and the former of which is decidedly more remunerative. The demands on the resources of the Corporation are numerous, with its present loan commitments, interest burden and amortization programme. Any further capital scheme will have to be launched on, with due regard to the benefit which it confers on the tax-payer, the degree to which its unremunerative nature is compensated by the amenities which the scheme may provide and without in any way seriously dislocating existing financial arrangements, or impairing the high credit which the Corporation enjoys in the money market to-day.

It is obviously unnecessary to incorporate in the City Municipal Act any provision for metering the water supply. The provisions of the existing Act enable the commissioner to meter away the City's water supply if the City Council so decides. Our City fathers must wake up in time and see that Government do not thrust an extravagant metering scheme down their throats. Let us hope good sense will prevail ultimately.

On 29th October was inaugurated a regular air mail service between Bombay and Trivandrum. The first batch of air mail letters was conveyed by the Tata plane which arrived at 4-40 p.m. on the 29th October at the Trivandrum Aerodrome. The mail included messages to the Maharajah from the Viceroy, the Governor of Bombay and Sir Frank Noyce. Mails from Trivandrum to Bombay are now conveyed *via* Madras and take as many as 6 days and the air mail promises to save five-sixths of this time. The air mail is, therefore, likely to be very well utilized both for passenger and for postal traffic. In fact, with Bombay 5 days nearer, and with so much commercial intercourse between Travancore and Bommay, the popularity of the air mail is assured. It is bound to play a very significant part in augmenting business between Tricandrum and the Western City, which have been brought within 12 hours of each other.

Madras is to have a new Mayor. Kumararaja M.A., Muthia Chettiar has just discarded the mayorial mantle, which adorned his shoulders for more than one term. The outgoing Mayor has been treated to the usual number of social functions. His sauvity, tact and urbanity have been praised. The city is to have a Moslem Mayor this year, in accordance with the provisions of the Convention. The Moslem group in the City Cuncil is only 6 strong and two candidates have been nominated, Mr. Abdul Hameed Khan and Mr. Basheer Ahmed Sayeed. Since two candidates have been nominated, there has to be an election. This means bang goes the convention. The convention is an often-pricked bubble and is flouted as often as personal ambitions conflict with communalism. The idea of the convention is just to avoid an election and develop sound healthy traditions for the mayorial *gadi*. By the time this appears in print our Corporation would have chosen between Mr. Hameed Khan and Mr. Basheer Ahmed. In any case, the city will have a Moslem Mayor as from the 6th instant.

* * *

Coffee, the favourite beverage of South India seems after all to be coming into its own. An interesting note has been placed by Mr. C. Ranganath Rao Sahib, who distinguished himself as the efficient Trade Commissioner fcr Mysore in London, before the Mysore Coffee Growers' Association. Mr. Ranganatha Rao Sahib speaks with inside knowledge of the Coffee trade, having been Chairman of the London Committee, which instituted a drink-more-coffee campaign in Great Britain. It is agreed on all hands that Mysore coffee is unrivalled in quality and has the best flavour. The only formidable competitor to Mysore coffee in England is Costa Rica coffee. But Mysore has over Costa Rica the advantage of a preferential duty. The Rao Sahib thinks the scope for improving the British market for Mysore coffee is immense. He has drawn the attention of the Association to the following suggestions made by the London Committee in October 1934.

> (1) The creation of a producers' organisation representing the interests of all coffee producers in Southern India.
>
> (2) The allotment of a substaintial portion of the receipts from the coffee cess to be levied in the near future for carrying out a publicity campaign in England and on the Continent, on behalf of South Indian coffee.
>
> (3) The formation of an Associate Company with a view to obtaining short-term finance for coffee on terms more favourable than could be obtained in India.

As Indian coffee interests felt that their present methods of financing the trade were working satisfactorily and should not for that reason be interfered with, the last of these suggestions was not pressed by the London Committee. The Committee thereupon decided to concentrate on the publicity campaign. The Rao Sahib proceeds to reproduce the following authoritative Mincing Lane opinion :

> "In making suggestions for increasing sales of Mysore coffee in this country, we cannot stress too much the importance of maintaining a high standard of quality in the raw, roast and cup. The roast, specially, has of recent years been the chief cause of many a parcel of otherwise good coffee being rejected. The Home trade attach great importance to an even-roast as very often Mysore coffee is blended with other fine sorts of coffee sold in the whole berry. The only suggestion we can make as regards this defect is that it might be improved with more careful picking".

OVERSEAS' NEWS: By Air Mail

Week ended Oct. 26

GREAT BRITAIN

FROZEN DEBT RISKS

Government have decided on an important measure which is designed to reinforce the existing cover for insolvency risks by protecting traders from frozen debts through tranfer difficulties. The Export Credits Guarantee Department has undertaken to ensure the receipt of 75 per cent. of the amount involved, within six months of the maturity of debt. The scheme will be self-supporting, involves no Government subsidy and does not cover currency fluctuations. The Department will in future reinforce the cover given in respect of insolvent overseas debtors by the provision of generous protection. As the latter risk is predominant under existing conditions, the importance of the plan needs no stressing, but support is naturally dependent upon certain conditions. Transfer cover will not be available for individual transactions, but only to exporters who insure the whole solvency of overseas buyers under the Department's Comprehensive Guarantee. Exporters, who invoice in foreign currencies, must cover such exchange risks by the normal process of forward currency operations. Frozen debts, arising from past trading, will not be covered, and long-period credits do not fall within the scheme, which is primarily intended to apply to a normal credit basis of not more than 90 days.

These transfer facilities will be developed, like other facilities afforded by the Department, on a self-supporting basis. The Department will watch every market and will not encourage the export of United Kingdom goods to any market beyond the point at which the importing country can reasonably be expected to provide sterling to pay for them. The Department may at any time decline to provide further transfer cover on any country beyond its existing commitments and may at any time vary the rates and conditions of new cover on any country. The risk cannot be covered more than a short-time ahead. These facilities will, therefore, normally be available only for goods sold for cash or short credit (as a rule up to 90 days) according to established market custom. Transactions in machinery, for which credits of twelve months or more may be justified, involve separate considerations and each of them will be considered by the Department on its individual merits. It is no part of the Department's functions to give information or advice about the exchange position in any country; nor can it in any circumstances make any statement about the exchange position in any country, or about the extent of its transfer commitments on any country.

The new scheme follows the successful operation of similar provisions over many months in respect of Anglo-German trade. The principle of insuring transfer risks was established last December, when this experiment was announced by the Government. In this case, special trade and exchange factors were operative, but it was then clearly understood that application on a much wider basis would follow successful operation. Not more than a dozen countries will be outside the scheme. It will apply to the whole of the Empire, to France, Germany, Switzerland, Holland, Scandinavian countries, and the whole of South America, except Brazil and possibly Uruguay. Roumania is among the countries to which the scheme will not apply.

Mr. Lloyd George continues to flog his "New Deal" horse into a trot rather than a gallop. A Prosperity Loan of possibly £240,000,000 for the development of public works, the reorganisation of industry and the restoration of agriculture form part of the scheme advocated by the Council of Action—an organisation promoted by him. On the basis of current interest rates and assuming amortisation in sixty years, the annual charge of such a loan is estimated at nine million pounds. The programme embraces: conversion of the Bank of England from a "self-perpetuating oligarchy" into a public institution, and regulation of joint stock banks, including dividend payments—but not nationalisation. The Governor and the Deputy-Governor of the Central Bank—elected by Government consent—would be advised and assisted by an Advisory Council or Board representing the interests of industry, commerce, labour and finance.

Other plans include: A central planning Board for the national distribution of housing and industry; division of the country into regions, each with a regional planning commission; drastic reconstruction of docks and harbours; nationalisation of mining royalties; and State assistance for agricultural schemes. "The first aim of British policy" says the Council, "should be to use every influence to restore freedom for the movement of goods over as wide an area as possible. The principle of reciprocity—which is the lever by which this may be achieved—must apply equally to the whole countries of the Empire and to foreign countries. Our ultimate aim should be to reconstruct an international currency system which will give substantial day-to-day stability of the exchanges, but leave the way open for such changes as are necessary to prevent the necessity of restrictive credit polices. For the present, our aim should be to co-ordinate currency policy with the countries of the sterling area and to extend the region of comparative stability to other countries as soon as they have resolved their own internal conflicts of policy".

Air Mail Week

A statement, issued by the Administrative Committee appointed under the Chairmanship of Sir Vernon Thompson to facilitate the working of the British Shipping (Assistance) Act, states that the tramp shipping subsidy of £2,000,000 to meet the competition of foreign subsidised merchant fleets has saved this branch of British shipping from collapsing. It has prevented, during the first six months of its operation, the abnormal transference of large blocks of British crews. It has morever restored confidence by enabling the industry to organise itself ; to minimise domestic competition ; to establish co-operation through minimum freight schemes between different sections and individual owners, both nationally and internationally ; to arrest the fall in freights by stabilising them in the principal tramp markets at a level covering the cost of operation and mitigating the subsidy being dissipated.

The Election campaign has opened, so to say, in an atmosphere of suspended political animation. The European situation is the dominating influence. The sense of national unity which was so keen a fortnight ago has been dulled by the usual spate of Party politics, both Conservative and Labour. The Opposition is, of course, levelling the charge of holding a snap election. Sir Herbert Samuel has accused Government of exploiting the sincere public spirit which supported its present policy in defence of the League of Nations. And if the political barometer is registering correctly —a bold assumption—the week's Election speeches indicate that the main issue will be the Opposition's charge that Government is insincere in its support of the League and in favour of unilateral re-armament. With the war mentality spurred by Signor Mussolini's challenge to civilsation, it is far from certain that the polls will not endorse unilateral re-armament, if that is really at the back of Government's mind.

U. S. A.

BUSINESS GROWTH

Although trade has not justified the exuberant optimism of the summer, there is no doubt that the trend is definitely upward. Compared with last year, autumn trade and production have made a good showing. Trade indexes mark out the present year for its maintenance of a volume of trade and production at a level, touching the peaks in 1934. Farm income is estimated at about 10 per cent. above 1934, and, in contrast to a year ago, is well distributed. Cattle and hog prices are high, because few cattle and hogs are available for market. Wheat of milling grade is rather scarce, as a good deal of the crop is of low grade, which will fall short of home consumption by 25 to 50 million bushels. The cotton crop is larger than last year's, with prices slightly lower. Urban industrial employment is probably the same as last year, though the estimates of the American Federation of Labour give a lower figure, against which is a compensatory increase in hitherto sterile fields. There is no doubt that the dollar income of employed urban labour is a little higher than last year. Relief payments have not changed to the point of affecting general conditions. The fundamental position may be stated to be that farm income is higher, both in money and purchasing power, and that urban industrial income is higher in money, but not much higher in purchasing power. The aggregate of individual incomes is higher by not more than 10 per cent.

The cardinal element in this country's economy is a remarkably high demand for consumer's goods, with a very little demand for producer's goods. As far as the miscellaneous industry is concerned, only recently have there been indications that existing facilities of production were not entirely adequate. In general, industry possesses both cash and credit, but as yet its demand for producers' goods has been restricted to minor ranges. While in 1934 the country passed from a distinctly consumers' goods economy to durable or semi-durable goods economy, in this year it is still a limited economy. The continual climb in primary commodity prices is in contrast to the steady rythm of trade and industry. These prices have risen almost 24 per cent. in the last twelve months. Since the end of 1933, Moody's index has risen 40 per cent. against 15 per cent. of the Bureau of Labour Statistics index, the latter being insensitive and the former sensitive. The current relation between the two is about what it was in 1930 and 1913.

The Supreme Court has been convened and processing taxes will be among the earliest suits. Payment on these have nearly ceased on injunctions. The legal status of the processing taxes is complicated. Under the original Act, these taxes were not levied by Congress, but by the Secretary of Agriculture. Under the liberal discretionary powers delegated to the executive department in the legislation of 1933—a delegation of dubious constitutionality—the legal status was changed in the last session of the Congress ; and the taxes are now levied by the direct authority of Congress, involving the conundrum that the original tax might have been

unconstitutional and the direct tax constitutional, so far as authority is concerned. The decision of the Supreme Court will, one way or the other, react materially on the complex recovery campaign.

The mechanism of the American silver purchase programme is not functioning any too smoothly. Section 2 of the "Silver Purchase Act of 1934" says: "it is hereby declared to be the policy of the United States that the proporion of silver to gold in the monetary stocks of the Unied States should be increased, with the ultimate objective of having and maintaining one-fourth of the monetary value of such stocks in silver". Section 3 of the same Act says: "whenever and so long as the proportion of silver in the stocks of gold and silver of the United States is less than one-fourth of the monetary value of such stocks, the Secretary of the Treasury is authorised and directed to purchase silver at home or abroad—with any funds in the Treasury not otherwise appropriated, at such times and upon such terms and conditions as he may deem reasonable and most advantageous to the public interest."

When this law was approved by the Congress on June 19, 1934, it was estimated that the American Treasury would have to purchase between 1.3 and 1.6 milliard ounces of silver. By June 28, 1935, the Treasury had purchased some 39,000,000 ounces of newly-mined silver, exactly 108,891,449 ounces of nationalised silver, and almost 300,000,000 ounces of silver from abroad. After that date very heavy purchases were made, but the exact figures are not available. A recent estimate says that the amount of silver still to be bought by the Treasury must be something like 1.1 milliard ounces. It is the policy of the United States that the relation of silver to gold shall be 1 to 3; so that the purchase of gold must change the quantity of silver to be bought. Such changes are daily taking place. From the beginning of July, 1934, to the end of September, 1935, the United States imported roughly five times as much gold as silver. According to section 10 of the Act, "The term 'stocks of gold' means that the total amount of gold at the time, owned by the United States, whether or not held as a reserve or as security for any outstanding currency of the United States". The great influx of gold into the States during the last fifteen months is composed partly of foreign funds and partly of direct purchases. The bulk of the imports since the coming into force of the Silver Purchase Act is gold in terms of the Act. The monetary gold stock has risen by 1,728 milliard dollars between January 1, 1934, and October 17, 1935. In order to maintain the ratio of 1 to 3 the Treasury had to buy three times as much silver as gold, which is remarkable in that silver imports for the above-named period amounted only to about one-fifth of the gold imports. It cannot therefore be said that the slightest progress towards the establishment of the 1 to 3 ratio has been made. Actually, the value of American gold stocks in relation to silver must now be much higher than it was when the Silver Purchase Act came into force. The basis of the Act (the 1.3 ratio) has been undermined by the recent monetary developments, notably since the States are "the safe harbour" for frightened European capital.

CERMANY

GERMANY, ITALY & GENEVA

The German economic situation, at the present time, presents an apparent anamoly inasmuch as the chief characteristic is the existence of an export surplus on the one hand and an excessive shortage of food-stuffs and raw materials on the other. The authorities have, of course, realised the serious extent of food shortage; still Dr. Goebbles would like the housewives only to tighten up their belts. The consumption of non-ferrous metals has been further restricted with a consequent deterioration in the quality of the corresponding periods. Yet the surplus devisen would not be utilised for procuring more raw materials. Instead of importing, Germany has slightly increased her gold and foreign exchange reserves, and the surplus has been utilised for the reduction of her foreign debts. A cursory glance at the position of the Standstill Agreement will show how far Germany has been able to liquidate her indebtedness.

On July 31, 1935, the outstanding total under the Agreement had declined to Rm 1,960 millions in February 28, 1935, and Rm 2,530 millions in February 1934 and Rm 6,300 millions at the start of the first agreement in July 1931.

The availed of credit lines have also been reduced during the first six months of the current year, from Rm 1,734 millions to Rm 1,517 millions. The following table shows how the chief creditors stand:—

It is expected that the total credit lines would be reduced to approximately Rm. 1,500 millions by the end of the current standstill year. It is, thus, evident that the Standstill Agreement has been working very satisfactorily during the current year, and the postponement of the meeting of the Consultative Standstill Committee from July 30 to November 5, 1935, is also due to this smooth functioning of the Agreement. The meeting has again been deferred until about the end of December or early in January, there being no material for discussion. As the only function of this postponed meeting of the Standstill Committee, will be to prolong the life of the Agreement by about a year or so after March, 1936, when it expires, it is probable that it may meet just before the date of expiry.

An analysis of the trade figures of Germany for the month of September, 1935, reveal that German exports to Italy have continued to increase. There has also been a decline in imports from that country, which, probably, is to be attributed to the war preparations, taken by Italy. Even in recent months, Germany's favourable balance of trade against Italy has increased enormously resulting in an accumulation of a surplus of about 20 million lire in the German-Italian clearing. Leaving alone the spurt in export trade, which is more pronounced during the last 4 or 5 months, Germany has usually enjoyed a favourable trade of exports and imports.

(In millions of Reichsmarks)

	Imports	Exports	Surplus
First six months, 1935 ...	94	124	30
First six month, 1934 ...	82	119	37
Year 1934 ...	185	246	61
Year 1933 ...	166	227	61
Year 1932 ...	181	223	42

The position of Italy will now become much worse than it appears to be, for the German Tourist traffic will be greatly reduced, thus taking a big slice away in the Italian balance of payments against Germany. Among the principal items of German export to Italy, one is coal, which represents 25 per cent. of Germany's shipments. Recently, about one million metric tons of coal were contracted with Italy against cash payment, and further contracts are being negotiated on the basis of 50 per cent. in blocked marks. In September, exports of pit-coal to Italy advanced to 613,037 metric tons from 193,342 tons a year ago, making a total, for the first nine months of 1935, of 4,976,392 tons as against 3,429,145 tons in the corresponding period in 1934. Exports of coke similarly increased to 90,747 tons in September, from 46,331 tons a year ago, making the total, for the first nine months, of 340,053 tons, as against 269,750 tons. Along with coal and coke, chemicals like coal-tar dyes, aniline, metal colours, varnishes etc. figure prominently in the list of German exports to Italy. Exports of mineral lubricants in September totalled 340 tons, against 109 tons a year ago, and a total of 2,819 tons, as against 833 tons, for the first nine months of 1935 and 1934 respectively. Shipments of pig-iron also showed an increase: from 678 tons in September 1934 to 2,767 tons in September 1935, is a good jump: for the nine months of 1935 and 1934, the total is 8,528 tons and 4,325 tons respectively. Exports of motor trucks declined from 73 in August to 25 in September, but for the nine months they aggregated to 400, compared with only 14 during the corresponding period a year ago. Conersely, prominent in the list of imported materials, are foodstuffs which account for about 40 per cent. of the total, and silk, about 10 per cent. of the total imports. Purchases of hemp and jute are also disclosed, though not on a large scale.

Thus detailed figures, regarding the trade of Germany with Italy, acquire a special significance, since the question of the application of sanctions against Italy has come to be fact in Geneva circles. Among others, the success of the sanctions will, to a great extent, if not solely, depend on the attitude of the "non-sanctionist" countries, among which is Germany, in line with the U. S. A. and Japan. Politically, Germany has publicly announced her neutrality in all international affairs: but there is considerable mistrust, in Germany, of Britain's League policy in the Abyssinian dispute because of the indirect way in which it affects Germany. The League is a dead organism as far as the Nazi State is concerned, and any attempt to galvanise it with activity is therefore not only not welcome to Germany, but also savouring of sinister motives. Britain's action in supporting sanctions, is regarded as self-interested, dictated not by League interests or self-sacrifice for the collective system, but in defence of Britain's own interests. Similar is the case of France, which has had to make a definite decision of choosing between Italy and England and in abandoning Italy, has abandoned the "security scheme built on cards." Germany's views about sanctions, are still muffled. Perahps she does not like them. At present Germany intends to trade with Italy as a neutral country and as a non-member of the League. Apart from political considerations, internal conditions in Germany would welcome any trade trend especially on a cash basis. With Italy willing to pay, and Germany willing to sell, the League decisions are not worth the paper on which they are written; more so, Germany being a non-member.

JUTE AND JUTE GOODS

JUTE

Calcutta, November 7, 1935.

The Jute market was very excited on the 4th instant and owing to speculative activity prices were pushed up as high as Rs. 40-7 in the futures market. The reason attributed by the speculators for the sharp rise was the paucity of arrivals in the mofussil. The high price level, however, could not be maintained on the following days and the market reacted sharply on November 5 by more than two rupees. At the time of writing the market is easier at Rs. 38-1-0. The reaction is mainly due to profit-taking and owing to reports of bigger arrivals in upcountry centres.

Mills are reported to have purchased large quantities on the basis of Rs. 6-2-0. At present mills are out of the market. Foreign demand has been negligible during the week.

Arrivals in the mofussil are steadily increasing, but compared with the corresponding period last year the arrivals are less by 20 per cent. So long as arrivals do not show substantial increase, the prices are not likely to go down to any appreciable extent. Prices in all mofussil centres are above Calcutta parity.

In the loose jute section the market has been firm during the earlier part of the week, but towards the close an easier tendency was in evidence with sellers showing rather more disposition for business. Business amounting to somewhere about 8 lakhs of maunds are reported in Indian Jat 4's on the basis of Rs. 6 to Rs. 6-2 and a small quantity of European at Rs. 6-6.

The Pucca Bales section has been very strong in sympathy with a firm loose jute market. Business reported has been small. Shippers are reported to have purchased Firsts for December shipment at Rs. 38-4 per bale. Towards the close the market reacted owing to weakness in the *Futka* and loose jute markets, Ready Firsts quoting Rs. 37-6.

The *Futka* market was very excited on Monday owing to speculative buying. Activity became rampant and prices were pushed up to Rs. 40-7. The high level could not be maintained as the rise was attributed to over-enthusiasm of the speculators, and the market witnessed a sharp reaction on the following days. At the time of writing the market has declined to Rs. 38-1-0 owing to selling of a profit-taking nature.

JUTE MANUFACTURES

Calcutta, November 7, 1935.

The scarcity of Ready goods continues to exercise its influence over the hessian market. The premium for ready goods at present is about 12 annas which is said to be unprecedented in recent years.

Demand has been very small. Business has been slow throughout the week and the few orders that came into the market were for Ready goods. 40 in 7½ oz. sold at Rs. 9-2 basis and 40 in 8 oz. at Rs. 9, both for November shipment. 11 Porters sold at Rs. 11-1.

The stocks of hessian and sacking at the end of October show a reduction of 2.40 crores yards and 3.36 crores respectively. Such low stocks have not been seen for the last ten years and it is believed that it cannot be further reduced at any time in future. On the publication of the figures the market assumed a firm tone, but in the absence of demand an easier tone set in at the close.

Heavy goods have been dull and prices are nominally unchanged. There was no business to report. B. Twills are quoted at Rs. 22-14, Liverpool Twills at Rs. 26-10 and Cornsaks at Rs. 23-10.

The following statement shows the total reported stocks of manufactured goods as at 31st October, 1935, as compared with the two previous months and a year ago :—

At the end of		Hessian Cloth* and Bags. Yds.	Sacking Cloth* and Bags. Yds.
October, 1935	...	4,85,31,647	10,43,57,083

JUTE BREVITIES

Italian Jute Industry Booming.

The jute industry in Italy is now working in full swing on large army orders. The number of workers is said to have been further increased and more spindles and looms set in operation. As regards the question of raw materials it is known that jute spinners have accumulated large stocks during the last year in anticipation of import restrictions. Present stocks will permit full working of the mills up to the end of this year, before shortage of supplies will be felt. Another factor in favour of the jute industry is the high price for hemp owing to a smaller crop and inferior quality.

Reduction of Working Hours in Germany.

The strict currency control by the Nazi Government has further restricted all business in jute yarns, cloth and new sacks. All jute mills are back again to the 36 hours week. On this basis the industry has orders in hand to last them until the end of this year. The result of this policy of the Government is that most of the consumers are turning their attention to the use of old sacks instead of new.

Import Quotas Prolonged in Holland.

The quota of restrictions on the importation of new jute sacks, goods and cloth have been prolonged for a further period from 1st October, 1935 to 31st March, 1936. The quota has been established on the basis of 50% of the average imports during six months in the years 1931, 1932 and 1933. However, the power has been granted to the Minister of Economic Affairs to establish special quotas.

A Jute Committee for Spain.

The ministry of Trade and Industry in Spain has decided to establish jute committee for the purpose of protecting the interests of the jute manufacturing industry in that country. So far, the scope and exact purpose of this Committee have not been announced and are still under consideration.

Paper Bags Replaces Jute Bags for Cocoa.

Paper bags are making further inroads into the jute bags market. Experiments are recently tried in using paper bags in the cocoa industry instead of jute bags. Bags made of 5-ply paper are utilised for making shipments of cocoa beans and several consignments are reported to have arrived in London in these bags. The bags are well ventilated and require no stitching, as the mouth of the bag is simply tucked in. Some of the bags are laid aside to ascertain how long the cocoa beans could be kept in them without showing signs of deterioration.

The following statement shows the total reported production of manufactured goods by the mills in the membership of the Association and also by the Adamjee, Agarpara, Gagalbhai and Shree Hanuman Mills, for the month of October 1935.

Description.	Quantity.

COTTON AND COTTON GOODS

COTTON

Calcutta, November 7, 1935.

During the earlier part of the week under review, the Bombay cotton market was steady, but as the session advanced, the market developed an easier tendency. Price fluctuations on the whole were confined to narrow limits. Trade buying was on a moderate scale and covering by 'shorts' was witnessed every now and then. On the 1st instant, the market improved due to scattered buying on receipt of strong foreign advices, Broach April/May touching Rs. 216-8. Buying by speculative interests was resumed on the following day, but towards the close of the day, prices suffered a sharp set-back on a prominent operator appearing as a seller. A quieter tone prevailed thereafter and Broach April/May closed at the lowest rate of the week, Rs. 213-12. Sentiment in the market continues to shift daily. Vacillation on the part of many dealers and the sudden turnovers resorted to by the operators only emphasise the present uncertainty about the future trend.

Weather in the cotton areas is favourable, except for cloudy skies and occasional showers in the Oomra and Khandesh districts.

The date for applying economic sanctions against Italy has been fixed by the League of Nations on November 18, and the Government of India are to join other nations in applying sanctions. If sanctions become operative from November 18, the export of Indian cotton to Italy would come to an end from that date. But Indian cotton trade will not be affected to any appreciable extent by the sanctions. The exports of raw cotton to Italy during 1924-25 was 485,000 bales ; Italy's takings have been steadily declining since then and in 1933-34 only 261,000 bales were exported to Italy. Moreover, the prohibition on exports of raw cotton to Italy would be followed by a like ban on imports of Italian piecegoods, which would increase the off-take of cotton either by Indian mills or foreign manufacturers, thus compensating the probable loss of our exports.

Price movements in the New York market were confined within narrow limits. Hedge selling characterized the market, but any sharp fall in prices was averted by substantial support by trade interests. The market at present is totally devoid of anv speculative activity owing to uncertainty regarding the Supreme Court's decision on the Processing Taxes. The latest advices indicate that the Supreme Court will be hearing one of the numerous Processing Tax cases on December 9, and that a decision on the constitutionality of the A. A. A. might not be arrived at before January, 1936.

The official crop estimate is due to be published on November 8. Fossick Bureau estimate indicate a total crop of 11,233,000 bales.

The prediction of a cold wave in the Western Belt pushed up prices on October 31, December spurting up to 11.04 and spot to 11.40; but later on prices dropped to the normal levels when the cold wave failed to materialise. The market closed easier and uncertain, Middling spot quoting 11.35, December 10.96 and March 10.78.

The most notable feature in the Liverpool market is the advance in the Egyptian Sakel, which touched 9.35 for spot and 8.51 for March. The advance was mainly due to reported Italian buying of actual in Alexandria before the application of sanctions. This remarkable strength in the Egyptian section imparted steadiness to other sections also. Continued hedge selling was witnessed, but regular trade buying absorbed all sales. Middling spot closed at 6.40, December at 6.10 and March at 6.09.

In their following estimate, showing the world production of commericial cotton during 1935-36 as compared with the two previous seasons, the New York Cotton Exchange Service states that the world production during 1935-36 about equals world consumption last season.

In 000's of Bales.

Foreign	...	13,173	13,029	13,984
Total	...	25,885	22,605	25,362

Exports of Indian raw cotton to Japan during the season 1934-35 amounted to 1,612,240 bales, an increase of 78,909 bales over the previous season. The Japanese purchases amounted to 52 per cent. of the entire export during 1934-35. Exports to Europe, including the United Kingdom, amounted to 1,239,840 bales, an increase of 21,000 bales over the previous season.

PIECEGOODS

Calcutta, November 7, 1935.

The improvement recorded in the previous week was not maintained in the local piecegoods market during the week under review. The quieter political situaion in Europe has diminished speculative enterprice. The uncertain tone in the raw material market and the poor support from the main distributing centres were other contributory factors to the quietness in the market. Besides, cheap sales of Japanese production depressed prices in other sections also.

The major portion of the bulk orders were secured by Indian mills. Both Bombay and Ahmedabad mills are reported to have sold substantial quantities of grey *dhooties*. A fair amount of grey shirtings and grey drills were done for January/March delivery. Bleached mulls and nainsooks also sold well.

Demand for Japanese goods has been practically confined to ready goods. It must be remembered that large stocks of Japanese goods had accumulated a month back, which dealers found difficult to dispose off owing to the then prevailing low rates. During the last three weeks prices have gone up and dealers are taking their opportunity to dispose of their stocks at current rates. The consequent large selling orders have depressed prices. The week's turnover included grey shirtings, grey dhooies, white nainsooks and white shirtings and a few fancy lines.

Trade in Lancashire goods has fallen and only small sales are reported. Attention has been chiefly centred on the better grade qualities of dhooties, white mulls and fancy styles in which a few sales have been reported.

In Bombay, there has been a lull in the market. Dealers in consuming districts have purchased large quantities during the last two weeks and they are awaiting to sell some of their stocks before entering into further commitments. Clearances have been very fair and prices continue to rule steady. The *moorat* sales covering a period of about a fortnight are said to have totalled up to nearly 1,10,000 packages. Fresh trade in British goods has been on a moderate scale. In Japanese goods, prices ruled steady. Divali sales have been on a large scale, but not up to the expectations.

BULLION

GOLD

Calcutta, November, 7.

The gold market in Bombay ruled quiet but steady during the past week. In the absence of any important operations the market was devoid of any activity. The appreciation in Sterling values in terms of the Franc and Dollar caused a slightly easier tendency. Price movements were almost absent. Ready, first settlement and second settlement, were quoted towards the close at Rs. 34-14-6. The highest rate touched during the week was Rs. 35.

Stocks on hand aggregated 75,000 tolas. Arrivals average about 10,000 tolas a day while the daily off-take remains unchanged at 3,000 tolas. Imports during last week amounted to Rs. 1,23,533 in bar and coin.

The price of gold in London moved irregularly. Touching £7-1-7 on 1st instant, the price declined to £7-1-5½ on the following day, again receding by another 2d. The closing rate was £7-1-4½.

The Sterling-Dollar rate improved to 4.92⅜, closing at 4.91 1/16. The Sterling-Franc rate, after improving to 74.72, closed at 74.66.

Bar gold valued at Rs. 73,35,668 was exported to foreign countries from Bombay by s.s. *Chitral* during the week ended Saturday November 2. The total value of gold exported from Bombay since Great Britain went off the gold standard up-to-date amounts to Rs. 250,70,94,219.

The exports of gold from U.K. during the week ended October 25, 1935, amounted to £4,400,000 of which £4,156,000 was shipped to U.S.A., £71,000 to France and £87,000 to the Netherlands. The imports of the metal into U.K. during the same week amounted to £2,582,000, of which £1,338,000 was shipped from America £555,000 from India and £559,000 from Australia.

Russia's gold output last year was more than that of the United States and Canada and by 1940 it would reach 80 million sterling annually, according to an official review. Numerous new strata are stated to have been recently discovered in the Caucasus, Kazaksatan and the Arctic.

London—Air Mail week ended October 23.

The Bank of England gold reserve against notes amount to £193,673,266 on the 16th October showing no change as compared with the previous Wednesday.

During the week the Bank announced the purchase of £650,636 in bar gold.

In the open market the amount disposed of at the daily fixing during the week under review was about £1,800,000, most of which was taken for the United States of America.

There have been further large shipments from this country and France to New York and, according to an announcement made in New York on October, 21st, the total amount of gold engaged for shipment to the United States of America since September 9th last amounted to $415,200,000. This would seem to permit of an additional purchase, under the Silver Purchase Act of 1934, of silver to the extent of $103,800,000 representing about 158,000,000 ounces at current rates.

The following were the United Kingdom Imports and Exports of Gold registered from mid-day on the 14th October to mid-day on the 21st October :—

Imports	£
British South Africa	1,563,311
Tanganyika Territory	16,134
British India	555,500
Australia	176,176
New Zealand	39,459

SILVER

Calcutta, November, 7.

The silver market registered a sharp rise of over a Rupee on Monday last (November 4). The statement made by two Senators in America that Government would continue their silver purchasing programme and that prices would rise up to 1.29 dollars per ounce and the announcement of the Chinese Government to issue notes and conserve the currency reserves of the country, infused enthusiasm amongst operators in the market. Considerable activity was witnessed and prices spurted up on buying of a general character. Ready touched Rs. 67-3-0 first settlement Rs. 67-4-0 and second settlement Rs. 67-8-0. On the following days the market eased off due to profit-taking and following a fall of 3/16d. in London. The market closed weak, Ready quoting Rs. 65-12, first settlement Rs. 65-14 and second settlement Rs. 66-2.

Arrivals are negligible and stocks are unchanged at 35,000 bars. The offtake is not more than 10 bars a day. Total imports during last week amounted to Rs. 47,447.

The price for spot silver in London was steady at 25 5/16d. Though the price improved to 29½d. on November 4, it again receded to the former level. The forward rate declined to 28⅞d., improved to 29 3/16d., again receding to 28⅞d. America was a regular purchaser in London at ruling rates, while China was the only seller throughout. There was speculative buying also. India was practically out of the market, though she appeared as a small purchaser in midweek.

The rate for spot silver in New York was unchanged at 65⅜c.

The London-Shanghai rate declined further steadily to 1-2 9/16 at the close.

The exports of silver from the United Kingdom during the week ended October 25, 1935 amounted £1,577,000 of which £1,546,000 was shipped to U.S.A. The imports of the metal into U.K. during the same period amounted to £756,000 including £231,000 from Japan and £366,000 from Persia.

London—Air Mail week ended October 23.

The price for cash delivery remained unchanged throughout the week at 29.5/16d., at which price the American Government acquired large amounts. This demand for cash, and the fact that the continued offerings on China account have been mostly for forward dates, resulted in the price for two months' silver being quoted at a discount.

The Indian Bazaars and speculators have both bought and sold to a moderate extent.

The market may be affected by movements in the dollar/sterling exchange, but the undertone is steady.

The following were the United Kingdom Imports and Exports of Silver registered from mid-day on the 14th October to mid-day on the 21st October :—

Imports	£

TEA

CALCUTTA AUCTIONS

Calcutta, Nov. 7.

The Offerings at this week's tea sales for export totalled 22,867 packages of which about 17,900 packages sold at Rs. 0-9-4 per lb., as compared with the average price of Rs. 0-8-5 per lb., realized at the corresponding auction last year. A useful selection was on offer and included some invoices from the Dooars with improved quality, while Assams continued to be of a very good standard. Leaf teas and tippy B.O.Ps. met with poor support and prices for these were on a lower level. Buying was more general but prices again eased, particularly for low medium sorts which were 3 pies lower, whilst clean common kinds were also rather easier to buy. Better medium broken grades were in good demand and sold readily at about last rates.

At the auctions for internal consumption, about 17,000 packages were submitted for sale, of which 10,000 were Dusts and the remainder leaf and other grades. All descriptions in dust quality were easier by 3 pies, at which rate large quantities were sold. All descriptions in other grades were in strong request and prices registered fractional rises.

Crop.—To the end of October the outturn was 280¾ millions as compared with 294¾ millions for the same period last season.

The following figures of tea exports taken from the Calcutta Customs daily entries and received periodically from Chittagong are issued by the Indian Tea Association.

Quantity of tea entered for export to United Kingdom for the second half of October, 1935.

Calcutta—Black 15,128,852 lbs. ; Green nil.
Chittagong—Black 4,728,344 lbs. ; Green nil.

Quantity entered during the corresponding period last year.

Calcutta—Black 12,085,783 lbs. ; Green nil.
Chittagong—Black 2,926,585 lbs. ; Green nil.
Total from April 1, 1935 to October 21, 1935.
Calcutta—Black 95,402,257 lbs. ; Green nil.
Chittagong—Black 50,271,387 lbs. ; Green nil.
Total 145,673,644 lbs.
Total from April 1, 1934 to October 31, 1934. 155,136,292 lbs.

The following are the full particulars of Sale No. 21.

LONDON AUCTIONS

The offerings at the London auctions for the week ending November 7, comprise 55,800 packages of Indian 20,800 of Ceylon and 4,600 of Java.

Indian Tea.

At the Indian auctions on November 4, the total offerings amounted to 28,200 packages. Low priced teas were firm but all medium grades were weaker particularly Assam Broken, Orange Pekoes and Orange Fannings. These showed an irregular tendency. Export demand was not as much in evidence as of late.

Ceylon Tea.

At the auctions of Ceylon Tea on November 5, the market was easier and very irregular. Low kinds were about a farthing down, Mediums sold at ½d. lower sometimes. Good and fine grades were very erratic and despite a fall in quality they were distinctly easier.

Java & Other Teas.

At the auctions of Java and other teas (including Sumatra) on October 31, 5,600 packages were submitted for sale. The demand was rather quiet with prices irregular. Tippy teas were mostly steady.

(Continued from page 1429)

What concerns foreign nations most is, of course, the measures which the Chinese Government will take to maintain the exchange value of the dollar. As has been already said, the order cannot make reference to the plans which are now under the consideration of the Government. In the statement which the Chinese Finance Member made, Mr. T. V. Soong, declared that China's silver reserves would provide for more than 100 per cent. cover for bank note circulation in terms of foreign currency. The exact import of this statement is not clear. Even if it is urged that the present gold value of China's silver reserves would provide sufficient cover, it would by no means form an adequate guarantee of the external stability of the Chinese currency. In the conditions which rule in international finance to-day, only large reserves of gold and gold exchange could convey such assurance ; and one is therefore tempted to give credence to the report that on the strength of China's silver resources the Chinese Government have arranged for large amounts of foreign credits. Sir Frederick Leith-Ross, for reasons which are not difficult to guess, has discredited the idea. But it stands to reason that, having sent out an expert adviser, whose recommendations have resulted in measures of practical reform, Britain would not hesitate to provide the necessary credits. If that were so, it is not difficult to understand Mr. Soong's confidence in the Government's ability to maintain practical exchange stability at the present level. The British Government are giving every help to China, as may be seen from the order of the British ambassador prohibiting British subjects from making payments in silver, in whole or in part, in contravention of the Chinese Government's declaration, nationalising silver.

Japan has her grouse in the work of Sir Frederick Leith-Ross in China. But it is most unlikely that Japanese discontent would lead to any hasty abandonment of the present programme of reconstruction. It need hardly be said that however wisely the present plans may have been conceived, financial reform cannot be a success, unless it leads before long to an expansion of the economic activity of the country and a stable equilibrium of its foreign trade. One can only hope that the establishment of order in the internal currency system would lead to the increase of productive activity and that the stabilisation of the exchanges would bring about an expansion of foreign trade. The present Chinese experiment is well worth watching, as from the details so far available, it would seem that China has gone one better than India in that she is attempting to maintain a proper standard with facilities for good exchange.

MISCELLANEOUS

WHEAT

Calcutta, October 31, 1935.
Calcutta, November 7, 1935.

The local wheat market remained steady during the week under review. The want of rain in upper Punjab continues to be responsible to some extent for the regular buying in the districts. The demand for flour continues quite satisfactory. The price for Punjab and Cawnpore Ready was steady at Rs. 3-11-0 at the beginning of the week, but towards the close a slight decline of 6 pies was noticed. May Beta also declined to Rs. 3-9-3 at the close, but the market maintains a steady undertone.

In Bombay, the market remained steady. Buying was on a moderate scale. Prices for Delhi-Cawnpore Ready improved to Rs. 4-15-0 and May to Rs. 4-12-0 on 4th inst. Towards the close, on receipt of weaker foreign advices prices declined, Ready and May closing at Rs. 4-13-3 and Rs. 4-10-9 respectively.

Karachi reports a good Divali *moorat* business. Spot sales last week amounted to 28,000 bags, of which 20,000 bags were bought by the local mills and the balance by Calcutta and Bombay shippers. Arrivals from up-country average about 5,000 bags per day, while the shipments last week totalled 52,837 bags. Stocks are reduced further to 2 lakhs of bag. It is reported that shipments to Calcutta from August to October end, during which period the Conference group of shippers reduced their freight rates to Calcutta to Rs. 4 per ton, amounted to about 3½ lakhs of bags. This reduction was only for three months and from Novemeber 1 the rate again reverted to Rs. 5 per ton. It is understood that the Government of India has deputed Mr. Dow of the Commerce Department to intervene into the disagreement between shippers and steamship companies and bring about an amicable settlement.

Import and export figures of wheat for the three main British Indian ports from 1st April to November 2, as compared with 1934, as given in the *Indian Trade Journal*, are:—

Import.

	(In tons) 1935		(In tons) 1935	
	Indian	Foreign	Indian	Foreign
Calcutta	13,315	...	140,299	2,968
Bombay	99,659	...	100,228	...
Karachi	202,739	34	301,790	...

Export

	1935	193
Calcutta	9	73
Bombay	875	704
Karachi	5,150	8,763

As regards the wheat markets outside India, the market in Chicago was steady during the earlier part of the week, but towards the close prices eased off by about a cent. the rate for December and May at the close were 97 3/8c. and 94¾c. respectively. In London the price of Australian wheat November has further receded by 3d., while the rate for Rosafe parcels Jan.-Feb. closed easy at 26s. 9d. Russian offers are moderate. There is a doubt that substantial quantities of Russian wheat have been sold to Italy during the past few months. This would explain why Russian offers in Liverpool have declined since the beginning of September.

MADRAS MARKETS.

Piecegoods.

Madras, Nov. 5.

The post-Deepavali lull continues, and the market for Piecegoods and Yarns has ruled quiet with no quotable change in prices. Upcountry buyers show no further interest and dealers are collecting their outstandings. No forward business is reported. Piecegoods dealers anticipate a better market in about 10 days with the advent of Ramzan demand.

METALS

The market for Yellow metal and Copper sheets is thoroughly demoralised and the position is unhealthy. With heavy stocks in Madras and poor upcountry demand, prices have sagged and speculators who had bought metal in anticipation of further advance in prices are now anxious sellers. Current local prices stand at Rs. 152 per candy for Yellow metal sheets and Rs. 181 per candy for Copper sheets. Sterling quotations are, however, slightly better than last week's levels around £44-10 per ton for English, £40-10 for Dittmann and £52-17-6 for Copper sheets.

GROUNDNUTS

The Groundnut market has remained dull during the week, and the downward trend in prices has not been checked. London quotations for Coromandel Machined opened on Monday last at £13-17-6 November Sellers and £13-5 December Sellers and advanced to £13-7-6 for December position in mid-week. But towards the end of the week, prices fell back to £13-15 for November position and £13-10 for December. Shippers' buying limits opened at Rs. 32-12 and Rs. 33-4 for Machined and Rs. 27-12 and Rs. 28-4 for Ordinary (Per French Candy of 531 lbs. ex-coast godowns) and advanced slightly to Rs. 34 for Machined and Rs. 29 for Ordinary (Per French Candy, ex-coast godowns) towards the end of the week. To-day, firms' buying limits are easier at Rs. 33-4 and Rs. 33-8 for Machined and Rs. 28-8 for Ordinary (Per French candy, ex-coast godowns). The Pollachi market is steady and the latest quotations are Rs. 30-6 to Rs. 30-8 for Rose quality Machined and Rs. 29-8 to Rs. 29-10 for Red quality Machined (Per French candy, ex-Pollachi godowns). Arrivals have commenced in the Vizagapatam area, and first arrivals of the new crop will begin in the Guntur area in about 10 days. The standing Winter crop in the Ceded districts is reported to be doing well, thanks to the recent copious rains in that area. Other things being equal this crop will be ready for the market early in January.

On the Kernel Freight market, Owners have, during the week, been vainly offering space for London/Dunkirk for early November loading at Madras and down coast ports fith no business resulting. Two Charters are reported the s.s. "Epsilon" for December loading at 29s. 6d. per ton of 20 cwts. Four loading ports to one U.K. or Continental port and for January the s.s. "Vera Radcliffe" at 27s. 6d. per ton of 20 cwts. for Four loading ports to one U.K. or Continental port.

Arrivals of Groundnut kernels into Madras for the week ended November 2, 1935 amounted to 16,362 bags or 1,288 tons against 15,024 bags or 1,182 tons in the preceding week and 5,437 bags or 428 tons at the corresponding week of last year.

HIDES AND SKINS

Air Mail advices report that Buyers are holding back in the face of the numerous offers for Kips from Madras. It is reported that taking advantage of the top prices then ruling in Madras, Curriers and Dressers in the Home market had commanded good prices at the October Fair, and there is at present very little spot stock of Kips in London. But any advance at origin is being resolutely resisted and prices are now only 2d. above the minimum selling prices. The price of Raw stock is, however, in the region of 3½d. to 4d. per lb. or roughly 2d. above the prices obtainable for the tanned article. 8-8½ lb. kips have come down to 11½d. from 13½d. 7-7½ lbs. have dropped from 14d. to 12d. and Prime Lights have declined from 15½d. and 16d. to 13½d. The local Tanned Cow market has ruled steady though the undertone is still in buyers' favour. Supplies and arrivals are moderate and sufficient to meet the demand. Home demand has slackened somewhat, but there has been locally general buying by both European and Native Houses. Tanned Buff hides have been firm with a fair demand though an easier tone prevailed at the close. Arrivals are free and supplies ample for all requirements. Tanned Cow Calf skins continue to be in good request and prices are steady with a fair enquiry from London. Tanned Buff Calf, on the other hand, is a quiet market with prices a shade easier. Home Buyers are not interested in this article at present. The market for both Tanned Goat and Sheep remains steady and business has continued in fair volume with London in original bales. Demand is mostly for Light weights and lower grade goods. The next London auctions for East India Tanned Goat and Sheep skins will commence in Mincing Lane on December 2.

The Raw hide market continues firm. At Cawnpore, Halali Pachan is quoted at Rs. 70 to Rs. 75, Halali Purapp at Rs. 60 to Rs. 65 and Murdali at Rs. 40 to Rs. 45 per 20 pieces. Cawnpore Dry Rejections are quoted at Rs. 20. The new season for Dry goods will begin in about 20 days.

The following quantities of Tanned Hides and skins were shipped from Madras during the week ended November 1, 1935:—To the U.K.: Tanned Cow hides 961 bales, Tanned Buffalo 138 bales, Tanned Buff Calf 10 bales, Tanned Cow Calf 42 bales, Raw Goat skins 14 bales, Tanned Goat 371 bales, and Tanned Sheep 276 bales. To France: 5 bales Tanned Goat. To U.S.A.: 47 bales Tanned Goat skins.

Calcutta, Friday Evening.

Another week of comfort for borrowers and embarrassment for lenders. There is no change to report in the quoted rates either in Bombay or in Calcutta. At ¼ per cent., Hornby Road bankers find it no easy job to allure borrowers to take unwanted funds off their hands. ½ per cent. (lenders) is still the prevalent rate in Clive Street. That the maintenance of the weekly offer of Treasury Bills at the limit of Rs. 2 crores has made no difference to the money market need not, however, be a matter for surprise. Conditions in the market in this regard were examined at length in an earlier issue ; and we need only stress the conclusion that the present offtake in the form of Treasury Bills is fully within the capacity of the market to find without any discomfort. Nor should it be forgotten that from the second week of December, Treasury Bills maturities will release funds to the market in a heady current. It is, of course, possible that sales of intermediate Treasury Bills are resumed just prior to the heavy maturity dates. Be this as it may, there can be no doubt that between the Imperial Bank on the one hand and the rest of the Scheduled Banks on the other, the surplus funds which they will have to find investment for will prove so large and so embarrassing that, merely on Treasury Bills, transactions, no stringency need be apprehended. In fact, banks will like to see such a change in monetary conditions as will enable them to find better use for their surplus money. Surplus money has become an increasingly difficult problem ; and it has been made all the more difficult by the sharp rise that has taken place in the whole range of government securities.

Short-dated scrips like 3 per cent. 1941 loan have been in special demand ; but no scrip whatsoever is forthcoming. Nor is the situation any different in regard to medium-dated stocks. The continuance of the present condition—we cannot see any reason how there can be any change in these conditions in the near future—would perforce compel banks to pick up some of the long-dated securities. It is this movement towards the longer-term stocks that accounts for the sensational jump in a scrip like 3½ per cent. Rupee Paper to nearly Rs. 96-8. At the time of writing, there has been a slight reaction. But this reaction is to be welcomed. The rise has been, in fact, too much of a big and sharp pull to be considered healthy. Any retrogression that takes place from the present level must be reckoned a necessary stage for consolidating the gains that have been so far won.

In visualising the future of giltedge on the basis of the ways and means proposals adumbrated in the budget, *Indian Finance* was, as early as March of this year, convinced that the giltedge outlook was as bullish as it had rarely been for a decade. It was immediately after the announcement of such a marvellously strong ways and means position, that the Government allowed the securities market to suffer one of its sensational and scandalous collapses. The inauguration of the Reserve Bank as from April and the courageous way in which its Governor interpreted the permissibility of 3½ per cent. Rupee Paper for investment purposes of the Bank, were responsible for a quick recovery at the close of the Spring. The next stage was the floatation of the New Loan at a price which was considerably below market expectations or the needs of the situation. Floating the loan at such a low issue price was tantamount to a gesture on the part of the Government that they did not favour higher giltedge price-levels. This and other circumstances combined to cause the second sensational fall of this year. Even during the period of this shock, both the Government and the Reserve Bank authorities stood by, callous, indifferent and unwilling to raise a little finger to save the money market The raising of a little finger would have made all the difference to giltedge in those conditions. From this abysmal fall, recovery in the earlier stage was slow. But there has been a considerable acceleration of the pace in the last two or three weeks. The present state of affairs in the government securities market is a direct and inevitable outcome of the intrinsic forces that hold sway in the giltedge section. It is the inevitable result of the ways and means comfort which the Treasury is now enjoying and which the Treasury will continue to enjoy. In view of these fundamental factors that rule the giltedge market, was it the part of wisdom or even of enlightened self-interest to have exposed the market to two violent shocks like those we have had this year. In gauging the future, one can certainly take an aboundingly optimistic view if he were basing his calculations only on intrinsic and fundamental factors. We have, unfortunately, to reckon with the apathy and superiority-complex of our authorities. As we have said more than once in those columns; and as we stressed with particular emphasis in the Investors Supplement, we believe that a change in the attitude of the authorities may now be reasonably looked forward to as Sir Osborne Smith is again at the helm of affairs.

As we go to Press, we have received a revised statement of the weekly totals of trade bills discounted by Scheduled Banks.

Week ended 1935.		Amount.
July 5	...	3,60,40,000
,, 12	...	3,47,70,000
,, 19	...	3,08,03,000
,, 26	...	3,00,09,000
Aug. 2	...	2,85,93,000
,, 9	...	2,88,75,000
,, 16	...	2,83,53,000
,, 23	...	3,07,27,000
,, 30	...	2,61,77,000
Sept. 6	...	2,43,27,000
,, 13	...	2,44,98,000
,, 20	...	2,39,42,000
,, 27	...	2,26,28,000
Oct. 3	...	2,36,83,000
,, 11	...	2,25,40,000
,, 18	...	2,20,77,000

The above affords an eloquent commentary on the diminishing demand for finance on account of trade. Except for two occasions, it has been an uninterrupted fall, week after week. The same story is told by the weekly diminishing 'Advances', which have fallen from Rs. 82.57 crores on November 1 to Rs. 81.74 crores on November 8. Advances were Rs. 102.85 crores on July 5. There has thus been a shrinkage of over Rs. 21 crores in four months.

The exchange market has been quietish. There have practionally been no bills offering. As foreshadowed in the last week's issue, applications on the sterling tender day were poor. Tenders were received only for £55,000 at 1s. 6⅛d. and allotted in full.

The closing rates are: 1s. 6 7/64d., November-March 1936 T. T.; 1s. 6 3/32d., April-May T. T.; 1s. 6 5/64d., June-December T. H.; and 1s. 6 1/16d., January-March 1937 T. T.

Bills may be quoted: 1s. 6 3/16d., up to March. Forward rates are purely nominal.

Interbank call money may be quoted ½ per cent. (lenders over) at Calcutta and ¼ per cent. (lenders) at Bombay.

Firms' money for call, three day's notice, seven days' notice and term deposits for onemonth, twomonths and threemonths deposits quoted ¾ per cent. Banks showed some interest in threemonths deposits. Twelvemonths deposits quoted 2 per cent. to 2¼ per cent.

SAVINGS

It may not be easy to save money at the present time, but it is even more necessary than in the past.
A convenient method of preparing for the payment of periodical demands for such purposes as holidays, insurance premiums, income tax, passages, medical expenses and school fees is to open a SAVINGS BANK ACCOUNT with Lloyds Bank and to place a small sum away regularly.
Interest is allowed at the rate of 2½% per annum. WITHDRAWALS CAN BE MADE BY CHEQUE.

Thursday Evening.

For years past, it has been taken for granted that questions of monetary policy would play a leading part in the next general election. In 1931, the National Government obtained a huge majority owing to the fear of the electorate of an excessive depreciation of sterling. Although sterling has depreciated to some extent since the general election of November 1931, the public is no longer alarmed about its prospects. On the basis of the experience of the last four years it is now realised that, far from being a disaster, a moderate depreciation of sterling is, in fact, beneficial to trade.

There can be no doubt that during the last four years British public opinion has departed to no slight extent from orthodoxy. Indeed, until recently it was assumed that a more radical attitude towards monetary policy would at the next general election help the Labour Party to regain many lost seats. It was also assumed that one of the reasons why the Government did not pursue a more orthodox monetary policy in accordance with its conservative traditions was the fear of repercussions upon the electorate. Whether or not these assumptions were correct, it was generally believed that the attitude of Government and Opposition towards monetary questions would play an important part in the electoral campaign.

In politics it is very often the unexpected that happens. With the advent of the Italo-Abyssinian conflict, questions of monetary policy have dropped well into the background. The coming election will be fought on the Government's foreign policy and on the question of rearmament. It is, indeed, doubtful whether, in the course of the electioneering campaign, questions of monetary policy will be mentioned at all. It is true that, encouraged by their success in Canada, the adherents of the Social Credit scheme are running a dozen candidates at the general election. Owing to the momentary lack of interest in monetary questions, however, they stand but little chance of being elected.

The question is, now will the result of the general election affect the fate of sterling? There can be no doubt that, should the Labour Party obtain a majority and assume control of affairs, there will be no stabilisation, so long as they are in office. During their term of opposition they committed themselves definitely against the restoration of the gold standard. In any case, since a Socialist Government would mean a flight of capital, it would not be easy for them to stabilise sterling even if they wanted to do so.

The chances are, however, that the National Government will return with a majority, even though its majority may not be as large as in 1931. What then will Mr. Chamberlain's policy be? He will have a five years' tenure of office in front of him ; will he risk the unpopularity of an early stabilisation in the hope that in the course of the next four years or so the Government will live it down? Were his recent emphatic statements against early stabilisation inspired only by his desire to please the electorate or were they sincere? There is reason to believe that the latter is the case and that Mr. Chamberlain has no intention of stabilising sterling for a long time to come.

In the first place, the international political situation in itself is sufficient to rule out any possibility of an early stabilisation. Even though the spokesmen of the Government made it plain that military sanctions do not form part of the Government's policy, they cannot be ruled out altogether from the political horizon. It is conceivable that the tension caused by the application of economic sanctions might lead to military measures, and it is equally conceivable that the failure of economic sanctions to produce the desired effect might induce the League to decide upon military sanctions. Should Britain be involved in a war, even if it were confined to Africa and the Mediterranean, a slump of sterling would be inevitable. The Exchange Equalisation Account does not possess sufficient gold to support sterling in face of a wholesale withdrawal of foreign balances in addition to the natural effect of war upon the trade balance. In the circumstances, so long as there is the least likelihood of Great Britain being involved in a war, it would be clearly absurd to try to stabilise sterling. Indeed, such a step would be interpreted by Signor Mussolini as being equivalent to a definite declaration of neutrality on the part of Great Britain, and this is exactly what for obvious diplomatic reasons the Government is anxious to avoid.

Apart altogether from international political considerations Mr. Chamberlain appears to be genuinely convinced of the advantages of his cheap money policy which would have to be discontinued if sterling were stabilised. Apart from any other reasons, he will be anxious to keep money cheap also from the point of view of the successful financing of the coming rearmament. Whether it will be done through a single large national defence loan or through a series of smaller operations, it will be to the interest of the Treasury to avoid anything that would lead to tighter money conditions.

Mr. Chamberlain appears to be equally convinced of the necessity of waiting until equilibrium is restored between prices and exchanges in Great Britain, France

TREASURY BILLS

Tenders for Rs. 2 crores of 3 months' Treasury Bills were opened on Wednesday, November 13. The total amount offered was Rs. 3,96,75,000. Tenders at Rs. 99-12-3 per cent. were allotted approximately 85 per cent. Lower tenders were rejected. The total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas 15 per cent. per annum.

Tenders for Rs. 2 crores of 3 months' Treasury Bills will be received on Tuesday, November 19. Successful tenderers should make payment on Friday, November 22. Other conditions are as usual.

During the week ended November 8, bills for Rs. 2,00,50,000 were renewed in favour of the Issue Department of the Reserve Bank.

STERLING TENDERS

On Wednesday, November 13, tenders to the amount of £55,000 at 1.6⅛d. were received and were allotted in full.

£1 million will be offered on Wednesday, November 20. Successful tenderers will have to take delivery of the allotments on Friday November 22.

The total amount of sterling purchased by the Reserve Bank of India during the week ended November 8 was £1,000,000 at 1-6⅛d.

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of buisness-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours?

You have only to let us know your requirement and leave the rest to us.

NATIONAL INSURANCE CO., LTD.

PRICE SPURT IN OCTOBER

The spurt in the index number of wholesale prices in India for October is of such a marked nature as to invite careful examination of its origin and significance. The index number of all commodities rose from 89 in August and September to 93 in October. This must be considered a remarkably high level as, since the abandonment of the gold standard in September, 1931, wholesale prices have but rarely risen to this height. In fact, it may be said that, after the initial stimulus of devaluation had spent itself, India bade goodbye to so high a level of her wholesale index number. If we leave out of account the month of January, 1935, it may be said that 93 was never touched since the first quarter of 1932. All these months, the wholesale price index has been at or below 91, 92 being touched only in the month of April, 1932. The wholesale price index has dipped as low as 82 in March, 1933. This, it may be explained, was a result of the reaction from the very buoyant sentiment which the markets witnessed in the autumn of 1932, to which date the present recovery from the depression, such as it is, is traced by common consent. The re-assertion of the forces of recovery in the summer of 1933 enabled the Indian wholesale index to rise to 89 within a few months and, except for occasional drops, it has remained slightly above that level during the succeeding months. Thus it happens that, while the annual average for 1933 was only 87 against 91 for 1932 and 96 for the year before, 1934 has as much as 89 to its credit. The average for 1935 is bound to mark an improvement on the average for 1934.

* * *

Withal, the monthly average for October, 1935, must be considered quite noteworthy. To those who have looked wistfully for a rise in the price level, a spurt, such as has been witnessed during the last month, might seem a new hope. But a little enquiry will show that there is no reason for such elation and that, far from being able to shout, we are really in the heart of the wood. It is not a little significant that, so far as the month of October is concerned, India is by no means alone in having witnessed a marked improvement in wholesale prices. Though the figures for the month of October are not available for other countries, there are sufficient data for concluding that the onset of war in Europe had had a similar stimulative effect on prices in foreign countries. The British complete index of sterling prices rose from 115.7 on September 11 to 118.4 on October 23. The Irving-Fisher index for the U.S.A. showed a fractional increase from 78 at the end of September to 78.9 in the middle of October. In Italy, the index number compiled by the Milan Chamber of Commerce shows a more marked rise from 103.7 to 106.6 during the same period. In France, the improvement was only from 78 to 78.9 and in Germany from 94.1 to 94.6. Thus a rise in commodity prices in the first half of October is common to most countries of the world. And it is only fair to infer that this rise is due to the bullish sentiment caused by the out-break of war.

* * *

That it is idle to expect the effect of the war to continue is seen in the setback which occurred in the second half of October. On October 26, *The Economist* expressed the view that "the recent advance in wholesale prices has for the moment been checked and the past fortnight witnessed irregular movements. The British complete index number continued to rise in the third week of October, but the advance was only by 0.4 per cent. The British index number for primary products fell by 0.7 per cent., while the United States' primary products fell by one per cent." The Irving-Fisher general index number for the United States is also fractionally lower. On the Continent, French wholesale prices were unchanged while slight advances were witnessed by Italy and Germany. In India, the official index numbers are published only on a monthly basis and a close comparison with the experiences of foreign countries is, therefore, rendered difficult. But a scrutiny of the movements of prices during the month of October shows that, while in the first third of October there was an all-round rise in commodity prices as a result of the expectation that the war might stimulate the demand for raw materials, the succeeding days witnessed a marked setback. It must be admitted that the setback was also caused by factors which are peculiar to each of the commodities. But there is no mistaking the fact that a common factor was also at work. Commodity prices during the month of November have not shown any appreciable improvement, and the spurt in October may, therefore, be taken as due entirely to a fortuitous cause.

* * *

We have already pointed out that the wholesale index of 94 for January, 1935, is also of an exceptional nature. If these two months are left out of account, then it will be found that the wholesale index has been fluctuating during the last three years and more between 91 and 88. This level compares with 96 in October, 1931 and 97 in the two months following. It will be seen from these that India has suffered a serious setback in her price level during the years following the devaluation. It would be useful to consider the movements of prices with a base different from what is adopted in the official indices, namely, July, 1914. The following tables give the indices of wholesale prices for the principal countries in the world with 1928 and September, 1931, respectively as the base years:—

Base 1928-100

,, viii ...	...	...	94.3	69.8	113.1	...	...	97.8	...

A glance at the above table will show how unhappy is India's lot in respect of the movement of prices. From the first table, it will be seen that, with the obvious and natural exception of France, which is a gold standard country and is, therefore, obliged to depress her prices for the sake of equilibrium, India has had the worst decline throughout the period as compared with the level of 1928. Argentine is notable for having raised her prices, by the end of 1934, to over the level of 1928, the index number for the last two quarters being over 100. In no other country of the world, has the wholesale price index fallen as low as 60 per cent. of the 1928 figure. Taking the index figure with September, 1931 as the base. there can be no doubt that there has been in India no attempt to secure the advantages of the devaluation of the rupee in terms of gold. It is true that no country has been able to ensure for its prices a smooth upward movement merely on the strength of devaluation. A marked setback in 1932, the year following devaluation, is common to all countries; and when one remembers the downward pressure on prices which the devaluation of sterling inevitably exerted, the setback of 1932 would not be difficult to understand. But it has not been difficult for the monetary authorities to contend against these forces and to regain some degree of control over the movements of prices. In Britain, the losses of 1932 were more or less fully made up by the end of 1933, and since then, except for occasional setbacks, no considerable loss has been sustained.

* * *

In India, the indices shown in the second table leave a big gap between them and the figure for the end of 1931. Only in the middle of 1935 has the level of September, 1931 been regained. Apparently, the monetary authorities in India do not consider it necessary or advisable that Indian prices should move in step with those of other countries of the sterling group. The Indian public has a right to protest against such an attitude on the ground of its divergence from the monetary policy of other countries. But even considered on its merits, it is difficult to understand the apathy shown by the authorities in India to the improvement of prices. A modest improvement in prices, we might urge here, is indispensable for any scheme of economic reconstruction. By all signs, it is clear that the various provincial governments have grown impatient of the pace of agricultural progress and popular representatives all over the country appear to have made up their mind that, before long, the legislatures should come to grips with the problem of rural indebtedness. The settlement of these long-standing dues through a process of conciliation is, at the moment, the only solution in the field and the various provincial legislatures are adopting it in various forms. There can be no doubt, however, that, unless this scheme of abolishing rural indebtedness is executed during a time of rising agricultural prices, it will be impossible of fulfilment or it will tend to aggravate the misfits in our economic system. With prices of land and agricultural produce resuming their upward trend, there will be an atmosphere favourable to a settlement of this long-standing problem. We hope that, with the end of the first year of its inauguration, the Reserve Bank will have mastered its work of a more routine character and will be ready to tackle the larger problems of currency and credit.

SPEECHES GALORE

The first half of November marks a crowded festival of speech-making. Our Indian commercial bodies have popularised the vogue of quarterly meetings; and the year is thus punctuated with four presidential addresses per Chamber. Mr. Manu Subedar, the President of the Indian Merchants Chamber, started the festivities with a speech as pugnacious and scintillating as ever. He traversed a wide ground; but we must content ourselves with a reference to the more salient points. Throughout the speech, there is vigorous criticism of the Finance Member in language so curt, in style so strident and with frankness so brutal, that Sir James Grigg must recognise a kindred spirit in the President of the Indian Merchants Chamber. It was Mr. Subedar who urged, six months ago, a strong plea for the revision of the tariff system on a scientific basis and for improvement in the machinery by which tariffs could be altered and protection could be granted to industries after proper investigation and without undue delay. What is the answer of Sir James Grigg

to these requests of the Indian Merchants Chamber? Sir James agrees that the tariff system needs overhauling; but his point of view and his objectives are entirely different. He is convinced that protection has been carried to extraordinary lengths and that, if left to himself and were the revenue position satisfactory, he would unhesitatingly reduce tariffs alround. In presenting this answer to the Bombay requests, Sir James claimed that he was the servant of India and of nine-tenths of the people who are agriculturists. This new-found devotion to agriculturists is examined at length by Mr. Subedar who has no difficulty in exposing the real motives of the great affection which the authorities now profess for rural classes.

* * *

The antithesis between agriculturist and industrial interests is not a special feature of Indian economy. Nor is it a phenomenon that has come to light only in current times. This antithesis is nothing new. It exists in every country in the world. And governments are everywhere trying to find a balance. We agree with Mr. Subedar that it is against the welfare of India to inflame and magnify the divergence between urban and rural interests. The real purpose of the emphasis laid on such divergence is that this serves as a convenient and effective mode of stifling the industrial progress of the country. After all is said and done, is there not a definite and assured place for industry in the economy of a nation? "Industry is wanted to stop the drain from India, to increase the diversity of occupation and to correct the weakness of India's economic life". Thus viewed, the greatest friend of agriculture in this country can be the industry of the country. The following passage from Mr. Subedar's speech is a proper and effective retort:

> "Taking cotton, for example, the Indian industry consumes about 50 per cent. of the total produce. The wages paid out by industry constitute the purchasing power of the masses of cities, who buy agricultural produce. Even the produce of agriculture itself could not be cleaned, packed, baled, transported and sold without the intervention of commerce, transport, insurance, banking and many other trades, which are ancillary, but the mention of which is anathema to some Government officials. The rural community has been known to receive substantial contributions even from the wages paid to industrial workers.
>
> I want to bring to the notice of the agriculturists to what plight, Government's policy of 'let alone' and omission has brought them. Agricultural products, like rice, wheat, sugar, fruits, and cocoanuts are clamouring for protection. It is not that the price is low. Prices have dipped even below the cost of production in many cases and this Government, in spite of the addition of Sir James Grigg to the galaxy of official talents, has so far failed to take any large measures to correct prices in India. And when this thing is pointed out to them from the Chamber, they turn round and accuse us of trying to advance industry at the expense of agriculture."

The fact is that the Government only profess sympathy for the agriculturists. Their performance in the direction of translating sympathy into direct action is unedifying. Publicity officers and the stalwarts of the broadcasting department are trying, might and main, to convince the population of the country that the Government are doing everything in their power to ameliorate their condition. With the biting sarcasm to which Mr. Subedar is only too prone, he points out that even in this so-called backward country and among its backward people, the voice of hunger travels faster than the radio. How acute is the economic distress prevalent amongst the masses, is borne testimony to by the continued fall in the earnings of the railways. These are the infallible index of the low vitality of trade and economic life in India. No relief can be looked for unless in the matter of railways, as also in the matter of currency policy, taxation, tariffs, etc., a policy of careful planning is substituted for the present policy of drift. But to talk of a plan in any discussion with

No. T/261/35.

Sir James is like flourishing the proverbial red flag before a bull. Sir James immediately thinks of Russia and accuses us of importing communist ideas. Here is some plain speaking of Mr. Subedar on economic planning and the Government's attitude towards it:

> "I want to make it quite clear to Government that India's commerce wants constructive activity on the part of Government not merely in the regulation of trade, but in many other directions, on a par with the activity and assistance which is rendered to trade by Government in the United Kingdom. It is only after Government of India have done all that is being done in the United Kingdom, that they can turn round and cry halt. I maintain that not a tenth of the attention, which is paid to trade and industry in the United Kingdom, is paid by the Government of India in this country, and the specious logic, bluff and patronising common-places given out by officials in dealing with requests of trade, will not exonerate them from their sins of omission, when the history of these times comes to be written."

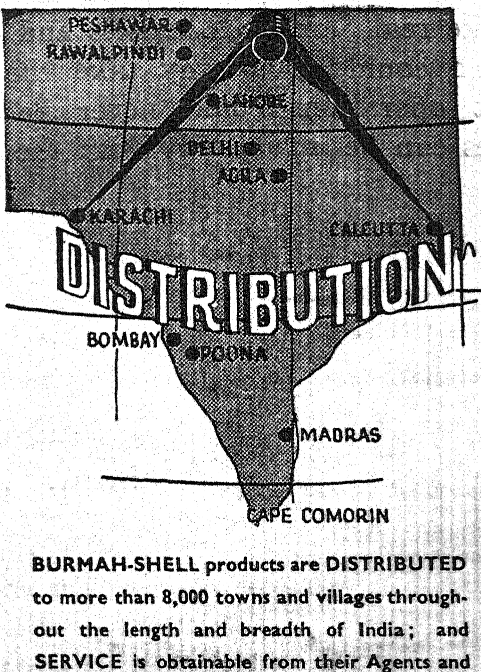
Mr. N. R. Sarker, presiding at a quarterly meeting of the Bengal National Chamber of Commerce, is no less pungent in his comments on Sir James's well-known views on planning. What we mean by planning, explains Mr. Sarker, is that the present haphazard and piecemeal methods of improvisation necessitated by emergencies and the consideration of sectional interests should yield place to carefully thought out plan which takes a comprehensive view and effects a balance of interest, directing the economic life of the country by positive measures and energetic leadership. If Sir James refuses to pay heed to this universal demand for planning, Mr. Sarker can understand why this is so. The official mind is too full of lethargy to respond to suggestions which would mean thought and impose labour and trouble. The official mind would rather have things go their own sweet way. When leading countries of the world have thrown old theories over-board and are constrained to adopt measures of planning suited to the economy of each, how can an undeveloped country like India hope for economic development without a clear-cut programme and a purposive plan? Mr. Sarker asks if the solicitous care for the interests of the Indian Civil Service displayed by Government and confirmed by many Acts on the Statute Book is not a form of planning. Mr. Sarker, too, is in a sarcastic vien; and we quote the following as it is the kind of argument which appeals to Sir James:

> "Not only their emoluments, prospects and positions are carefully secured but even down to details, such as medical treatment by European doctors, holidays, leave, overseas allowance, rates of exchange applicable to their pays and pensions, provision for their families, all those items are carefully thought out and set down as unalterable and eternal. I submit that in the Government of India Act the system of protection provided for British interests with the purpose of maintaining the security of these interests in India for all times, is yet another example of planning. So are the Ottawa Agreements a plan; and so is the Mody-Lees pact which received official blessings soon enough and abundant enough. So far as imperial and British interests are concerned, there is really no dearth of planning—to our mind, as a matter of fact, too much planning. Instances could be multiplied, but our quarrel is not that there is no planning but too much planning in certain directions and little or nothing in other directions where the interests of this country are concerned."

Both Mr. Subedar and Mr. Sarker have stressed that Finance Ministers in India, who always worship the model of Great Britain, should be prepared to undertake in India all those forms or schemes of planning which the authorities in England have undertaken. The Government can plead no excuse for shirking planning in India while the British Government, even in a conservative regime, are assimilating and carrying into effect many of the proposals put forward by socialists.

We have so far been dealing with literature which is highly critical of Britain's attitude towards Indian questions. We may now turn to the mportant speeches delivered at the Calcutta Armistice Dinner; and these speeches exult in British self-esteem. Major G. M. Lindsay referred to the British Commonwealth of nations as ever ready to defend not only the Empire but those great ideals of freedom and justice for which the Empire stands. Major R. B. Lagden dilated on the chivalry of the Britisher. "As has happened before, and as will happen again, when Britishers are behind big guns, the weaker the enemy, the more reluctant are Britishers to press the trigger". As an instance in point, the speaker referred to the efforts of Sir John Anderson to find a solution to one of the crying needs of Bengal, namely, unemployment, when he initiated the scheme for training detenus into good citizens. Sir John's reply was in characteristic vien. In his appreciation of Indian psychology and, particularly, the psychology of those who are devoted to the cult of terrorism, His Excellency is convinced that terrorist bias is an abnormality and most people, given a proper chance in life, would shun abnormality. Sir John developed his point in fine style and with great effectiveness:—

> "Most men (in the Great War), I think, fought for simple, homely things—a farm somewhere in England, a plantation somewhere overseas, a business, a job in an office or a factory, perhaps even a best girl—a sane decent life without hate or frightfulness, a reasonably free existence, where a man could let his neighbour live in peace and not be interfered with himself. These things and things like these were to ninetynine men out of hundred their background and their inspiration. A commonplace creed—the outlook of the ordinary man—but it is the ordinary man that governments have to govern in the mass and what we here are now trying to do is just part of an attempt to give the ordinary man a chance, in the hope that given his chance he would sooner be an ordinary man than an abnormality. It is an uphill job, especially when so many of the younger generation in this country are out of harmony with their environment; but it is a job that has got to be tackled, and if we do not succeed in one way we shall have to find another."



BURMAH-SHELL products are DISTRIBUTED to more than 8,000 towns and villages throughout the length and breadth of India; and SERVICE is obtainable from their Agents and Dealers at every point. In the smallest village and in the largest city the QUALITY of Burmah-Shell products is maintained at a uniformly high standard

THEY CANNOT MAKE SAFES

WITH CHISELS AND HAMMERS

The proverb is that you cannot make bricks with straw. Nor can small shops make real Safes with chisels and hammers. Small hand tools and crude hand work could in no way take the place of modern machinery. Some important operations could never be performed except by machines only. Good Safes can be made only with the help of suitable and special machines.

From the grim realities of politics and political life, the week afforded a respite in the sweet and fragrant function that was held in Mr. K. C. Mahindra's house to commemorate the inauguration of the Four Arts Square. The few and select that had forgathered at Queen's Park was as far from the maddening crowd of politicians as one can imagine. Mr. W. C. Wordsworth, who presided, launched the new organisation with a speech marked by his quaint humour and inimitable style. But, as one speaker remarked, has the modern age any use for the Four Arts? In these days of fret and fever, rush and and hustle, the poise and dignity of the arts seems strangely out of place. The Four Arts are said to comprise of music, painting, dancing and poetry. We have the jazz in place of music, the cartoons in place of painting, sundry contortions in place of dancing and journalism in place of poetry. This is modern age. Is it not more in consonance with the Four Artifices rather than with the Four Arts?

ANGLO-EGYPTIAN RELATIONS

The war in Abyssinia has far-flung waves of disquietude, while nearer home it has submerged Egypt in a constitutional crisis. Dictator Mussolini's drive in Abyssinia has reduced to fundamentals the relation between the British Empire and Egypt. The declaration of 1922 gave Egypt sovereign independence, subject to four British reservations. These are (1) the security of the communications of the British Empire in Egypt ; (2) the defence of Egypt against foreign aggression or interference ; (3) the protection of foreign interests and of minorities in Egypt and (4) the protection of the Sudan. Although the declaration did away with Britain's protectorate over Egypt, Britain notified the world that "the termination of the British protectorate over Egypt involves no change in the *status quo* as regards the position of other Powers in Egypt itself" and that Britain "would regard as an unfriendly act any interference by another Power in the affairs of Egypt." The announcement from Cairo that the Egyptian Government has not committed itself to neutrality adopted by Britain and the Dominions is of the nature of a test of Egypt's ostensible sovereign status.

* * *

Not one of the negotiations for an exact settlement of the political relationship between Egypt and Britain, which have from time to time been broached since the declaration of 1922, has materialised. The last of these negotiations was a treaty defining Anglo-Egyptian political connection and limiting the scope of British military activities, proposed in May, 1930 by Mr. Arthur Henderson, then Great Britain's Foreign Secretary, to the Egyptian Premier. Had that treaty been signed, an extremely difficult position would have been eased to-day. Ever since the Milner proposals of 1920, the relationship between Britain and Egypt was based on the assumption that the control of the Suez Canal was essential to the safeguarding of Empire communications and that the defence of Egypt against aggression from without would be assured by the Mediterranean fleet at Malta. The Italian campaign has discounted the strategic value of the Canal and the Malta base. Last month has proved that Malta cannot adequately protect Egypt or Suez by revealing the vulnerability of Egypt on her Libyan frontier, hitherto not considered in the strategic scheme, invasion by land on the western frontier not being considered possible. The concentration of Italian military and naval forces in Libya has necessitated a new angle of vision. This concentration has demonstrated that the military defence of Empire communications is not on the banks of the Canal, but on the Western frontier, where an enemy, by aeroplanes and armoured cars co-operating with troops, could menace the rear of an army operating on the Canal.

* * *

This real danger to Egypt is bound to react fundamentally on Anglo-Egyptian relations. The nebulous nature of Egypt's sovereignty accentuates her difficulties. For fifteen years Britain has not defined the relation in any formal document, though Egypt has, again and again, pressed for a clear enunciation. At the present time, before committing itself to any act which Italy might interpret as an act of hostility, the Egyptian Government naturally wants to know how it would stand. The application of neutrality laws to Italy by Egypt would certainly be resented by Italy. And Egypt, because of her geographical position, would be justified in considering, from her own, rather than the Empire, point of view, the danger of inviting Italy's hostility. Italian forces in Libya and, in a short while, Italian conquest of Abyssinia, would leave Egypt between the upper and nether stones of insecurity. With the Suez Canal, the jugular vein of the British Empire and the alleged ultimate objective of Italy, in Egyptian territory, the anxiety of the Egyptian Government to know Britain's mind before antagonising Italy is ordinary prudence. Britain's interests in the Canal, Malta, the Sudan Somaliland and Kenya are so paramount that an understanding with Egypt, on the basis of sovereignty, would allay Egyptian apprehension and suspicion. If events are shaping the terms of a necessary understanding, long belated, it is not intelligent to charge Egyptian public men, as a section of the British press is doing, with sinister motives.

MNK 181A

of its existence. We may gladly stress that the Sunlight of India cannot be classified, by any test, among the too many mushroom companies, that have spurted up during recent years, with insufficient capital, with bad and sometimes dishonest management and with entire lack of business principles and decorum. The Sunlight has a paid-up capital of Rs. 1 lakh and has secured the services of an influential board of directors. What is more, the Company seems to do business on quite sound and safe principles. During the year under review, the Company received proposals to the amount of Rs. 32.85 lakhs; and the policies issued during the year amounted to Rs. 26.10 lakhs. The total income received by the Company during the year amounted to the substantial sum of Rs. 2.11 lakhs, of which premium income amounted to Rs. 1.99 lakhs and interest income Rs. 5,000. On the disbursement side, claims paid amounted to Rs. 10,000 and management expenses to Rs. 1.24 lakhs, working out to an expense ratio of 62 per cent. Though this is not a high figure for the age of the company, the management should try to reduce it considerably in the next few years. We are glad to note that company has written off the entire organisation expenses of Rs. 20,000. The life fund has been increased by the substantial sum of Rs. 57,000 to Rs. 86,000.

* * *

The balance sheet shows, on the liabilities side, a paid-up capital of Rs. 97,000, a life fund of Rs. 86,000 and other miscellaneous liabilities amounting to Rs. 26,000. On the assets side, stock exchange securities account for Rs. 1.45 lakhs or 70 per cent. of the total assets amounting to Rs. 2.08 lakhs. Of this, giltedge securities amount to Rs. 1.13 lakhs. Policy loans and other secured loans account for Rs. 36,000 or 17 per cent. Of the remaining Rs. 27,000, cash amounts to Rs. 9,000 and other miscellaneous assets to Rs. 18,000. It is noteworthy that there is not a single item of dud or intangible asset. All the organisation and preliminary expenses have been wiped off within the third year of the Company's existence. Outstanding premiums do not find a place on the assets side of the balance sheet as the net premiums collected are only shown as premium income in the revenue account. The distribution of assets is ideal and deserves to be emulated by many offices of much older standing. Thus, in every respect, the balance sheet appears free of blemish. The reviewer is all the more happy to find an ideal balance sheet from such a young company as the Sunlight of India, and only wishes that many Indian companies of much longer standing follow the example of this company. We trust that the management will follow a cautious policy in future for its expansion, and try to make the Company sounder first before making it bigger. For, it is only a solid and strong foundation that can bear the weight of an imposing edifice. Unfortunately, in India, many life insurance companies seem to ignore this principle and try to become great without first attaining an unimpeachable and sound financial position. The Company is represented in Calcutta by their chief agents, Messrs Puri Brothers.

COMMERCE CONSTITUENCY

The India Act allocates nineteen seats to commerce in the Bengal legislature, of which as many as fourteen go to European and five to Indian commerce. This preponderance of European commerce is one of those outstanding British reservations which run through the Act. Five seats for national commerce are outrageously inadequate to its importance. To make, therefore, the best use of this small representation, it is essential that it should be confined exclusively to commercial organisations indigenous to the Province. Nothing would more jeopardise the solidarity of Bengal's Indian Commercial interests than a communal or provincial cleavage on the allocation of these five seats. We should avoid communal discrimination, which is responsible for the European weightage and a seat to the Moslem Chamber of Commerce. Nor should the plea of the magnitude of interests represented be the basis of distribution, as Japanese and German commerce would then have an indisputable claim, which of course is absurd.

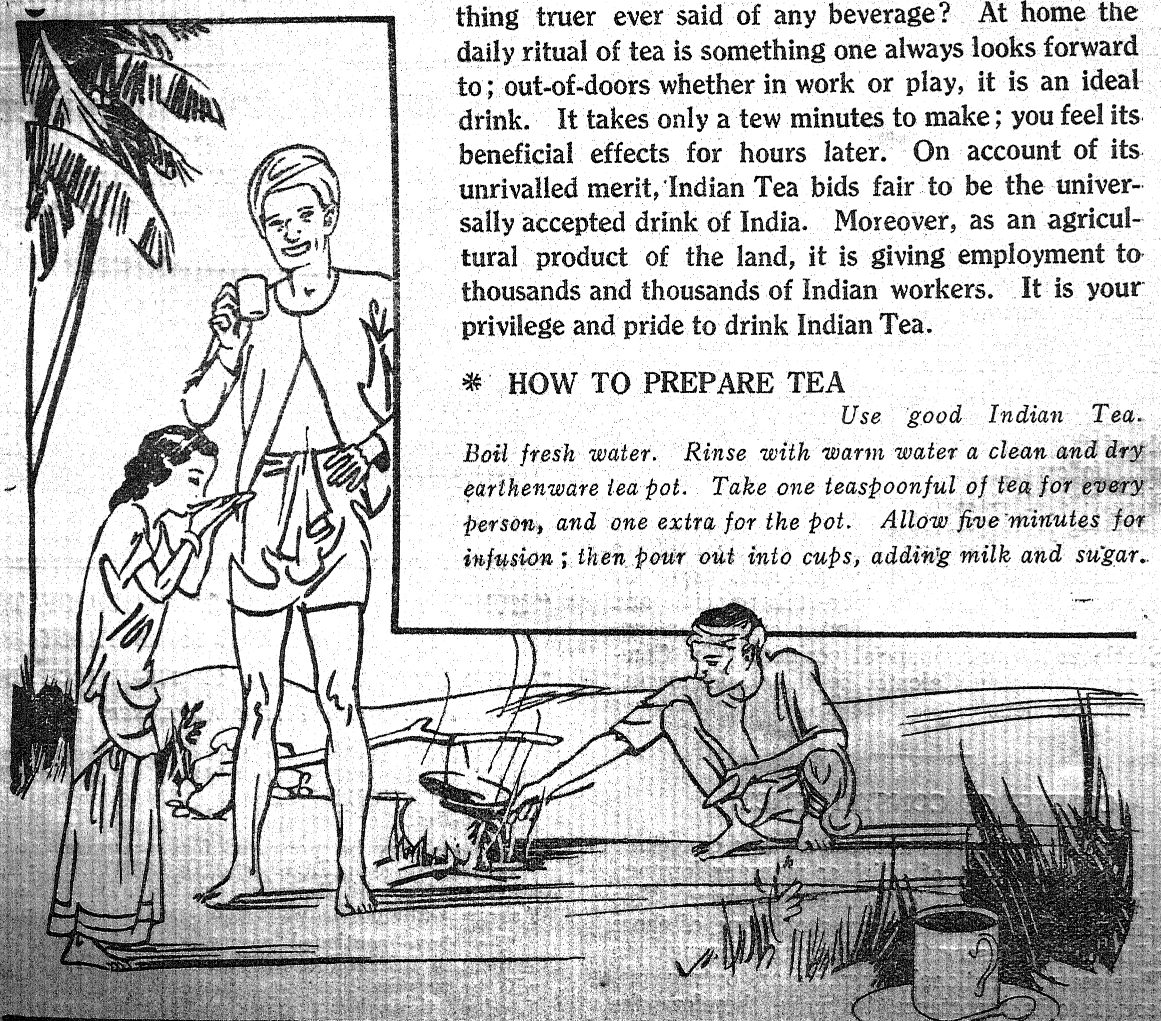
at home or out of doors
INDIAN TEA
is valuable refreshment



"Any time is tea time" so goes the saying—Was anything truer ever said of any beverage? At home the daily ritual of tea is something one always looks forward to; out-of-doors whether in work or play, it is an ideal drink. It takes only a few minutes to make; you feel its beneficial effects for hours later. On account of its unrivalled merit, Indian Tea bids fair to be the universally accepted drink of India. Moreover, as an agricultural product of the land, it is giving employment to thousands and thousands of Indian workers. It is your privilege and pride to drink Indian Tea.

* HOW TO PREPARE TEA

Use good Indian Tea. Boil fresh water. Rinse with warm water a clean and dry earthenware tea pot. Take one teaspoonful of tea for every person, and one extra for the pot. Allow five minutes for infusion; then pour out into cups, adding milk and sugar.

India's joy and pride ■ INDIAN TEA

By all tokens, elections to the local boards of the Reserve Bank promise to be full of increasing thrill and excitement in the future years. In the case of the election that was concluded this week, the candidates and the public were, so to say, taken unawares. There was but a hazy appreciation of the importance of membership on local boards; this meant that a number of business and other leaders did not think it worth the while to put themselves to all the expense and bother of a widespread election campaign. Looking over the lists of those whose nominations were found valid for the respective areas, it cannot be said that there were any large number of prominent or deserving men nor that there was anything like a keen contest. Another reason contributing to the emaciated list of candidates is that membership of local boards means severance of connection with the legislature, central or provincial. Those who are in the public eye in this country set much store on a political career. There are powerful footlights and floodlights playing on the actors who strut the political stage. Advertisement is the breath of life for most of our leaders. Deny them the opportunity to bask in the sunshine of newspaper publicity; they may decide that there is nothing worth coveting in leadership, big or small—good, bad or indifferent. The legislatures afford excellent platforms for long orations, shrewd repartees and striking poses. By comparison, what does the local board of the Reserve Bank offer? Who may know of the existence of these members after the stir and noise of the election has subsided? No press agents are allowed inside the hush-hush board rooms of the Reserve Bank. What the members may say and do is hid behind a thick veil of secrecy. Nor are the emoluments so alluring. It is, therefore, no matter for surprise that most of our leaders were not prepared to exchange a political for banking career.

Nor was there much time for planning election programmes on comprehensive lines. The electorate covers a far-flung territory. The list of shareholders could be made available only at the eleventh hour. The process of voting is complicated and not easily comprehended. Those who are entitled to vote were, as is natural, swayed by considerations of influence or friendship. It cannot yet be said that the voters have realised the privilege and responsibility of membership of the franchise to the Reserve Bank boards. There was also considerable difficulty in regard to the insistence on voters giving the numbers of the shares held by them. Inspection of share registers was a privilege, the exercise of which was conditioned by the convenience of the Reserve Bank authorities; and the authorities were so full of work as regards the printing of the mammoth share lists that shareholders anxious to inspect share registers could not be given the facility for a few days prior to the closing of the list. These were some of the handicaps which were present in the first elections. In spite of these, such results as have now been announced afford good cause for satisfaction. The following candidates have been elected in the Calcutta territory:

Mr. B. M. Birla;
Mr. Amar Krishna Ghose;
Mr. Shanti Prasad Jain;
Mr. Satyendra Chandra Mitra;
Rai Bahadur Pramathanath Mullick.

While it is sad that Sir David Ezra has been defeated, it is a matter for gratification that the Bengalee community, who had cause to feel apprehensive at the beginning, can now claim three representatives on the local board. The most sensational success is that of Mr. A. K. Ghose who, single-handed secured nearly 4,000 votes, all first preference. Mr. Birla topped the list with 7,000 votes; this is half the total votes registered. Herein is evidence of the influence which the Birla house commands and the elaborate organisation which Mr. Birla had set up for securing votes. It is not to be forgotten, however, that his total strength is, in a measure, the sum total of the efforts of himself, Mr. Durga Prasad Khaitan and Mr. Shanti Prasad Jain. Be this as it may, Mr. Birla is entitled to hearty felicitations on his triumphant success. As for the other candidates, they owe much to the second and third preference votes that came to them from Mr. Ghose and Mr. Birla.

At this point, it is useful to assess the results in order that we may deduce a lesson. The total number of votes in the Eastern circle are reported to be 24,000; it is, however, well-known that a large number of shares has been sold by the original holders to a wealthy magnate of Bihar and to prominent financiers of Bombay. As soon as the transfer books are reopened, all these shares so sold will be presented for transfer to the new buyers. Taking this fact into account, I believe that the actual list of shareholders entitled to vote would amount to only 20,000 votes. It may, therefore, be concluded that 75 per cent. of the voters recorded their votes. There can be no doubt that the electorate of the Reserve Bank is made up of intelligent and shrewd men. As amongst the candidates who stood for election, the voters have exercised their judgment in the wisest manner. The results bear the impress of nimble canvassing as also of appeal to sentiment. Given time and given greater experience, the candidates aspiring for the honour of membership of local

BOMBAY: FORBES BUILDING, HOME STREET

boards could secure adequate support, provided they can show good credentials. In future elections, one may be sure, what will count is not canvassing so much as credentials. Methinks there is great comfort in this thought.

Madras election results are equally heartening. The successful candidates are the following:—

Mr. C. R. Srinivasan ;
Mr. Ramanath Chettiar ;
Sir Vepa Ramesam ;
Mr. Govinddas Chaturbhujdas ;

and Dewan Bahadur T. Raghaviah. It is as fine a team as could be got together in South India. The voters have certainly shown good discrimination. The Bombay results are not yet to hand. The scramble in that area is even less than in other areas. There were only seven candidates. Mr. F. E. Dinshaw and Sir Purshottamdas Thakurdas are assured of victory. So are Mr. Chinoy and Mr. Thackersey. Bombay, too, will have a good team. And it may be taken as certain that Mr. Dinshaw and Sir Purshottamdas will be elected to the Central Board by the Local Board. This is eloquent testimony to the wisdom of Government's original choice. Which reminds me that the turn of Calcutta for electing representatives to the Central Board will come after the Local Board now constituted is dissolved. At the next election, Sir Badridas Goenka and Sir Edward Benthall are sure to seek election. This should add greater liveliness and more reality to the election.

Meantime, these two members of the Central Board will, in the usual course, be amongst the trio to be nominated by the Central Board to the Local Board. There is, thus, only one member regarding whose nomination the Central Board will have to spend careful thought and exercise conspicuous tact. The Moslem community is agitated over the defeat of Mr. Ispahani. Much of this agitation is unjustified for the simple reason that if there had been adequate Moslem voters, they could certainly have installed Mr. Ispahani in the Local Board. It would appear that the total of Moslem voters in this area is less than 2,000—perhaps, much less than this figure. While, from this point of view, the defeat of the Moslem candidate cannot be urged as a communal grievance, there is much justice in the demand that the deficiency in this regard must be made up in the nomination list. It is obvious that one, who has failed to gain admission by the front door of election, should not be sneaked in through the backdoor of nomination. This leaves Mr. Adamji Haji Dawood as the only suitable person in the field. Even as between Mr. Ispahani and Mr. Dawood, every credential of experience, status, influence, stake and ramification of business is in favour of Mr. Dawood. Had the latter been a shareholder, he would certainly have stood for election ; and he would have come off with flying colours. Nomination of one who has hundred per cent. chance in election stands self-justified. I strongly urge this point of view to the Governor and Directors of the Reserve Bank who are to meet early next week to consider this and other matters.

Speaking at a social welfare meeting, Dr. Foss Westcott, the Metropolitan, said that the woman's movement—I refrain from capitals—is the most powerful influence on Indian life. He spoke better than he knew. For, it is impossible for a foreigner, however informed, to understand the significance of the change that has come over India's womanhood. Take a daily paper ; not an issue but has a report or two of woman's work by those who are the leaders of the feminist movement: work that ranges from baby-care to cinema posters. The contribution by women delegates to the Round Table Conferences was in a class by itself—broad-based, without communal taint and not perfervid : a performance that vindicates Indian women's political aptitude. That contribution registered the spirit that animates India's womanhood. Social reform is everywhere a slow, often invisible process ; in this country, it is being speeded up by a combination of progressive forces. The presence of women in the coming legislatures breaks new constitutional ground. Much of legislation in the near future will cover social problems. The active participation of women in framing such legislation will give it the right direction India has not, happily, developed the unsexed woman who was, thirty years ago, the gaunt apostle of emancipated womanhood in Great Britain. Indian women, slowly shaking off immemorial shackles, have not lost the sense of sex values. Nor has the new sense of leadership, a heady draught, disturbed the balance of their womanliness. They are aiming at being, not lesser men, but greater women, which is Nature's purpose. In that sense, if that was his interpretation, the Metropolitan's comment was correct.

Gradually, painfully gradually, the Indian home is being re-built nearer to the woman's heart's desire. Never has that desire wavered from chastity and constancy ; education and culture have given them a new setting. The rebuilding is all the more in the domestic domain of cleanliness, clinics and cosiness. The upper and middle class home is more of a woman's sanctuary now than before. Naturally, the change is more pronounced and prevalent in cities ; but, as in other things, the urban example is spreading to suburban areas. That is the leaven that is quickening the dough of womanhood ; and, with or without legislation, such as the Sarda Act, the relation of the sexes is being adjusted, without sacrificing or mutilating fundamentals. The fire of reform must be lit within to purify society ; and, without a doubt, wise womanly hands are lighting and fanning it in India. The promise of this flame, visible here and there, but aglow everywhere, spells India's destiny.

While there is agitation for the levering up of woman's legal and marital rights, there is no hysterical demonstration for sex equality. Indian women are not in quest of things merely masculine. Their sex instinct, not perverted by sex obliquity, inhibits the freakism of mannish women. They are not intrigued by man's ambitions and occupations. They know that, in the rearing of a family, which is their work, lies the glory and the greatness of humanity. Of those, who are in the public eye, it may be said that their life's work, like that of their illiterate sisters, is in the home, first and last. Their service is pledged to the betterment of their sisters' lot ; their solicitude is for husband and brother and sons and daughters. Still, like Savitri, death cannot hold them ; still, like Sita, constancy is their crown. In a generation, when sex sensationalism is obliterating sex values, Indian women continue to cling to the comeliness of womanliness. And "like perfect muscic unto noble words" they complete the symphony of life.

OLYMPUS

(From Our Correspondent)

New Delhi, November 12.

It is not always given to business leaders to play important political roles, entirely in the political sense. Seth Ghanshamdas Birla is doing it for the moment. His last visit to London enabled him to get into touch with those who form the "sympathetic" section among Conservatives including Lord Zetland. The idea is to arrange a kind of armistice till Lord Linlithgow arrives in India. Mr. Birla spoke for Mahatma Gandhi in London and is now in touch with the same sources to arrange matters behind the scenes.

* * *

The Cochin Harbour Conference is now in session. It had become a hardy annual and people had lost interest in it. But thanks to "straight talk" between Sir James Grigg and Sir Shanmukham Chetty the settlement has been arrived at. The Finance Member, one fine morning, told the Cochin Dewan to set aside the legal arguments and face the matter as businessmen. They found each other very helpful and accommodating and within an hour a bargain was struck. The financial tangle was solved and the rest followed.

* * *

So far as the legal side goes, the Maharaja of Cochin was clear and insistent: "I will not surrender an inch of my jurisdiction". Every scheme Sir Tej Bahadur Sapru put forward had to keep that fundamental point in view. And when the Government of India realized that that was the inevitable basis, they found a way out. A Port Trust is to be constituted to run the port with the powers such bodies possess elsewhere. All is settled and only Sir C. P. Ramaswamy Iyer must arrive on the 14th to give his consent on behalf of Travancore.

* * *

The present revenue of the Cochin Harbour is estimated at 63 lakhs. It will be divided as follows: Cochin Rs. 21 lakhs. Travancore Rs. 16½ lakhs. Government of India Rs. 25½ lakhs. Whatever is in excess of this minimum basic figure of revenue, will be divided between the three parties in the following proportion. Travancore will get 6 per cent. Cochin 10 per cent. and the Government of India 84 per cent. And as the calculation is that in another 10 to 15 years the revenue may shoot up to 3 crores the Government of India has made its plans well for the future.

* * *

Now, therefore, the 4th Stage of the Harbour Construction will proceed ahead with all possible speed. At a time when such happy result is about to accrue it is due to Mr. Herbert, the ex-Dewan of Cochin, to say that by the loyal and vigorous manner, in which he fought the case for the State at the earlier stages of the controversy, he certainly surprised those who generally expect a civil service man to be cold and detached in matters in which the Government of India are interested. Mr. Herbert made the case his special charge and fought it valiantly. Sir Shanmukham Chetty, of course, did the real business of settlement. He played his cards so well that the financial tangle was solved by him; and that led to better appreciation of Cochin's position in other matters.

* * *

Ottawa is on the nerves of the Secretariat—next to it is the question of introduction of the new constitution. The case for the Ottawa Pact has to be fought before a hostile house; and the Desai-Jinnah combine has to be broken if the Pact is to be saved. Sir Joseph Bhore had stated that the Assembly's verdict must be favourable, so is the instruction which will ring out of the Secretariat to the Whips. The rest must follow.

* * *

Mr. N. R. Pillai was the Deputy Secretary when the Pact was adopted by Government and endorsed by the Assembly. He will be on special duty to work with the same enthusiasm as before to prepare a cast for renewal of the Pact. Mr. Pillai is an Indian Official and would not be charged with racial bias. The Member in charge of the Department is also Indian. So Government can claim that the fate of Ottawa has been dealt by two patriotic Indians.

* * *

A very reasoned plea for the Pact has been put in by "A Clive Street Man" in the columns of *Roy's Weekly*. Perhaps it may be taken as summing up the case for the Pact by a European who is interested in India's political advancement. At any rate, his are the kind of arguments that would probably strike Mr. Pillai himself in writing a commentary on the official Report on the working of the Pact.

* * *

A yearly judgment on the working of the Pact is considered unfair to the Pact. It must be judged for the whole period of its currency. It is generally admitted that the Pact has not by itself contributed much to India's increased exports to U. K. They are attributable far more to the stable exchanges of the sterling group, the cheap money policy in U. K. which gave a fillip to industry and the demand for raw materials. The writer maintains equally vigorously that the Pact did not, in the least, affect India's trade with the other countries which would have suffered serious shrinkage whether or not the Pact was there.

* * *

The Pact has done no harm to India; it has been of considerable benefit to U. K. and, at any rate, its rejection now would mean that India, under the new constitution, would be hostile to British interests. With this feeling in his mind the "Clive Street man" argues that the best remedy is to agree to the principle underlying the Pact and arrange better terms for India by consulting business in India.

* * *

So far as one can feel the pulse here, the attitude of the Government may be conciliatory, if the Congress Party does not bring anti-British politics into the picture and discusses the Pact purely on its merits. Delhi is not happy with the Pact altogether, but it will be very unhappy if it is disowned; for the reason that it will cause unnecessary complications with London and adversely affect the Indo-British Trade Agreement which is of very great consequence from the point of view of the Board of Trade.

* * *

Indeed, it may be safely assumed that the Ottawa Pact would constitute the chief bone of contention in the next Assembly Session and that the Government Whips would be busy arranging a favourable verdict on the principle of continuing this gesture to the U. K. and leaving it to the experts with the assistance of businessmen to negotiate a trade agreement more beneficial to India than the Pact has been.

Bombay, November 13.

For strategic considerations, the Poona session of the Legislative Council has been carried over to Bombay. For reasons which are not clear, opponents of the Motor Vehicles Taxation Bill, which was introduced at Poona, have a hunch that the spear-head of opposition would be more effective in Bombay. The first item in the Council's agenda is the consideration of the Bill, clause by clause. There isn't any hope, at this stage, of amending the Bill to the liking of the public.

* * *

In the matter of gambling, which is to come up before the Council, Bombay is expected to have a full debate on the Bill to amend the Bombay Prevention of Gambling Act of 1887. Bombay has acquired the gambling habit. Two years ago, Government was urged, in a resolution, to deal drastically with gambling. Sir Robert Bell, the Home Member, admitted that gambling had become a menace ; so, with the support of Government, the Bill is expected to go through the first reading this session ; and thereafter to be passed on to a Committee before re-appearing at the Budget session.

* * *

Another Bill to amend the Gambling Act will be introduced by Mr. J. Humphrey, a non-official European member, to authorise the Western India Turf Club to expand its betting area outside the race courses in Bombay and Poona. Dr. J. A. Collaco has, on the other hand, given notice of the following resolution "This Council recommends to Government to cancel the license granted to the Western India Turf Club and to run the Bombay and Poona races as a Government concern." Gambling, from the bucket shop to the bookmaker, will come in for a thorough overhauling in a series of debates, which ought to prove stimulating and significant.

* * *

Mr. Humphrey's Bill will, if time permits, be given leave of introduction. Mr. Collaco's resolution will be still-born. For, there is gambling and gambling. The tote and the bookmaker cater, in gorgeous environments, under the protection and authority of the law, to the gambling craze of thousands. The Western India Turf Club's turnover runs weekly to lakhs of rupees, involving the ruin or destitution of thousands. High gambling is fashionable ; low gambling is criminal. That sums up the orthodox complex ; and the day is not yet when unorthodoxy will regard the one as criminal as the other. I do not see the point of Mr. Collaco's resolution. Gambling in Government livery will be gambling all the same.

* * *

The unseemly anxiety of Government to rush all sorts of legislation before the beginning of the new constitution is the text of a communication of the Karachi Indian Merchants' Association to the Chief Agricultural Officer in Sind. The official amendments to the Cotton Ginning and Pressing Factories Bill are meant prmarily for Sind. It is difficult to understand the haste to carry through the measure, when Sind will be separated from Bombay and constituted a separate province in a year. The natural and reasonable, thing to do would be to give Sind the opportunity, under the new constitution, to legislate for itself. The Karachi Association is knocking its head against the brick wall of official mentality, its only comfort being that it is going through the experience in the best of company.

* * *

The toll in cash of the communal riots in 1929, is notified by the Chief Presidency Magistrate, who has received Rs. 64,314-13-0 from the Municipal Commissioner as part of the seventh instalment of the total compensation of Rs. 7,54,710 awarded for death, injury, loss, etc. It is proposed to distribute Rs. 50,000 out of the sum received to victims or the legatees of victims. Cash represents the lowest loss of communal violence, which has rent the country in twain.

* * *

Sir Henry Wheeler, Chairman of the Secretariat Procedure Enquiry Committee, Lady Wheeler and Sir James Rae, a member of the Committee, who arrived in Bomay last Sunday, will stay here till November 13 to have informal discussions with the local Government. Sir C. P. Ramaswami Aiyer, who is another member of the Committee, came from Kolhapur to meet his English colleagues. The Committee will proceed to New Delhi from Bombay, and thence to Patna, Calcutta, Lucknow and probably Lahore. Its report will be submitted to the Government of India before Sir Henry sails home on March, 7.

* * *

Family budgets of the working classes in Bombay are among the "revelations" of the statistics of wages, to which I referred last week. In all, 1514 family budgets were collected ; out of which 1469 were accepted for final tabulation ; of which 947 or 64.47 per cent. related to workers in cotton mills. Over 62 per cent. of the families fall within the income group of Rs. 30 to Rs. 60. The average monthly income of the families works out to slightly over Rs. 50, to which men contributed Rs. 39-13-6, women Rs. 4-13-7 and children Rs. 0-0-2, with Rs. 5-6-4 coming in from other sources. The average monthly expenditure is Rs. 45-15-9. Except in the income groups below Rs. 30 and Rs. 30-40, the income is in excess of the expenditure, while in the income group "Rs. 90 and over,, the surplus at the end of the month is about 22.5 per cent. of the income. The wage cuts that have taken place since in the cotton mill industry have lowered both the surplus and the standard of living.

(*Continued from page 1479*).

and the United States. He declared that he would not stabilise until the franc could face the dollar without a squint. Since France is not prepared to devalue, it will take a long time before price levels in France and the United States reach an equilibrium, or before France is swept off the gold standard. In the meantime, there is no question of stabilisation.

There is, indeed, no noteworthy pressure of British opinion in favour of stabilisation. Such strongholds of orthodoxy as the Bank of England and the London School of Economics are, of course, in favour of it. In his recent speech, Mr. Montagu Norman reaffirmed his belief that the City can only work under the gold standard. The predominant majority of expert opinion as well as public opinion is, however, against premature stabilisation.

It is true that both French and American Governments are doing their utmost to persuade the British Government to stabilise. The stabilisation offensive launched out at the League of Nations Assembly in September last came, however, to an abrupt halt when, on the occasion of the International Parliamentary Commercial Conference, Mr. Chamberlain rebuked the over-zealous French delegates who attempted to bring the campaign into our own camp. Since then the French Government has had to realise that in face of Mr. Chamberlain's determination to avoid premature stabilisation, it is helpless. At a luncheon party at the Bank of France in honour of Mr. Morgenthau, attended by the French Finance Minister, the Governor of the Netherlands Bank and the leading representatives of reactionary orthorodoxy in France, such as Messieurs Rist, de Rothschild and Vendel, the conclusion has been arrived at that for the time being it would be futile to try to persuade London to change her policy.

SOUTH INDIA

(From Our Correspondent)

Madras,
November 13, 1935.

The problem of rural and agricultural indebtedness in India is half as old as our epics. Recently numerous attempts have been made to attack this problem both under official and non-official auspices. Everybody who had the energy and public spirit to put his hands to the job, retired with a sense of frustration and more than ever convinced of the almost Himalayan immensity of the whole thing. The Madras Legislative Council has donned St. George's armour, solemnly determined to annihilate the dragon. The Council has just discussed the Debt Conciliation Bill, a measure which provides for the appoinment of conciliation Boards in rural areas. Diwan Bahadur T. A. Ramalingam Chettiar M.L.C., President of the Coimbatore District Urban Bank Ltd., and one of the leaders of the Co-operative movement in this province, explained the provisions of the Bill, in the course of a talk at the Madras Economic Association the other day. He said agriculture had practically ceased to pay the ryot, to whom it is a whole time occupation. The ryot had drifted into a state of chronic indebtedness, having to borrow even the minimum means of his subsistence. As a result 70 to 80 per cent. of ryots sold their lands every 40 or 45 years. Apart from this, people were reluctant to lend money on land. They preferred more liquid investments, like shares and gilt-edge securities.

The number of bankruptcies and consequent execution proceedings had increased and land was coming up for sale on a large scale. A large number of creditors were willing to take 50 to 60 per cent. of the money lent by them in preference to adopting the more expensive and unpleasant course of resorting to courts, if cash was forthcoming. The Debt Conciliation Bill contemplated the establishment of Boards of Conciliation which would bring the creditor and debtor together and effect a settlement by scaling down the debts due by ryots. The Government of Madras had agreed to sanction loans up to Rs. 2,000 in cases in which such a sum would, thanks to Conciliation, suffice for a full settlement. The Government held the view that the Boards would justify their existence only if they had scaled down debts to at least 50 per cent. The total rural indebtedness of the province had been computed by the Special Officer at Two Hundred Crores of rupees.

The authors of the Bill make no larger claim than that it is a measure of temporary alleviation. As a step towards relieving the colossal strain which indebtedness has imposed on inarticulate Rural India, it is welcomed in all quarters.

* * *

The Madras Medical College has just finished celebrating its centenary. The series of functions that were arranged in that connection brought together many distinguished alumni of the institution. Two striking features of the centenary celebrations were the splendid Exhibition which was organised by the college students and the endowment of a sum of Rs. 50,000 by Mrs. Kamala Rangachari, towards scholarships in medical education in memory of her husband. No recent death was more widely lamented in South India than that of Dr. S. Rangachari, and no death affected as many homes, with everybody feeling he had lost his family-doctor. The void in the surgical world which the passing away of this remarkable votary of the medical profession has created, will, in a very material sense, be difficult to fill for quite a long time to come. Mrs. Kamala Rangachari could not have selected a more appropriate method of commemorating the memory of this prince among doctors. Nor could she have thought of a more suitable occasion for the announcement of the endowment than the 101st birthday of her husband's alma mater. With the completion of recent improvements, the Madras Medical College has become one of the best equipped institutions of its kind in this country, and the century of life which it has just completed has been a century of striking progress for the institution.

* * *

The Government of Madras are appointing a committee to examine and report on the necessity of constituting an Electricity Board for the province. An announcement of the personnel is imminent and will probably be made before this appears in print. It is expected that the Law member will be chairman of the Committee. The Secretary, Public Works and Labour department, the Finance Secretary to the Government, and a member of the Board of Revenue will be among the official members of the Committee. The Electricity Board has been very much in the air recently. Now that Major Howard, the Chief Engineer, Electricity is back in Madras after furlough, the preliminaries are likely to be speeded up. While enlightened public opinon favours the establishment of a Board, it has to be remembered that the experience of some countries, where such Boards exist, has not been very happy. The recent report of Major Howard on the working of electric supply undertakings in South India had a rather mixed reception and cannot be said to have created the proper atmosphere for the constitution of the Board. The commencement of Electric Supply from Pykara represents the first stage in the campaign of electrification. The Secretary of State has already sanctioned the Metur Hydro Electric scheme. Arrangements for the erection of the turbine at Metur are well under way. With the commencement of distribution of electrical energy from Metur, South India will enter on an era of plentiful supply of cheap power. This will only increase the responsibilities of the Electricity Board now in contemplation. It remains to be seen if the Board will succeed in quickening the pace of industrialisation in South India, by a wise distribution of energy at reasonable rates, without seriously prejudicing the interests of the numerous electric supply companies which have functioned so satisfactorily in South India. The importance of popular representation on such a Board is paramount. The Board must steer clear of the danger of being dominated by the Government department of electricity and succumbing to "expert technical knowledge" stunts.

* * *

An interesting point of law is being argued by Mr. V. V. Srinivasa Iyengar in the course of the case against Messrs. McIver and K. S. Narasimhachari. The point is whether a Broker can mix up his client's money with his own in the course of his business. In the opinion of this distinguished lawyer this can be done and in some cases is inevitable and cannot constitute a criminal offence. He has invoked the authority of a House of Lords decision in support of his position. In fact, a broker can not only mix up client's money with his own, but can pay it into his bank account in reduction of his overdraft without being guilty of any criminal offence, and this position is again well-supported by well-known judicial decisions. In the exigencies of a broker's business he has sometimes to pay his sellers before receiving payment from buyers and sometimes receives payment from buyers before he pays the seller, though the former happens more often. In a case where the broker pays the seller before receiving payment from the buyer, he pays money out of pocket and sometimes overdraws his account and pays heavy overdraft interest. He has, therefore, a moral justification for compensating such losses in the course of his business by applying any money he may receive from a buyer towards reduction of such overdrafts. The broker generally keeps what may be called a common till, into which he puts his own money, the money he may receive from clients against buying orders or against securities already purchased and out of which he pays his sellers and his own expenses. There is a good deal of common sense if no more in

(*Continued on page* 1509)

CHINESE CURRENCY REFORM

HOW IT IS VIEWED IN LONDON

FUTURE OF SILVER

By Dr. Paul Einzig

Special for "INDIAN FINANCE"

London, Nov. 4.

The dramatic rapidity, with which the Chinese currency crisis developed towards the end of October, led to currency reform measures of momentous importance which took London completely by surprise. It was expected that Sir Frederick Leith Ross would take some time to conclude his investigations and that it would be months before his report became public; that the publication of the report would be followed by endless diplomatic negotiations between Great Britain, the United States and Japan and that in China itself the partisans of various reform measures would engage in endless controversy as to what part of Sir Frederick's report should be adopted. Instead, the Chinese Government took the bull by the horns and acted when least expected. After all the Prime Minister was just gravely wounded by a would-be assassin. The Nanking meeting of the Central Council of the Kuomintang had just begun, and it is unlikely that the Government would place it before a *fait accompli*.

Apparently, however, the speculative attack launched against the Chinese dollar forced the hands of the Government. The origin of this speculative attack was the circulation of rumours according to which Sir Frederick Leith Ross advised the Government to devalue the dollar. There is reason to believe that these rumours were entirely without foundation, since Sir Frederick has had no opportunity as yet to come to any definite conclusions, and in any case, according to the original arrangements he was to consult Japan before he advised the Chinese Government. The Government was utterly helpless in face of the speculative attacks since it possessed no resources with the aid of which it could support the currency. Nor was there any possibility of raising such resources by means of an external loan.

In the circumstances, the only way in which the Government could possibly raise resources for the defence of the exchange was by the seizure of privately-owned silver stocks. In this respect, it had but to follow the precedent created by the United States in 1933. Viewed from the point of view of the Government's desire to control the exchange, the seizure of the silver stocks is the most important part of the currency reform measures. Indeed, all the rest was only adopted in order to facilitate this task. The emergency measure was taken owing to the situation that had arisen through speculative attacks, and not as a result of fundamental considerations. Notwithstanding this, it is possible, and on balance probable, that China has done the right thing for the wrong reason. Rather than hesitate for years and wait for a good opportinity, which may never occur, she has been driven into a long overdue currency reform.

Whether or not the Government will be successful in carrying out the reform depends on two main considerations. The one is whether it will be able to sieze a large amount of silver for the defence of the exchange. The other is whether the population will accept in payment the notes issued by the Chinese Central Bank. Regarding the first, the task of the Government will be by no means easy. To a large extent, its efforts may be frustrated by smuggling and hoarding, although a certain amount of silver held by banks and other corporations, whose activities can easily be controlled will have to be surrendered. An even more important question in the long run is whether the public will accept the bank notes. In this respect, experience in other countries with somewhat similar conditions is not altogether discouraging. On more than one occasion, it was possible to introduce paper currency in countries where the population was used to metallic currency. In Turkey, for example, notes of the Central Bank are now generally accepted in every part of the country. What is more, in China there have always been local paper currencies and the only question is whether the inhabitants will be prepared to trust the Central Bank to the same extent as they trusted the local merchants.

The text of the decree issued by the Government does not in itself indicate the monetary policy to be pursued. The dollar is to be stabilised at its present level but it is not stated in relation to what its stability should be maintained. It cannot be in relation to silver since the course of most of the trouble was the instability of the white metal. The choice lies between gold and sterling. There is good reason to believe that the Chinese currency will be kept stable in relation to sterling, and China will thus become a member of the Sterling Bloc. This is only natural since most of the commercial and financial intercourse of China is with Great Britain, Japan and other countries of the Sterling Bloc such as the British Dominions. Politically also the only solution, which would not arouse the hostility of the Japanese Government, would be to secure the stability of the dollar in terms of the yen.

There can be no doubt that the Chinese currency reform constitutes the most important change in the international monetary situation since the suspension of the gold standard in the United States. Its importance lies in the fact that the largest of the remaining silver-using countries has decided to demonetise silver. This move paves the way for the establishment of a really uniform international monetary system, more uniform than it was before the war when half of the world was on a silver basis. This does not mean, however, that the Chinese move will lead to the complete demonetisation of silver. Indeed, the United States authorities have gone too far in their silver policy to be able to back out without suffering disastrous losses. They will have to maintain the arrangement by which silver is to be used to a limited degree as note cover. It is possible that other countries may follow this example, especially if the price of silver is not raised to too high a level.

This brings us to the question of how the price of silver is likely to be affected by the Chinese reform measures. In this respect, it is necessary to discriminate between the short view and the long view. There can be no doubt that in the near future there will be heavy selling of silver as a result of smuggling. Since the price paid by the Chinese Government for silver which is to be nationalised is rather under the London market price, the chances are that smuggling will be done on a large scale. The London market will be flooded, but it is probable that the United States Treasury will continue to absorb the supplies at its official buying price. Following upon this spell of heavy selling, the Chinese supplies will dry up since the Government will have seized a large part of the silver stocks. In the long run, however, part of the silver seized by the Government is bound to come to the market. In defence of the currency the Government has to sell silver, and besides it will probably be desirous of converting part of its holding into gold.

All depends upon the attitude of the United States authorities in face of the changed situation. There can be no doubt that the Chinsse measures will cause immense disappointment in Washington, though the United States Government has only itself to blame for having brought about a situation by its ruthless silver policy which led to the demonetisation of silver in China. It is conceivable that, confronted with the change, the United States Government will not only abandon its idea raising the price of silver to 1.29 dollars, but many even lower its buying price. For this reason, the Chinese reform has to be regarded in the long run as a bear point for silver.

STABILISATION RECEDING FARTHER

CHINESE REFORMS & SILVER OUTLOOK

BRIGHT PROSPECTS OF PERMANENT SHARES

By **Francis Williams**

City Editor: The "Daily Herald," London

(By Air Mail)

Special for **"INDIAN FINANCE"**

November, 4.

The recent sharp upward movement in prices reflects the ease with which Stock Markets in their present state will quickly respond to even the most meagre items of favourable news.

Until the General Election is out of the way, any sustained movement in one direction or the other can hardly be looked for, despite the fact that it is evident that investors will easily be led away by favourable news of any kind.

Coming as it does on the eve of the election, the Government plan for expending £30,000,000 on railway development is obviously a vote-catching piece of propaganda. Taken in conjunction with the five-year road plan, the railway scheme involves a total annual expenditure of only £26,000,000.

Such expenditure is not sufficient to bring any real prosperity back to this country. The late Sir Basil Blackett urged the expenditure of at least £350,000,000 over three years, if any real attack was to be made on unemployment.

Considerable difference lies between the two proposals.

I am glad, although such ultra-conservatives as Mr. Neville Chamberlain and Mr. Montagu Norman remain adamant, that other sane people and institutions are realising rapidly the necessity for freedom from the Gold Standard.

In its review, the Federation of British Industries comes out definitely against a return to gold. The Federation realises that it is impossible for a community dependent to any important extent upon import and export trade to pursue a policy of maintaining the domestic level of incomes and prices and to offer an automatic international Gold Standard.

The decision of the Chinese Government to abandon the silver standard and to replace silver currency by a note issue is, in my opinion, a definite answer to the argument that China would find increasing prosperity through a rise in the international price for silver.

While there is no doubt that the abandonment of silver by China is a serious matter for the Silver Market the price of the metal is not likely to fall to any material extent, owing to the United States Government being committed to its silver buying policy.

American Gold Stocks are growing larger, with the result that purchases of silver must continue at an increasing rate. Otherwise the plan of keeping gold and silver bullion stocks at a fixed ratio will be disorganised.

The rise in the price of spot and forward silver following the announcement of the Chinese Government indicates that speculators are fully cognisant of the position. In my view, the silver market may shortly reach a dangerous stage.

War, we know, no longer pays. But preparation for war certainly, it would appear, provides some very handsome profits for a few people.

Thus I find from an examination of the share movements of a representative list of armament shares, including Vickers, and various Naval shipbuilding concerns such as John Brown, Cammell Laird, Harland & Wolff, Swan Hunters and various others, that there has been a rise of just over 125 per cent. in share values this year.

As a result, the market valuation of the publicly dealt in shares of these concerns have increased by over £14,000,000.

When one adds to this that successful share dealers in aircraft shares, together with the promoters and vendors of the nine new aircraft concerns, which have been publicly issued during the past seven months, have cleared up between them a total profit in the neighbourhood of another £15,500,000 one cannot be surprised that the "National" Government is popular in the City.

As the "National" Government believes in still more armaments, its popularity is likely to continue.

For the moment, however, even dealers in armament shares are holding their hands until they see how the electorate generally responds to the scare that our Naval, Army and Air Forces are inadequate; and that if we want peace we must acquire more battleships and bombing planes with which to go hunting for "Her."

Until the Election is over there is not much likelihood of settled markets and the ordinary investor will be well advised to go slow.

Despite the general belief that some sort of a deal is being done with Mussolini, the International horizon is by no means clear yet and a big armament programme in Britain is hardly likely to improve it.

Investors will, therefore, be well advised on the whole to stick to absolutely safety-first securities for the time being, unless, of course, they want to try and secure some of the future armament profits, in which case they should probably buy shipbuilding shares.

OVERSEAS' NEWS: By Air Mail

Week ended Nov. 2

GREAT BRITAIN

VOTERS' VERDICT

The general election is in full cry. Party programmes and party broadcast offer voters a variety of recipes for the cure of economic, social and political ills. Not that there is much variation, except in the packing of the recipes. The programmes of the Government and the Opposition differ in degree rather than kind. To seek peace and to safeguard it is the main common plank on which Conservatives, Liberal and Labour wave the same election flag with the same vim. The Labour Manifesto is an unexpurgated text of the Government gospel of industry, agriculture, housing and education. It advocates the abolition of the National Air Forces and, in the same breath, emphasises its intention to maintain such forces as become Britain as a senior member of the League of Nations—a policy which Mr. Baldwin is placing before the public. The Liberal Party, a small voice in a Babel, has adopted the technique of a questionnaire which would resolve immediately the woes of the voter. The "public ownership" appeal figures in the Labour manifesto more as a concession to the past than a guide to the future.

Unlike five years ago, Government have not asked for a blank cheque. Their detailed election programme is composed of selected items from all parties, a national wrapper which covers a multitude of contrarinesses. Britain must peg her fidelity to the League, but re-arm quickly and efficiently. The Special areas are treated with a promise that financial considerations will not stand in the way of any practical scheme. Slums will be energetically cleared: how, it is not stated. The extension on a voluntary basis of contributory pensions to those outside the present cover is offered, along with the regularisation of Unemployment Assistance Arrangements and the raising of the school leaving age to fifteen. And voters are left guessing as to whether the proposals are Labour, Liberal or Conservative.

Government may be said to be confident of reelection, though their chief spokesmen, not excluding Sir Samuel Hoare and Mr. Baldwin, have had a hot, rather than a warm, reception in their own constituencies, while Mr. Ramsay MacDonald developed a defensive language that reminds one of Mr. Lloyd George's Limehouse speech. There is no denying that Government can point to a record which will have a vote-snatching quality. That the record is not the reward of patient labour or constructive planning will not worry the voter. Labour will capture a good many constituencies which in 1931 were solidly Liberal and secessions from the Conservative fold are indicated. Reading the present indices, one is tempted to forecast a Government majority of not more than a hundred and fifty.

The kaleidoscopic character of the Anglo-French-Italian relations was very evident last week. London, Paris and Rome were big with high diplomacy. Quai d'Orsay asked Mussolini to define his peace terms. The Director, in the first flush of success, wants Italy to acquire control, by mandate or concession, over all non-Amharic Ethiopian territories, specially those bordering on her own colonies: Ethiopian armaments to be effectively controlled and the League to accept responsibility for Ethiopia's fulfilment of her obligations under the Covenant. The British and French Governments have rejected them on the ground that they are not acceptable to the League or Abyssinia, which throws the onus on them to formulate alternative terms. So Monsieur Laval and Sir Samuel Hoare, with Mr. Anthony Eden in attendance, are exchanging views with the Italian Ambassador in Paris. Meanwhile Abyssinia is crumpling up before the Italian army of conquest and the League is contemplating ways and means of applying economic sanctions.

The Chancellor of the Exchequer, addressing a large gathering of business men in the City, promised that the new National Government will conduct the finances of the country in such a way as not to impair confidence. There would be no "first-class financial crisis", and the Government would continue the policy it has pursued of continuously looking out for opportunities for helping industry to help itself. Referring to the suggestion for a "Prosperity Loan", the Chancellor said: "While it is useless and absurd to raise a loan bigger than is necessary for the particular purpose that you have in mind, the question of finance has never been a difficulty ever since we have been left in office." There was no reason to suppose, he added, provided there was no disturbance of the public mind, that during the next four years the country might not anticipate safely further steady progress in the same direction. But what would happen if power passed to a Socialist Government? "The price of securities" answered Mr. Chamberlain, "would drop like a stone and I believe in all probability it would be impossible to sell securities at all. London to-day, by the wise and prudent administration of the Bank of England and the joint stock banks, as the financial centre of the world, would be instantly drained of foreign money."

The demand for steel has developed so rapidly that supplies are becoming scarce; and prices are likely to be raised in the near future. The position is indicated by the fact that, in addition to the amounts permitted to enter the British market under the cartel arrangements, the British Iron and Steel Federation has purchased a larger quantity of semi-finished Continental steel. The productive capacity of the British steel industry was established a few years ago at about 12,000,000 tons of ingots per annum. Since then new plant has been erected and improvement schemes have been carried out. It is impossible, however, to run all productive units consecutively and concurrently. Furnaces must be put out of blast periodically for repairs and rolls in the mills must be changed.

The recent meetings in London between British and Continental steel representatives did not reach any final decision. It is believed that sufficient progress will be made before January 8, when the present reduced steel duties lapse, to justify a continuance of the lower scale. In informed circles it is said that, even should normal negotiations prove to be very protracted, no reversion could be made to the old trading system. There is every prospect of an international thin sheet cartel being formed before the end of the year.

A broad hint to coalowners to put their house in order was given by Mr. Ramsay MacDonald in an election speech at Caxton Hall, Westminister, at a conference of National Labour leaders. Declaring that National Labour would secure new markets and give all the help it could to the miners' claims for an increase of minimum wages, he urged closer contact between owners and miners. Much of the unsettlement, he said, would be removed if the lower cost of production and the increased value of coal could be made to contribute increases to the miners' incomes. If the coal owners wanted further powers to put a stop to "suicidal internal competition," Mr. MacDonald said those powers would be given, and central selling agencies would be established, by legislation, if necessary. "The industry must take steps to reorganise itself," he declared, "and the Government would give every help it could."

Coming to the question of the Government's attitude towards trade barriers, Mr. MacDonald said that the channels of world trade are so obstructed by the pursuit of nationalist economic policy that steps should be taken at once to make it possible to arrive at an international economic agreement which would revive international trade. The first condition of any reorganisation of industry is that economic stability and confidence should not be destroyed. There are, according to him, two main lines of advance:—

(1) In monopoly and semi-monopoly industries the number of public corporations should be extended. For this there is a model, not only in the British Broad-

Air Mail Week

casting Corporation, but in the London Passenger Transport Board, first planned by Labour, but, when they deserted it, carried through by the present National Government.

(2) In non-monopoly industries, reorganisation cannot be effected solely by Government action from outside the industry. The cry of 'nationalise everything' solves no problem. The best results are achieved when the State from without and industry itself from within co-operate for increased industrial efficiency.

The Government have already used this method in varying degrees and forms with encouraging results in relation to the steel industry, tramp shipping, the textile industry and agriculture. These experiments must be carried further and industries must be assisted by State encouragement and direction to organise and modernise themselves.

U. S. A.

FOREIGN POLICY

The League of Nations has the unqualified support of the United States Government in outlawing war. This was made clear to the Co-ordinating Committee of the League in an important State despatch which indicates American foreign policy and its limitations. Secretary Hull assured the Committee that the United States will "at all times not only exercise its moral influence in favour of peace throughout the world", but will "contribute in every practical way to that end." The despatch concludes with a declaration that the United States "views with sympathetic interest the individual or concerted efforts of other nations to preserve peace or to localise and shorten the duration of war". This endorsement of the League's policy and action will materially and morally strengthen the cause of collective peace. The time may come (it seems sure to) when the question of a blockade of Italy may emerge. In his speech at Wolverhampton, Mr. Baldwin said that Great Britain would not participate in a League blockade unless assured of the "sympathetic support" of the United States, Japan and Germany. Of the three, the first and, in this case, the most important, has given an authoritative assurance ; and, while it is too early to speculate on the ultimate attitude of Japan and Germany, the lead of the United States may prove to be the decisive factor.

Further, Mr. Hull's despatch re-infoces the British Premier's view on the difficulty of localising any war under modern conditions. When Mr. Hull reiterates the text that "war . . . . even threatens the existence of civilisation," reading into it the interpretation that an outbreak of war in any part of the world is everybody's concern, he goes as far as he can. The despatch commits Washington, not only to avoiding doing anything which might create difficulties for the League, but to discouraging American nationals from attempting to exploit the League's sanctions against Italy for private profit. This form of exploitation, in regard to oil, is taking place in the States and Mr. Hull's declaration ought to check, if not kill, its growth. Economic sanctions, which will be applied by the League on and from November 18, would prove infructous were supplies to pour in through unregulated channels. On that account alone, Mr. Hull's despatch will be oil on troubled waters.

Wall Street's one theme of conversation, since Mr. Guy, President of the Stock Exchange, predicted "inflation" as an eventuality, is inflation. Some speak of inflation in terms of crash ; others in terms of making hay while the sun shines. Autumn business, though not on the level of midsummer forecasts, is much better than in 1934 and there are no indications of a sliding down of the upward trend of prices. Which explains why, in spite of doleful shakes of the head, no business is being run on the basis of inflation.

The visible trade balance for September is passive to a sum under 1,200 million dollars. Gold and silver equal the total of merchandise imports and mechandise trade was practically in balance. The silver imports of September (44 million dollars) were unusually large, challenging the popular view that the "silver programme" is in abeyance. Although the financial community in general favours stabilisation, the use of the word, curiously enough, confuses issues. Actually the continuation of the *de facto stability* between the dollar and the sterling is taken for granted.

On his return to Washington President Roosevelt made an encouraging survey of the economic position and prospects of the country. He said that employment is now back at the November 1930 level, and that next month would see a great majority of employable workers back in work. The Government intended to provide work this winter for all employables who had not got jobs in private industry. Turning to agriculture he indicated that the Administration's agricultural policy was more and more aiming at securing agricultural stability, and less and less at raising prices. He promised that the Administration's agricultural programme would continue, despite the improved position of the farmer. The A. A. A. would now stimulate as well as curtail production where necessary.

FRANCE

RADICAL-SOCIALIST CONGRESS

By all tokens the month, that is ahead, may prove to be the most critical in the life of the Laval Ministry. For one thing, the period, during which M. Laval enjoyed the extraordinary privilege of administering the country by decrees, is now over. Whatever he wishes done now must be done strictly according to constitutional procedure. The international situation has not showed any signs of the tension easing off. Caught between the rival allegiances of faithfulness to the League and its principles, friendship towards England and a pro-Italian policy, M. Laval's hesitancy has become proverbial. The Cabinet patched from all the political sections, shows signs of wearing off. The economic situation, to add to all, does not show signs of health, in spite of the decree-laws. Prosperity is still far off, and the only result, the decree-laws has produced, is the formation of the new Agriculturist Party with its own grievances. The French Budget may again, in all probability, become the major item of interest, judging from the steady fall in revenues. Nor is the Treasury position very cheerful. The limit, prescribed for the issue of loans, has been reached, and the technical position of the Treasury is none the stronger. The Treasury's balance with the Bank of France is barely sufficient to cover a few days' requirements. There has been no noteworthy dishoarding or repatriation of French

funds, if any conclusion can be drawn from the figures of gold reserves or those of bank deposits and savings bank deposits. To crown all, the legislature is to meet shortly, and M. Laval is to obtain ratification of the Parliament to his decrees.

There are already signs to show that the political parties are bestirring themselves to activity. The question of sanctions has given them the opportunity to align themselves into distinct camps. The Left Party is opposed to M. Laval's pro-Italian policy. The socialists and communists are drawing towards a closer union and the Radical Socialists. One is also not opposed to indentifying themselves with the Popular Front for purposes of election. Only a week or two ago, there were rumours current in Paris that M. Mandel, the "strong man" of the Cabinet was preparing to form a cabinet, that he would become the Minister of the Interior, and that he would deal with the Croix de Few with the ruthless energy, characteristic of his master M. Clemenceau. Whatever may be the truth underlying this rumoured formation of an iron-fisted Mandel Cabinet, it gives sufficient indication that M. Laval's National Government is not so secure in power. M. Laval himself, perhaps, had felt which way the wind is blowing. This anxiety for the safety of his position cannot fail to be traced, when, in the recent senatorial elections, he stood for two constituencies the Seine (Paris) and the Puy-de-Dowe departments. His success from both the departments, has, of course, revealed that the voters still retain their trust in his as conductor of the difficult foreign policy of France.

The Radical Socialist annual congress, that has now ended, may verily be said to have given a fresh lease of life to M. Laval's Cabinet for considering the fact that two cabinets have been destroyed, as a result of an ultimatum from the Party Congress, and that, on this occasion, no less than six Radical Socialist members of the present cabinet were present in the conference. The session must be considered to have ended quietly. The congress, with its eyes on the general elections six months hence, unanimously agreed on the re-election of M. Herriot, as President of the Party. Among the resolutions passed, were these calling on the Government to go further than it has hitherto done in putting down the "intolerable activity of factions and leagues openly preparing for civil war", referring thereby to the various Fascist organisations, which have become more militant in the past few weeks than ever before. The bitter attacks against the United Kingdom and the League, and the open pro-Mussolinian propoganda have become only too pronounced. The pungent articles in *Gringoire*, the weekly, that claims the larger circulation, is only a sample of its kind. The Radical Socialists have, therefore, demanded that the first Act of Parliament in the coming session, even before the budget debate shall take place, shall be the one providing for the might to dissolve league and the prohibition of all semi-military exercises even on private estates. Another resolution calls for a revision of M. Laval's economic decrees in the direction of greater equity, fiscal reform on democratic lines, suppression of the private sale of arms, the reform of the Bank of France and the modernisation of the Parliamentary procedure to ensure greater governmental stability. In monetary policy, the congress declared itself favourable to the 'stability of the currency on the national and international field". New reduction in taxes is urged, and inflation is rejected summarily.

That the annual congress of one of the important Political Parties should have ended so tamely is a silver lining in the cloud ; but that is not to say that M. Laval can count on the support of the Radical-Socialists, when the Finance Bill comes up for discussion. The Finance committee of the chamber finally agreed to examine the Budget Bill at once, but its Left Wing members without rejecting the decree-laws are finding fault with the economies and proposing new means of raising revenues. This agitation has just received an illustration in the resolution passed by the Finance committee in favour of the restoration, to those with low incomes of the 10 per cent. reduction imposed by the July decrees on the wages of State employees and on Public Debt coupons and also of the cancellation of the 10 per cent. reduction from State pensions. Whether the chamber will endorse the committee's action is another matter.

Whatever M. Laval's faults may be, he can be depended upon to act according to circumstances without alienating the sympathies of all shades of opinion. The great maxim, on which his success has been based in home and foreign politics, is "keep in with everybody." He has issued a last batch of decree-laws just before the expiry of the privileged period given to him, about 300 in number, which are mainly concerned with the remedying of fiscal and administrative defects or anamolies. These also include measures for the defence of sheets, for the complete re-organisation of the Ministry bondholders and for the publication of company balance-sheets, for the complete re-organisation of the Ministry of Commerce and for the restoration of departmental and municipal finances. Taken along with some 200 decrees already promulgated, M. Laval can claim, within four months, to his credit about 500 decree laws, all of them involving immense and unremitting labour, some of them calling for courage and imagination. They have involved the nation in heavy sacrifices upon almost every class of population, and have broken all precedents in arbitarily modifying private and public contracts. But, how admirable these would have been, had the economic position of the country advanced, even at a snail's pace! M. Laval would have been hailed as the Saviour of the nation and national finances. Unfor-

tunately, the era of decree laws will only prove to be another of the many experiments, tried by the Powers that be. The courage and fortitude, with which the nation bore the brunt of this special legislation, have been to no purpose.

PALESTINE

ECONOMIC PROGRESS

The report of the British Commercial Agent at Haifa gives some glimpses of the rapid progress made by Palestine since 1928. It also serves to strengthen the belief that the minor countries have been less seriously affected by world slump. An undeveloped country, Palestine is rapidly acquiring all the amenities of modern civilisation and industrialisation; and this is evident not only from the interest taken by the foreign governments to monopolise the Palestine markets for their own products, but also by the increased overseas trade. In Palestine pounds the export and import position is as under:—

Imports	1931 £	1934 £
Imports	5,940,000	15,150,000
Exports	1,570,000	3,220,000
National Revenues ...	2,334,000	5,452,000

On June 30, 1935, the Government had accumulated a surplus of £5,587,837. United Kingdom imports rose from about £1,000,000 in 1931 to about £3,000,000 in 1934. In addition to British goods, the Japanese are fully exploiting the potentialities of this market and a trade delegation from Japan also visited Palestine recently. There has been a great increase in the number of immigrants, bringing in its train considerable investments. Public security is well maintained. Increased building activity for housing, commercial and industrial purposes has brought new settlements into being and many towns have thus been enlarged, suburb by suburb. The rate of progress seems to be steady and from the trend of events, the flow of immigrants seems to be increasing with the imports and exports. Palestine is now turning her attention towards developing the industries. Many of the foreign companies have thus found a vast scope for their enterprise and organisation. To mention only a few, the progress made by the public utility concerns like the Jerusalem Electric and Public Science Corporation and the Palestine Electric Supply Corporation, is marked. The potentialities of the newly floated Palestine Potash Company are really great; and that the English banks are only too well aware of these. That further investment opportunities will be offered to finance utility and industrial concerns, the Commercial Agent's Kingdom have established their sales outposts in Palestine; and, doubtless, many more are on the way. Last, but not least, is the attempt made to co-ordinate the Road and Rail communication in the country. A sum of £1,120,000 is to be spent on improving the railway system if the proposals made by the British experts are adopted. With a better co-ordination of the communication, and spread of electric and power supply companies, the country must be able to take more rapid strides towards industrialisation and general economic prosperity.

the House of Lords decision invoked by Mr. V .V. Srinivasa Iyengar.

Mr. Hamid Khan has been unanimously elected Mayor of Madras. The convention was after all saved by the rival candidate Mr. Basher Asmed agreeing to withdraw his candidature a few minutes before the election, thanks to the intervention of the outgoing Mayor and some fellow councillors. Times out of number, members of the City Council recite the copy book maxim it is undesirable to import politics into civic affairs. But the atmosphere of a mayoral election is sadly surcharged with the politics of the province. Civic affairs constitute a thin sheet of transparent ice under which can be seen the strongest of political undercurrents. Whoever wants to skate on that thin ice,—whoever aspires for high civic office,—must be familiar with the fact that very often, if not invariably, the ice cracks under the weight of his office. And when it does happen, he must know how to swim skilfully with the political undercurrent. Once at least the Mayoralty of Madras was given away as a consolation price to a gentleman who ran for a Ministership of the province and failed. The offer was accompanied by a polite hint that he should not at any time renew his efforts to secure ministerial office. Needless to adds the gentleman kept his word. Mr. Hameed Khan belongs to the Congress group in the City Council and has been a popular Councillor for quite a number of years. Many a paper scheme remains pegionholed in the archives of the Corporation. It is up to Mr. Hameed Khan to see that some of the more beneficent schemes are implemented.

JUTE AND JUTE GOODS

JUTE

Calcutta, November 14, 1935.

During the earlier part of the week the jute market has been quiet on reports of larger imports in the upcountry centres. Speculative activity in the *Fatka* market was stagnant, prices receding to as low as Rs. 37-2. On Tuesday a sharp rise was recorded on reports of arrivals in mofussil falling off and owing to the decision of the Association mills to work 54 hours a week from 1st April next failing our agreement with outside mills on a uniform basis. There was a stampede of speculative buying in the futures market and prices were pushed up to Rs. 40 on the 13th instant. At the time of writing the market is excited, the price of December delivery *Fatka* touching Rs. 40-4.

There was practically no business done in the market. Mills were out of the market and foreign buyers too took very little interest.

Arrivals in the mofussil earlier in the week showed signs of increase. Though prices showed a slightly easier tendency, with the decrease in arrivals during the latter part of the week, the market recovered. Sellers were reserved and prices have once again gone up.

In the loose jute section very little business was done. A small business with Mills was reported on Rs. 6-2 basis per maund for Indian Jat 4's. Towards the close the market was very firm in sympathy with the futures market. Sellers were reserved and were quoting on the basis of Rs. 6-4 per maund for India Jat 4's.

The Pucca Bales section ruled quiet throughout the first half of the week. A small business in Daisee assortment for Outports was reported at Rs. 32 per bale. Towards the close of the week prices firmed in sympathy with loose jute and a strong *fatka* market. Business reported was negligible. Small lots of Hearts for ready shipment at Rs. 28-12 and Short Group ready Daisee for Dundee at Rs. 35-12 were done with shippers.

JUTE MANUFACTURES

Calcutta, November 14, 1935.

The outstanding event in the Hessian market during the week under review was the decision of the Indian Jute Mills Association regarding their future policy. At a meeting of the Association held on November 11, the following resolution was unanimously passed :—

"That the requisite three months' notice as required by Clause 3(*b*) of the Agreement dated January 21, 1933, and made between the Association and the outside mills be given to the Adamjee Jute Mills Ltd., the Agarpara Co., Ltd., the Gagalbhai Jute Mills Ltd., the Ludlow Jute Co., Ltd., and to the Shree Hanuman Jute Mills, of the intention of the mills in the membership of the Association to release from seal and put into operation, as on and from Monday, February 17, 1936, the remaining five per cent. of the total complement of looms of each mill or mill company in the membership of the Association which at present has looms under seal."

In addressing the meeting the Chairman said that the Committee have decided to recommend to the Association that, in the event of no agreement being reached on a uniform basis of restriction with the outside mills before the end of December, the Association mills would enter into an agreement among themselves to work 54 hours a week as from April 1, 1936.

It is believed in market circles that the possibility of an agreement with the outside mills would be very remote and that the Association would find it inevitable to decide working 54 hours a week. If unrestricted production is resorted to by all the mills, the results will be disastrous and prices of hessian may go down to unprecedently low levels.

The market has been dull and easier during the week under review. Towards the close the downward tendency was checked and prices recovered slightly in sympathy with a strong jute market.

Foreign demand has been negligible. A noteworthy feature in the market was the offer made by American buyers to sell back November nines and elevens in the Calcutta market. Consumption in America during October was reported to have amounted to 69 million yards which is very encouraging. Stocks in the United States are reported to have gone up by 15 million yards at the end of October, as compared with the previous month.

Forward positions were completely neglected owing to the uncertainty regarding the future policy of the industry. Business reported was small and confined to ready and near positions only. 11 Porters sold at Rs. 10-10 to Rs. 10-12 for November shipment, while 40 in 8 oz. ready delivery was done roundabout Rs. 9.

Heavy goods were dull and easier, but towards the close a slightly steadier tendency was in evidence. No business of importance, however, was reported. D. W. Flour bags were done at Rs. 27-6 November/December. Cornsacks for November delivery sold at Rs. 23-4.

Total reported sales for the week ending Saturday, the 9th November, 1935.

JUTE BREVITIES

Improvement in Norwegian Jute Trade & Industry.

As compared with the previous year, the Norwegian jute trade shows marked improvement in 1935. Imports of grey jute cloths into Norway during the first 8 months amounted to 3,791 tons or 733 tons more than in 1934, and importations of sewn sacks rose from 972 tons last year to 1,169 tons.

The jute industry also shows considerable improvement which can be ascertained by the increasing imports of raw jute. The total imports of raw jute for the first 8 months of this year amounted to 852 tons. Imports during August alone amounted to 227 tons, which is a third of the total imports of the preceding 7 months.

Competition of Paper Bags in Austria.

The Austrian Jute industry is now faced with a serious danger of competition of Paper Bags. An Association interested in the advancement of the wood and paper trade has put in a demand to the Government that all agricultural products should be packed in kraft paper bags. The Association reckons that the annual consumption of paper bags would reach 20 million bags, representing 10 million kg. of kraft paper and 55,000 cubic metres of wood. It is claimed that 80 per cent. of the cost of production would be distributed by means of wages among 2,800 workers.

New Jute Company for Switzerland.

A new Company by name Sack & Jute A. G., has been formed to carry on trade in yarns, used and new sacks, manufacture of sacks and all other transactions connected therewith. The Share Capital amounts to 10,000 francs.

500% Increase in Canada's Jute Consumption.

Imports of jute and jute butts into Canada during 1934 show an increase of about 500 per cent. as compared with the previous year. Imports during the above year amounted to 47,472 cwt., as compared with 10,301 cwt., in the previous year. During the period from 28th June, 1934, to the end of the year imports of yarns, rovings and warps of jute totalled 259,882 lbs., valued at $19,654, of which no less than 251,703 lb., valued at $18,892 were from Great Britain, 8,067 lb. of the remainder coming from the United States.

Jute Exports for October.

According to the returns received by the Department of Commercial Intelligence and Statistics, the total export of raw jute from Bengal during October amounted to 329,235 bales of 400 lbs. each, of which 317,548 bales were exported from Calcutta and 11,687 bales from Chittagong.

The total exports from Bengal in the months of October, 1933 and 1934, were 376,034 and 354,749 bales, shipments from Calcutta having been 342,647 and 330,008 bales respectively.

COTTON AND COTTON GOODS

COTTON

Calcutta, November 14, 1935.

The most important event during the past week in the cotton markets is the publication of the United States Bureau Report on November 8. The general expectations in the market circles were for a reduction of about 150,000 bales in the outturn from the previous official report, owing to damage caused by frost in Oklahoma and Texas. But the Bureau placed the crop at 11,141,000 bales, showing a decrease of 343,000 bales. The yield per acre was decreased to 186.1 lbs. as against 191.5 in the previous month. The ginnings till the end of October were declared to be 7,750,000 bales as compared with 6,590,000 ginned up to October 16.

The report was considered to be very bullish and the acme of speculation was witnessed in all the markets. The price of Broach April/May in Bombay now stands at Rs. 14 higher than the closing rate of last week. On receipt of the Bureau estimates, excited trading was witnessed in the market and there was a stampede for buying. As a sequel the price of Broach jumped up to Rs. 220. On the following days there was nothing to obstruct the steady upward march of Broach April/May touched Rs. 227-4 and closed at Rs. 225-12.

The prices for Bengal and Oomra also advanced steadily. Bengal was quoted at the close at Rs. 157 as against Rs. 149 last week. Oomra has registered an increase of Rs. 11-4 as compared with last week, closing at Rs. 208.

The reduction of over 300,000 bales from the available supplies, which have been rapidly depleted by spinners' takings and large exports and a huge amount of cotton held off by the Government, have rendered the statistical position of American cotton very strong. Besides the smaller ginnings as compared with the corresponding periods for the last four years have raised doubts in certain quarters that even this reduced crop might not be realised. On the publication of the Bureau report the market assumed a definite bullish tendency and prices advanced rapidly. Heavy trade buying continued to absorb all sales at advancing rates. As compared with the closing rates of last week Middling spot has registered a rise of 65 points at 12.00. December improved to 11.61 as against 10.96, while March closed at 11.47 as against 10.78 a week ago.

Active trading was witnessed in Liverpool. Covering by short interests and buying of a general character on receipt of the bullish American crop report steadily pushed up prices. There was heavy trade buying throughout the week. Middling spot, December and March closed at 6.62, 6.40 and 6.35, as compared with the previous week's closing rates of 6.40, 6.15 and 6.09 respectively. In anticipation of the imposition of sanctions Italy has been buying actuals in Alexandria on a large scale, as a result of which a firm tone was noticed in the Egyptian section in London. Sakel spot further advanced to 9.73, but closed at 9.68, while March closed at 8.69, touching 8.81 on the preceding day.

U. S. COTTON CROP REPORT

Washington, Nov. 8.

The Crop Reporting Board of the United States Department of Agriculture issues the following estimates in its fifth crop report of the 1935 season. The Bureau of the Census of the Department of Commerce also issues its seventh ginning report of the season as given below :—

Season		Production 1,000,500 lb bales	Yiēld per acre lb	Ginnings prior to Nov. 1, 1,000 running bales
1935	...	11,141	186.1	7,750
1934	...	9,636	170.9	7.920
1933	...	13,047	208.5	10,359
1932	...	13,001	173.3	9,247
1931	...	17,095	211.5	12,124

The October estimate of production was 11,464,000 bales.

In the corresponding report of 1934 production was forecast as 9,634,000 bales.

The next crop report will be issued on December 9.

Imports of non-Indian raw cottons into India during the first six months of the current financial year (1st April to 30th September, 1935), were valued at Rs. 4,51,42,300, compared with Rs. 2,31,84,000 and Rs. 2,21,07,000 during the corresponding terms in 1934 and 1933 respectively.

PIECEGOODS

Calcutta, November 14, 1935.

The sharp rise in the price of the raw material during the past week has been an encouraging feature in the piecegoods market. Manufacturers had to increase their prices but buyers were holding off from the market and were unwilling to effect purchases at higher rates. Trade in cold weather styles continues active but buying on an extensive scale is yet to be reported. It is feared in market circles that unless substantial clearances are effected during the next few weeks, a heavy carryover is inevitable.

In the Lancashire section, sales were of a retail character. Small lots of white dhooties, mulls and nainsooks changed hands.

Sales in Japanese goods have suffered a set-back. The forward position has been practically neglected while small lots of grey and white shirtings and artificial silk fancies sold at unchanged rates.

In the indigenous section, a moderate turnover resulted. Among the transactions of the week were grey shirtings, white shirtings and some fancy dyed goods.

The yarn section has been dull and very little business passed. Though prices have advanced in sympathy with the raw material market, buyers showed no disposition to enter into fresh contracts at the advanced rates.

The market has been quieter in Bombay. Though prices have slightly advanced in sympathy with the advancing cotton market, business has been on a very limited scale. It must be remembered that a record sale has been effected during the "moorat" season and naturally a lull after such heavy buying is to be expected. Operators are holding off from the market and are covering their urgent requirements only. Sales in British goods are unsatisfactory. Prices are steady for all descriptions. Movements in Japanese section were very slow. Clearances from stocks in retail quantities have been possible at slightly easier rates. So far as indigenous goods are concerned, business of a bulk nature was quite absent. Negotiations for forward sales are afoot, but so far nothing has been reported.

Reports from Ahmedabad say that about 40,000 bales of local mill cloth have been sold for *moorat* transactions Slackness in demand is now experienced particularly because of the quieter political conditions in Europe. The demand in upcountry markets is also extremely poor. Merchants are disposed to satisfy their urgent requirements only and wait till December when the mill-agents would be anxious to dispose off their stocks at reduced rates.

British exports of cotton piecegoods to India during September—were only 37,300,000 square yards against 44,500,000 square yards in August and 60,500,000 square yards in September last year. In the three months ended June, India imported 133,000,000 yards of cotton piecegoods from Lancashire and 136,000,000 yards from Japan whereas in the corresponding period of last year the imports from Lancashire exceeded those of Japan by 40,000,000 yards. In July Lancashire, with 33,000,000 yards, had an advantage of 8,000,000 yards over Japan against that of 13,000,000 yards in July last year, while in August this year Lancashire's advantage was barely 2,000,000 yards as compared with over 27,000,000 yards in August last year. Imports of all kinds of Japanese goods except dyed cloth were larger in August than was the case a year ago and with one exception, at Lancashire's expense all kinds showed gains in favour of Japan.

BULLION

GOLD

Calcutta, November 14, 1935.

The gold market evinced a dull and uninteresting session throughout the week. Fluctuations in prices were practically absent. Both sellers and buyers abstained themselves from any active operations. The turnover of business was very small. Prices at the close were slightly better as compared with the previous week's closing rates, ready and first settlement quoting Rs. 34-15-6 and second settlement being unquoted.

Stocks in Bombay are unchanged at 75,000 tolas. Daily arrivals averaged 10,000 to 12,000 tolas and the offtake remains unchanged at about 3,000 tolas a day. Imports during last week amounted to Rs. 2,68,550 in bar and coin.

The price of gold in London dropped from £1-1-5½ per fine ounce to £7-1-3½ in consonance with the fluctuations in cross rates. At the close the market was steady and the price improved to £7-1-6.

The Sterling-Franc rate improved from 74.65 to 74.79 on the 9th instant receding stedily to 74.72 at the close. In the like manner the Sterling-Dollar rate moved from 4.92 11/16 and 4.92 1/16, closing at 4.92 5/16.

Gold valued at Rs. 6,430,770 was exported from Bombay to Europe and America to-day.

The total value of the gold exported since England went off the gold standard now amounts to Rs. 2,513,524,989.

The following are particulars of 17 bars of gold despatched to the Bombay Mint weighing 12.974.67 oz., valued approximately at Rs. 12,15,118, being the output of the following mines during the second half of October, 1935:—Mysore Mine 3,874.22 oz. at Rs. 3,62,646; Champion Reef 2,598.40 oz. at Rs. 2,43,379; Ooregum 2,073.62 oz. at Rs. 1,94,363; Ooregum and Nundydroog joint a/c 530.56 oz. at Rs. 49,607; Nundydroog 3,897.87 oz. at Rs. 3,65,123; Total 12,974,67 oz. at Rs. 12,15,118.

The total exports of gold from U. K. during the week ended November 1, 1935 amounted to £1,545,000 of which £1,237,000 was shipped to the United States and £226,000 to the Netherlands. The total imports of the metal into U. K. during the same week amounted to £2,263,000, of which £1,782,000 was shipped from Africa and £324,000 from India.

As a result of the rapid development of the gold mining industry in Western and Northern Australia, the gold yield for 1935, it has been officially estimated, will be nearly

£10,000,000. Production in Western Australia alone is expected to reach £6,000,000. Australia's total production in 1934 was 887,000 fine ounces valued at £7,536,674.

SILVER

Calcutta, November 14, 1935.

Conditions in the silver market have been quiet but steady during the week under review. In the absence of any stimulating news operators preferred to hold off from any active operations and hence business was restricted. The market assumed a steady tone on the 9th instant on receipt of Shanghai advices that the Chinese Government has placed an embargo on exports of silver from China. This factor was considered bullish by the dealers and on certain speculators appearing as buyers, prices rose, first settlement spurting up to Rs. 66-12. A further advance of 2 annas was registered on the following day. The tendency was easier at the close. Both Ready and first settlement receded to Rs. 66-4, while second settlement was quoting Rs. 66-8.

The effect of the silver decrees in China is beginning to be felt in the silver markets. The Chinese Government has raised the export duty on silver from 6¾ to 57½ per cent. based on Sterling at 1-2½d. per Shanghai Dollar. It is reported that note reserves in China banks have fallen by 48,650,000 dollars since June 30. By passing such decrees silver has been nationalised in China and the fixation of the exchange rate at 1-2½d. will tend to help the export trade of China and at the same time check excessive imports.

Stocks of silver in Bombay is unchanged at 35,000 bars. Arrivals are almost negligible while the offtake is about 7 to 10 bars a day. Total imports during last week amounted to Rs. 60,221 in bars and coin.

The price for spot silver in London has been steady at 29 5/16d. There has been a good deal of speculative buying and selling in forward, which fluctuated irregularly between 29 3/16d. and 29 1/16d., closing at the latter rate. Sales on China account have been practically nil during the week. America continued purchasing spot silver at steady rates. India has been holding off from the market throughout the week.

In New York the spot rate for silver was unchanged at 65 3/8c. The London-Shanghai T. T. dropped from 1—2 9/16 to 1—2½.

The total exports of silver from U. K. during the week ended November 1, 1935 amounted to £1,381,000 of which £1,369,000 was shipped to the United States. The total imports of the metal into U. K. during the same week amounted to £502,000 of which £367,000 was shipped from Japan.

TEA

CALCUTTA AUCTIONS

Calcutta, November 14, 1935.

There was rather more tea included in the export sale at Calcutta on 11th instant, when the total packages submitted for sale amounted to about 25,400, of which 21,400 packages sold at an average price of Rs. 0-9-3, as compared with Rs. 0-8-6. Quality generally was on the same lines as in the last sale with slight improvement in some Assam descriptions. There was a fair general demand at a slight lower level of price, and a certain amount of leaf tea was withdrawn under bids of 3 to 6 pies below last rates, while brokens were irregular and slightly easier.

At the auctions of teas for internal consumption on November 12, the total offerings amounted to 16,000 packages, of which 9,500 were Dusts and the remainder leaf and other grades. All descriptions of dusts met a steady demand at last week's rates. Among other grades, commonest descriptions were occasionally easier to buy, but there was a good general demand at about last prices.

The following are the full particulars of sale No. 22.

LONDON AUCTIONS

The total offerings at the London sales for the week ending November 14, amounted to 55,400 packages of Indian, 20,100 of Ceylon and 4,600 of Java teas.

Indian Tea.

At the auctions of Indian Tea on November 11, the total number packages submitted for sale amounted to 29,900 packages. There was a good general demand and although low priced teas opened with a rather easier tendency it improved and was about steady on balance above the shilling market. Higher grades were irregular and rather uncertain. There was a good demand for mediums. The export demand was not quite satisfactory.

Ceylon Tea.

At the auctions on November 12, a slightly lower tendency was witnessed. There was a little easier buying but it was unquotably lower. Medium and good teas were lower by a farthing to ½d. per lb. Gannings generally sold well. The export demand has fallen off.

Java & Other Teas.

At the auctions on November 7 of Java and other teas (including Sumatra) 4,700 packages were submitted for sale. There was a fair demand at rather low rates.

Tea Average.

The following were the average prices of tea in the London market during the week ending November 7 as compared with the previous week:—

	Week Ending Sept. 12 lb.	Week Ending Sept. 19 lb.
Indian Tea (Northern) ...	14.00d.	13.32d.
Indian Tea (Southern) ...	12.42d.	12.31d.
Ceylon Tea	15.69d.	15.03d.
Java Tea	11.89d.	12.18d.
Sumatra Tea	10.12d.	9.42d.

SUGAR

Calcutta, November 14, 1935.

The local sugar market remained quiet but steady during the past week. Demand has depreciated much and prices are slightly easier as compared with those ruling a week ago. Java Refined Ready and Steamer have declined to Rs. 10-9-0, while Java White Ready and White Steamer are quoted at Rs. 10-8 and Rs. 10 respectively. In the Desi section White (1st Crystal) is quoting Rs. 10-4 to Rs. 10-8, while Brown (2nd Crystal) closed at Rs. 9-14 to Rs. 10-2.

In Bombay, the Market has been easier during the week. Owing to the approaching arrivals and the absence of further war complications had a quietening influence on the market. The publication of the second forecast of the sugarcane crop in India showing an increase of 234,000 acres in the areas as compared with last year, further accentuated the downward tendency of the market. Outside parties are selling heavily at reduced rates. Last week's business amounted to 1,000 tons.

The Java market is reported to be unchanged at F 4.20 with very little business passing.

The Cawnpore market ruled dull with sellers more anxious for business. Prices have declined by 1 to 2½ annas. No business of importance transpired.

Arrivals of about 3,600 tons of Java and 2,500 tons of Mozambique sugars are expected during the next three or four days.

Stocks in the main ports are:—

(In bags: 10 bags=1 ton.)

	1935		1934	
Calcutta ...	(7th Nov.)	14,948	(9th Nov.)	34,800
Karachi ...	(8th Nov.)	9,500	(9th Nov.)	65,000
Madras ...	(4th Nov.)	15,000	(5th Nov.)	22,500
Rangoon ...	(4th Nov.)	8,180	(5th Nov.)	15,240

In their second forecast of the sugarcane crop in India, the Government of India estimate the area sown for the 1935-36 season at 3,679,000 acres, as against 3,445,000 acres, the corresponding revised estimate of last year, or an increase of 7 per cent. The detailed figures for the provinces and States are as follows:—

Provinces and States	(In thousands of acres) 1935-36	1934-35	Increase (+) or Decrease (—)
United Provinces (a) ...	2,010	1,836	+174

MISCELLANEOUS

WHEAT

Calcutta, November 14, 1935.

The local wheat market remained quiet during the past week. Prices are a shade easier at the close. Stocks at Calcutta have increased and now amount to 1½ lakhs of bags and stocks in upcountry centres are also on the large side. These factors, together with weak foreign advices, had a quietening influence on the market. Punjab and Cawnpore Ready closed at Rs. 3-9-3 and May Beta at Rs. 3-9-6.

In Bombay, prices declined by 3 annas for January Delhi-Cawnpore. Business was very restricted as operators were not inclined to enter into any commitments at present. Delhi-Cawnpore January closed quiet but steady at Rs. 4-11 and May at Rs. 4-10-9.

Advices from Karachi are in no way encouraging. The market has developed an easier tendency there, owing to absence of buying support, lower foreign cables and large November Notices. The easier feeling was further accentuated by the N. W. Railway notification suspending the increase in Railway freight rate on wheat which were proposed to be levied as from December 16 next. November contract has declined steadily during the week to Rs. 24-6-3. Trading interest was very poor. Spot sales last week totalled about 3,000 bags which were purchased by local mills. Calcutta shippers were practically out of the market. Arrivals from upcountry averaged 4,000 bags per day, while last week's shipments totalled 54,724 bags. Stocks are slightly increased at about 2½ lakhs of bags.

The import and export figures of wheat for the three main British Indian ports as given in the *Indian Trade Journal* from April 1 to November 9, 1935, as compared with the corresponding period last year are:—

Import.

	(In tons) 1935		(In tons) 1935	
	Indian	Foreign	Indian	Foreign
Calcutta ...	142,975	...	146,740	2,968
Bombay ...	103,265	...	104,888	...
Karachi ...	205,569	34	303,140	...

Export

	1935	193
Calcutta	11	73
Bombay	959	719
Karachi	5,189	8,806

The markets outside India are weak. It is reported that in the United Kingdom the crop in 1935 was estimated by the Wheat Commission at 33,580,000 cwts., as against 37,375,000 cwts in 1934 and 33,440,000 cwts in 1933. The price for Rosafe Percels have declined by 6d. in London, while Australian wheat has registered a further decline of 1s. 6d. for November delivery, closing easy at 28s. 6d. In Chicago, the market has been steadily declining throughout the week. December and May contracts closed at 94 3/8c. and 95¼c., as against 97 3/8c. and 96¾c. respectively a week ago.

Shipments up to November 9, 1935 amounted to 9,414 chests.

MADRAS MARKETS.

PIECEGOODS

Madras, Nov. 13.

The Piecegoods market has been quiet, and prices are barely steady with the result that forward business is still in abeyance. Though *Deepavali* clearances have been disappointing this year stocks are on the light side. It is expected that Upcountry dealers will enter the local market very shortly in connection with their *Ramzan* and *Pongal* requirements. The Yarn market has ruled dull and prices for Japanese and Indian yarns have eased off. Demand for Manchester yarns is poor though prices remain steady. No forward business is reported.

METALS

The market has continued to move on the down grade. Owing to lack of demand from upcountry buying centres and the predominence of anxious sellers in Madras, prices have declined further and are now nominally quoted at Rs. 150 per Candy of 500 lbs. for Yellow metal sheets and Rs. 180 per Candy for Copper sheets. English Yellow metal sheets are quoted at £44-10 for November shipment and "Ditmann" at £40-15. Copper Sheets are now quoted at £53-7-6 against £52-17-6 last week.

GROUNDNUTS

The Groundnut market has collapsed, and prices have on balance, declined by nearly 10s. per ton in the course of the week. Opening at £13-15 November sellers and £13-8-9 December sellers, London quotations for Coromandel machined declined to £13-10 November sellers and £13-2-6 December Paid in mid-week. Towards the end of the week, prices dropped further to £13-7-6 November sellers and £13 December sellers. Shippers' buying limits opened at Rs. 33-8 and Rs. 34 for Machined and Rs. 28-8 and Rs. 29 for Ordinary, per French candy of 531 lbs. ex-coast godowns. Prices declined sharply at the end of the week to Rs. 30-12 to Rs. 31-12 for Machined and Rs. 26-4 for Ordinary (Per French candy, ex-coast godowns). At Vizagapatam, the new crop has begun to move and free arrivals are expected in about a week's time. The quality is reported to be "Fair average." At Pollachi, *Rose* quality machined is quoted at Rs. 30-14 to Rs. 31 and *Red* quality Machined at Rs. 29-14 to Rs. 30 per French candy, ex-Pollachi godowns.

The standing crop in Tiruvannamalai area (North Arcot) is reported to be in excellent condition and harvesting will begin at the first arrival of rains. The crop in the Guntur area will be ready for the market in about a week. The standing crop in the Kondapuram area (Ceded districts) is also reported to be in good condition owing to the timely rains during the growing period. Altogether, the out-look is bearish, and we look forward to lower prices when the Main Winter crop begins to move.

The Kernel freight market has been quiet with practically no tonnage offering and shippers uninterested in space at the present high rate of 32s. 6d. per ton of 20 cwts. quoted by Owners for November/December shipment to North continental ports. No further Charters are reported.

Arrivals of Groundnut kernels into Madras for the week ending November 9, 1935 amounted to 14,567 bags or 1,147 tons against 16,362 bags or 1,288 tons in the preceding week and 4,525 bags or 356 tons at the corresponding week of last year.

HIDES AND SKINS

The speculative activity has spent itself, and the Tanned Cow Hide market has developed signs of weakness both here and in London. Heavy offerings in London and selling pressure in Madras have caused buyers to hold off the market. It is rumoured that the present switch-back in the market is partly due to the bear operations of Indian speculators. London bids for Kips are now lower by ½d. at 11½d. for 7/7½ lbs., 11d. to 11½d. for 8/8½ lbs. and 13d. for Prime Lights. Locally prices have declined all-round by nearly 6 pies per lb. Very little business has transpired during the week. Tanners hold large stocks of both Raw and Tanned Hides and the prospects of any upward movement in values seem remote for the present. The Raw Hide market has kept firm, as the season for Dry hides has not commenced and as stocks are low in the centres of production. There has been no quotable change in prices for Wet hides at Cawnpore and Calcutta. A steady demand from London has continued for Tanned Buffalo hides, though prices show an easier tendency. Supplies of Tanned Buff Calf are limited and there is very little doing in this section. The demand for Tanned Cow Calf has been good but prices have now moved in buyers' favour. The market for Tanner Goat and Sheep is fairly steady with a good enquiry from the Home market, but at prices below Madras parity. Clearances in the local market have been satisfactory.

The following shipments of Hides and Skins were made from Madras to Europe and America during the week ended November 7, 1935:—To the United Kingdom: Tanner Cow hides 574 bales, Tanned Buffalo 20 bales, Tanned Cow Calf 34 bales, Tanned Buff Calf 10 bales, Tanned Goat 173 bales, Tanned Sheep 76 bales, To U. S. A.: 55 bales Tanned Buffalo.

DODGE

TRUCKS

Dodge Trucks are famous the world over for their dependability and ability to carry on day after day under all conditions. Dodge Trucks are designed for trucking purposes alone. They offer the power, the stamina and the flexibility so necessary in trucking operations. Extra strength where strength is needed, ample power when power is a necessity and a host of features which mean long life and minimum maintenance cost are the attributes of these outstanding truck units. Let us show you that a Dodge Truck can save your money.

Investor's Supplement

Vol. XVI. No. 19 SATURDAY, NOVEMBER 16, 1935 Price Re. 1

LONDON CITY CIRCLES DISCUSS CHANCES OF EARLY PEACE

PROBABLE MARKET REACTIONS

By R. Gordon Cummings

The following discussion of Mr. Cummings on prospects and reactions of early peace will be furnishing a useful and helpful lead to investors in India.

Having previously given a fairly accurate forecast of market reactions to the then growing menace of the Italo-Abyssinian crisis, I am now going to venture an opinion on the possible trend of markets should early peace be consummated.

Hopes of an early settlement of this unfortunate dispute have already given rise to a wave of investment buying. The set-back at the close of October was not so much due to a definite feeling that peace will not be eventually arrived at, but more to the fact that many investors, and the Stock Exchange in particular, overlooked the temporary unsettlement bound to arise during the General Election.

If improvement can take place on the bare hopes of a settlement, what will happen should the dispute be quickly cleared up?

MARKETS STRONG

(By Special Cable)

New York, November 14.

Utilities and Motors were higher.
The market closed strong and active.

At this point I must digress. The market having now appreciated the near approach of the General Election, with its consequent uncertainty, has, on occasions, felt like calling a temporary halt in activity until the result is known. Whatever our personal opinions may be, it appears to be certain that the National Government will be returned to office, but whether with a large majority or not I am unable to forecast. Accordingly, until this obstacle is out of the way there is not likely to be any sustained rise in markets.

Gilt-edged stocks have recovered a fair part of previous losses. It appears that a further upward movement will be seen before the end of this year. A restraining influence on recovery to the previous high levels of this year will be, however, the much mooted "Defence Loan," which, judging by Mr. Baldwin's opening Election speech, is an early certainty should the National Government be returned.

I look, therefore, for moderate recovery in Government and similar stocks over the next two months.

Some weeks ago I suggested that British Government and kindred stocks were again worth buying. Subsequent market movements have proved this advice to be welltimed.

Below I give a table showing the highest and lowest prices of representative stocks during the current year, together with the quotations on October, 28:—

Stock.	High	Low.	Oct. 28th.
Consols 2½%	94¼	80	83½
Conversion 3½%	113	100½	104¾
,, 4½%	114⅜	108	110½
,, 5%	124½	115¼	117¾
Funding 3%	106	98	101
War Loan 3½%	110	101½	103⅝ x.d.
Local Loans 3%	98	89	93
India 2½%	86½	66¼	71
,, 3%	95¼	76	82½
,, 3½%	100½	90	95
,, 4½%	119½	113	113½
,, 5%	117	112	114
Australia 4%	111¾	104	107
,, 3¾%	105	99½	102
,, 3½%	104¾	99	101½
,, 3¼%	99½	95½	96¾

Current prices, be it noted are slightly below the best of recent weeks. I have already pointed out above that there is room for further moderate recovery in British Government stocks.

I must emphasise, however, that not only do ***India*** and *Australian* loans give higher yields, but they offer greater scope for appreciation and probably less room for a sharp fall.

MARKETS STRONG ON ELECTION OPTIMISM

(By Special Cable)

(From R. Gordon Cummings)

London, November 14.

Markets are strong on election optimism.

Peninsular Oriental and Steam Navigation Company passed deferred dividend.

Calcutta Electrics were weak following investigation.

Australian stocks in particular are under-valued. Investors have recently been somewhat nervous as to the outlook for that great country. The recent upward movement in commodity prices has meant a great deal to the Australian community. The prices of wool, meat, butter and all agricultural produce have moved up in a manner which should mean a large increase in the favourable trade balance of Australia. Output of her gold mines is, moreover, rapidly on the increase. Production of gold is forging steadily ahead and with the rapid opening up of new mines a big increase in exports is bound to accrue from this most important source.

(*Continued on page 1527*).

Worth-While Investments :

INDIA

A GOOD CONCERN IN A GOOD GROUP

KATNI CEMENT AND INDUSTRIAL COMPANY

(By "Watchdog")

Cement shares both in India and England have been highly prized by investors; and most of them have justified this strong support. Katni Cement is an outstanding concern in this category.

It has an influential board of directors consisting of prominent industrialists and leading businessmen. The managing agents are Messrs. C. Macdonald & Co.

The record of the company during the last eight years has been very satisfactory. A glance at the table given below will prove it. The dividends declared are high.

Year ended. Mar.	Profit.	Depre-ciation	Allocations to funds.	Carry forward.	Dividend %. ord.
1927	9,19,391	6,30,000	...	12,290	...
1928	8,11,539	4,67,600	...	34,845	11
1929	9,24,968	2,74,743	2,35,000	13,948	15
1930	8,81,001	1,80,756	1,75,000	1,03,071	15
1931	5,60,594	2,02,237	15,000	10,306	15
1932	4,82,434	65,000	...	20,300	14
1933	6,64,723	2,00,000	...	20,218	16
1934	6,15,360	1,55,000	...	15,906	16
1935	6,80,716	1,10,000	50,000	14,577	18

The capital structure of the Company is rather complicated. The capital authorised, issued and subscribed is Rs. 30 lakhs. Preference capital First Issue is Rs. 5 lakhs and Second Issue Rs. 10 lakhs in 7 per cent. preference shares of Rs. 100 each less 19 shares forfeited during the year ended March 1934. The dividend on both classes of preference shares is cumulative and the shares rank in priority to the ordinary and deferred shares in respect of repayment of capital in case of liquidation. The dividend on the first issue is subject to income-tax whereas on the second preference shares the dividend is free of income-tax. The ordinary Capital is Rs. 14,34,200 in 14,342 shares of Rs. 100 each fully paid up. These shares are entitled to a non-cumulative dividend of 8 per cent. per annum after the cumulative dividend on the preference shares has been met and to a further dividend of 50 per cent. of the surplus profits of the company after the payment of a non-cumulative dividend at the rate of 25 per cent. per annum on the deferred capital. The deferred capital is Rs. 62,400 in 1,560 shares of Rs. 40 each. The amount received against ordinary and second preference forfeited shares of Rs. 1,275 is added to this. These shares are entitled to a non-cumulative dividend of 25 per cent. per annum after the cumulative dividend of 7 per cent. has been paid to the holders of preference shares and the non-cumulative dividend of 8 per cent. has been paid to the holders of ordinary shares. The deferred shares are also entitled to 50 per cent. of the surplus profits of the company after the above dividends have been met.

The company was formed primarily to acquire the mining and other rights of the Bombay Prospecting and Mining Syndicate to manufacture Portland Cement. Later on, other industries were also included in the company's operations *viz.* manufacture of titles, fire-clay, French Chalk etc. The company also manufactures coloured cements of various shades.

The total funds are Rs. 13,11,500, Rs. 12 lakhs in General Reserve; Rs. 1,10,000 in Dividend Equalization Fund and Rs. 1,500 in provision for bad and doubtful debts. The figures remain at the same level as the previous year.

Sundry liabilities are Rs. 3,73,500 against Rs. 3,38,003.

On the assets side, the gross block of Rs. 55,05,684 has been depreciated by Rs. 40,33,412 to Rs. 14,72,272. This is much below the total paid-up capital.

Stores are Rs. 5,79,190.

Stock-in-trade is Rs. 4,87,118.

Outstandings are Rs. 5,18,037 against Rs. 7,16,960 in 1934.

Investments are Rs. 16,94,259 against Rs. 8,70,265 in the previous year. These have nearly doubled. Part of the large cash balance at the end of last year has been invested in securities and in shares of allied cement companies. Rs. 10,53,665 is in Government of India securities and Rs. 6,40,596 in other industrial assets.

Cash and other balances are Rs. 7,44,615 against Rs. 14,53,223.

The total liquid assets are Rs. 37,91,840.

The profits for the year ended March 1935, after providing for income-tax and super-tax with surcharge and before depreciation, are Rs. 6,80,716 against Rs. 6,15,360 in 1934. Rs. 1,10,000 against 1,55,000 has been set aside for depreciation and Rs. 50,000 against nil has been transferred to the Reserve Fund. The dividend has been maintained at 16 per cent. but a bonus of 2 per cent., both free of tax, in addition has been declared. The dividend on deferred shares of Rs. 83-8-9 is the same as last year but a bonus of Rs. 18-6-3 has also been declared. The carry-forward is Rs. 14,577 against Rs. 15,907.

At the present price of around Rs. 365, the yield is 5 per cent. tax-free on the ordinary shares and that on the deferred share at the price of around Rs. 1,850 is 5.5 per cent. also tax-free. This must be reckoned a good yield for a good concern in a good group.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

British Assurance Expansion.

An interesting development during the week has been the acquisition by the *London Assurance Company* of a controlling interest in the *Clive Insurance Company* of Calcutta. Messrs. Gillanders Arbuthnot & Co., the Indian managers for the London Assurance Company and also for the "Clive," are, it is understood, to continue to act as managers for the combined businesses.

London Assurance is one of the leading companies in Great Britain, the paid-up capital being £1,662,337, while the total assets at December 31st, 1934 were £16,622,448. All kinds of insurance business are transacted by the company, which maintains branches in most of the Dominions and the United States of America.

* * *

Indian Gold-Mining Progress.

The quarterly development and progress reports of the four Indian gold-mining companies under the management of John Taylor & Co., are now to hand. These cover the quarter ending September and it should be noted that working profits are in each case above those of the June quarter. The figures are given before providing for the royalty payable to the Mysore Government on profits, income tax, depreciation and other appropriations from net revenue. The figures are:—

Ooregum—Gold sales (at an estimated price of £7. 0s. 9d. per ounce), less 5 per cent. royalty, £85,800. Adding sundry revenue of £1,900, and deducting working costs (including development) and London charges of £73,200, the estimated working profit is £14,500, compared with £14,300 in the June quarter. Capital expenditure amounted to £2,100.

Mysore—Gold sales (at an estimated price of £6. 19s. 9d. per ounce), less 5 per cent. royalty, £158,500. Adding sundry revenue of £1,500, and deducting working costs (including development) and London charges of £91,800, the estimated working profit is £68,200, as against £64,600 in the previous quarter. Capital expenditure amounted to £11,200.

Nundydroog—Gold sales (at an estimated price of £6. 19s. 10d. per fine ounce), less 5 per cent. royalty, £185,550, to which is added sundry revenue of £700, making £186,250. After deducting working costs (including development) and London charges, net profit £92,600, as against £87,300. Capital expenditure was £3,400.

Champion Reef—Gold sales (at an estimated price of £6. 19s. 10d. per ounce), less 5 per cent. royalty, were £114,000. Adding sundry revenue of £900, and deducting all working costs and London charges, the estimated working profit was £45,700, compared with £44,700. The dump re-treatment plant was finally closed down in August. Expenditure on capital account was £250.

Announcements of some of the Indian Railways provide the main source of interest this week. I feel certain that the remarks of the Chairmen of two of the Railway Companies will be of interest, more particularly their comments on the continued competition from road transport.

South Indian Railway Meeting.

Dealing with the constitutional changes in the Government of India, Sir Ernest A. S. Bell, C.I.E., Chairman and Managing Director of the *South Indian Railway Company*, pointed out that the Secretary of State had consulted the representatives of the Indian Railway Companies at various stages, and the necessary clauses to safeguard their interests had been embodied in the Act. In his opinion these safeguards contained adequate protection for the interests of shareholders.

The Chairman added "Moreover, a contribution from the Government share of any surplus from Indian railway revenues was an important part of the Federal financial structure. It was reasonable to expect, therefore, that the Statutory Railway Authority, in whose hands would rest the administration of Indian railways on a commercial basis, would endeavour to the best of its ability to produce a surplus—a policy which should, of course, bring concurrent advantage to the stockholders of Indian railway companies.

"Competition from road motors continued without abatement and so far little of advantage to railways had emerged from the conferences that had been held to consider this question generally, but they hoped that the appointment of the Transport Advisory Council would result in the formulation of such rules for the licensing, upkeep and general control of road motors as would put both forms of transport, road and rail, on a fair basis for competition.

"Traffic in the Madras electrified area continued to expand, and there was no doubt that the whole electrification scheme had been of great value and convenience to the public."

As regards results of the railway for the current year, Sir Ernest said that unless a very substantial improvement in the second half-year took place they would have to expect a further reduction in dividend next year.

* * *

Assam Railways & Trading Meeting.

Referring to the interests of *Assam Railways and Trading* in the railway question, Mr. E. A. A. Joseph, the Chairman, pointed out at the Annual Meeting that so far as the Company's system was concerned the revenue account showed, as anticipated, very definite improvement in earnings in all the important items of goods traffic. The only heading under which there had been a falling off was in passenger traffic. In the passenger department the railway was working under very considerable difficulties.

He added "The experience of the railways in England was being repeated in India. So far, little if anything had been done by Government to co-ordinate the traffic, or to protect the railways from what was often hardly a legitimate competition from motor traffic. Unfortunately the improvement in the railway earnings was more than covered by an increase in expenditure, chiefly in the locomotive and carriage and wagon department, with the net result that the profit on the railway was down by £2,000."

The interests of this Company are, fortunately, not confined to railway transport, these being spread over various industrial enterprises which have done reasonably well during the past year. In referring to prospects for the current year, Mr. Joseph stressed the fact that the future was inextricably linked with that of the tea industry, which had not had, in the past year, as good a season as most of them had hoped.

His remarks on the outlook for tea are brief but to the point, for he said "Now it was doing very much better, and many people were of the opinion that the steps taken by the industry were having their full effect, but there must be a certain effect on their own company, so, while the position from that point of view was hopeful, he did not wish to indicate any immediate results."

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Friday Nov. 15, 1935.

The main feature of the Week at the Calcutta Stock Exchange was the firm tone in Government Securities, with 3½ per cent Papers soaring to Rs. 95-6, due to strong London advices, and it is anticipated that this steadiness will be maintained inspite of the fact that the European situation continues to be in the same position as before. The information available of the conflict in Abyssinia, is as fragmentary as ever, and contradictory to each other, and the general public have started to ignore it altogether.

In other sections there was little change noticeable. The Indian Jute Mills Association has decided to release from seal the remaining 5 per cent. of the looms of each mill in the membership of the Association as on and from February 17, 1936, and to work 54 hours with all existing machinery in operation as from April 1, 1936, unless some settlement is arrived at with the non-member Mills before the end of December, 1935. If no such settlement is arrived at, it is feared that the result of 54 hours per week working of the mills with all the looms opened, will lead to such over-production, that the total turnover will be something like 17½ crores of yards per month, and the accumulation of stock will be to the extent of a figure between 3 and 4 crores of yards per month. In case, however, some sort of a settlement is arrived at between the Association and the non-member mills before December 31, 1935, then all the mills will work according to the agreement made, and the situation will be saved. Owing to this decision of the Association raw jute prices moved up to Rs. 40, and it is believed that coupled with the fact that the Government is making attempts for restriction, prices of same may go up further. Under the circumstances, taking a long view, the position of the industry is very uncertain, and a careful watch over the share market should be kept.

The money market was in the same unsatisfactory position, and Reserve Bank rate continued at 3½ per cent.

Government Securities.—The rise indicated last week, continued, and 3½ per cent. G. P. Notes moved up to Rs. 95-6, at which it closed. During mid-week a slight reaction in these papers was noticed apparently due to profit taking, and on Wednesday after touching Rs. 95, gradually eased down to Rs. 94-10. New Loan 1951/54 was marked at Rs. 99-12, 3½ per cent. 1947/50 at Rs. 104-9 and 4 per cent. 1960/70 had buyers at Rs. 110-8. Medium dated loans still continue to be scarce. There were a few sellers for 5½ per cent. loan 1938/40, but these were quickly absorbed, the rate closing at Rs. 108-14.

Debentures.—Quite a good business was recorded on Thursday, especially in Calcutta Port Trusts, which included 4 per cent. 1915/75 at Rs. 103-6, 4 per cent. 1908/38 at Rs. 103, 4 per cent. 1912/42 at Rs. 105 and 5 per cent. 1957/87 at Rs. 115-4. Of the Calcutta Municipals, a small lot of 4 per cent. 1933/50 changed hands at Rs. 106, 1925/55 (6½ per cent.) at Rs. 131. and 1928/58 (5 per cent.) at Rs. 115-4. Among others, 4 per cent. 1935/55 Mymensingh Bhairab Railways closed at Rs. 103-4, 5 per cent. 1933/43 Presidency Jutes at Rs. 102-8 and 5½ per cent Chowringhee Properties at Rs. 98-12. A lot of C. I. Trust 3½ per cent. 1935/65 changed hands at Rs. 96-8.

Preference shares.—A good demand for all the better class Jute mills issues was in evidence, but sellers were scarce. Business included Ballys at Rs. 141, Empires at Rs. 147 (small lot), Craigs at Rs. 62, Dalhousies at Rs. 149 and Kinnnisons at Rs. 152-8. Among others, Bengal Telephones improved to Rs. 14-5, B. I. Corporation changed hands at Rs. 146 (small lot), Calcutta Trams at Rs. 14, and New Victorias at Rs. 5-5.

Other investment stocks.—A sharp rise in the Imperial Bank fully paids was recorded, which closed at Rs. 1,573, against a quotation of Rs. 1,525 of last week. Contributories were also in good demand and a small lot changed hands on Thursday at Rs. 393. Reserve Banks continued very firm and after minor fluctuations closed at Rs. 125-8. Central Banks were a shade easier, having closed at Rs. 34-8 as against Rs. 34-12 of last week. Ballygunge Banks again came to business around last week's figure of Rs. 103. Enquiries for Railway shares continued, and the transactions included Dehri-Rohtas at Rs. 11-4, Hardwar-Dehras at Rs. 118, Kalighat-Falta at Rs. 91-8 and Bukhtiarpur-Behars at Rs. 60. In river transit companies Bengal-Assams closed at Rs. 217-8, and Calcutta Landing and Shippings at Rs. 14-4. In Insurance Companies Concord of India came to business after a long time at Rs. 10-6 premium and New Indias closed at Rs. 41-12. Tritons were crossed at Rs. 223.

Cottons.—The activity noticed last week in New Victorias, continued on strong rumours of re-arrangement of Agency, and the prices moved up to Rs. 1-10 at which it closed. Apart from this, little alteration in prices was noticed, Kesorams closed at Rs. 3-8.

Coals.—Enquiry in this section continued on a very small scale, and there is little chance of prices going up. Some of the good shares are no doubt somewhat steady, but many others have come down to very low levels. Transactions were reported in Amalgamateds at Rs. 21-4, Bengals at Rs. 259, Burrakurs at Rs. 12-8, New Beerbhooms at Rs. 12, Equitables at Rs. 36, and Bansras at Rs. 4-2. New Manbhooms were crossed at Rs. 62.

Jutes.—The unsatisfactory condition of this section continued, although during mid-week prices have not been heavily marked down. At the close, a steadier feeling in the market was noticed, apparently due to the Hessian market having ruled firm in sympathy with a higher jute futures and speculative buyers having paid slightly better prices to mills. Howrahs, which were fluctuating around Rs. 49, moved up to Rs. 50-12, but closed easier at Rs. 49-12. Kamarhattys which opened at Rs. 472 on Monday, closed after a steady rise at Rs. 490, small lots changing hands even at Rs. 495-8. Clives closed at Rs. 25-4, Nationals at Rs. 22-8 and Hukumchands at Rs. 11-4. The rumours current in the market about the sale of hessian etc. of the last named mill, were not very encouraging. Of higher priced shares, Anglo-Indias were quoted at Rs. 398 (ex-dividend), Ballys at Rs. 185, Belvederes at Rs. 319, and Champdanys at Rs. 158.

Electricals.—The outstanding feature in this section was a good demand for Bengal Telephones, which closed at Rs. 18-4, with buyers over. Agra Electrics came to business at Rs. 114, Ajmer Electrics at Rs. 8-4 and Cuttack Electrics at Rs. 8-8.

Engineering.—Interest in Bengal Irons and India Irons, contrary to expectation, has somewhat evaporated, the former closing at Rs. 3/14 and the latter at Rs. 8/12. Burn & Co., inclined to sag, but a transaction was put through suddenly on Wednesday at Rs. 247/-. Indian Galvanizings closed at Rs. 6/8 and Kumardhubis changed hands at Rs. 2/12.

Sugar.—Good business was recorded in this section, and while the prices of the more popular shares had a tendency of easing down a little, there was quite a good demand for others. Transactions included Balrampurs at Rs. 19, Cawnpores at Rs. 35-8, Nawabgunges at Rs. 145, Punjabs at Rs. 270, Rohtas at Rs. 12-9 and South Behars at Rs. 15-4. Murree Breweries were crossed at Rs. 194.

Tea.—In this section, during the week under review no interest was apparent and the business done was very limited. The few transactions reported include Bishnauths at Rs. 26-4, Central Cachars at Rs. 71 (small lot), Hasimaras at Rs. 4-2, Pashoks at Rs. 13, Ruteemas at Rs. 8-4 and Tezpores at Rs. 9-2.

Miscellaneous.—In Paper shares a small odd lot of Bengals came to business at Rs. 100, Titaghurs were done at Rs. 23-4 and India Paper Pulps were quoting at Rs. 180 with nothing doing. Among others, Burma Corporations were unchanged at Rs. 7-12. B. I. C. ordinaries changed hands at Rs. 3-13, Calcutta Ices at Rs. 7-8, Indian Wood Products at Rs. 23-4 and Macfarlane & Co. at Rs. 4-9.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Thursday Evening.

Money.—Money continued easy with interbank call quoting at ¼ per cent.

Exchange.—Owing to lack of export bills, exchange was rather quiet with banks selling T.T. at 1s. 6 3/32d. up to December ; 1s. 6 7/64d. January-March 1936 ; 1s. 6 3/32d. April-June and 1s. 6 1/16d. July-December, 1936.

Securities.—The Rupee security market has moved up with India sterling loans ; and 3½ per cent. Paper moved up by more than one rupee to Rs. 95-1. On investment demand, short-dated and medium-dated securities have improved remarkably. 5 per cent. 1945/55 found buyers at Rs. 119-4 compared with Rs. 118-8 last week. 5½ per cent. 1938/40 was higher at Rs. 108-13 ; 1960/70 improved by about two rupees and was quoted at Rs. 110-2. The following securities were quoted as under: 1941 at Rs. 103-2 ; 1951/54 at Rs. 99/8 ; 1947/50 at Rs. 104/10 ; 1943 at Rs. 108 ; 1955/60 at Rs. 115 ; 1939/44 at Rs. 109-6 and 1940/43 at Rs. 110-8.

Shares.—The share market remained steady with only minor reactions throughout the week.

Textiles.—This section closed quiet. Bombay Dyeing firmed up to Rs. 765. Central India was quoted at Rs. 270. Century improved to Rs. 225-10 ; Colaba rose up to Rs. 140 ; Gokaks to Rs. 178-12 ; Kohinoor to Rs. 206-14 and Swadeshis improved by Rs. 2-8 and closed at 162-8.

Hydro-electrics.—This group remained steady throughout the week. Tata Powers were quoted around Rs. 1,540 and Tata Hydros improved by Rs. 3 and closed at Rs. 164. Andhra Valleys improved from Rs. 1,600 to Rs. 1,635.

Iron and Steel.—On continued fresh buying, Tata Ordinaries improved from Rs. 150 to Rs. 155-4 ; Tata Steel Deferreds jumped from Rs. 590 to Rs. 635, though both closed slightly lower at Rs. 151-12 and Rs. 611-4 respectively. Inspite of heavy selling at higher rates, the market has acted well and the undertone seems healthy. We, therefore, recommend accumulation of Tata Ordinaries on every reaction. Tata Steel 2nd Preferences were steady at Rs. 159-4.

Cements.—This section continued steady and closed much better than last week. Bundi may be quoted at Rs. 33-12 ; Gwalior at Rs. 118-12 ; Indian at Rs. 439-6 ; Katni Deferred at Rs. 1,850 and Katni Ordinary at Rs. 366-4 ; Okha at Rs. 248-12 ; Punjab at Rs. 24 ; Shahabad at Rs. 473-12 and United at Rs. 113-8.

Miscellaneous.—Bombay-Burmahs were done as high as Rs. 420 but closed at Rs. 413-12. The new shares closed at Rs. 136-4. Bombay Steams were neglected and may be quoted at Rs. 283-12. The Bombay Telephones were having a good enquiry and were done up to Rs. 107-8 but closed at Rs. 106. The Bombay Trams were better at Rs. 147-12. Belapur Sugars touched a high of Rs. 351-4 but eased off to Rs. 343-2. The Belapur Sugar Company has done well this year. After allocating Rs. 1,21,651 for depreciation, the company has earned a net profit of Rs. 10,65,551 for the year ending 30th September, 1935. Out of this amount, the directors have recommended a dividend of Rs. 10 per share together with a cash bonus of Rs. 2, free of income-tax, as also one bonus share for every share held. Arrangements are being made by the company for the leasing of a further 600 acres of land. Scindias closed better at Rs. 13-11. This company has done exceedingly well for the year ending 30th June, 1935. It has earned a net profit of Rs. 10,04,291 during the above period. Allowing for debit balance of Rs. 7,27,200 brought forward from previous year and Rs. 6,00,000 for depreciation, the

THE INDIA JUTE CO., LD.

NOTICE.

NOTICE is hereby given that the Thirty-seventh Ordinary General Meeting of the Shareholders of the above company will be held at the Registered Office of the Company, No. 16, Strand Road, Calcutta, on Friday, the 22nd day of November, 1935, at 12 noon, for the purpose of receiving the Directors' Report and Accounts for the half-year ended 30th September, 1935, and transacting any other ordinary business that may be brought forward.

The Share Transfer Books of the Company will be closed from the 15th day of November, 1935, to the 22nd day of November, 1935, both days inclusive.

Holders of Scrip under blank transfer are reminded to send in their Shares for registration in the Books of the Company as soon as possible.

MACKINNON MACKENZIE & CO.,
Managing Agents.

Calcutta, the 12th November, 1935.

THE MEGNA MILLS CO., LD.

NOTICE.

NOTICE is hereby given that the Twenty-ninth Ordinary General Meeting of Shareholders will be held at the Registered Office of the Company, No. 16, Strand Road, Calcutta, on Friday, the 22nd day of November, 1935, at 12-15 p.m., for the purpose of receiving the Directors' Report and Accounts for the half-year ended 30th September, 1935, and transacting any other ordinary business that may be brought forward.

The Share Transfer Books of the Company will be closed from the 15th day of November, 1935, to the 22nd day of November, 1935, both days inclusive.

Holders of Scrip under blank transfer are reminded to send in their Shares for registration in the books of the Company as soon as possible.

MACKINNON MACKENZIE & CO.,
Managing Agents.

Calcutta, the 12th November, 1935.

balance available for distribution was Rs. 2,777,090. The Directors of the company recommend a dividend of As. 6 per share free of income-tax. *It is advisable to purchase Scindia shares for purposes of investment.* Premier Constructions closed at Rs. 76-8 ; Shivrajpurs at Rs. 31 ; Alcocks at Rs. 213-12 and Petrols were steady at Rs. 3-13-6.

Banks and Insurance.—The rise in the securities gave an impetus to this section. Imperial Bank of India fully-paids closed higher at Rs. 1,560 and partly-paids at Rs. 388-12. Reserve Banks improved to Rs. 125-4 ; Bank of Indias remained steady at Rs. 124-12 ; Central Banks at Rs. 35-8. Barodas were steady at Rs. 97-8.

New India Assurance improved from Rs. 40 to Rs. 41-4. Orientals rose higher by Rs. 200 and closed at Rs. 4,450. Vulcan Insurance were quoted at Rs. 7.

MADRAS STOCK EXCHANGE

(*By Wire*)

(From Our Correspondent)

Madras, Friday Evening

Government Securities.—The Securities market continued active and the highest levels for the year in most securities were repeated. Paper lagged behind till Thursday, when it jumped closing at Rs. 95-4. On Friday Paper improved further to Rs. 96-8 closing a shade quieter in spite of strong sterling advices. A large turnover was noted in same upto Rs. 96-5 ; 4 per cent. upto Rs. 110-14 ; 5 per cent. 1945/55 at Rs. 119-8 ; 1940/43 at Rs. 110-13 ; 5½ per cent. 1938/40 at Rs. 108-14 ; 3 per cent. 1951/54 at Rs. 100-2 and 4 per cent. 1943 at Rs. 108-7.

Amongst State Loans, Cochin loan had good buyers at Rs. 108-12 with nothing on offering whilst Mysore loans were strong closing at Rs. 104 for 3½ per cent. ; Rs. 108-14 for 4 per cent. and Rs. 120-4 for the 5 per cent. loans. Short dated loans are in good request with nothing on offer.

There are no transactions of note in Municipal or Joint stock company debentures. In Preferences, Vasantas were a strong counter with buyers at Rs. 109 whilst Spencers 'A' Preferences were done at Rs. 10-8 ; Tata Second Preferences showed no change.

Banks.—Imperial Bank's shares after improving to Rs. 1,575 and Rs. 390 for the fully-paids and partly-paids respectively, relapsed to Rs. 1,560 and Rs. 387-8 on selling pressure. Indian Banks eased to Rs. 125 for the big and Rs. 25-8 for the small. Central Banks were a firm feature at Rs. 35-8 as also Bank of Indias at Rs. 124.

Public Utilities.—Madras Telephones were done at Rs. 20 ; Vellore Electrics at Rs. 15-4 cum dividend and West Coast Electrics at Rs. 10-2 ex-dividend.

Mills.—Mill shares were steady with Buckingham and Carnatics at Rs. 217 and Cambodias at Rs. 13-4. Vasanta Ordinaries were done at Rs. 111 with further buyers over.

Sugars and Cements.—This section was neglected and no business was done in this market. United Breweries attracted a little attention at Rs. 105.

Planting.—Rubbers were dull whilst in Tea shares with the exception of Peermades at Rs. 70 no business was done.

Miscellaneous.—This section was most active. On good profit taking, Tata ordinaries reacted to Rs. 150-8 whilst Deferreds to Rs. 600, closing at Rs. 152½ and Rs. 612 respectively.

LONDON STOCK EXCHANGE

Markets have been very steady on election optimism and nearly all the sections have been very firm. Giltedged were very steady and some improvements were recorded both in Home Funds and Indian Loans. 3½ per cent. Indian Stock 1931 was quoted at 96½, 4½ per cent. 1958-68 at 114, 4 per cent. 1948-53 at 108½ and 2½ per cent. Consols at 85⅛. 3½ per cent. Conversion at 106⅞, 4 per cent. Funding Loan at 116¾, War Loan at 105 and Victory Bonds at 115¼.

Among other sections, Home Rails were steady with Great Western Ordinaries being quoted at 48½ and Southern deferred at 20. Oils improved and showed several price advances, Anglo-Iranians, Burmah Oils and Shell Transports being quoted higher. Teas and Rubbers were unchanged. Minings were steady. Industrials were firm.

NEW YORK STOCK EXCHANGE

There has been a general improvement in prices and the market closed strong and active. Rails, Utilities and Motors were higher. Coppers were steady. Banks were a shade lower.

THE INDIAN CABLE CO., LD.

NOTICE.

The sixteenth Ordinary General Meeting of Shareholders will be held at the Registered Office of the Company, 2, Waterloo Street, Calcutta, at 4-30 p.m. on Monday, the 18th November, 1935.

The Share Transfer Books will be closed from the 11th November to 18th November, 1935, both days inclusive.

By order of the Board,
BRITISH INSULATED CABLES, LIMITED,
Managing Agents.

Calcutta, 16th October, 1935.

ADAMJEE JUTE MILLS, LIMITED.

NOTICE is hereby given that the Sixteenth Half-yearly Ordinary General Meeting of the Shareholders of "Adamjee Jute Mills, Limited" will be held at the Registered Office of the Company, "Stephen House," 5, Dalhousie Square, East, Calcutta, at 4 p.m., on Friday, the 22nd day of November, 1935, for the purpose of transacting the Ordinary business of the Company.

The Transfer Register of the Company will be closed from 16th to 30th November, 1935, both days included.

ADAMJEE HAJEE DAWOOD & CO., LTD.,
Managing Agents.

Calcutta, 8th November, 1935.

INDIA GENERAL NAVIGATION & RAILWAY CO., LD.

NOTICE

The Company's Calcutta Share Transfer Registers will be closed from Thursday, the 21st to Saturday, the 30th November, 1935, both days inclusive.

KILBURN & CO.,
Managing Agents.

Calcutta, 8th November, 1935.

MARKETS BEHAVING WELL

SUBSTANTIAL RISES

By R. Gordon Cummings

By Air Mail

Special for "INDIAN FINANCE"

London, November 4th, 1935.

Considering the near approach of the General Election, Stock Markets are behaving in what can only be described as a marvellous manner. On the opening of a new fortnightly account this morning a distinct broadening of interest was noticeable, with the result that substantial rises have been seen in almost every market, the only exceptions being the Tea and Rubber sections.

It is obvious from to-day's buying, which is based partly on the good trade and unemployment returns and partly on hopes that the National Government will be returned with a good majority, that buyers need little encouragement to re-enter markets. The position of late can be compared to a dog straining at the leash.

Reviewing individual sections the Gilt-edged market is distinctly strong, rises to-day being anything up to one point above Friday's close. *War Loan* is 104⅝, 2½ *per cent. Consols* 84¾, 3½ *per cent. Conversion* 106 and *Local Loans* 93¾. *India* and *Colonial* stocks have followed the same upward movement, *India* 3½ per cent. being 95½, the 3 per cent., 84 ; the 2½ per cent., 72 ; the 4 per cent., 107, and the new 3 per cent., ½ discount.

There has been more business in Foreign Loans, buying being encouraged by some favourable factors such as the likelihood of the Greek Government being reconstituted and the possibility of interesting developments in Chinese currency. *Brazilian* loans have continued to rise.

Sentiment in the Home Railway market has improved, investors now taking more notice of the encouraging trend in weekly traffic receipts. *Great Western* is higher at 46, while *London Midland and Scottish* has improved to 17¾, *Southern* deferred to 19, and *London and North Eastern* second preference stock to 19¼. Interest in Foreign Railways has also broadened ; but particular attention has been paid to *Argentine* stocks on the somewhat brighter possibilities.

Rises in Industrials have been numerous. As I have pointed out in previous notes the technical position has recently been such that persistent buying or persistent selling would lead either to sharp rises or equally sharp falls. During the past week buying has predominated.

Outstanding rises include *Amalgamated Metal* to 25s. 6d., *Associated Cement* to 63s., *Boots Drug* to 49s., *British Aluminium* to 42s. 9d., *Dunlops* to 38s. 3d., *Imperial Chemicals* to 36s. 9d., *London Brick* to 81s., *Radiation* to 71s., *Salt Union* to 41s. 6d., *Tate and Lyle* to 87s. 6d., *Unilever* to 32s. 9d., *United Molasses* to 19s. 3d. and *Woolworths* to 110s. 6d.

Tobacco shares have registered corresponding improvement, *British-American* being 116s., *Imperial Tobacco* 141s. and *Carreras A.* 165s. Textiles have continued on the upgrade, buying being encouraged by the continuance of strong rumours that something will be done in the near future to improve the condition of the Lancashire trade. Rayon shares have been in better demand. *Courtaulds* are 53s. 9d. and *British Celanese* second preference 22s. 9d.

Brewery shares continue to rise, the recent fall having been overdone. *Guinness* have improved still further to 143s., *Watneys* to 73s. and *South African Wines* to 54s.

Outstanding movements in the motor section comprise a fall in Standards to 81s. 6d., and a rise in *Leylands* to 73s. 6d. *Fords* keep steady at 34s. 6d.

Buying of Armament shares has been resumed, *John Brown* recovering to-day to 18s. 9d., *Hadfields* to 19s. 3d. and *Vickers* to 18s. 9d. Encouraged by the placing of a number of Government contracts for new vessels, shares of ship-building companies have registered some sharp gains. *Hawthorne Leslie* have been outstanding with a rise to 24s. 6d., while *Harland and Wolff* have spurted to 8s.

After remaining comparatively quiet for some weeks interest in Iron and Steel shares has revived. *Allied Iron* are 39s. 6d., *Baldwins* 8s., *Dorman Long* 19s. 6d., *Guest Keen* 33s., *Imperial Smelting* 15s., *Stewarts and Lloyds* 32s., and *United Steel* 32s. 6d.

In accordance with my previous anticipations, buying of electrical equipment shares has been resumed, the result being an improvement to 37s. in *Associated Electrical. British Insulated Cable* are 90s., *English Electric* preference 22s. 6d., and *General Electric* 67s.

Mining markets are more active, Kaffirs having been bought on the gratifying monthly returns for October and the likelihood of the present system of taxation being more equitably apportioned in the near future. *African and European* have recovered smartly to 39s. 9d., while *Anglo-American* are considerably higher at 31s. Amongst the producing companies *Simmer and Jack* have been bought at up to 12s. 9d. on the possibility of the shares, together with others, being listed in the near future on the Paris Bourse. Shares of some of the developing properties have also received attention.

Interest in Australian and West African gold mining shares is at last showing signs of expansion. The "Shops" are doing their best to stimulate active conditions. Indian mining shares have also been bought.

On possibilities of the retail price of petrol being raised by 1d. per gallon there has been some heavy buying of oil shares at steadily rising prices. This market has been one of the most active throughout the past week. *Anglo-Iranian* are 67s. 6d., *Burmah* 80s., *Shell Transport* 81s., and *Apex* 22s. *Attock Oil* have again been heavily bought, and with a shortage of shares, there has been a further rise to 24s.

Interest in Rubbers has dwindled, with the result that price movements have been downward. Tea shares are suffering from lack of interest and reflect lower auction prices for the commodity.

New Issue Activity.

Bearing out my recent predictions there has been a decided expansion of business in the new capital issue market. Within the last few days a number of industrial issues have been successfully floated. In certain cases allotments have been heavily cut down owing to the large volume of public applications.

At the time of writing the near approach of the General Election is doing little to upset the flow of issues. Several of these are scheduled to appear during the next two days, but after they are out of the way I fully expect that there will be little doing until after November 14th—Polling Day.

Should the "Poll" be in accordance with the expectations of the City a big flood of capital issues can be looked for. Judging, however, by a somewhat mysterious circular letter from the Treasury, sent to stock brokers by the Committee of the London Stock Exchange, it is evident that at long last an attempt is to be made to limit the number of highly speculative flotations.

The communication referred to indicated that brokers to companies formed to develop untried patents could obtain expert advice by means of enquiries sent to certain technical department of the Government.

The City was somewhat mystified by this circular, which, in my opinion, simply represented a political move prior to the Election. It certainly looks as though the National Government had decided to take another leaf out of the Labour Party's programme by partly forestalling the National Investment Board.

First Accounts of London Transport.

In view of the wide ramifications of the *London Passenger Transport Board* it is not surprising that considerable interest has centred on the first accounts covering the two years ended June 30th last. The Board was formed in 1933 to take over and to consolidate the various transport organisations serving London and surrounding districts. The area covered by the Board is 1,986 square miles, representing an area with a population of over 9,500,000 people, the various interests covering tramways, omnibuses, underground railways and suburban railways, not to mention country 'bus services.

The accounts for the first two years of working show that total traffic receipts have risen from £27,379,351 in 1933-34 to £29,016,085 in 1934-35. After deduction of working expenses and the inclusion of miscellaneous receipts, net revenue for the past year is £5,126,271, compared with £4,956,691 in the previous twelve months.

As already announced, dividends on the C. stock are 3½ per cent. for the first period and 4 per cent. for the last twelve months. Examination of the accounts discloses that net revenues have been so adjusted by transfers to various reserves that the sums available are exactly the amounts required to pay dividends for the two years.

Capital expenditure since operations were commenced on July 1st, 1933, has risen by £3,260,435 to £113,152,136, against which renewals and maintenance reserves total £4,450,109.

It is worth recalling that the Board is empowered to pay dividends of up to 6 per cent. on the C. stock. Although at first sight the working results for the first two years appear disappointing, I feel that gradual expansion can be anticipated. On the basis of last year's dividend the C. stock yields almost a full 4 per cent. at 101. I can recommend the stock as a promising lock-up purchase.

Iron and Steel Developments.

Although smacking strongly of a pre-Election political move, the statement that *Richard Thomas & Co.*, the big steel and tin plate manufacturers, is likely to purchase the assets of *Ebbw Vale Steel, Iron and Coal Company*, came as a pleasant surprise, for considerable unrest was recently aroused in South Wales through the announcement that a big proportion of the Richard Thomas works were to be transferred to Lincolnshire. If this programme had been carried through the repercussions on South Wales would have been serious.

At the time of writing the definite terms of the acquisition have not been made known. I am given to understand, however, that the total cost, including remodelling of the Ebbw Vale works, will be approximately £2,500,000.

Richard Thomas 6s. 8d. ordinary shares rose on the announcement to 9s. 6d. They have remained steady at this price, buyers being further encouraged by the announcement to-day of a 3 per cent. interim dividend—the first for very many years.

Some Encouraging Statistics.

I have referred briefly in my opening notes to the effects of certain trade and other statistics on stock markets. While definite figures are not yet to hand it has been indicated that the number of unemployed people in Great Britain fell during October by approximately 42,000.

Additional figures of an encouraging nature include the continued rise in the weekly traffic receipts of the four Home railway companies. For the week just ended total revenues have risen £98,000 over the figures of the corresponding week in 1934. One of the most encouraging factors is a jump of £61,500 in goods' traffics.

For the 43 weeks of the current year total revenues of the four main lines have risen by £949,000 over those of the same period in 1934. Although passenger receipts are up by £1,196,000, goods traffics are still £247,000 below those of last year.

If only the wages question and the rating appeals were out of the way we should see some sharp rises in Home railway stocks!

Consumption of beer in Great Britain during September was higher than in September, 1934, but lower than in the month of August last. Standard barrels consumed during September were 1,300,807, compared with 1,265,247 in September, 1934, and 1,550,217 in August, 1935. For the nine months of the current year to end-September consumption rose by 573,790 barrels to 12,148,136 standard barrels.

Brewery shares have been in better demand at rising prices. There is still room for further recovery in leading shares, such as *Guinness*, *Watney Combe Reid*, and *Bass*.

The retail trades of the country, judging by latest statistics, continue to expand. Compared with September, 1934, turnover in September of this year rose by 8.1 per cent., while sales for the eight months to September 30th last rose by 5.3 per cent. over the corresponding figures for 1934. Every district in the country shared in the improvement.

Coincident with the publication of these figures the directors of *Great Universal Stores*, the mail order business which has recently been opening various shops throughout the country, have announced an interim dividend of 20 per cent., the same as a year ago.

British Celanese Prospects.

Dealing with the arrears of dividends on the first and second preference capital, Dr. Dreyfus, the Chairman of *British Celanese*, indicated at the annual meeting that the sum outstanding on the first preference capital had already been more than earned during the current year. He hoped that it would be possible to discharge these arrears before June 30th next, while he also hoped that it might subsequently be found possible to resume payment of current dividends on the second preference shares.

Nothing definite has yet transpired, however, regarding the clearance of the second preference dividend arrears, which might be paid in cash or by means of a funding scheme.

Although I candidly think that Dr. Dreyfus is inclined to be carried away by his own enthusiasm on the prospects for British Celanese, I do believe that the company is now earning substantially higher profits than a year ago. The chairman indicated that if the present output could be fully sold at current prices the company would be in a position to earn sufficient to clear all preference dividend arrears in a very short time.

The second preference shares have responded to the chairman's remarks by rising to 22s. 6d. They should be held.

Electric & Musical Industries Annual Report.

Beyond showing that actual net profits of the subsidiary companies from trading operations have risen by roughly £37,500 to £445,603, the report of the big radio and gramophone combine *Electric and Musical Industries*—for the year to September 30th last gives little more information than the preliminary figures.

After providing for taxation, net profits of the parent company are £457,546, compared with £325,033 in 1933-34. The latest figures include, however, a profit of £114,544 realised on sale of investments. As already announced the ordinary dividend is increased from 10 per cent. to 12½ per cent. The carry forward is £197,558, an increase of £154,940, so that even allowing for investment realisation profits the net trading profits are by no means fully distributed.

So far *E. M. I.* 10s. shares have failed to respond to the good report, the current price being 25s. 6d. They are, in my opinion, one of the most attractive lock-up investments available in the industrial market.

Other Industrial News.

Other announcements of interest include the annual report of the big Empire cotton company, *Sudan Plantations Syndicate*. For the year ended June 30th, 1935, profits are £257,673, compared with only £167,584 in 1933-34. The dividend on the ordinary shares is raised by 2 per cent. to 8 per cent. and £26,293 more is placed to reserves. Total reserves now exceed £2,341,000, whereas fixed assets appear in the balance-sheet at only £2,334,000. There are no preference shares or debentures ranking in front of the 2,475,000 £1 ordinary shares, which give the good yield of 4¾ per cent. at 33s. 6d.

Now that the outlook for the cotton industry is definitely improving I can look forward to continued recovery for *Sudan Plantations*.

Evidence of the rising prosperity of the paint and wall paper industries is evidenced by the increase of 5 per cent. to 15 per cent. in the total ordinary dividend of *Lewis Berger*, the paint, varnish, etc., manufacturers, and the rise of £58,000 to £741,557 in the trading profits of *Wall Paper Manufacturers*.

British Plaster Board manufactures a patented product used in the building trade. Since it was made public in September, 1932 considerable expansion has taken place. On account of the current year the directors have decided to increase the interim dividend by 5 per cent. to 20 per cent.

Investors in two prominent companies are to benefit from the issue of additional ordinary shares on bonus terms. Shareholders of *Standard Motor Company* will shortly be given the right to subscribe for 150,000 £1 ordinary shares at 40s. each in the proportion of one new share for every two now held. As the old ordinary shares are quoted at 81s. 6d., holders who are not desirous of taking up the new shares can sell the rights at a satisfactory profit.

The electrical engineering company, *Johnson & Phillips*, is to raise additional capital by the issue of 100,000 new £1 ordinary shares at £2 each. Holders of the existing 700,000 ordinary shares will be entitled to apply for one share in respect of every seven now held. The old shares are changing hands at 43s. ex the rights to the new shares.

South American Railway Prospects.

British investors hold a large stake in the leading railways of most South American countries. Since the world-wide depression commenced they have had to face very trying times, the various companies having to contend not only with a falling away in business, but also having to meet large losses on foreign exchange.

While I cannot go so far as to say that the corner has now been turned, I am coming to the conclusion that it is possible to anticipate a moderate improvement in traffics and the exchange position in the near future.

Most companies are now unable to meet even the service on their debenture stocks, most of which are subject to moratorium agreements.

Only this week, however the *Buenos Ayres and Pacific Railway* has announced the further payment of one year's arrears of interest to June 30th, 1934, on its 4½ per cent. second debenture stock and on the 4 per cent. second debenture stock of its subsidiary, *Argentine Great Western Railway*. It was only on August 2nd last that one and a half years' interest arrears were paid on both of these stocks.

Further encouragement can be derived from the latest report of the *Peruvian Corporation*, which operates railways in Peru. Compared with £49,313 in 1933-34, net revenue for the twelve months to June 30th last was £117,065. In this case debenture interest has been charged, although not paid, with the result that the deficit on net revenue account is now £780,266. Should profits continue to increase, which is a reasonable possibility owing to the present expansion in traffic receipts, it may not be long before the directors decide to pay off some of the interest arrears. The 6 per cent. debentures are a healthy speculation at 50, while the out and out gambler should be attracted by the low price of £10 for the 5 per cent. non-cumulative preference stock.

Market Pointers.

My suggestion to buy *Shell Transport* ordinary shares has been fully justified by the rise to 81s.—the highest price for over five years. The market is going for a good interim dividend.

For the year ended June 30th last, *Eastern Transvaal Consolidated Mines* earned a net profit of £108,573, compared with £72,942 in the previous twelve months. After meeting dividends of 12½ per cent. (10¼ per cent.) and providing for taxation, a sum of £3,722 is carried forward. The 5s. shares are very much under-valued at 8s. 6d.

The latest monthly tin statistics reflect the effects of the recent increases in the output quotas. Visible supplies of the metal have risen during October by 1,422 tons to 14,845 tons. The price has fluctuated violently during recent weeks, but is still maintained at over £220 per ton.

I learn that there has been some very persistent buying of tin shares from the East. Those in touch with the position should know what they are doing. The ordinary investor can safely follow their lead.

The European lead and zinc producing company, *Trepca Mines*, enjoyed a large measure of prosperity during the twelve months ended September 30th last, net profits rising by no less than £147,000 to £307,517. Dividend on the 5s. ordinary shares is made up to 20 per cent. tax free, compared with 12 per cent., less tax, for 1933/34.

Progress in realising the assets of *Royal Mail Realisation Company*, and *Elder Dempster Realisation Company*, is proceeding satisfactorily. Assets already sold have realised good prices and negotiations now in hand indicate that the remaining assets will bring in substantial sums over and above the balance-sheet values. *R. M. Realisation* £1 ordinary have been well bought this week at up to 31s. 6d.

Paringa Mining have received speculative attention on rumours that one of the leading Australian finance companies may shortly make a bid for the shares, which are now active at 4s. They are worth holding until something more definite is known.

After rising to 6s. 3d., *Klerksdorp Consolidated* 5s. shares have fallen to 5s 9d. on profit-taking. *Dominion Reefs* (*Klerksdrop*) is being floated this week with a capital of £625,000. This is the first subsidiary of the parent company, which is receiving £104,000 in cash, and £250,000 in shares of the new company.

Mr. Gordon Cummings's Air-mail letter of October 28 was not received in time for last week's issue. The more salient points of his weekly review are given below:—

British Celanese Report.

The full report of *British Celanese*, the big artificial silk manufacturing company, is now available. During the year ended June 29th last it is officially stated that production and sales increased largely as compared with the previous year, and constituted a fresh high record. Owing, however, to a large loss sustained on stocks through the reduction earlier this year in the excise duty on artificial silk, net profits do not fully reflect the improvement which has taken place in trading.

After charging all expenses, debenture interest and writing off £61,142 (£61,146) from royalties, net profits are £880,138, compared with £733,470 in 1933-34. Deducting £304,000 depreciation, £133,000 income-tax and £25,000 written off issue expenses, etc., the profit available for dividends is £418,138. Deducting £271,250 for the 2½ years' dividend already declared on the first preference shares it is possible to increase the carry forward by £146,888 to £260,692. A year ago arrears of depreciation amounting to £1,014,940 were provided from accumulated profits.

The balance-sheet is still far from impressive, intangible assets such as goodwill, patents, royalties, etc., accounting for £3,227,674 of the assets total of £13,311,380. On the other hand, liquid assets of £2,805,296 exceed creditors by almost £1,950,000. Apart from the profit and loss balance there are no disclosed free reserves.

Excluding the dividend recently declared arrears of accumulated dividends on the £2,000,000 7 per cent. first preference capital totalled £271,250 (net) at the end of this month, while accumulated arrears on the £4,250,000 7½ per cent. second preference shares equalled £1,358,672 (net) after allowing for income-tax. No suggestion has been put forward by the directors in their report for clearing off these arrears. It is possible, however, that some scheme may be announced at the meeting.

Unless it is possible to clear second preference dividend arrears by means of funding certificates, or the distribution of ordinary shares, it may be some time, although they are now increasing, before profits are sufficient to justify cash payments.

Although I am candidly disappointed with the latest report I am prepared to place faith in the directors' confidence that the future is full of promise—they estimate that profits for the first quarter of the current year are approximately 70 per cent. more than for the corresponding period in 1934.

For the time being the second preference shares can be held.

Imperial Airways.

The full report of *Imperial Airways* for the twelve months to March 31st last shows net profits of £112,519, after providing £15,000 for income-tax and £6,250 for writing off Air Ministry claims. This compares with profits of £61,072 in 1933-34. Actually, earnings on the £624,080 issued ordinary capital were the equivalent of 16.6 per cent., compared with 11.3 per cent. a year ago and 7.6 per cent. in 1932-33.

A remarkably strong position is shown in the latest balance-sheet, the main features of which are: Aircraft, etc., £621,795 ;; reserves and undivided profits £665,070 ; liquid assets £883,068 ; creditors, etc. ,£310,930 ; investments in subsidiary and associated companies £98,943 ; intangible assets £21,250.

Provincial Brewing Recovery.

I believe that it was on one of the first occasions of writing for *Indian Finance* that I recommended *Mitchells and Butlers* ordinary shares as the best investment amongst the provincial brewing companies. Since then they have risen considerably to 97s. 6d.

During the twelve months ended September 30th last profits of this company were £642,541, compared with £785,047 for the previous fifteen months, or at the rate of £628,038 per annum. The directors have increased the dividend from the equivalent of 15 per cent. per annum to 17 per cent. tax free in respect of the past twelve months, the final payment on the £2,960,298 ordinary capital being 11 per cent. After adding £60,000 to reserve the large sum of £553,366 remains to be carried forward. General reserve is now £1,485,000.

The report of another provincial brewing company demonstrates that improvement in this industry is taking place throughout the country. The Lancashire concern, *Matthew Brown & Company*, announces an increase of £7,777 to £74,270 in profits for the year to September 30th. During the depression arrears of dividend accumulated on the preference capital, but these have now been reduced to only 6½ per cent. on the A preference shares.

Other Industrial News.

That my recommendation to buy *Maden and Ireland* preference and ordinary shares was well timed is proved by the announcement that the year's preference dividend is to be paid, while 8⅓ per cent. is to be distributed on the 1s. ordinary shares, which last received 25 per cent. in 1928. The preference shares have improved to 23s., while the ordinary are steady at 1s. 6d.

The directors of *British Match Corporation* have made a new innovation insofar as they have declared an interim dividend less tax, whereas previous payments were always free of tax. A slight increase in the interim dividend is to be found in the payment of 2¾ per cent., less tax, compared with 2 per cent., tax free, in previous years.

Activity in cement shares was encouraged by the proposal of the *British Portland Cement manufacturers'* directors to issue at par 320,000 £1 ordinary shares in the proportion of one new share for each £5¼ ordinary stock now held.

Capital reorganisation proposals are now put forward on behalf of *Singer & Company*, the motor manufacturers. To provide the sum necessary for writing down fixed assets to present values the £1 ordinary shares will be reduced by 7s. 6d. to 12s. 6d. The directors have followed the commendable course of not demanding any sacrifice from preference shareholders, which, moreover, are to receive ordinary shares in settlement of all dividend arrears. This is a scheme which I can heartily commend to other boards of directors contemplating capital reorganisation schemes.

Tin Output Quota again increased.

To meet the ever growing demand for tin and to ease the dangerous position on the London metal market, it has been necessary for the International Tin Committee to again raise the output quota, this time from 70 per cent. to 80 per cent., with retrospective action from October 1st.

This is the fifth increase in the output quota, which is now double that of 40 per cent. ruling on March 31st of this year. While it may later be necessary to make a moderate downward revision, the effect of a doubled production on the profits of tin mining companies is easily visualised. Not only should their output be doubled, but owing to the spreading of fixed overhead charges over a larger production, profits should rise more than proportionately to the increase in turnover.

I need not enlarge upon the promising outlook for tin shares.

There is only one doubtful factor to take into account and that is the recent and probable future fluctuations in the price of the metal, which has recently moved in an erratic fashion. I fully anticipate that those in charge of the position will see that the average price is kept at a level of around £220 per ton, which, in my opinion, is a fair price to all concerned.

A few words on Copper.

Latest statistics show that world copper stocks have been steadily falling throughout the current year. In January 1935 they amounted to 478,000 tons, but by the end of September they had fallen to 429,250 tons. Further falls can be looked for, although a cessation of part of the existing strong demand may result from a reduction in armaments expenditure.

On the other hand production of electrical goods is steadily on the increase. I hear it stated in certain quarters that it may soon be found necessary to increase the quotas in operation under the voluntary restriction scheme.

Coincident with the publication of these figures, the full reports of two of the leading Rhodesian copper companies are available.

For the year ended June 30th last *Rhokana Corporation* earned profits of £339,560, compared with £389,045 in 1933-34, the fall being due mainly to the voluntary restriction of output and to a lower average selling price for the metal. After meeting the maiden dividend of 12½ per cent. the carry forward is reduced by £142,289, to £287,619, but after transferring £150,000 to reserve.

In the case of *Roan Antelope Copper Mines* profits, for the same reasons, also fell during the twelve months to June 30th last. After providing for income tax the net figure of £264,720 goes against £305,440 in the previous twelve months. The first dividend of 20 per cent. on the ordinary shares takes £241,481, and after appropriating £28,300 for debenture redemption, the carry forward is reduced by approximately £5,000 to £322,824. A favourable feature of the report is a reduction in total costs of production from £25.721 per ton in 1933-34 to £23.174 per ton.

Roan Antelope 5s. shares have been one of my most persistent recommendations. I admit that the yield at current price of 28s. 3d. is not great, but it is to the future that holders must look.

Market Pointers.

During the past week *Home Railway* traffics again showed an increase over those for the corresponding week of 1934. The net increase of £33,000, makes a total increase of £62,000 in the past fortnight.

The interim dividend on *Stanton Ironworks* ordinary shares is being maintained at 4 per cent. actual.

Imperial Continental Gas Association fell 15 points to 200 on the announcement that the interim dividend is to be reduced by 1 per cent. to 4 per cent. I consider the stock to be fully valued and cannot advise a purchase.

In the oil market *Shell Transport and Trading* £1 ordinary shares are the most attractive purchase. I fully expect that the forthcoming interim dividend announcement will give cause for satisfaction.

There has been some good buying of *Klerksdorp Consolidated Gold* 5s. shares at up to 5s. 6d., while *West Spaarwater* 5s. ordinary have suddenly spurted to 5s. 3d.

For those looking for a gamble *Kassala (Sudan) Gold Mines* 2s. shares offer attractions at 2s. 6d. The shares fell on the Abyssinian trouble from 5s. to 2s. There has been some good buying during the last few days.

BOURSES IN AIR MAIL WEEK

Paris.

During the first half of the fortnight under review a firm tone was prevalent on the bourse and there was a general improvement in prices. Rentes were strong and Internationals wer higher. But during the latter half of the period Rentes were weak owing to holders selling out on account of the uncertainty in outlook. Internationals were steady and Banks were irregular. On talk of application of sanctions Suez Canals were quoted as low as 17,615 at one time on October, 28. There was some recovery later on and the price at the close was at 18,020. Royal Dutch were steady.

On the Coulisse, diamond shares hardened. There was some improvement in shares in the Gold Mining Group.

	Oct. 18	Oct. 24	Oct. 31
4½% Rentes, 1932 "A"	86.10	86.97	84.35
4½% Rentes 1932 "B"	85.05	86.00	83.30

Berlin.

Rather quiet conditions have prevailed on the Bourse during the fortnight under review with a slightly declining tendency. Farbenindustries showed some improvement. Minings also were higher with Harpeners being quoted at 112. The close was firm with Electricals good and Banking and Shipping shares moving to higher levels.

	Oct. 18	Oct. 24	Oct. 31
Reichsbank	173.75	174.75	174.25

LONDON CITY CIRCLES DISCUSS CHANCES OF EARLY PEACE

(*Continued from page 1517*).

In the case of Industrials, buying will be selective. This does not mean, however, that speculative shares with fair promise will not subsequently come in for attention.

Once again, I must emphasise that judicious selection is essential, for many of the leading shares are at levels discounting prospects a considerable way ahead. Some profitable selections will be found amongst the smaller companies, particulars of which I have lately been giving under my special article on "worth-while" British Investments.

Revival in oil and gold-mining shares is to be expected. These sections are full of promise and may be amongst the first avenues to which speculators will turn their attention.

So much of the recent rise in prices having been based on demands for armaments, I anticipate some recession in most of the commodities used in armaments. This recession, however, may only be temporary, as genuine trade demand for commercial purposes is and should continue to increase. Commodities most likely to be affected are base metals, such as lead, copper, and possibly tin.

Commodity shares are worth holding, while they offer a promising field for investors prepared to take moderate risks, to pay for their shares, and to hold them for anything up to twelve months.

A sign of returning confidence is the sharp increase in activity in the new capital issue market. Oversubscription of a fair sized industrial issue in the last week of October has hastened forward the public offering of several other issues, most of which have been kept in cold storage since the summer. Providing there is no hitch in existing preparations, three or four issues are due to make their appearance shortly, while others will make their bow to the public early in November.

Once the Election is out of the way, and providing there is no up-set in foreign politics, continuing activity in the issue market can confidently be looked forward to. There are many issues only awaiting a favourable opportunity before being made. Many of these are on behalf of estalished companies, but on the other hand there are a number concerned with new ventures as public companies.

BRITISH COMPANIES IN INDIA

(*Continued from page 1519*).

for the year ended March 31st, 1935, are now to hand for the *Bengal Dooars Railway*. Gross receipts of the railway during the past year were Rs. 20,57,011, compared with Rs. 20,06,048 in 1933-1934. Deducting expenses of Rs. 11,88,398 (Rs. 11,77,031), net earnings amounted to Rs. 8,68,613 (Rs. 8,29,017). After making small exchange adjustments net revenue, converted into sterling at 1/6d. per rupee, was £57,192, as against £53,277 in the previous twelve months. A sum of £10,000 (£9,910) is transferred to reserve, bringing this up to £355,000.

As already announced, the dividend on the £400,000 issued ordinary stock is to be maintained at 7 per cent. by a final payment of 4 per cent. The sum to carry forward after payment of preference and ordinary dividends is £4,782 higher at £59,465.

In respect of the year ending March 31st, 1936, the Directors of *Bombay, Baroda and Central India Railway* announce an interim dividend of 3 per cent., representing 1½ per cent. guaranteed interest and an interim dividend of 1½ per cent. in respect of the first half-year. These payments are at the same rate as a year ago.

* * *

Two Interim Dividends.

On account of the twelve months ending December 31st next, the interim dividend on the £598,200 issued ordinary capital of *Madras Electric Supply Corporation* is being maintained at 2½ per cent. For the full year 1934 and for many years previous the final payment was 5½ per cent., making 8 per cent. per annum.

An interim dividend of 5 per cent., like the previous year, is proposed on the £60,000 ordinary capital of *Itakhooli Tea Company*, which owns 1,828 acres of land in Assam.

WALL STREET IN AIR MAIL WEEK

GENERAL TREND COLOURLESS

GENERAL MOTORS GOOD THIRD QUARTER

By F. Rocke.

By Air Mail

Special for "INDIAN FINANCE"

Good conditions in general have prevailed in Wall Street during the fortnight under review. President Roosevelt's optimistic commentary on the nation's economic position had a stimulating effect on the market on the 25th instant. The Dow Jones Index went up as high as 141.47. Almost all groups participated in the advance. Motors, Oils and Liquor shares were particularly strong. Rails and Utilities were fractionally higher. But later on there was profit-taking in evidence and prices were lower as a result. The general trend of the market was colourless though towards the close Motors and Steels again led the market.

On the Bond market, the advance in the call money rate to 1 per cent. had some adverse effect on Government Securities. Germans and Italians gained moderately.

Pool operations in violation of the Securities Exchange Act are alleged to have been carried on by Mr. M. J. Meehan. The expulsion of this person from the New York Stock Exchange and from other exchanges becomes possible.

Rails have been better. Reports of the first 53 railroads to announce their earnings for September show gross income 12 per cent. higher and operating income 51 per cent. higher than in September 1934. Unfavourable reports regarding the position of certain Western Railroads affected this group unfavourably towards the close.

Pennsylvania Railroad is to build 10,000 new freight cars and remodel 1,000 at a cost of $30,000,000. Part of the work will be done in the Company's own shops.

Denver and Rio Grande Railroad has filed a reorganisation petition under the Bankruptcy Act.

Oils also have been higher. Crude oil price increases averaging 55 c. a barrel are announced by Union Oil of California. Prices of Pennsylvania crude oil also were increased by 15 c. a barrel.

The rise in the Californian price in spite of the high output there is ascribed to an understanding whereby the independent producers will shortly curtail production.

The daily average production of crude oil in the United States in the week ended October 26, was 2,797,950 barrels, against 2,782,800 in the previous week, according to the figures of the American Petroleum Institute.

Gasoline stocks in the United States on October 26, totalled 41,162,000.

Utilities were fractionally higher. They derived some strength from the decision of a Washington Judge issuing injunction against the making of Federal loans to southern cities desirous of erecting municipal power plants assisted by Utility obligations.

According to *Iron Age* steel mill activity was at 53.5 per cent. of capacity during the past week against 52.5 per cent. per cent. the previous week. The price of pig-iron has been raised by $1 per ton to $19.50 in Detroit and Toledo following an advance in Chicago. These advances and improved prospects for the automobile industry gave the iron and steel market renewed buoyancy.

The earnings of Bethlehem Steel Corporation and U. S. Steel Corporation are good showing.

The Bethlehem Steel Corporation reports net earnings of 75 c. per share of Preferred stock for the third quarter, against a loss of $2,400,126 in the corresponding period last year.

For the first nine months net earnings equalled $2.03 per Preferred share, against 15 c. a year earlier.

Operations at present are at 46 per cent. of capacity.

The company will spend $10,000,000 on plant improvements this quarter. In the first nine months of the year $12,000,000 was spent in this way

The company is planning a refinancing programme which will cut interest charges from $8,000,000 to $4,750,000 a year.

The United States Steel Corporation has made the usual quarterly payment of 50 c. on the Preferred stock.

The third quarter earnings report shows a net loss, before Preferred dividends, of $1,305,205, against a loss of $9,826,767 in the corresponding quarter last year.

In detail, earnings for the quarter resulting from operations, after deducting all expenses, including repairs and maintenance of plants and payment of taxes, were $13,470,000. Charges and allowances for depreciation were $11,598,000, leaving net income of $1,872,000.

Interest charges on bonds of subsidiary companies cost $1,227,000, leaving a net income from operations of $645,000.

The proportion of overhead expenses of the Lake Superior Iron Ore Properities and Great Lakes Transportation Service was $1,950,000, and the dividend on the Preferred stock took $1,801,000, making a total defict for the quarter of $3,107,000.

The report adds that the despatches of finished products during the third quarter totalled 1,787,000 tons.

Motor shares were active. General Motors were higher on good third quarter earnings reports. Chryslers were higher on dividend increase.

The prices of the 1936 models of the Ford Motor Company will show only minor changes from those now existing. Low priced models have been advanced by $5 to $15 while De Luxe models show reductions ranging from $5 to $10.

Chrysler has announced price increases and decreases corresponding to those announced by Ford.

Studebaker has announced cuts on its 1936 models ranging from $30 to $280. It reports a loss of $1,104,923 making the total loss since the reorganization on March 9, $1,192,760.

The Chrysler Corporation has declared a dividend of 75 cents. per share on the Common stock. Previously a regular quarterly dividend of 25 cents. and extra payment of 25 cents. had been paid. The net profit for the first nine months amounted to $23,184,000 (equal to $5.35 per share), compared with $9,423,000 ($2.17) for the corresponding period of 1934. Sales amounted to $366,711,000 against $311,780,000, while car sales to dealers numbered 599,415, compared with 523,283.

Current assets on September, 30, totalled $87,645,000, compared with $85,745,000 on the same date last year, while liabilities amounted to $26,989,000, against $31,652,000.

The General Motors' third quarter earnings report shows net earnings equal to 66c. per Common share, against 48c. in the third quarter of 1934.

Earnings in the first nine months of this year equal $2.51 per share against $1.99 in the same period of 1934

Cash and Government securities at September, 30, totalled $219,000,000, against $229,000,000 at the end of June, and $207,000,000 on September, 30, 1934.

Sales in the third quarter were valued at $236,000,000, against $343,000,000 in the previous quarter, and $214,000,000 in the third quarter of 1934.

COMPANY REPORTS

THE KANGRA VALLEY SLATE CO., LTD.

The Directors have pleasure in submitting herewith the accounts of the Company for the year ending 30th June, 1935, which show a profit of Rs. 33,464-15-3. To this has to be added Rs. 3,616-14-10 brought forward from last year's accounts, making in all Rs. 37,081-14-1. As already advised, the litigation with the Zamindars has terminated and a compromise has been arrived at; therefore, the whole balance at credit of the Profit and Loss Account, *i.e.*, Rs. 37,081-14-1 is available for appropriation.

This result, the Directors hope, will be considered very satisfactory.

The Branch Managers and the staff have worked very satisfactorily during the year under report and the thanks of the shareholders are due to them for the good results attained.

The Directors propose that the profits be disposed of as follows :—

	Rs.	A.	P.
Dividend for the year ending 30th June, 1935, at 15 per cent. per annum free of Income-tax ...	18,000	0	0
Depreciation on Block account ...	2,000	0	0
Depreciation on Kunyara and Kund furniture	200	0	0
Depreciation on Kunyara and Kund Plant and Machinery, Rs. 100 each	200	0	0
Provision for Income-tax to be paid on the Profits for the year ended 30th June, 1934 ...	6,000	0	0
Transfer to Bad Debt Reserve Fund, increasing the Fund to Rs. 4,000	1,957	10	1
Bonus of one month's pay to the staff	1,200	0	0
Total ...	29,557	10	1
Balance to be carried forward ...	7,524	4	0
Total ...	37,081	14	1

The dividend, as usual, will be paid on 1st October, 1935.

One of the Directors and the Managing Director visited Kunyara Branch along with the Secretary and the Secretary also visited Kund Branch during the year under report and found the management and condition of the Quarries good.

The Company's investments appear in the Balance Sheet at a figure much lower than their present market value.

Money market conditions remained easy throughout the year and therefore there is a decrease in the amount of interest earned on the investments.

The shareholders will find that the balance carried forward is somewhat higher than in the previous years. This is partly due to the enhanced rate of lease money which the Company will have to pay in future under the compromise sanctioned by the High Court. The Company, in future, is liable to pay all the land revenue and cess of the village now or hereafter to be assessed which at present is Rs. 7,361-15-3, instead of the sum fixed in the original lease on that account, *i.e.*, Rs. 1,700. Moreover, the income-tax due on the profits of the Company for the year ending 30th June, 1935, is still to be paid. The Directors' recommendations as to the distribution of Rs. 53,891-7-4 on account of accumulated profits during the time of litigation, amongst the shareholders, have already been circulated to the shareholders. The shareholders should also bear in mind that in future years the Company will have an increase in Share Capital owing to Bonus Shares to be issued to the registered shareholders on 1st October, 1935, hence dividend in future is to be paid on increased Capital.

Directors.—Binda Saran and Hari Chand.

Secretary.—Tara Chand Kapoor.

Comparative statement of balance sheets for the last three consecutive years :—

To paying a Dividend on the Ordinary Shares @ Rs. 10 per share (*i.e.*, 20% per annum), free of Income-tax ...	1,40,000	0	0
To carry forward	19,433	11	8
Total ...	1,94,433	11	8

In accordance with the Agreement amongst the members of the Indian Jute Mills Association the Company's Mills have worked only 40 hours per week throughout the half-year under review. At the commencement of the period 12½ per cent. of the total complement of looms were "sealed," but in view of the steady demand from consuming countries it was decided by the Association gradually to release further looms from 'seal' and by the time the authorised programme is completed in November only 5 per cent. of all looms in the control of the Association will not be working.

Following the refusal of the Government of India to legislate for the curtailment of production on the lines suggested by the Association and as a result of a threat from an 'Outside' Mill to withdraw from the current Working-Agreement between the Association and that group of Mills, the Association have decided to bring the remaining 5 per cent. of 'sealed' looms into operation in February next and to terminate the existing Working-Agreement with the 'Outside' Mills on March 31st, 1936. In the meantime an endeavour will be made to formulate some scheme to regulate supply to demand, which will embrace all jute-manufacturing concerns and which it is hoped will be given statutory force by the Government of India.

In these circumstances market conditions have recently been very disturbed and it is of course quite impossible to forecast the future.

THE UPPER GANGES SUGAR MILLS LIMITED.

The Directors beg to submit the audited accounts for the year ended 30th June, 1935 which show a manufacturing profit of Rs. 74,761-6-8. After payment of interest, debenture interest, commission etc., making sundry adjustments, and taking into account, the balance brought forward from last year's account, there remains a balance of Rs. 24,512-7-2 at debit of Profit and Loss Acconut.

The prospects for the next year are encouraging. The condition of the cane crop in the area adjoing the Mill is satisfactory and it is hoped that the Mill will have a better supply of cane during the next season.

No depreciation on Block has been allowed for the year under review.

In view of the unsatisfactory result the Managing Agents have foregone their commission and remuneration for the year amonuting to over Rs. 50,000.

MONTHLY REVIEW OF TRADE AND FINANCE

Vol. No. XVI. SEPTEMBER, 1935. November 16, 1935

As compared with the month of August and with the corresponding period last year, the trade returns of British India for the month of September 1935, show decline both in exports as well as in imports. Total imports of merchandise amounted to Rs. 10,21 lakhs during the month as against Rs. 11,18 lakhs last month, showing a decrease of Rs. 98 lakhs or 8.8 per cent. and a decrease of Rs. 34 lakhs over that of August 1934 or 3.2 per cent. Total exports of Indian produce and manufactures also showed a decline of Rs. 3 lakhs from Rs. 11,81 lakhs in August 1935, to Rs. 11,78 lakhs during the month under review and a decline of Rs. 7 lakhs as compared with Rs. 11,85 lakhs, in September 1934. Re-exports on the other hand showed a further rise of Rs. 1 lakh over that of August, thus amounting to Rs. 24 lakhs.

As there was a considerable decrease in imports of about 98 lakhs, and only a slight decrease in Exports which was made up to a certain extent by an increase in re-exports, the balance of trade in merchandise shows a good increase and stands at Rs. 1,81 lakhs as against Rs. 85 lakhs in the previous month and also compares favourably with Rs. 1,52 lakhs in September 1934. But the balance of transactions in treasure was as high as Rs. 7,69 lakhs in the last month compared with Rs. 3,13 lakhs during the month under review, and only Rs. 96 lakhs in September 1934. The total visible balance of trade stands at Rs. 494 lakhs during the month as compared with 824 lakhs last month and only 2,48 lakhs in September 1934. The Imports of gold rose to 15,881 ozs. in weight and Rs. 15 lakhs in value from 6,100 ozs. in weight and Rs. 6 lakhs in value during the month of August. Exports on the other hand, fell from 733,642 ozs. valued at Rs. 6.77 lakhs to 341,586 ozs. valued at Rs. 3.2 lakhs in value during August 1935. Silver imports fell from Rs. 5.04 lakhs in August to Rs. 3.14 lakhs in September 1935. Exports of Silver also fell from Rs. 102 lakhs in August 1935 to only Rs. 9 lakhs in the month under review.

*Weekly averages.

Taking the first half of the year as a whole *i.e.*, from 1st April to 30th September, 1935, exports of merchandise declined from Rs. 73,95 lakhs in 1934 to Rs. 73,59 lakhs in 1935, but still compare favourably with Rs. 71,04 lakhs in 1933. Imports on the other hand rose from Rs. 62,13 lakhs to Rs. 64,74 lakhs showing thereby an increase of Rs. 2,61 lakhs over that of 1934 and an increase of Rs. 9,02 lakhs over that of 1933. These figures exclude the value of Railway materials (Rs. 14 lakhs Rs. 23 lakhs and Rs. 37 lakhs in the six months April to September 1933, 1934 and 1935 respectively) imported direct by the state railways working under company management which was paid for in the ordinary way and not therefore taken into account in arriving at the balance of trade. With a fall in exports and an increase in imports the visible balance of trade naturally has fallen to Rs. 10,81 lakhs in 1935 as compared with Rs. 13,41 lakhs in 1934 and Rs. 17,30 lakhs in 1933. Added to this the balance of transactions in Treasure private has declined considerably to Rs. 20,86 lakhs from Rs. 21,48 lakhs in the previous year and Rs. 27,85 lakhs in 1933. All this has reduced the total visible balance of trade from Rs.34,89 lakhs in 1934 to only Rs. 31,67 lakhs during the period under review as compared with Rs. 45,15 lakhs in 1933.

As compared with September, 1934, the imports of food, drink and tobacco in September, 1935 stood almost on the same level at Rs. 1,11 lakhs ; raw materials rose by Rs. 7 lakhs to Rs. 1,17 lakhs while manufactured articles fell by Rs. 44 lakhs to Rs. 7,69 lakhs. Under food, drink and tobacco imports of rice, not in the husk, fell by 7,100 tons to 12,600 tons and in value by Rs. 5 lakhs to Rs. 8 lakhs, while rice in the husk rose from 10,200 tons to 15,900 tons in quantity and from Rs. 5 lakhs to Rs. 9½ lakhs in value. Sugar 16 D.S. and above (including beet) decreased by 11,200 tons to 17,600 tons in quantity and by Rs. 11½ lakhs to Rs. 16 lakhs in value. Under raw materials, the imports of kerosene oil declined by 1.4 million gallons to 3.7 million gallons in quantity but the vaue remained almost stationary at Rs. 16 lakhs. Imports of mineral oils other than kerosene advanced to 5.7 million gallons valued at Rs. 17

lakhs, which meant a rise of 0.9 million gallons in quantity and of Rs. 1 lakh in value. Raw cotton (chiefly imported from Anglo-Egyptian Sudan, Kenya Colony and Tanganyika Territory) showed an increase of 500 tons in quantity and of Rs. 6 lakhs in value and stood at 3,800 tons valued at Rs. 35 lakhs. Under manufactured articles, imports of cotton yarns and manufactures together fell by Rs. 17 lakhs to Rs. 1,64 lakhs. Twist and yarn rose from 2.1 million lbs. to 3.3 million lbs. in quantity and from Rs. 21 lakhs to Rs. 28 lakhs in value. Under cotton piecegoods all the three main descriptions of goods showed decreases. Grey goods fell from 27.2 million yards to 25.8 million yards in quantity, and in value from Rs. 38 lakhs to Rs. 35 lakhs, white goods from 19.2 million yards to 17.2 million yards and from Rs. 36 lakhs to Rs. 33 lakhs, and coloured goods from 34.1 million yards to 31.0 million yards and from Rs. 72 lakhs to Rs. 55 lakhs. The number of motor cars imported, amounted to 947, and that of motor lorries, buses and vans to 803 as against 1,482 and 1,142 respectively in September, 1934. The value of motor cars imported, in September, 1935, amounted to Rs. 17 lakhs and that of motor lorries, buses and vans to Rs. 10 lakhs as compared with Rs. 26 lakhs and Rs. 14 lakhs respectively in the corresponding month of the preceding year. There were noticeable increases under pneumatic motor covers and jute machinery (+Rs. 7 lakhs each), sheets and plates of iron or steel (+Rs. 5 lakhs), copra or coconut kernel and salt (+Rs. 4 lakhs each) and tin unwrought (+Rs. 3 lakhs) while there were decreases under woollen piecegoods (−Rs. 9 lakhs), coal tar dyes (−Rs. 8 lakhs), silk raw (−Rs. 6 lakhs) and chemicals (−Rs. 5 lakhs).

(a) Exclusive of the value of Railway materials (Rs. 14 lakhs, Rs. 23 lakhs and Rs. 37 lakhs in the five months from April to end of August in 1933, 1934 and 1935 respectively) imported direct by State Railways working under company management which was not paid for in the ordinary way and not, therefore taken into account in arriving at the balance of Trade.

Compared with September, 1934, exports of food, drink and tobacco in September, 1935, declined by Rs. 6 lakhs to Rs. 3,79 lakhs. Shipments of rice, not in the husk, advanced from 73,000 tons to 91,000 tons in quantity and from Rs. 60 lakhs to Rs. 77 lakhs in value. Shipments of wheat increased from 1,700 tons to 2,300 tons in quantity and from Rs. 1⅔ lakhs to Rs. 2 lakhs in value. Shipments of coffee rose from 2,100 cwts. to 6,000 cwts. in quantity and from Rs. 1 lakh to Rs. 2¾ lakhs in value. Exports of the declined from 48 million lbs. valued at Rs. 2,85 lakhs to 42 million lbs. valued at Rs. 2,59 lakhs. Exports of raw tobacco improved from 1.8 million lbs. to 2.5 million lbs. in quantity and from Rs. 3½ lakhs to Rs. 6 lakhs in value. Exports of fruits and vegetables, dried, salted or preserved, rose from 1,200 tons valued at Rs. 7½ lakhs to 1,300 tons valued at about Rs. 11½ lakhs. Raw materials and produce, exported, decreased by Rs. 45 lakhs to Rs. 4,20 lakhs. Under this group, shipments of raw cotton shrank from 26,000 tons to 22,500 tons in quantity and from Rs. 1,41 lakhs to Rs. 1,21 lakhs in value. Of the total shipments of 22,500 tons, Japan, the largest purchaser, took 12,000 tons or 53 per cent., the United Kingdom 3,200 tons or 14 per cent., Italy 1,900 tons, Belgium 1,400 tons, Germany 1,000 tons, France 700 tons and Spain 600 tons. Consignments of raw jute decreased from 56,000 tons to 38,000 tons in quantity and from Rs. 78 lakhs to Rs. 65 lakhs in value. Exports of lac rose from 27,000 cwts. to 37,000 cwts. in quantity but the value declined from Rs. 16 lakhs to Rs. 11⅔ lakhs. Shipments of oilseeds declined from 94,000 tons. to 32,000 tons in quantity and from Rs. 1,11 lakhs to Rs. 49 lakhs in value. Despatches of groundnuts dropped from 51,000 tons to 20,000 tons in quantity and from Rs. 56 lakhs to Rs. 32 lakhs in value. Linseed declined from 32,000 tons to 5,000 tons in quantity and from Rs. 42 lakhs to about Rs. 6½ lakhs in value. Rapseed decreased from 3,300 tons valued at Rs. 4 lakhs to only 130 tons valued at Rs. 18,000. Castor seed, on the other hand, improved from 4,000 tons to 5,200 tons in quantity and from Rs. 4 2/3 lakhs to Rs. 7½ lakhs in value. Exports of raw skins more than doubled from 700 tons valued at Rs. 10½ lakhs to 1,600 tons valued at Rs. 23 lakhs while raw hides showed an increase of 500 tons in quantity and of about Rs. 3 lakhs in value. Exports of raw wool rose from 2.9 million lbs. valued at Rs. 11 lakhs to 6.8 million lbs. valued at Rs. 27 lakhs. Exports of teak wood improved from 3,100 c. tons to 7,000 c. tons in quantity and from Rs. 6 lakhs to Rs. 13 2/3 lakhs in value. Manganese ore rose from 29,000 tons to 54,000 tons in quantity and from Rs. 5 lakhs to about Rs. 9½ lakhs in value. Wolfram ore advanced from 270 tons to 580 tons in quantity and from Rs. 4 1/3 lakhs to Rs. 12½ lakhs in value. Raw rubber increased from 0.7 million lbs. to 1.4 million lbs. in quantity and from Rs. 2 lakhs to Rs. 4 lakhs in value. Oilcakes dropped from 40,000 tons to 26,000 tons in quantity and from Rs. 22 lakhs to Rs. 15 1/3 lakhs in value. There was an increase of Rs. 2 lakhs under hemp, raw, and a decline of Rs. 2 lakhs each under coal, and fodder, bran, and pollards. Manufactured goods increased by Rs. 32 lakhs to Rs. 3,56 lakhs. The number of gunny bags exported declined from 36.6 millions to 35.4 millions but the value rose from Rs. 89 lakhs to Rs. 91 lakhs. Gunny cloth, on the other hand, increased from 96 million yards to 104 million yards in quantity and from Rs. 100 lakhs to Rs. 107 lakhs in value. Exports of tanned hides rose by 45 tons in quantity and

Rs. 52,000 in value while tanned skins declined by 40 tons in quantity and Rs. 5 lakhs in value. Exports of paraffin wax improved from 3,500 tons to 5,200 tons in quantity and from Rs. 15 lakhs to Rs. 22 lakhs in value. There was also an improvement of Rs. 5 lakhs each under coir manufactures and pig lead and of Rs. 2 lakhs each under copper, pig iron and saltpetre.

The share of the United Kingdom in imports fell from 39 per cent. in September, 1934, to 38 per cent. in September, 1935, and in exports from 41 per cent. to 38 per cent. The shares of Germany, Japan and the United Sates of America in the month under report were 10, 16, and 6 per cent. respectively under imports and 3, 9, and 9 per cent. under exports.

The tonnage of vessels that entered into British India and cleared with cargoes from and to foreign countries and British Possessions during the month of September, 1935, amounted to 681,000 and 585,000 respectively. The corresponding figures were returned at 675,000 and 700,000 in August, 1935, and 594,000 and 581,000 a year ago. During the six months ending September, 1935, the tonnage of vessels that entered and cleared with cargoes amounted respectively to 4,069,000 and 4,061,000 as compared with 3,764,000 and 3,901,000 in the corresponding period of the preceding year.

Calcutta, Friday Evening.

Not only have we to record, in the current week, the continuance of the same easy money conditions as in the past many weeks, but we have to take note of a few indications which suggest the certainty of the continuance of cheap money well into the New Year—and, perhaps, even the possibility of a more plethoric supply of short credits. In the first place, it is significant that led by the announcement by the Imperial Bank of a reduction in the interest allowed in savings bank accounts to 1½ per cent. all other banks have notified that the new rate allowable to savings bank depositers will be 2 per cent. as against 2½ per cent. prevalent hitherto. It must not be forgotten that this lower rate is made effective right at the commencement of what is usually described as the busy season. This may be taken as a token of the general expectation in banking circles that money will remain easy in the current year even during the period when, ordinarily, money rates are inclined to be on the high side. It is safe to assume that the Government will follow suit; and an early announcement may be expected of a reduction in the rate allowed to depositors in the postal savings bank accounts and also of a reduction in the yield on postal cash certificates. The general public would appear to have sensed developments of this nature; for, the sales of postal cash certificates in the last month were definitely higher. When the sales for the current month are announced, it may well be found that, in anticipation of a reduction in the yield on cash certificates, the public have subscribed for substantial amounts of certificates. For our part, we will not be surprised if the ways and means position of the Treasury is helped by this means to the extent of anything like Rs. 50 lakhs to Rs. 100 lakhs. This general movement towards lower interest rates for savings bank accounts must play a great part in accentuating the sentiment of cheap money.

In the second place, the Treasury Bills Maturities will set free, as from the second week of December, a huge flood of credits into the market. The market will be in receipt of Rs. 16½ crores form Treasury Bills redeemed in the course of December. December is not a particularly good revenue month. In fact, current revenue is generally short of current expenditure in the last month of the calendar year. It is only from January that the tax gatherer gets so busy as to account for an excess of something like Rs. 10 crores per month of revenue over expenditure in each of the months of the final quarter of the fiscal year. So far as Treasury Bills maturities in December are concerned, the Reserve Bank may, in all probability, decide on meeting these obligations by recourse to larger sales of Treasury Bills, that is, by re-starting intermediate Treasury Bills at tap rates. Whether intermediate Treasury Bills are re-introduced or not, there can be no doubt that money will continue as easy as now throughout the next month. From January onwards, the Reserve Bank will have to plan deliberately for the reduction of Treasury Bills outstandings. The high watermark of Rs. 40 crores for the floating debt will be touched at the end of this month or early in December. This total will have to be reduced to something like Rs. 20 crores by the end of March. It may, therefore, be taken as certain that sales of Treasury Bills in the last quarter will be considerably less than the Maturities. Even assuming that trade conditions prove more lively in the current year than in the past and that demand for finance for the movement of produce is on a larger scale, the excess payments which the market would be receiving on the Treasury Bills position should enable the banks to cope with such demand as there may be, without any discomfort or pressure.

In the third place, far from there being any sign of reviving trade, all omens point to an exactly opposite state of affairs. The total Advances made by Scheduled Banks as on November 15, continue the declining tendency manifest in earlier returns. On November 8, total Advances in India were Rs. 81.74 crores; on November 15, they had come down to Rs. 80.70 crores. Within a week, there has thus been a shrinkage of

Rs. 1 crore in the advances made by Scheduled Banks. It is again useful to repeat that, as compared with July 5, the date on which Scheduled Banks joined the Reserve Bank system, Advances made by all the banks put together have gone down from Rs. 102.85 crores to Rs. 80.70 crores. There has, therefore, been a decline of over Rs. 22 crores. November sees the movement of jute crop in full force. December marks the commencement of the cotton season. Towards the close of December and early in January, movement of rice is to be expected in Burma—also movement of seeds in South India and wheat in the Punjab. It has been found that, in the last two or three years, the movement of these crops has not at all caused any strain on the money market centres. This was due mostly to the low prices prevalent for all commodities and to the smaller volume of funds required. For such demand as there was in relation to lower commodity prices, the resources which the bazar parties command were found to be more or less adequate for the purpose. For this reason, produce finance was a matter of but little consequence to banking circles.

Will conditions be different in the current and prospective crop season in India? It is true that raw jute has advanced in price by about 35 per cent.; and other raw produces have also registered some Advances. Even allowing for the somewhat higher price-levels now ruling, the additional finance that may be required, that is to say, the finance required over and above what was needed last year, may not prove so large as to necessitate bazar parties having recourse to banks for any large amounts. All factors taken into consideration, we believe that the busy season will not make much difference to money market conditions. It is not produce finance or trade demand or factors of this nature that can harden money rates in the next few months. In the earlier years, with trade lethargic and demand for finance poor, there have been occasional phases of monetary stringency; but such stringency was directly the result of Government policy and Government operations. If, contrary to expectations, the money market experiences the reverse of cheap conditions in the cold weather, such dearer money could be only the result of official monetary policy. Otherwise, the market seems set for continued ease of money.

In the fourth place, we must not overlook the probability of reduction in bank rate. Were the monetary policy in India on par with that in advanced countries, it will be more than a probability; it will be a certainty. We believe that definite action as regards bank rate cannot be postponed beyond the next month.

SAVINGS

It may not be easy to save money at the present time, but it is even more necessary than in the past.

A convenient method of preparing for the payment of periodical demands for such purposes as holidays, insurance premiums, income tax, passages, medical expenses and school fees is to open a SAVINGS BANK ACCOUNT with Lloyds Bank and to place a small sum away regularly.

Interest is allowed at the rate of 2½% per annum. WITHDRAWALS CAN BE MADE BY CHEQUE.

Branches in the East:
CALCUTTA, 101-1, Clive Street and 37, Chowringhee, DARJEELING, RANGOON, 45, Phayre Street and 75, China Street, BOMBAY, KARACHI, LAHORE, AMRITSAR, DELHI, NEW DELHI, SIMLA, RAWALPINDI, MURREE, SRINAGAR, GULMARG.

The exchange market has been quite steady. But there has been practically no business. The week was altogether dull. Export bills are conspicuous by their sparsity. Banks are sellers of T. T. at 1s. 6 3/32d., right through to June, 1936. There were some ready buyers at 1s. 6 1/8d. For other positions, there were buyers at 1s. 6 7/64d. On the weekly sterling tender day, applications for £75,000 at 1s. 6 1/8d., were received and allotted in full. This is the second week in succession during which sterling purchases fell considerably short of the offer.

The closing rates are: 1s. 6 7/64d., November-June T.T.; 1s. 6 5/64d., July-December T.T.; and 1s. 6 1/8d., January 1937—March T.T.

Bills may be quoted: 1s. 6 13/16d., right through to December, 1936.

Short credits went abegging as in recent months. Lenders abounded at ½ per cent. in Calcutta and ¼ per cent. in Bombay. Banks are reluctant to take any money at any rate.

Interbank call money quoted ½ per cent., lenders over, in Calcutta and ¼ per cent. (lenders over) in Bombay.

Firms' money for call, three days' notice, seven days' notice and term deposits for onemonth, twomonth and threemonth deposits quoted ¾ per cent. Twelvemonth deposits quoted 2 per cent. to 2½ per cent.

Thursday Evening.

Sterling has undergone during the week a strong upward pressure. Though on November 18, the sterling-dollar rate fell from 4.92 1/16 to 4.91 13/16 and the sterling franc rate from 74.66 to 74.63, the subsequent course of these two exchanges has been consistently upward. It is possible that the fall in the earlier part of the period under review was due not so much to natural causes as to the intervention of the authorities who must be naturally anxious to check any undue appreciation of sterling, especially when it comes about as a result of loss of confidence in gold currencies n the Continent. But latterly, the authorities must have found the current flowing too strong.

The recent rise is due to the revival of disturbances in the position of the franc. It was announced last week-end that the discount rate of the Bank of France was unexpectedly raised on November 14 by one per cent. from 3 per cent. to 4 per cent. The former rate had been in force since Thursday August 8. The rate for 30 days advances was also increased and the rate for advances on securities was raised from 4 per cent. to 5 per cent. The news report added that the increase is due to the drain of gold from the country. The statement of the Bank of France dated November 14 showed that 66 million francs worth of gold had been withdrawn during the week ended November 8. Latterly, the outflow of gold is reported to have decreased ; but it can hardly be claimed that normal conditions have been restored.

It is difficult to see how much restoration can be effected speedily. For, unlike on previous occasions, the disturbance is now due to the general unsettlement in the political situation in France. In French politics, it is hardly necessary to look for any special reasons for such unsettlement, for political crises are practically endemic in that country. M. Laval has been in office for what for France is an unusually long period. The plenary powers, which he persuaded Parliament to grant to the Government, have enabled him to carry on the administration with a series of decrees. Our Overseas Letter this week examines the position in respect of these decrees and brings out the necessity, which M. Laval is under, of securing the support of other parties. But so far as the franc is concerned, the uneasiness as to its prospects arose in the conflict between M. Laval and the Chamber Finance Committee. At one time, it was believed that the danger of a Cabinet crisis had been averted by a compromise on the basis that M. Laval would restore the cuts to small-salaried civil servants, pensioners and other classes supported by the parties of the Left. Our Overseas Letter also makes reference to the possibility that M. Laval would be exploring the chances of securing the support of some of the Left groups. Any such attempt would revive the question of devaluation.

The Financial News observes:—"It is beginning to be recognised, however, even in quarters which have hitherto been opposed to devaluation, that a decision to that effect cannot be delayed indefinitely. According to some quarters, the franc will be devalued before the general election or immediately after it by a Government, headed by some one without any political ambitions, which is prepared to face the unpopularity of that step." Whatever the ultimate fate of the franc, it is certain that French politics is now deeply stirred, and, as a result, the franc is experiencing severe pressure. The French Cabinet is reported to contemplate the prohibition of all public meetings calculated to endanger law and order with a view to check the tension between political groups. There is also the threat of the Socialists that, on the re-assembly of Parliament on November 28, they intend to put down for immediate discussion a motion for the dissolution of political leagues in the form of a vote of censure. The passage of such a motion would mean the resignation of the Government. These possibilities are naturally viewed with alarm and the drain of funds has forced the Bank of France to effect during this week another increase in its official rate from 4 per cent. to 5 per cent. The morale is now so low that some financial quarters have actually begun to discuss the question of an embargo on gold exports.

It is interesting to note that, while the franc has again moved into the danger zone, the other principal gold currencies, namely, the guilder and the Swiss franc, are in a definitely more comfortable position. It is said that President Colijn, realising the dangers of another political conflict, has decided to cut down his retrenchment programme with a view to ensure wider support and a smoother passage of the bill through the legislature. In the particular circumstances in which Holland is placed, one need not regard a budget deficit with any deep horror ; and it may be said that till the Dutch finances arrive at a dangerous state, the guilder will not experience any serious crisis. The position of the Swiss franc has improved since the last elections, so that, once again, it is France which has to face squarely the problem of devaluation.

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of bussiness-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours ?

You have only to let us know your requirement and leave the rest to us.

NATIONAL INSURANCE CO., LTD.

COCHIN HARBOUR

All's well that ends well. And there is good cause for gratification that the tedious, protracted and often acrimonious talks over the question of the Cochin Harbour are now at an end ; and that the outcome of the recent Delhi confabulations is acclaimed by all the varied interests as just and fair. This successful issue of the Cochin Harbour discussions has, we would like to believe, a more than local interest. One of the major grievances of the Indian commercial community is the disproportionately heavy representation of European interests in the various Port Trusts of India and the insignificant position and power assigned to Indian commerce. The Indian commercial bodies have, from time to time, submitted representations to the Government of India, drawing pointed attention to the diverse manifestations in which this paucity of Indian representation on Port Trusts has expressed itself. Thanks to the continued trade depression and its effects on Port revenues, thanks to reckless borrowing of earlier years and the onerous burden of debt service, thanks to the development of rival ports, and thanks to the smuggling and other conundrums presented by the Kathiawar Ports, the administrations of the leading Port Trusts of this country have now reached a difficult and arduous phase in their careers. One would have thought that the autocrats who had so far wielded power defiant of public opinion would now, in such extremities, be more prone to listen to reason. No such change in their attitude is, however, noticeable. Nor do the Government of India pay any heed to the protests and wails of the Indian commercial bodies. While the position in regard to the older bodies stands thus, it is a heartening sign of the times that, in regard to the Cochin Harbour, the Government of India have evinced an admirable spirit towards the Indian side of the case. It is from this point of view that we welcome the settlement of the Cochin Harbour dispute ; for, we believe that this is a significant token of the new attitude which the authorities might be expected to take towards Port Trust administration.

* * *

Turning from the wider to a more limited sphere, the successful issue of the Delhi conferences as regards the Cochin Harbour constitutes a personal triumph of no inconsiderable magnitude for Sir Shanmukham Chetty, the Dewan of Cochin. That he should have been able to shift the centre of gravity of these negotiations from Fort St. George to the Imperial Secretariat at New Delhi and that he has obtained for the Cochin State her just and lawful dues, so persistently and so truculently denied by the Madras Government, go to prove that qualities of tact and statesmanship, displayed in such abundance by Sir Shanmukham, are bound to prevail over mere dilatory and obstructive tactics. The Shanmukham —Zafrullah pourparlers, in the concluding stages of which Sir C. P. Ramaswami Iyer took a significant hand, have resulted in an agreement satisfactory alike to the Governments of India, Cochin and Travancore. The insistence of the Madras Government on Cochin ceding a substantial share of its jurisdiction over the Harbour and its unwillingness (which informed quarters interpret as a mask for inability) to finance the fourth and really important stage of harbour development constitute, by themselves, a diverting chapter of governmental intransigence. The futility and unwisdom of the dog-in-the-manger policy, so often the theme of Treasury Bench oration, seems to have been lost on the Local Government in the matter of the Cochin Harbour. It was, therefore, possible to arrive at a settlement only by pushing the Madras Government out of the field. How this became necessary and how this was done will be apparent from a recital of the history of the Cochin Harbour scheme.

* * *

Efforts to make Cochin a major port were first made shortly after the war. Not much headway could, however, be made till 1925 when an agreement was concluded between Travancore, Cochin and Madras Governments during the governorship of Lord Willingdon. It will thus be seen that the first significant move in this matter was taken under the auspices of Lord Willingdon and the final negotiations have also reached their happy end under his aegis. It is, therefore, in the fitness of things that the Harbour area, which has been reclaimed, is named Willingdon Island. The first and second stages of the Harbour development were completed without any hitch or much ado. In regard to the third stage, the necessary finance was supplied to the port authorities by the Government of Madras. The sum outstanding and due to the Madras Government under this head is now Rs. 29 lakhs plus interest. All the pother of recent years has been about the fourth stage. The completion of this stage will cost Rs. 90 lakhs. The original proposal was that the fourth and last stage should be financed by the three Governments by way of a loan to the port authorities in equal proportions. The loan was to carry no interest for the first ten years ; and, thereafter, the port authorities were to repay the loan in thirty annual instalments with interest at 5 per cent. When the question of completing the fourth stage was taken on hand, the Madras Government proved the stumbling block. The scheme sponsored by the latter envisaged a large Port Trust body, with a great weightage for British Indian interests, especially British commercial interests. Thus, the British Cochin Municipality and the British Cochin Chamber of Commerce were assured of ample representation, while representation was altogether denied to Ernakulam and Mattancheri, the two important Municipalities of the Cochin State which are on either side of the backwaters and which are vitally interested in the development of the Cochin Harbour.

* * *

At the same time, the Local Government insisted on the Cochin Government ceding jurisdiction in regard to legal matters to the courts of the former. Such ceding of jurisdiction meant the loss of sovereign powers enjoyed by the Maharaja of Cochin over his own territory. On this question, the Maharaja would, naturally enough, not budge an inch. Sir Tej Bahadur Sapru, who was advising the Cochin Government in this matter, evolved the formula of a general tribunal representative of the diverse interests. The Government of India asked the Madras Government and the Cochin Government to get together and report on the solution reported by Sir Tej Bahadur. On Sir Shanmukham becoming the Dewan, matters stood thus ; and from this point onwards, he applied himself to the task of discovering a speedy and favourable solution. At the outset, he invited the Madras Government to fix up arrangements for discussions as proposed by the India Government. Madras replied that no useful purpose could be served by such discussions. Sir Shanmukham had no other alternative than to take up the matter directly with the Government of India. Events followed in quick succession thereafter. Sir Zafrullah Khan visited Cochin and made a personal and detailed study of the problem on the spot. Sir James Grigg made a thorough examination of the problem from the point of view of finance. Everyone was agreed that no time should be lost in developing and declaring Cochin a major port. All this could be done only by removing the main obstacle, namely, the Madras Government. On this point, all the three Governments would appear to have been unanimous.

* * *

It was, therefore, decided that Madras was to be repaid the outstanding amount due by the Cochin port authorities, namely, Rs. 29 lakhs plus interest at 5 per cent. The Government of India have undertaken to lend this sum to the port authorities. The port authorities are now placed in a much stronger financial position as the new loan is repayable over a period of fifty years against thirty years of the original loan and will carry interest at 3¾ per cent. as against the original interest of 5 per cent. These new arrangements enable the port authorities to reduce their annual sinking fund contribution from about Rs. 2½ lakhs to less than half this sum. Instead of the Madras Government contributing Rs. 30 lakhs and Cochin and Travancore Rs. 30 lakhs each towards the fourth stage of the scheme, Cochin will now contribute Rs. 60 lakhs and Travancore Rs. 30 lakhs, the Madras Government retiring from the field. Of the Rs. 60 lakhs to be found by Cochin, Rs. 30 lakhs could be easily spared from its large cash balance of Rs. 85 lakhs ; as for the balance, the Government of India will lend the sum, interest being 3¾ per cent. and the period of repayment fifty years. On the new plan thus evolved, Cochin Port Trust may well stand out as a model of its kind. Interest charges, which will be a burden in the earlier years, have been lightened as far as possible. The unwilling partner has been compelled to retire. The Cochin State has been assured of the continuance of its sovereign rights. The new Port Trust guarantees adequate representation to the Indian State municipalities and to the Indian mercantile community. The Port Trust as a body will be more compact ; its working will, as a result, be more efficient and businesslike.

GOVERNMENT AND PUBLIC

In the further spate of speeches which this week has produced, those, which deserve prominent mention, are the presidential address of Mr. Walchand Hirachand at the annual meeting of the Maharastra Chamber of Commerce and the discourse on unemployment which the Rt. Hon. Sir Tej Bahadur Sapru gave at the second U. P. University Students' Conference. The speakers belonged to entirely different categories. Mr. Hirachand is a businessman ; and Dr. Sapru is an eminent lawyer, with a flair for politics. Yet, both of them arrive at the same conclusion, namely, that there is endless distress in each of the fields with which they were concerned in their addresses ; and that all this could have been avoided if the Government had chalked out a clearcut plan. For the acute conditions of unemployment amongst the educated middle-class community, Sir Tej Bahadur holds not only the Government, but also the society, responsible. It is curious that, in recent years, the plea for planning not only in economics but in other sections of national life has been urged by Indians belonging to all walks of life and professing all shades of opinion. It is no less curious that the Government's spokesmen affect lofty contempt for this popular demand ; and that, with their own magnifying glass of extra power so vivaciously described by Sam Waller, they are able to see in their policy of drift and their programme of inaction the completest features of a comprehensive plan. The apologists for the Government claim that the Government have certainly fashioned a plan and worked in accordance with that plan. One or two of the more important members of the Government are, however, candid enough to admit their total scorn for anything that savours of a plan. In this matter, as in many another, there is this glaring variance between the Government's policy and the popular demand.

* * *

Everyone is urging the need of a plan. Some of the officials reply that they are already acting on a plan, while others brush aside all pleas for a plan. The Indian public demand that the problems connected with the continued export of gold should be fully investigated. The Government desire us to be grateful for this gold exodus and to feel proud that India is thus able to contribute its quota to the solution of international complications in finance. India is convinced that most of the gold that is shipped out of the country represents distress gold. Finance Member after Finance Member has tried to argue, but without facts and figures, and without any investigation or observation, that all these sales of gold are for profit. India with one voice demands a lower ratio. Eighteenpence ratio is unalterable, reply the Government in indignant fervour. The policy of protection is halfhearted according to India's industrialists. Sir James Grigg argues that his predecessors have allowed a

regime of protection run mad. Even the moderate politician condemns military extravagance. Finance Members pay handsome tributes to the Commander-in-Chief for his resolute campaign of economy. The costliness and autocracy of the Indian Civil Service are a constant theme of complaint from the Indian side. The Government look upon the I. C. S. men as model human beings and deem their present emoluments as mere pittances compared with their real worth. This kind of antagonism between the Government view and the public view runs through every question of importance. It is time that there is some machinery whereby the series of misunderstandings like these are reduced to a minimum and through which the Government can meet public opinion half-way and the public can be better appraised of the policy and motives of the Government. Till such machinery comes into being and begins to function effectively and efficiently, speeches of our leaders in business and politics must continue to be grouses from beginning to end.

TRIUMPH OF CONSERVATISM

The results of the British elections have been deprived of their element of surprise by intelligent forecast. The choice of the date of election clearly made the issue a foregone conclusion. The leaders of the Conservative party became suddenly conscious of the solidarity of the nationalist sentiment, resulting from the decisive stand which the National Government took up in reference to the Italo-Abyssinian question. The rules of party politics do not preclude the use of such tactical advantage ; and it is no use condemning the party in power for so restricting, in effect, the judgment of the sovereign people. But one cannot help wishing that the rules were so amended as to enable the electorate to choose its representatives according to its best judgment. The fact remains, however, that the Conservative party has been returned with a substantial, though reduced, majority and that the Conservatives are bound to continue in power for the next five years unless the unexpected happens, that is, either a re-alignment of parties or some paramount problem necessitating a fresh appeal to the country. In an election, the results of which could be clearly foreseen much ahead of the polling date, one could hardly expect any sensation. The unseating of Mr. Ramsay Macdonald and his son, though obviously notable, can hardly be called a surprise ; for it is quite understandable that the candidature of Mr. Macdonald, with his record of the immediate past, should provoke no dissimilar reactions in a Conservative or a Labour constituency. Nor was the return of Labour leaders like Mr. Clynes, Mr. Herbert Morrison and Dr. Hugh Dalton, who were scuttled out of Parliament in the great national hysteria of 1931, quite unexpected. The only change that the elections may be said to have wrought is that the front bench of the Opposition has been considerably reinforced and that, as a consequence, debates in the future will not be so remote from reality as in the past. As for the new Government, it is reported that changes will be reduced to the minimum.

* * *

So long as the accredited leaders of the Conservative party and the more important members of the Cabinet are assured of their place, the election will have wrought no more than an inconsiderable reduction in the Government majority. It may be said, therefore, that the Conservatives are now firmer in the saddle and that they would be free to formulate their plans for the next five years without the fear of any major upset. Whether the Conservatives will utilise to the full the power which they will now obtain remains to be seen. It is, by

no means, improbable that the new elections tend to dull the enthusiasm of the Conservative Cabinet for thorough schemes of internal reconstruction. Psychologically, the next five years would seem to be somewhat different from the period following the crisis of 1931. For then, the National Government went to the polls with a demand for what has been aptly called a "Doctor's mandate". The doctor, at that time, claimed both expert knowledge and extreme goodwill to his patient. The doctor was also conscious that the failure to make an effective and beneficient use of the mandate would involve him in dangerous consequences. But now that the mandate has been renewed and the doctor has apparently ingratiated himself to the patient, a degree of indifference is, by no means, improbable. The danger is that the Conservatives might in the coming years shift the emphasis of their party programme from schemes of broad national reconstruction to those of a more or less class character.

* * *

But it must be said that the election manifesto of the Government serves to dispel such fears. One might even say that, so far as the economic interests of Britain are concerned, the National Government have acquired in recent years a degree of commendable eclecticism. If it is remembered that many of the measures indicated in the manifesto of the Labour party are only of a formal kind and the party is not serious about their actual execution, it will be seen that there is hardly any notable difference between the practical proposals advocated by the parties. The Conservative party has showed itself not unwilling to adopt the ideas of its critics if they are consistent with the deeper principles of their creed. There is a large mass of work by way of economic reconstruction which is waiting to be tackled by the Government. It would be, obviously, too late in the day for the worst diehard to object to the reconstruction of this industry or that merely on grounds of doctrinnaire individualism. As for finance, the Chancellor of the Exchequer has made it plain that financial considerations need not stand in the way of executing any sound scheme. If the Government make up their mind to be true to this assurance of Mr. Neville Chamberlain, they will find their hands full and they will establish a more concrete claim to the gratitude of the electorate than they have been able to put forward on this occasion. One may say that, if the Conservatives would only tackle the internal problems in the right spirit, there would be no reason to regret the failure of Labour at the polls ; for it should not be forgotten that a Labour Government is still attended by the risks of grave unsettlement in the business and in the financial world.

* * *

It is only when one considers the prospects of the next quinquennium from the standpoint of Empire and international politics that the triumph of the Conservatives seems an almost unrelieved tragedy. The National Government themselves have given the utmost importance to foreign affairs, in which sphere they virtually ask in the words of *the New Statesman and Nation* for 'Policeman's mandate'. This came in the wake of assurances on behalf of the Government that the British behaviour in connection with the Covenant was always "irreproachable." But no student of foreign affairs can miss the instances of the Government's infidelity to the ends for which the League of Nations stands. The attitude of the British Cabinet

to the Sino-Japanese dispute, the sabotage of the Disarmanent Conference, the intrigues for the partitioning of Abyssinia and the efforts to buy off Mussolini by methods of conciliation which only serve to assure the Duce that no serious opposition from the League to his war plans need be apprehended—these are matters which hardly serve to reassure the public that, in its new lease of life, the Conservative Government would serve the cause of international peace more faithfully than its rivals to power. The comment of the *New Statesman and Nation* on the demand of a 'Policeman's mandate' is apt and well bears reproduction:—

> We approve of the policeman's activities, but we are all against giving this particular policeman a blank cheque. His conversion to the side of law and order is too recent. For several years he openly aided and abetted the most notorious housebreaker of our times, and only a couple of months ago he was willing enough to strike a bargain with the latest thug. If today he asks us to accept his *bona fides* as an emissary of the law, we reply that we prefer a fellow with a better record. We want much more definite assurances about his reasons for turning honest and his plans for the future. And what we like least about him is that he talks at times as if it were rather a soldier's than a policeman's mandate he was after.

Few can deny that the interests of world peace demand that power in Britain should remain in the hands of a party unfamiliar with the dubious ways of war-time diplomacy and more devoted to world peace. To the average Britisher, this should have been clear if he had cared to reffect ; and if in spite of these facts, the British public has renewed its mandate to the Conservatives, one can only say that the British electorate has not risen to a sense of its responsibilities as the arbiter, in large part, of the destinies of the world.

PUBLICATIONS OF THE LEAGUE OF NATIONS

"BALANCES OF PAYMENTS, 1933"

Price : Rs. 4-2-0

Only existing statistical book of reference concerning international accounts (trade in goods and services, gold, long and short-term capital operations). Figures, are given for 32 countries, in the majority of cases for a series of years up to 1933 inclusive. Information is also supplied concerning outstanding international liabilities and assets. In a summary chapter the general tendencies up to September, 1934, are dealt with, special consideration being given to the effect of currency depreciation.

"ARMAMENTS' YEAR-BOOK, 1934"

Price : Rs. 13-12-0

This edition contains monographs on 64 countries, both members and non-members of the League. The information contained is derived from two sources: the communications from various Governments to the Secretariat on the occasion of the Conference for the Reduction and Limitation of Armaments and the official publications of the different countries, such as collections of laws, army gazettes, etc

"NATIONAL PUBLIC WORKS"

Price : Rs. 8-4-0

This book has just been issued by the Communications and Transit Organisation of the League of Nation and is the result of a letter addressed by the Secretary General of the League requesting various Governments to communicate to him the following particulars: (1) A brief description of the main public works undertaken since the beginning of the year 1929; (2) The principal administrative methods followed or contemplated for the execution of such work; (3) The principal methods employed for financing such work; (4) An estimate, as far as possible, of the allocation of expenditure on the execution of the possible works.

"INTERNATIONAL TRADE STATISTICS, 1933"

Price : Rs. 6-14-0

This volume analyses the foreign trade during the years 1931, 1932 and 1933 of 65 countries accounting for 95% of the total world trade. It contains more than 300 tables, which are accompanied by explanatory notes. The data it gives illustrate strikingly the great changes undergone in recent years in the composition and direction of foreign trade, and their effect in the position of the individual countries. The synoptical tables show the percentage distribution of each country's imports and exports by provenance and destination.

INDIA AND THE SANCTIONS

On Monday last, the Government of India, in common with fifty other Governments of the world, took the action necessary to impose the economic and financial sanctions against Italy. In details, they have, it is said, followed the example of His Majesty's Government in Great Britain. They have, in the first place, published three notifications under the Sea Customs Act prohibiting the export from British India to Italy or to any Italian possession of certain classes of goods and the import into India of goods produced in Italy or in any Italian possession. The imposition of financial sanctions is embodied in the Italian Loans and Credits Prohibition Ordinance, which was proclaimed on the same day. It may be easily imagined that the exports, on which an embargo is now laid, comprise war materials or such goods as would be useful for raw purposes. This list, doubtless, includes many things which, with the worst will in the world, India cannot export. But the second list published in the notification under the Sea Customs Act covers a number of goods of which India has a fair supply and which Italy would be only too glad to procure from this country. For it covers a number of metals and ores, rubber and animals of transport. There can be no doubt that the prohibition of these exports has a considerable practical significance to the aggressor, whom the League of Nations is now out to bring to terms. The Ordinance imposes a penalty of two years' imprisonment or a fine or both on persons who, directly or indirectly, render financial help to Italy. The Ordinance penalises the participation in the issue of loans for the benefit of Italians and the granting of credits. An explanatory note elucidates for the benefit of the business world the kind of transactions which would constitute a contravention of the new law. The object of the measures now taken is not difficult to understand. More than fifty members of the League of Nations have decided that they should make it as difficult as possible for Italy to prosecute the war and to force her eventually to accept any settlement that would be acceptable to the League of Nations and to Abyssinia.

Though there can be no doubt that the application of sanctions against Italy by India has the approval of the nation, it can hardly be claimed that the policy has the prior consent of the accredited representatives of the people who have examined the question from all standpoints. It may be useful, therefore, to resist, for the moment, the obvious dictates of our pacifist mentality and to consider the question from the more sordid standpoint of our interests. Though the Ordinance and the notifications under the Sea Customs Act have attempted to make careful distinctions between permissible and prohibited transactions with Italy, there is no doubt that India's trade with Italy will be virtually suspended during the period in which the sanctions will be in force. It is already clear from the news reports so far received that such has been the effect of the action of the British Government in Great Britain. The demand for certificates of origin, which the authorities will make, to make sure that Italy's goods are not carried into Britain through a third country, may also have the effect of inconveniencing the exporters from other countries. Thus the imposition of economic sanctions must surely cause a grave disturbance in world trade.

* * *

The extent of the damage to India may be gauged from the following table, which gives the total exports from India to Italy during the last three financial years and the value of the principal items thereof:—

Exports from India to Italy.
(in 000's Rs.)

		1932-33	1933-34	1934-35
Total Exports	...	4,65,73	5,75,37	5,73,21
Jute Raw	...	66,04	95,61	1,26,93
Cotton	...	1,43,82	2,38,78	2,54,73
Linseed	...	18,14	31,25	12,25
Groundnuts	...	44,32	83,89	45,07
Rapeseed	...	91,35	10,85	3,87

As against these exports, imports from Italy into India accounted during the last three years for Rs. 3.95 crores, Rs. 2.91 crores and Rs. 3.101 crores respectively. It will be seen that India has a substantial balance of payments in her favour amounting to

nearly Rs. 3 crores during the last two years. Our exports of raw jute, cotton and groundnuts to Italy are, indeed, the loss of this market on the prices of these commodities. Though these goods are not banned, so far as we can interpret the terms, the actual effect of the working of the Ordinance might be to shut them out from the Italian market. In imposing the sanctions against Italy, India must, therefore, be well prepared to lose a not invaluable export market, for her principal agricultural commodities. It is necessary to see how far Italy would be impeded in the prosecution of her Abyssinian war by the action taken by this country. As has been already mentioned, India has little or none of the materials essential for war purposes. Nor have our banks granted Italians large lines of credit, the cutting of which would bring Italian economic life to a standstill. It may be said, therefore, that, while the application of sanctions against Italy causes India a great deal of privation, it does not incommode Italy to any considerable extent

* * *

Can it, therefore, be said that India's action in this instance is only a piece of martyrdom without any immediate tangible effect? One can only say that, approached from what we have called a sordid or an unduly practical standpoint, the action of the Government of India would seem to lack all meaning. But one can hardly do justice to this question unless one regards it with a warmth of feeling, breadth of view and even a flight of imagination, rarely called for in the consideration of public problems, particularly those with an economic significance. We can forget that a war, at this stage of the fortunes of mankind, is a danger to civilisation and that particularly the Abyssinian war is a challenge to humanity. India is one of the original members of the League of Nations. She has established, right through the course of her history and particularly in recent years, a reputation for pacificism which, though it may now savour of making a virtue of necessity, must, ere long, acquire a force in world politics. In the present distressed state of the world, the League of Nations is rightly or wrongly the load-star of the hopes of humanity. Its dignity was outraged not long ago by the action of the Japanese in slicing off a large bit of Chinese territory and constituting it into a puppet kingdom. Of Signor Mussolini, it may be said that he has put up the back of the League for once ; and if, for the first time, the great international organisation has proceeded to give effect to an outraged world conscience, India should, undoubtedly, be the last to hold back.

* * *

The ordinary criteria of judgment in these matters would, therefore, be inapplicable in the present case. Reckless of the losses that the abandonment of the trade with Italy may involve, India has to line up with the rest of the world in bringing pressure to bear on the aggressor. But it [illegible] at the same time, disturbing to reflect that the sincerity of the Powers in bringing Signor Mussolini to terms is not altogether self-evident. Few can claim knowledge or at least an inkling of the ulterior purposes of the great nations in respect of the Italo-Abyssinian question. But the manner, in which the parleys with Italy have been conducted in the past, and the dilatoriness in the imposition of sanctions raise the doubt whether ultimately it will not prove that the majority of the nations of the world had made these sacrifices, more or less, in vain. If the sanctions are to be effective, the nations should not shrink from the task of adopting more drastic measures, when such are found to be necessary. But even more important than the disorganisation of Italy's war-plans is the spirit which will underlie the negotiations and the final settlement. There can be no greater danger to the cause of the world peace than a settlement, the terms of which would set a premium on such arrogant intransigence as was shown by Signor Mussolini in his dealings with the League. In such an unfortunate event, the least that India could get is a favourable treatment at the hands of the League when the latter takes up the question of compensating the various countries for the losses sustained by them in the application of sanctions against Italy.

COMPETITION IN TEA TRANSPORT

Our attention has been drawn to an inaccuracy in the article on "The Transport of Tea" which appeared in our Annual Tea number. The writer dealt at length with the methods of transport, and in the course of the article incorrectly represented that undue competition existed between the various transport interests which cater for the Tea traffic. Such competition may exist in certain other directions in Bengal and Assam, and the writer is perhaps, within his personal knowledge, aware of some instances of very low rates. But it is a matter for gratification that no question of cut-throat competition, so liable to obtain under conditions of modern economy, has invaded the domain of Indian Tea, of which the transport, as at present conducted, is answering every economic criterion.

If health were wealth, Calcutta must be a very wealthy place, indeed, judging by the crowd which, at dawn and at dusk, perambulate the strand and the maidan, the Lake and the Eden Gardens. Professor Dey has, in a recent address, emphasised the place of national health in national economy. But the citizens of this city have realised the truth long ere this ; and so large a proportion of the population is out on the open spaces and unfrequented thoroughfares that the Lake presents, of evenings, all the appearance of a *mela* and the maidan during mornings looks as though an unending stream of workers are hustling, by a short cut, to the factory lest they be late for the opening hour. Even a casual look at the throng pursuing their physical exercise in such grim earnestness will convince you that what they are after is not the acquiring of new good health, but the shedding of a portion of their over-abundant health. They form, in fact, the Rotund Brigade of Red Road ; and each one of this brigade would rather be a member of the Super-Slim Society. This slimming craze has, curiously, caught both masculines and feminines. Amongst these pedestrian enthusiasts, you find corpulent Chandi and gaunt Gladys, fat Phatkaram and stout Samuel.

The vogue of figures which ape the exclamation mark has levelled all distinctions of age, race, nationality, sex and colour. Marwaree corpulence pursues the emaciation programme in the invigorating hour which blends twilight and dawnlight in the weird beauty of the maidan. Bengal sees in the setting sun an auspicious time for apt results from resolute strides round and round the Lake. Tom and Dick, and Tom's sweetheart and Dick's wife find it more to their liking to act on the old motto which enjoins half a mile after supper. And, thus, are most out-of-office hours spent in the cause of fat-reduction while all other hours are, it is sad to relate, devoted to fat-accumulation. Therein is the rub. We eat far too much and get bloated ; then, we seek to cast off the superfluity by means whose efficacy is, to put it mildly, open to question.

Let me, without ado, admit that I have, recently, been trying this recipe myself. A fairy friend, who had seen me more reasonable in girth and size but a year ago in London, has taken on herself the kindly task of waking me up at 5.30 in the mornings, thanks to the day-and-night vigilance of the phone. And this is an hour which, in earlier times, I had rarely seen except from the wrong end. At five-thirty, then, I cast off—unwillingly enough, believe me—my beauty sleep ; and at quarter to six, we are legging it on the Red Road. An hour and a half of brisk walk which, thanks to her grave sense of duty, is more akin to a run—and I creep back home, dead beaten for the day. We have had a week of this fervent pastime ; and, to gauge the result, we watched, wistfully, the fateful hand in the weighing machine. Two pounds up apiece—was the startling revelation. This should not, however, have been startling had we but looked around in our daily walk and noted, with some understanding, the colossal procession of corpulence which, despite ages of devotion to the cult of walking, refuses to budge an ounce.

The use of pedestrianism in the cause of slimming is, I am convinced, precious little. Doubtless, it may have its soul of goodness in diverse other ways. For one thing, an old proverb assures us that early to bed and early to rise is the way to health, wealth and prosperity. There is, after all, some virtue in acclaiming the dawn, each day of the week, from the right end. Most of us have tried other ways of acquiring wealth and achieving prosperity—and failed. For my part, I propose to persist in the morning ritual ; for, it may well prove my only way to affluence. Starting the day early enough, assured of moderate exercise and plentiful fresh, young air, a sprightlier outlook as the initial equipment of each day may mean better writing and better value for the writings of a scribe.

It has now been decided that Cochin Harbour is to be Cochin's Harbour and our congratulations go to Sir Shanmukham Chetty for having made sure of it and for establishing, in so conclusive a manner, that Cochin's material progress is safe under his stewardship. The fourth stage of development, as adumbrated in the 1925 agreement, will now be commenced. Under the Dehhi agreement, the administration will vest in a Port Trust, over which the Cochin Government will have primary and the Government of India supervisory jurisdiction. The thirty lakhs so far lent by the Madras Government will be returned by Cochin in three instalments of Rs. 10 lakhs each. The Madras Government will cease to have interest or jurisdiction over the Port. The exact composition of the Port Trust has also been decided on. The Government of Travancore will be adequately represented on the Port Trust. The Harbour revenues will be divided among the India, Cochin and Travancore Governments, the India Government getting the lion's share. That the Government of Madras should have failed where the Government of India succeeded in arriving at a speedy and satisfactory solution is something depressing to contemplate. That the Government of India should have been persuaded into playing Santa Claus and that an agreement so satisfactory to Cochin should have been arrived at, are facts which add a decoration to Sir Shanmukham's helmet. The new Dewan of Cochin and the new Commerce Member of the Government of India have done a good day's work ; may each day of their regime prove an equally resplendent record !

THESE MODERN TIMES CALL FOR HIGH EFFICIENCY

To-day, you can no more afford a private courier than the shipping companies can afford sailing ships. In this telephone age you'd be behind time and your competitors. The telephone is not only a symbol of the 20th century, but a very essential part of it too. You can't imagine a really progressive business without a telephone, and it is just as important for social engagements too.

TELEPHONE! IT'S QUICKER AND CHEAPER

Whether it is a question of business or pleasure, a telephone is at your service—it gets you in touch cheaply, quickly and realistically.

Telephone Rates		*Payable yearly*	*Payable quarterly*
Business Lines	...	Rs. 280	Rs. 72-8
Residential Lines	...	Rs. 180	Rs. 45-0
Party Lines (Residences only)		Rs. 135	Rs. 34-0

Sir Chimanlal Setalvad's open letter to Lord Willingdon, to which our Bombay correspondent refers, re-raises a question which the best mind of India and the best mind of England regard as intimately involved in the larger question of Indo-British relations. Unfortunately, possibly unavoidably, the question has been consciously side-tracked more because it is delicate rather than difficult. Obviously, an approach charged with real good-will must be made by the ruling community; Indians, I mean self-respecting Indians, cannot be expected to lay themselves open to the sort of snubbing of "natives" which is an unwritten law. This snubbing, galling in politics, is insulting on the social side; and, while the humiliation of planned political snubbing is inescapable, the hurt of social snubbing is avoidable. Wherever Indians and Englishmen meet socially, it is a condition precedent that the Indian should accept the Englishman's race superiority. If he accepts humbly this interpretation, among others, of the white man's burden, he becomes, according to the measure of his subserviency, a *persona grata* in British official and non-official society, on the outermost fringe of which he assumes a becoming pose.

Something, not much, of this racial intolerance has been liquidated as a matter of public policy, for which reason Indians are 'featured' in Indo-British public functions which are by courtesy called social. The personal ban, except in rare cases, is static. One of the unfortunate re-actions of India's national drive against British over-lordship is the accentuation of racial bias. The man from London or Lancashire or Edinburgh or Aberdeen (I gladly exclude the sons of Erin) cannot reconcile himself to the reflection that the educated Indian is his social equal, even though he is constrained to admit that the educated Indian is his intellectual equal. It will not help the situation by complacently or wrathfully closing our eyes to the reality, because of its ugliness. And if the Indo-British connection is to continue on a basis of good-will and common weal, which is the avowed purpose of Britain, it is up to the sons and daughters of Britain in India to break through a convention which has wrought incalculable mischief.

I would not attach much value to a change of heart, if it is to be a change, under Viceregal patronage. The element of comporting oneself under direction would not introduce a new code. After all, European clubs are the flower of the European social seed; and they, no more than the European home, insist on the European social code. Obviously, the European clubs would not be exclusive to Indians were not the members so minded. Till, therefore, the European, or rather the Britisher, sheds his superiority complex, Indians will continue to be taboo socially. Let it not for a moment be thought that Indians, the right type, crave for social contacts with the ruling class. They would gladly appreciate them and reciprocate as an admission of racial equality. And certainly a finer understanding would mature from the freedom of equality—an understanding which is ruled out by the social exclusiveness of the British. Only a short view, an oblique view, sees the security of British interests in India in an offensive exclusiveness. Treating us as political pariahs is a mistake: treating us as social outcasts is an offence.

Let me, however, hasten to add that degrees of superiority in inverse ratio to pigmentation are tending to be less marked and less insulting to Indian self-respect. I can relate a hundred incidents from personal experience during the war period and the few years after the war, wherein Europeans were wantonly insulting in theatre or railway, hotel or office. There is now, be it admitted, a more earnest endeavour on the part of the better class Europeans to avoid behaviour which will be resented by Indians. Time was, for example, when you could not enter the dining hall in Hotel Cecil (Simla) in *dhoti*. Since the days of Goswami and Chaman Lall, *Khaddar* clothes and Gandhi caps, ensure a better treatment alike from management and staff. The use of Red Road (Calcutta) was denied to Indians but two decades ago. Now, the Rotund Brigade of Red Road is predominantly Indian. Government members and principal officials promote functions that they and their Indian friends could mix more freely and exchange thoughts more frankly. It may be that you cannot still fail to notice the air of condescension which is only partly hid by the eager geniality of the host and his caste. I can thus go on over a long list to prove the existence and growth of the changed heart; but I will content myself with pointing out that while Byculla Club and the Yacht club put up notices warning Indians to "keep off the grass",—and this, too, in a city which boasts of its better understanding amongst its Indian and European population—Bengal Club allows its 'grass' in the Guest Room to be trodden by Indian friends of its members. I have myself attended a few functions in the Guest Room of this premier club of the European community and they have been amongst the cheeriest convivialities I have taken part in. What the Bengal Club is doing in a section of its premises, it can extend to the entire premises. And what the Bengal Club has done and may do, must be enough of a warning to Byculla Club and its like that exclusiveness of this kind can but make a prison for its members, instead of the Club being a centre where experience, intellect and culture can be pooled and enriched for common good.

A recent foreign and political department *communique* states that membership of the various classes of the Orders of the Star of India and of the Indian Empire is to be increased to accomodate the Armed Forces in their decorative distinction. The bestowal of Orders, more in the higher than the lower degree, is conducted on wrong principles. It should be the exception, and not the rule, for officials to accumulate a row of ribbons on the left lapel of their coat. They are paid public servants and generally their service is not commensurate with their pay. They have promotion, pension and pride of officialdom, an inviolate trinity. Men, and now-a-days women, outside the Public Services, who serve the state and the public out of the fulness of ability and selflessness, should be selected for Honours: not those who, among themselves, distribute the loaves and fishes of Stars and Garters. Having the giving, it is surely unseemly that they should keep the kernel and cast aside the husk. The Honours List in England carries out this principle. In this country of false values the public is sacrificed to the Services.

Shirley Temple at Calcutta's renovated screen temple—that is what the enterprise of the management of Madan Theatre offers to the public three times a day at popular prices. "Curly Top" and Shirley Temple is a revelation, of which Madan Theatre has secured the exclusive release. It is a 20th Century Fox Film Corporation production—the last word in frolic, fascination and fashion. Hear Shirley sing: watch Shirley dance: see Shirley smile! And cinema fans will be delighted with the new sound and vision arrangements which have made Madan Theatre a place of joy.

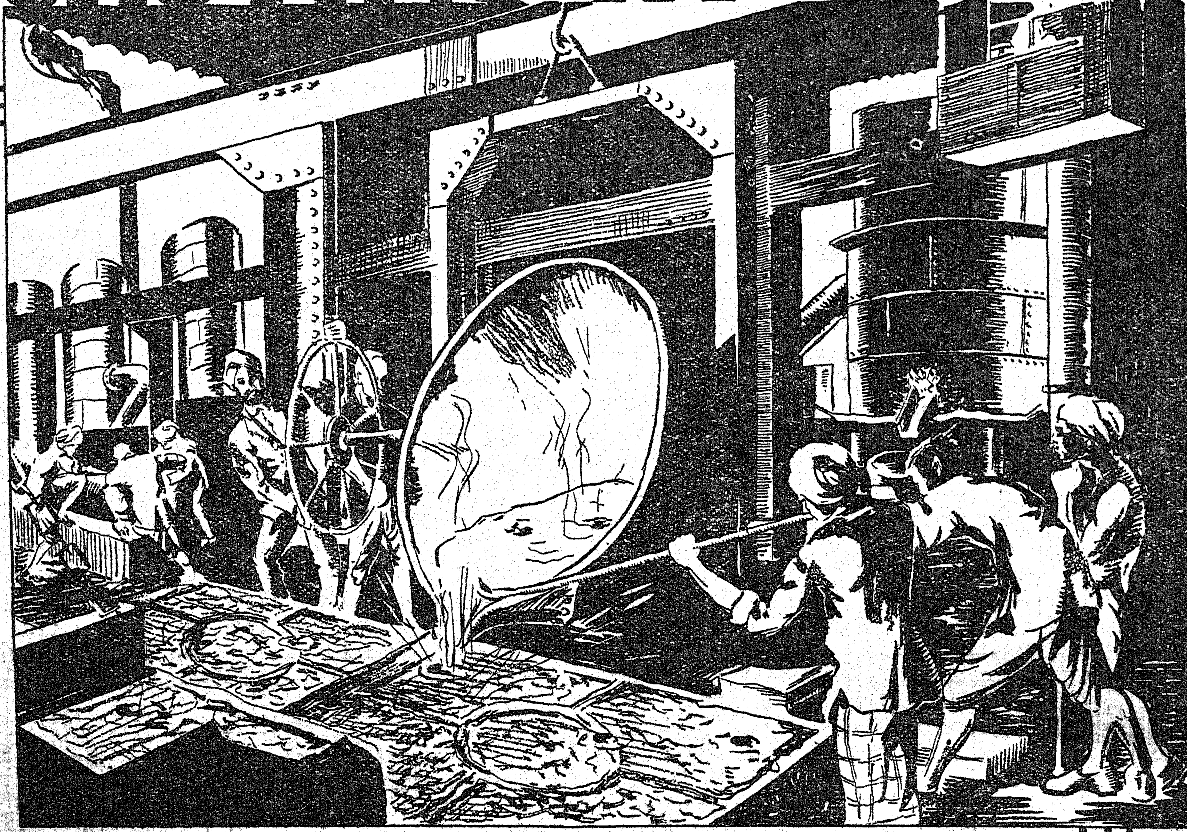
CASTING AT KULTI



PRICE OF IRON CASTINGS LOWERED THROUGH INDIAN ENTERPRISE.

TEN years ago Castings required to any degree of exactitude to specification had to be imported at heavy expense. Indian enterprise has changed all that. To-day the vast foundries of the Bengal Iron Co. at Kulti are turning out castings of an excellence equal to anything done abroad ; and such ready response has this enterprise received that Bengal Iron's prices now compare favourably not only with those of imported castings but even with those of untried substitute materials. From pattern-making right through to the final machining and finishing, every step of every job is handled by highly trained workmen under expert supervision. The following are only a few examples of the work undertaken.

CAST IRON PIPES. HEAVY MACHINE PARTS. SUGAR MILL ROLLERS. MILL COLUMNS. BRIDGE CYLINDERS. SLUICE GATES.

(From Our Correspondent)

New Delhi, 19th Nov.

An economic war has been declared against Italy by the application of sanctions, published this morning. It is of two kinds,—financial and economic, as indicated by me in a previous diary. It is not the subscribing or the giving of assistance to any loan raised for the benefit of Italy or Italians that worries anyone, but the prevention of credit which will hit hard the Indian agriculturist, whose commodities figure largely in the export trade of India to Italy.

But there was no escape from the position. The Assembly had expressed its protest against Italy's conduct ; India, as a member of the League of Nations and as a signatory to the Covenant, was bound to impose sanctions. The question was in what manner it should be enforced. Here, the British Government had laid down the terms, and mentioned the goods which they are not exporting to Italy or Italian territory which could be used for war.

So, India has merely copied Britain. The notifications under the Sea Customs Act have specified the kind of goods which are not to be exported or transhipped to Italy or any of her possessions. And there is to be complete prohibition on all imports. How this will react on the progress of the war in Abyssinia cannot be estimated just yet. *Reuter* has been mentioning frequently how Italy had been taking steps to meet the embargo. But no less than fifty other countries are with India in this act of retaliation against Italy. That is something.

Still the Indian agriculturist will have his own problem to face now. How is he to find the market for the goods which, he is told, he is not to send to Italy where his products have been finding increasing sale. The Government of India will have to look into this aspect shortly and help the agriculturist, who is already in distress, in regard to the prices he gets for his labour.

While you in Calcutta are happy that three Bengalees have been elected out of the five for the provincial board of the Reserve Bank, we in Delhi have our grouse that there will be none to represent us as a result of election, on the Delhi Board. The proxies had been so well arranged that the votes had been cast for those who had gone round for them.

The casting of votes took place in Delhi. And there was the Hon. Rai Bahadur Lala Ramsarandas who had come personally to help his son Mr. Rup Chand and his son-in-law Mr. Shambulal Puri on whose behalf the first preference had been collected from all over the Punjab. Credit for the success of these two candidates really goes to Mr. Ramsarandas.

As for Mr. Srinivas's success, his cousin, Mr. Sriprakasa, M.L.A., was mainly responsible. The Benares M.L.A, in fact, had done enormous personal propaganda and was also present at the polling station with his Khaddar cap on. Altogether there are three Congressmen and two non-Congressmen who have been returned. Perhaps, the Central Board will be guided by this fact in the nomination of one shareholder to the provincial board.

Imperial Delhi is at present suffering from two epidemics—municipal dictatorship and malignant malaria. I have been a victim of the latter, but in a sense, the two epidemics are inter-connected. Such an enormous importance is being attached to the outward appearance of this new "Garden City," that the most rigid enforcement of bye-laws with regard to occupation of property is being observed. People cannot let houses or flats except as they are told to ; and even public institutions are treated without any regard for their standing or purpose.

I am told that The Lady Irwin School for Girls, which, being organised to provide education for the Children of the Government of India employees, moves between Simla and Delhi and, has for that reason, been granted aid by the Government of India, engaged a decent place in a business quarter, but, municipal dictatorship would not brook it. The alternative suggestion of hiring a residence was turned down. The School was told to close down and send its children to the local municipal school. However, I am told, that as a result of appeals to a Member of Government and even to The Viceroy's House, slight relief was granted in that the School was allowed to engage a private house, provided the residents of the locality did not object.

The traders both Europeans and Indian, of New Delhi, have under stress of necessity, organised a Trades Association and are fighting a municipal order which purports to tell every trader, in every detail, how his posters and sign-boards and placards should be displayed. I can assure your readers, that the municipal authorities have no artist on their staff.

While all this fuss at ornamentation is proceeding, in the name of the "Imperial Capital," the city continues to be a prey to epidemics. These little dictators have hardly looked into the question of drainage or of levelling up of marshy grounds, with the result that a very large proportion of the residents of New Delhi are down with malaria, which does not seem to have troubled her old Imperial neighbours to the same extent. And, remember New Delhi is administered by a totally officially appointed body !

The result of the British General Elections has, of course, delighted the Olympians. To them, none but a Conservative Government can mean stability and security ; and so long as such a Government is returned, the Civil Service interests, in London are powerful enough to have their way. But, they are interested as to who will fill the Offices of the Secretary of State and the Under-Secretary of State. Private advices received here, have shown, that Lord Zetland is quite keen to retain the India Office. In fact, he has been settling with Lord Linlithgow, the outline of a new pilicy, which together they wish to operate, with a view to make the new reforms a success.

Feeling here seems to be, that, the India Office should go to a Die-hard Conservative, who would listen to the Service view in all matters and not introduce any original plans of his own. They have already had bitter experience of the Benn-Irwin Pact, and, they do not want to see a Secretary of State at the India Office, working too closely with the Viceroy.

The recent developments at Aligarh, are of a particularly meaningful kind. Successive visits by three Members of the Government of India, Viceroy's intervention to get the Nizam to accept Chancellorship of the University, the election of the Agha Khan, as Pro-Chancellor, and, the appointment of Dr. Zia-ud-Din as Vice-Chancellor, all indicate, that special attention is being directed to Aligarh with a view to curb the Nationalist tendencies, which, the institution had grown, especially in communal matters. I would not say much, lest, people think, I am trying to upset their apple-cart.

(FROM OUR CORRESPONDENT)

Bombay, November 20.

At a meeting on last Friday of the Standing Committee of the Municipal Corporation, when the budget for 1936-37 was presented by the Commissioner, Mr. I. H. Taunton, the financial position was closely scrutinised. Suggestions were made to cut the Municipal coat according to the Municipal cloth: a policy of caution, covering school furniture and salary cuts, was advocated. Some of the members pointed out avenues of retrenchment, while others demurred at loans at high rates of interest. Some urged that the sources of income were not elastic and that expenditure had been cut to the bone: others were surprised at the inconsistency of dealing with a deficit budget by a reduction of the general tax. And there was the difficulty of raising taxation, or finding other sources of revenue, which were both not feasible.

* * *

Professor S. R. Davar pointed out that, if Government had made additional sources of revenue available, while "saddling us (the Municipality) with the Improvement Trust Department with its heavy deficit," there would have been no need to raise the tax from 11 to 12 per cent. Properties were vacant in the city because tenants were unable to pay the rents demanded, choosing the lesser of two evils by going to the suburbs. The operation in this case of the law of diminishing returns indicated, in the Professor's opinion, the necessity of encouraging urban building activity through reduction of the general tax. And the Professor was insistent that the surplus land was purchased as a matter of business for the sake of profit and that the Commissioner's idea of treating this revenue as capital investment was "fundamentally wrong."

* * *

It was the Professor who noticed that, in spite of addition of one ptr cent. general tax plus reduction of debt charges by nearly Rs. 9 lakhs plus increase of revenue by about Rs. 4 lakhs over the revenue of the current year, the budget is so adjusted as to show an unreal deficit of about Rs. 3½ lakhs of rupees, by not crediting the revenue of the surplus land sales, amounting to about Rs. 10 lakhs. The budget, as prepared, would rule out any relief to tax payers—a contingency which has come to be regarded as static.

* * *

The heavy toll of motor accidents in each of the three divisions of the Presidency, which was given by the Home Member, in reply to a question by Mr. A. J. Bangi (Southern Division), is—

Number of Motor Accidents during 1934.

Grievous hurt	Loss of human life	Both
50	50	2
268	42	9
50	15	10

The Home Member said that the special measures adopted to minimise the number of such accidents were:—(1) In the Poona District a checking party is posted on the Poona-Mahableshwar road during the season and on other roads during other periods. (2) Speed governors have experimentally been introduced on Public Service vehicles in the Poona District and on similar vehicles of other districts, the permits in respect of which are countersigned by the District Superintendent of Police, Poona. If this measure reduces accidents due the extension of speed governors to the rest of the Presidency will be considered. (3) The restriction on the working hours of drivers, which has been imposed recently, is also calculated to lessen the chances of accidents due to fatigue of drivers. (4) A scheme to provide a larger establishment for the control of motor traffic by effecting retrenchment in other directions is contemplated.

* * *

The Port Trust administration did not show up well in the lime light of answers by the Home Member to interpellations in Council on passage concessions. Since passage concessions were sanctioned by the Trustees in 1927, the sum under this head stands at Rs. 3,24,212. When these concessions were sanctioned, eight Indian trustees led by Sir Purshottamdas Thakurdas disapproved of them; but, being in a minority, they could not stop the extravagance. It was admitted by the Home Member that, though sanction came in operation in 1928, concessions were granted a year previous on, it seems, the principle of intelligent anticipation. The list of officers who received passage allowances is all-embracing. Queried if, in view of continuous depression, Government intended to have the concession scheme re-examined, the Home Member replied blandly in the negative. And that is that.

* * *

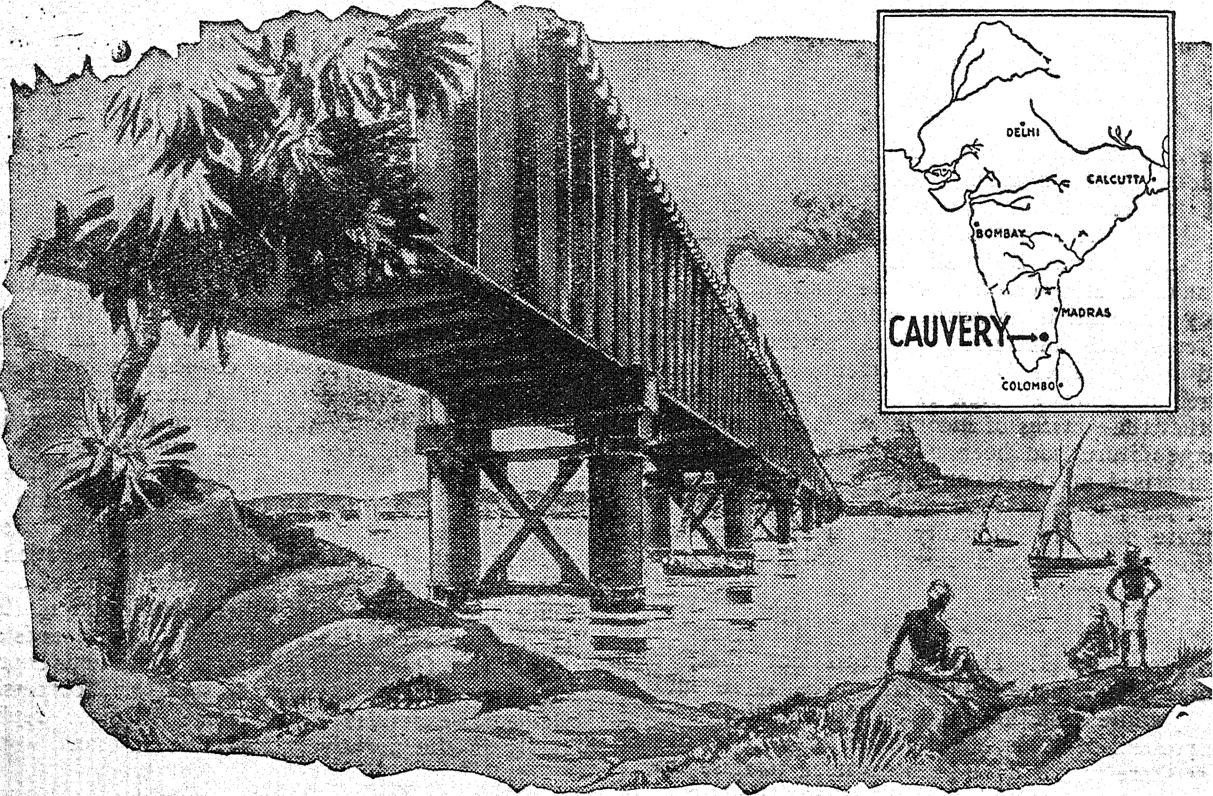
Sir Chimanlal Setalvad's open letter to H. E. the Viceroy on the "exclusiveness" of European clubs voices a sentiment which is none the less strong because it is silent. This is not the firt time Sir Chimanlal, as one of the foremost Indian public men in Bombay, has protested against a racial code sacrosanct in European clubs. Whether Sir Chimanlal's appeal to Lord Willingdon, on the eve of his departure and on the eve of India's alleged constitutional partnership with England, will break through the crust of club inconsequence remains to be seen. I am far from sanguine, knowing the Englishman west and east of Suez, where "the worst is like the best." When Sir Chimanlal says "it is not understandable why members of any such (European exclusive) clubs should be prohibited from inviting to the club members of any other community as their guests" he is not calling a spade a spade.

* * *

Pace all the platitudes that pour on us about goodwill being the fountain of understanding by Britishers of Indians, the social ban is inexorable. A few Britishers, Scotsmen rather than Englishmen, are "at home" in the social sense to Indians with whom they are friendly in business or in the professions. I agree with Sir Chimanlal that some of them, not too many, feel the irksomeness of the intolerance of the social ban and would be glad to see it deposited in the dust bin of die-hardism.

* * *

Indians and Europeans meet "socially" at frigid receptions or formal farewells or ceremonial parties or *burra khanas* or Rotary lunches, where everything that is superficial, insincere or casual is the small change of conversation. The mask is always on. As media of mutual understanding these "social" contacts have no value: whereas the geniality of club contacts is genuine. India is really administered from clubs where the highest official hierarchy cultivates high statesmanship over cake and tea or biscuit and whisky. The plea of religion, as Sir Chimanlal makes clear, is casuistry. Indians, to whom hospitality and courtesy are inviolate, would appreciate and respond to a "social" gesture. But it must be a gesture without a sense of patronage and racial pride.



SPEED

The Cauvery River at Trichinopoly is nearly 1½ times as wide as the Hooghly at Howrah Bridge.

Braithwaites bridged the river and opened the line to traffic in six months.

This feat was made possible by the Braithwaite organisation backed by their patented system by which they finished the foundations in five weeks. Seven other similar bridges having an aggregate length of two miles were completed by the same methods in 13 months of continuous work.

BRAITHWAITE & CO.
(INDIA), LIMITED

South 1112

CLIVE WORKS, CALCUTTA — MULUND WORKS, BOMBAY

SOUTH INDIA

(From Our Correspondent)

Madras, 18th Nov. 1935.

The announcement of the results of the Reserve Bank Local Board elections (Southern Area) was an instance of the expected happening. The results were in almost monotonous conformity with anticipations. What with the candidates not making a secret of the number of valid proxies filed by them and what with ballot boxes being in very little demand at the Victoria Public Hall on polling day, the results were more a matter of computation than of prophecy.

Mr. C. R. Srinivasan came easily on top with what seems an unnecessarily large number of first votes, which apart from being very nearly double that of the next successful candidate, pulled up the quota, beyond the reach of all but one other candidate. Mr. Srinivasan's election is interpreted as a triumph of the Fourth Estate. It is said of Gladstone that he lived long enough to become a tradition in his own life time. The "Swadesmithran" is in a similar happy position, as the father of vernacular journalism in South India. I venture to hope Mr. Srinivasan will bring to bear on the deliberations of the maiden Local Board the qualities of wisdom and of circumspection which he has displayed in his stewardship of that influential daily.

Mr. Pl. V. A. V. Ramanathan Chettiar who comes second is well known in banking circles in Madras. It is just as well that a member of the Nagarathar community, the most influential Bankers of South India, is on the Board. Mr. Ramanathan Chettiar is essentially a "city man" with extensive stock exchange dealings. Mr. Govindoss Chaturbhoojadoss belongs to a well known family of upcountry bankers which has made Madras its home. He should prove quite a useful member. Sir V. Ramesam with his considerable judicial experience, his Wentworthian thoroughness and tenacious memory should prove quite an asset to the Board. Dewan Bahadur T. Ragaviah brings to his job his experience as an administrator. He has sought to enliven the evening of his life by agreeing to serve on many companies' Boards and thus has become essentially a Board man. Whatever may be said of this board, the charge of obscurity cannot be levelled against its personnel.

* * *

The presidential address of Rt. Rev. E. H. M. Waller, Lord Bishop of Madras at the Regional Conference on traffic in Women and Children held under the combined auspices of a number of influential social service organisations, at the Banqueting Hall of the Government House, the other day, was short, purposive and refreshingly free from shibboleths. His address was devoted less to cataloguing past achievements than to enumerating the steps that yet remain to be taken. He stressed the need for the immediate establishment of a Central Home which will tackle the more intricate and baffling problem of rescue work. It is easy to penalise commercialised vice by legislation and by stopping it to create fresh problems for society. The Lord Bishop drew pointed attention to the economic basis of the whole problem.

"Turning to the rescue of the victims of this traffic, it has to be recognised that very many of them are engaged in it for economic reasons; for want of some other method of earning a livelihood, they have drifted or been forced into it. To deprive them of even this means of keeping body and soul together and to provide no outlet for them is futile and cruel." A central rescue home is the only humane solution. It will cost a lot of money—lots more than charitable organisations can hope to provide. The State should, therefore, run the Home. It has no reason to squeal, as money invested in such an institution will be money saved in having fewer hospitals, doctors and nurses to maintain. If a drive against immoral traffic is to be effective, ample provisions must be made to rehabilitate the victims; they should be encouraged and guided into more healthy and elevating methods of earning a living. The Bishop's address was followed by a bunch of resolutions, on the subject. I wonder with what degree of seriousness the Madras Government are going to approach this question. Will considerations of financial stringency (a familiar weapon in the official armoury)—stand in the way of a Rescue Home materialising? If the Government feel on the subject as strongly as does the Lord Bishop, it should not be difficult for them to establish a Central Home in the immediate future and thus find for the problem a comprehensive and intelligent solution.

* * *

The members of the Viceroy's Council seem to have developed a sudden affection for South India. It was Sir Zafarullah Khan a month ago and Sir Frank Noyce last week. We are now informed a third member is going to confer on Madras the distinction of a visit shortly. This time it is going to be Sir G. S. Bajpai. Sir Zafarullah's visit helped to solve the Cochin Harbour conundrum. Sir Frank Noyce, who has latterly made the aeroplane his favourite mode of transport, has gone back impressed with the necessity of reducing trunk telephone rates as also with the possibilities of a broadcasting station in Madras. Sir Girija is coming to visit the Avadi and Mandapam Emigration depots and generally to acquaint himself with the operation of the emigration system. He will also visit the Imperial Dairy Institute at Bangalore. Madras has received a tip that it would be advisable to draw his attention to the parlous state of the cocoanut trade. Cocoanut has become the Cinderella of the produce market. The trade seems like going to the dogs. The Ceylon cocoanut which is larger in size, has overrun the market like a hightide and the local produce is in little demand. Cocoanut-producers observe with despair, the cloud of depression darkening their horizon. Nothing short of immediate and substantial protection will avert the disaster which threatens this trade. Will the forthcoming visit of Sir Girja Shanker, who holds the *portfolio*, help to dispel the cloud, and save a trade so important to the province?

"FUNK MONEY"

FLIGHT OF EUROPEAN CAPITAL

HOARDING CONTINUES

By Dr. Paul Einzig

Special for "INDIAN FINANCE"

London, November 11.

Ever since 1931 the shifting of funds by nervous people anxious to safeguard their fortunes against currency depreciation has been the most important factor in the international financial situation, and also in the case of some countries, in the internal financial situation. The volume of "funk money" —to use the term coined for the purpose of indicating such capital has been enormous during these years. The Bank for International Settlements attempted to compile statistics of its amount, but the results are necessarily incomplete and one-sided, for a very large proportion cannot be ascertained by statistics. Some of the owners of this capital hope to find their security by transferring their balances to foreign countries. Others hope to attain this end by hoarding gold or foreign bank notes. Whichever way it is done, the process has caused immense trouble to Central Banks; it has unsettled the foreign exchange market from time to time; and it has made human calculation of trends impossible.

During the early years of the crisis, France, Holland and Switzerland were the principal refuge for foreign funds. While French people themselves were hoarding on a large scale, foreigners hoped to be on the safe side by relying on the stability of the franc, and, to a less extent, of the guilder and the Swiss franc. During the last two years, however, the greater part of the refuge funds have been removed from the countries of the Gold Bloc. At the same time, the flight from the gold currencies by the nationals of these countries through hoarding or through transfers abroad has assumed unprecedented dimensions. Part of these funds sought refuge in gold; and the rest had to choose between dollar and sterling, apart from a small amount which found its way to Brussels after the devaluation of the belga.

From time immemorial, gold has been a favourite means for hoarding. Although an attempt was made after the War to get all gold out of circulation and concentrated in the hands of the monetary authorities, this movement was reversed from 1931; and it is safe to say that at present the total volume of hoarded gold is much larger than it was at any time in history. Even though some countries such as India have reduced their hoarding, the decline has been offset many times over by the increase of the hoarding in Europe and the United States. It is a popular belief that the gold thus hoarded lies hidden in vaults for years. Doubtless this is true concerning part of the amount hoarded. A very large part of it, however, exchanges hands at frequent intervals. Indeed, the London gold market has never experienced such an active period as it has since 1931. The same bars change hands several times a week and the increase of the turnover has necessitated a change in the customs prevailing in the bullion market. In the olden days, coins were scrutinised carefully to avoid losses arising from paying full price for worn coins. To-day, they are simply counted. In fact, when it comes to larger amounts, it is only the sealed bags that are counted. As far as bar gold is concerned, buyers and sellers no longer take the trouble of checking the weight of each bar nor even of the total consignment. They are transferred from holder to holder,—that is from the bank of the seller to the bank of the buyer—with the aid of invoices which state the weight and fineness of each bar, and nobody troubles to check these figures. And yet there is more reason to check them now than there was in the olden days when bars changed hands on rare occasions only. As a result of frequent transport, in the course of which the bars are not handled always too carefully, the loss of weight must be quite considerable. Nobody worries about it, however, at present. The lawyers must be rubbing their hands when they think of the day of reckoning which is bound to come sooner or later when the gold which is at present hoarded is sold to some Central Bank when the short weight will be discovered. According to legal practice in Great Britain, the bullion brokers are responsible for the weight and fineness of the bars sold through their intermediary. They in turn have recourse against the seller. It is easy to imagine the complications that will arise in case of substantial short weight of bars which have changed hands a hundred times. There is no way of ascertaining which seller was responsible for the short weight. Indeed, probably all of them were responsible for a fraction of it. Since the buyer can ill-afford to bear the whole loss, which in some cases will be considerable, some formula will have to be found to indemnify him. It is impossible to imagine any solution which would be fair to all parties concerned.

To some extent the flight from the various currencies assumes the form of hoarding sterling and dollar notes. This practice has not assumed the same dimensions as after the War, when the population of France and other Continental countries had large amounts of notes obtained through the spendings of armies. It is, nevertheless, a factor which should not be ignored. There is reason to believe that the increase of the Bank of England's note issue by some £20,000,000 during the past twelve months was to a large extent due to foreign buying of notes for hoarding purposes. In France and other countries of the Gold Bloc, the acquisition of pound and dollar notes is the only method of hoarding available for the small man who cannot afford to hoard bar gold and does not know enough about finance to transfer capital abroad. Large amounts of pound notes are left by British tourists abroad. It has been noticed that the amount of these notes which are repatriated by foreign banks has become much smaller, even though tourists' spendings have, if anything, increased. The reason is that those foreign hotel-keepers, shop-keepers and others, who obtain pound notes keep them instead of selling them to their banks, and even those, which find their way to the foreign banks, are usually re-sold to the hoarding public. For the time being this factor provides a support to sterling, but sooner or later with the return of confidence after the devaluation of the gold currencies, the notes will be repatriated and will, therefore, cause an adverse pressure on sterling exchange.

Until a few months ago, a large proportion of the refugee capital found its way to London in preference to New York. The lightning changes in President Roosevelt's policy provided a source of uncertainty, and foreign capital playing for safety, preferred to keep aloof from the dollar. During the last few months, however, the situation has undergone a fundamental change. It has become evident that President Roosevelt is becoming increasingly

(*Continued on page 1583*)

PROSPECTS OF REARMAMENT

BRIGHTER OUTLOOK OF SHIPBUILDING & IRON & STEEL

LIKELY RUSSIAN LOAN

By Francis Williams

City Editor: The "Daily Herald," London

(By Air Mail)

Special for **"INDIAN FINANCE"**

London, Nov. 11.

Writing, as I am, on the very eve of the Election I am at a disadvantage as you, my readers, will know the result by the time this is published.

At the moment it looks as though the "National" Government will be returned, although with a very substantially reduced majority. I think we may now take it as certain that one of the first actions of the Government will be to embark on a big rearmament programme. As least £150,000,000 is likely to be spent on the Navy and substantial sums also on the Army and Air Force.

This means, undoubtedly, a considerable increase in activity in the shipbuilding industry, while iron, steel and the metal trades should also obtain a fair share of new orders.

Although some of the effect of this big spending programme has been discounted in previous rises on the Stock Exchange, the market in these shares is likely to be firm for some considerable period.

The £100,000,000 road scheme, announced during the election, is not likely to mean much increase in business for public works contracting firms, as spread over five years this sum means very little, if any, increase in expenditure over that of past years. The shipbuilding and iron and steel industries are, therefore, likely to benefit most of all from a "National" Government return.

We may also see further substantial rises in aircraft shares; but here the market is highly speculative.

As the rearmament programme will undoubtedly be financed in a large part by a loan, some decline in gilt-edged securities is likely in the immediate future.

Fresh Municipal borrowing will probably be held up, until this Government Loan is out of the way; and I do not, in fact, expect much activity in the new issue market in any kind of security until the new year, although there are one or two minor industrial issues pending.

One possibility of the somewhat more distant future is a Russian loan. There exists, of course, a certain amount of political prejudice against such a loan, but this prejudice is not so strong as it was; and, as the proceeds for any such loan would be spent exclusively on British orders, the proposal has the backing of a substantial number of British industrialists.

It has also received favourable consideration from a number of bankers. Although I do not expect the obstacles in the way to be overcome immediately, I think there is quite a chance of a fairly substantial Russian loan after a few months. If so, the yield, although it will not be excessive for the Russians are now in a sufficiently strong position to refuse exorbitant charges, will be, looked at on purely financial grounds, very attractive.

(Continued from page 1582)

reluctant to apply any further radical devices and that his monetary policy is becoming less and less inflationary. Confidence in the dollar has, therefore, strengthened to a considerable extent. At the same time, the political troubles in Europe and the possibility of Great Britain being involved in a war have weakened confidence in sterling. For this reason, the bulk of the new capital that is seeking refuge from the Continent, finds its way nowadays not to London but to New York. In fact, a certain amount of foreign capital which has hitherto been kept in London has been transferred to New York. Even some of the foreign gold deposits in London have been converted into dollars; with the result that the appreciation of the dollar has made it profitable to ship gold from London to New York. To that extent, the change in the trend resulted in dishoarding, since the gold sold by private holders found its way to the official American gold reserve. The total of funk money, however, remained unchanged since there was an increase of foreign dollar balances to take the place of hoarded gold.

It would be misleading, therefore, to speak of genuine dishoarding. Indeed, the process of hoarding still continues and is likely to continue for some time. Political uncertainty provided an additional reason for hoarding and postponed the day when the restoration of confidence will cause the trend to be reversed.

OVERSEAS' NEWS: By Air Mail

Week ended Nov. 9

UNITED KINGDOM

ELECTION EROSIONS

The first stage of the election campaign shows clearly the voters' mind. The week's nominations have provided 1,347 valid candidatures for 615 seats, including 586 supporters and 761 opponents of the National Government. The fight will be between Conservative and Labour parties, whose candidates, numbering 515 and 552 respectively, cover nearly 80 per cent. of the total nominations. The Government's supporters include 45 Liberal National and 20 National Labour candidates against 155 Liberal and 13 Independent Labour representatives in opposition. It is evident that in the new House of Commons the voting strength will in the main lie in the Conservative and Labour parties. That does not mean that the relative predominance of these two Parties represents their voting power in the country. Within a week the demos will have chosen a Government for the next five years. There is no doubt that the Conservatives, who took unto themselves the mantle of a National Government, will come back to office in that guise, after inaugurating a foreign policy which more than any measure has appealed solidly to the security sense of the hub of the British Empire.

Should the election run on its charted course, it is more than likely that the immense majority of 411 which the National Government had on the dissolution of Parliament will shrink substantially, despite the tactical advantage of Government in rushing a general election. The Opposition in the new House of Commons ought, if election portents are a guide, to be more effective than in the last, when Government's overwhelming majority literally stifled any sort of opposition. Labour has been for the last four years consolidating its voting strength and it would be a surprise were Labour not returned a vastly more re-inforced party. Labour leadership in the last House of Commons was not compelling, though there is hope that some of the stalwarts who failed at the last election may rehabilitate the power and prestige of Labour Opposition. Liberals, after the stagy come-back of Mr. Lloyd George, laid the comforting unction to their soul that their great traditions would be a political asset. Nothing is farther from the reality. The other sub-parties, ancillary to the two trunk Parties, do not come into the election picture.

The range and intensity of League sanctions will expand with the embargo on supplies of steel, iron, coal, oil and petrol. This gap in economic action has been recognised from the outset; nothing decisive was done in the face of supplies from non-League members. The proposal has been approved by the Economic Sub-Committee and referred to a Drafting Committee to consider the necessary measures, which can only be effective if sufficient support is forthcoming from non-League members. So far Germany has declined to discuss the Italo-Abyssinian conflict, stressing officially her non-committal attitude. The United States has come voluntarily into line with League sanctions. The Committee of Clearing Agreements formally decided that League members shall be directed to terminate such pacts with Italy by November 18. Another Committee began detailed consideration of contracts in course of execution—especially in regard to those where partial payment had been made by October 19—when trade sanctions were approved. The Transit Sub-Committee also considered the consignment of goods to "non-sanction States," and the transit of such goods designed for Italian consumption. Switzerland has, it is said, invoked the international agreement which provides that the St. Gothard tunnel should always be open, in spite of obligations under the Covenant, which now assume prior rank.

Heavy interest disbursements in respect of Government stocks on the first of the month are largely responsible for the big deficiency of £16,401,264 of revenue against expenditure disclosed in the Exchequer Return for the week to Saturday last. In the same week of last year, however, the deficiency was even larger at £19,335,599. Ordinary expenditure last week amounted to no less than £30,295,154 compared with £30,515,485 a year ago; of the total, no less than £13,400,000 was required for interest and management of the National Debt, while practically the whole of the remainder was absorbed by the Supply Service. Revenue at £13,893,890 showed an increase of some £2,800,000 over last year, income-tax receipts being particularly good at nearly £5,500,000. Customs and Excise were also large contributors to revenue. The heavy deficiency necessitated a substantial increase in the Floating Debt. Advances by Public Departments jumped by £14,600,000, while the balance was met by the issue of Treasury Bills, no advances being taken from the Bank of England, as was the case a year ago.

Bank deposits reached a net high record for all time last month, according to the weekly averages for the eleven clearing banks. The total rose to £2,035,700,000, easily surpassing the previous record of £2,023,500,000 established only a month earlier. A year ago, these deposits amounted to less than £1,900,000,000. The expansion in deposits in October, which followed a jump of some £10,000,000 in the previous month, was again largely explained by a reduction in the cash ratio, which at 10.04 per cent. was at its lowest point since long before the depression. Two months ago the ratio was standing at 10.59 per cent. The cash holdings of the banks fell by £3,600,000, although a rise is usual at this time of the year with the return of currency at the end of the holiday season.

The coal strike ballot is to proceed. The Mineowners' Federation, in reply to the request of Captain Crookshank that the executive should reconsider the question of a national ballot on the strike issue, said that the Federation finds no justification for postponing the ballot scheduled to take place in the coalfields on November 11, 12 and 13. The Federation stated officially that "the suggestions of the Government confirm the assertions of the Mineworkers' Federation that the coal industry has been suffering from a complete lack of organisation in the sale and distribution of coal. What the Government offers is merely a hope that at some remote time the proceeds of the industry may be improved and an opportunity afforded of obtaining better wages in the future. There is no attempt to deal with the miners' demand for an immediate increase in wages. The miners believe that an immediate improvement in their wages is imperative. They are prepared to submit their case to an independent tribunal and to abide by the judgment. This offer has been refused both by the coalowners and the Government. In these circumstances the executive feels that the suggestions of the Governmeent offer no justification for postponing the ballot vote."

Under an agreement just concluded between the Government and the four big railway companies, the Treasury is to guarantee the principal and interest of a loan to enable the railways to carry out a £30,000,000 improments scheme. The programme which is expected to be completed in five years, includes the electrification of important sections, the rebuilding and modernisation of stations, and the construction of additional rolling stock. An official statement announced that the Government, after some months of negotiation, had just concluded an agreement with the four Main Line Railway Companies. The essence of the agreement is that the Exchequer will guarantee the principal and interest of the loan.

U. S. A.

TRADE OPTIMISM

In its review for November, the National City Bank of New York states that a preliminary summing up of the autumn trade and production furnishes evidence that the earlier optimistic expectations are being realised. The volume of production and distribution is in many lines the largest in four years. Retail sales have been held back in some areas by the unseasonably warm weather, but have, on the whole, been good. There are many indications that the public is able to buy not only more, but also higher-priced goods. The railways are moving more freight than at any time in four years, and their aggregate earnings statements will be "in the black" this autumn, though, doubtless, they will show a deficit for the full year.

There is virtually no dissent from the view that the business gains of the autumn to date will be maintained through the rest of the year, with probably a further rise in the indices of industrial production. The expansion of automobile manufacturing almost assures such a rise. With this support business will go in 1936 under good headway. The Review finds that the earnings for the third quarter of representative industrial corporations in many lines were well above those of the third quarter of last year, which was a period of reaction in business and profits, and that apparently the decline from the second to the third quarter was somewhat less than the usual seasonal extent.

A tabulation of reports of 220 industrial companies shows combined net profits (less deficits) of approximately $146,000,000 in the third quarter, while the same companies had a profit of $158,000,000 in the preceding quarter and of $91,000,000 in the third quarter last year. Comparison of results for the first nine months of the year shows a total of $27,000,000, an increase of 26.3 per cent. over the total of $338,000,000 reported in 1934.

The gold inflow into the United States has increased sharply with war alarms, adding to the already existing causes of instability in the foreign exchange situation. Purchases over a period of less than two months are reported as exceeding $475,000,000, the movement in this direction having lifted the country's monetary gold stock to a new high record of $9,629,000,000. In contrast to the earlier months of the year, the gold movement to the United States has not caused equivalent reduction in the gold holdings of European central banks; this is explained as being the result of withdrawals from private hoards in London and sales of gold by the British Equalisation Fund.

The Review challenges the opinion that this reappearance of gold is wholly indicative of dehoarding and of reviving public confidence, suggesting that, although part of the movement represents repatriation of American balances and flow of funds for investment, a part represents the transfer of funds by holders due to conditions abroad. It repudiates also the implication that gold sold by the British Equalisation Fund is in the same class as gold released from private hoards and maintains that it should be properly considered as part of British monetary stocks.

The review advances the belief that the problem of future control of credit in the United States has been vastly complicated by the Government's policy of devaluation and points out that, whereas the gold imported has been reflected in bank reserves, the "write up" of gold stocks at the time of devaluation has not yet exerted its influence. Notwithstanding, excess reserves have reached a total of approximately $3,000,000. Money rates have been driven down: prime bonds have been forced up to the highest prices since the turn of the century, and lenders everywhere are at a loss to know what to do with their money.

Money remains easy. Notwithstanding the activity in Wall Street, Brokers' loans were reduced during the week ended October 30 from 832 million to 828 million dollars. Stock is being bought outright for cash and the assumption is that the buyers are using their stock as collateral for bank loans. New York member banks' other loans against securities were reduced the same week from 730 millions to 727 million dollars. The Comptroller of Currency has issued a call for the condition of all national banks on November1, being the third call this year. The size of excess member banks reserves, with the possibility of inflation, is causing anxiety at Washington, where methods of reducing these reserves are being considered. The New York price of silver is unchanged at 65⅝ cents an ounce, in spite of China's departure from the silver standard, the official view being that American silver purchases may be accelerated as a result of China's move. Gold arrivals during November include 14.3 million dollars from France and 6.2 million dollars from England. Engagements for shipment were 7.3

million dollars from France and 1.5 million from England.

Wall Street is gratified at the first election results. The news that the Republicans had recaptured the Legislative Assembly of New York State may not be of crucial political importance, since the Democrats were so insecurely perched in office ; but the market interpreted the results as a blow to the President's re-election prospects. The results provided the signal for very active dealings ; and the Dow Jones industrial index broke through a new post-depression "high". Nor was the bond market disregarded in the stock market's enthusiasm, for industrial issues were particularly firm, and turnover was nearly 5 million dollars higher than on Monday last. General Motors led the rise in motors, following the increased dividend, and optimistic forecasts of production emanating from the motor show. Steel issues responded to good winter prospects and ignored a one point drop in the estimated level of activity to 52.5 per cent. of capacity. Reports are gaining currency that increased prices for steel may be introduced and an immediate increase of demand is expected. Industrial news continues favourable. Numerous increased dividends have been announced.

FRANCE

M. LAVAL'S FUTURE

It was, primarily, considerations of the peculiar economic and financial problems that faced France that prompted the Legislature to consent to a regime of decree laws for four months: but the Decrees, promulgated, are not always with a view to bring back economic prosperity. The last batch of decree laws is perhaps unexampled both for the rapidity with which they were issued, and for the variety of subjects they cover. Some decrees deal with credits for the 'passive defence' of the country (air-raid shelters) ; some with the protection of public monuments and the countryside against disfigurement by advertising ; one refers to the position of women who pass examinations for the diplomatic services ; a few to the sale of gas masks to the civilians ; some regarding the organisation of pawn shops ; and others are intended to remove the loophole, which landlords have hitherto utilised to get round the 10 per cent. reduction of rents by increasing charges for heating water etc. This being the final batch, probably M. Laval thought it fit to make the list thoroughly exhaustive, irrespective of the urgency, if not the need, for these laws. Or, perhaps, anticipating that it will always be a tardy process to get these laws passed by the Chamber, which may question the efficacy of, and the need for, these plenary laws, judging from results, achieved, in the earlier months, M. Laval thought it better to issue the laws first, and think about justifying them afterwards.

Viewing more closely, it would appear that M. Laval has only strengthened the position of both himself and his Ministry by so including, in his dictatorial enactments, matters political and social. The Radical Congress and the attitude, that it has taken towards the Fascist organisations, which of late have only become too numerous, are too well known. And in attempting to impose restrictions and limitations on the activities of the Fascist groups, M. Laval is only drawing closer the ties of friendship with the Radical leaders. There is also current in the Socialist circles a rumour about a New Deal, which M. Laval is to have offered to the Radicals. According to the *Populaire,* the Radicals are to agree to the Budget for 1936 being passed automatically in the Parliament without discussion, (which, by the way, is practically the same as enforcing the Budget Bill by decree) and to an extension of the duration of the present Chamber until 1938, instead of 1936, when constitutionally its powers expire. In return, M. Laval is to see brought into force a series of anti-Fascist measures. M. Laval has done his part ; now it is the Radicals' turn, and, if they mean serious business, the Parliament will become a mere ornamental body. The elections will be postponed, while the entire nation will be smothering under the discontent of a consistent deflationary policy. Of course, the rumoured deal has been denied and very strongly too, but it does not seem unreasonable to suppose that some such combination may have been considered.

For one thing, M. Laval's present position warrants it, even demands it. He has, undoubtedly, carried out his task admirably. He has cut public expenditure and increased taxation with a throughness, which even Wentworth and Laud of English history did not reach. He has reduced the State's contractual payments to individuals in a manner, which nine months before would have been considered outrageous. France, unfortunately, is not a wee bit more secure in prosperity now than she was six months back. The September trade figures made really a bad show—imports 1,508 million francs as against 1,697 millions in August and 1,518 millions in September 1934. On the whole, there has been a contraction in foreign trade to the extent of 12 per cent. during the first nine months. Consequently, the State revenues are steadily falling off, and the gap between the estimates and the actuals during the nine months of this year is 3,492 million francs. The position of the French deposit banks tell an even more sorrowful tale. The decline in deposits during the second quarter of this year was only a natural

consequence of the franc crisis. But the decline has continued throughout the third quarter, despite the return of confidence in the exchange. The reduction in the deposits of the big banks from Fr. 38,200 millions in 1931, to Fr. 28,500 million in 1935, is to precipitate a drop. Hoards have not been disgorged: rather they have now increased. There is also a certain amount of flight of capital. In the face of this depression and in view of the ineffectiveness of the measures, economists are constrained to review the old question of deflation *versus* devaluation. World price level, in spite of a little spurt witnessed in October, which is confined to some countries only, is still too low to bring relief to French agriculturists and industrialists. The price level in the U.S.A. is definitely rising, and probably may not rise at all. Devaluation would suggest itself as the essential part of a constructive policy. If M. Laval is prepared to consider the fundamentals of policy, however he may succeed with the intransigent elements of the Right and Left, his position as the Prime Minister is likely to be endangered. It is consideration of these circumstances that gives strength to the belief that M. Laval, is angling for Radical support.

As against these adverse circumstances, M. Laval has one thing in his favour, that he has secured a personal ascendency, which has become too marked. Te political situation has, no doubt, helped to bring about the change. He has proved that, if there is a leader in France, he must be sought in M. Laval and not in any body else. This, with the promised support of the Radicals, must ensure the safety of M. Laval, even if a general election were to come off next year.

CHINA

CURRENCY REFORM

A thorough overhauling of the currency machinery of China is long overdue. Being on the silver standard, President Rossevelt's monetary experiments were having their effect on the silver position of China. The high price of silver and the appreciation of the Shanghai exchange, the heavy drain of silver from the country, the embargo on the export of silver, the depletion of stocks and the failures of Banks to meet their obligations—all these are too well known. Now it is the other end of the pendulam. It is now the depreciation of the Shanghai exchange, and the rumours of devaluation have led to complications in the monetary system. It is only now that sweeping reforms have been introduced, to some extent suddenly also.

The new reform has three main features—*viz.*, the stabilisation of the exchange at the present level, which is approximately 40 per cent. lower than what it was before; the demonetisation of silver; and the consolidation of note issue by the creation of a Central Reserve Bank. Bank notes, in future, issued by the three government Banks—the Central Bank of China, the Bank of China and the Bank of Communications—shall be full legal tender, and the bank note reserves shall be placed under a unified control. Notes, issued by other issuing houses, will continue to circulate side by side; but they will be gradually withdrawn and replaced by notes of the Central Bank. No fresh notes are to be issued by the Banks, and all their unissued stocks and reserves are to be handed over to the Central Bank. The Government-owned Central Bank is to be organised as the Central Reserve Bank of China. It will be owned principally by the Banks and the general public, thus becoming an independent institution with the main object of maintaining the stability of the country's currency. The Central Reserve Bank, in addition, will hold the reserves of the member banks, and also act as a depository of public funds. It will provide centralised rediscounting facilities for other banks, but itself will not transact general business. After a transition period of two years, during which the note issues of various houses will be absorbed, the Central Bank will be the sole note-issuing centre.

Silver is demonetised. All debts, expressed in terms of silver, shall be discharged by payment of legal tender notes of the nominal amount due. No use of silver dollars or bullion for currency purposes is permitted, and any contravention of the provision is punishable by the confiscation of the whole amount of silver seized. Illegal possession of silver is punishable in accordance with the law governing acts of treason against the State. Such of those, who hold silver, are to get it exchanged for legal tender notes. In case the foreign banking houses stationed in China refuse to hand over their stocks of silver to the Government, an embargo on the export of the white metal may be likely. For, as far as it could be known, only certain houses are willing to abide by the new decrees. Whereas others are hesitant, mainly because of the discrepancy between the London price of silver and the rate at which exchange can be made with the Government.

The exchange value of the Chinese dollar will be kept stable at the present level, *i.e.*, 14½d., and for this purpose the Government will buy and sell foreign exchange in unlimited quantities at the official rate. A Currency Reserve Board, to be created under a special ordinance, shall be formed to control the issue and retirement of legal tender banknotes and keep custody of reserves against outstanding bank notes. Energetic measures will be taken to deal with speculation and attempts made by individuals to bring about unwarrantable increase in prices.

In effect, China has joined, so it can be said, the Sterling Bloc: for, though it is not definitely said so, the present stabilisation of the Shanghai dollar is in relation to sterling and yen, as the major portion of China's trade is with these countries. The success of the reforms will depend on certain factors, *viz.*, on the ability of the Government to control effectively the entire stock of silver; on the ability to prevent smuggling and on the presumption that there will be no further major rise in the price of silver.

JUTE AND JUTE GOODS

JUTE

Calcutta, November 21, 1935.

The jute market remained firm during the week under review and prices in the *Futka* market touched as high as Rs. 41. The main factors for the rise were the appearance of the mills as buyers and the bullish sentiment created by the decision of the Indian Jute Mills Association to work 54 hours a week on the failure of any agreement before the end of this year. Speculative activity in the market was exuberant. Sellers are reserved in all sections.

Earlier in the week mills purchased a small quantity of Indian Jat Fours for December/January shipment at Rs. 6-6 per maund. This imparted some firmness to the market and sellers raised their limit to Rs. 6-8. Later in the week mills again appeared as buyers and are reported to have purchased one lakh and a half of bales of European packed Eastern Jute Fours on the basis of Rs. 6-8 per maund.

Foreign demand was on a moderate scale and higher rates are reported to have been paid by shippers.

In the loose jute section, the market is very firm. Sellers are reserved and Mills are purchasing at the rate of Rs. 6-8 per maund. The cultivators are hopeful of higher prices in future and are selling their jute in small quantities at every rise.

The Pucca Bales section was very steady and small business was done with shippers every day. Ready Firsts were done at Rs. 38-8. Lightnings at Rs. 35-8 and Rs. 35, Tossa Tops at Rs. 37, and Tossa 4's for Outport at Rs. 34-6. Ready Hearts sold at Rs. 30-8, while Daisee for Dundee was done at Rs. 37 with buyers over.

Speculative buying in the *Futka* market continues gleefully. Fro mRs. 39-10 at the beginning of the week the highest rate of Rs. 41 was touched on November 16. At the time of writing the market is very firm at Rs. 40-4.

JUTE MANUFACTURES

Calcutta, November 21, 1935.

In sympathy with a strong jute market the hessian market ruled steady during the past week. There was also a fair amount of buying by North America earlier in the week. Mills are reported to have sold a fair quantity of forward goods at the ruling rates on November 16. Later in the week demand from America was mostly confined to ready and near positions. Hessian *Futka* advanced to Rs. 8-7. At the time of writing the market is a bit quiet as buyers have withdrawn and *Futka* is quoting Rs. 8-4-6.

As regards the future of the industry market circles believe that there is very little possibility of any agreement with the outside mills. It is rumoured that the Jute Mills Association would be availing of the opportunity of the Viceroy's visit to Calcutta during the Christmas holidays and persuade His Excellency to enforce legislation.

Mills are sellers for forward deliveries, but there are no buyers. Ready goods are still at a considerable premium. Unless the uncertainty in the future of the industry is removed there is no chance of foreign buyers purchasing forward positions.

November 40" 8 oz. were done at Rs. 9-5-6 basis, 45" 11 oz. A. B. January at Rs. 11-3-6. 40" 10 oz. December sold at Rs. 10-14 and 8 oz. December at Rs. 8-15.

The bag market ruled steady in sympathy with hessians and eased off towards the close. Business done was very meagre. Ready B. Twills were done at Rs. 22-11, April-June at Rs. 22-14, while Liverpool Twills changed hands at Rs. 26 for April-June shipment.

COTTON AND COTTON GOODS

COTTON

Calcutta, November 21, 1935.

The bullish sentiment of last week continued in the Bombay cotton market during the first part of the week under review. Broach April-May recorded a further rise, touching Rs. 230-4 on the 15th. Strong advices from America regarding the extension of 12 per cent. loan beyond February and unfavourable weather reports, together with a good export demand, helped the advancing trend. Besides, there was considerable short covering. On the 18th, the sentiment changed reactionary. Heavy realising soon brought down prices, Broach April-May touching as low as Rs. 224-8. But the steady purchasing by trade checked further fall and the market recovered on the following days. Broach April-May improved to Rs. 225 at the close.

Oomra and Bengal December-January delivery also recorded further advances, touching Rs. 211-4 and Rs. 160-12 respectively on 15th instant. Profit-taking operations pulled down prices during the latter half of the week. Oomra December-January closed at Rs. 207, while Bengal December-January was finally quoted at Rs. 155-4.

Crop movements in up-country have commenced and arrivals are reported to be larger than last year. Ginning returns indicate increased crop movement in Sind areas.

The sanctions imposed by the Government of India do not affect cotton and hence shipments to Italy continues. Karachi reports say that from November 8 to 18 about 9,000 bales of cotton were exported to Italy. For the whole season from September to October 31, shipments amounted to only 6,275 bales.

The statement made by the Agricultural Adjustment Administration regarding their intention to extend the Government 12 per cent. loan and the favourable statistical position imparted further strength to American cotton. Reports of unfavourable weather in the Western Belt, increasing trade demand and the encouraging news from the dry goods market further accelerated the advance in the New York cotton market. Speculative activity was rampant and values touched the peak on November 15. Middling spot touched 12.35, December 11.95 and March 11.77. Prices for spot and December two weeks ago were 11.35 and 10.96 respectively. A reactionary tendency was witnessed towards the latter half of the week. At the close Middling spot stood at 12.20, December at 11.80 and March at 11.60.

The Liverpool market received good support from Bombay and American interests. Cotton prices continued on last week's onward march, recording a further advance of 12 to 15 points as compared with last week's closing rates. A reactionary tendency was witnessed towards the close on heavy profit-taking operations. Middling spot and December closed at 6.73 and 6.46 respectively. Egyptian Sakel developed further strength advancing to 9.77 for spot and to 8.70 for March.

Details of the average weekly deliveries of raw cotton to spinners in the United Kingdom in October, compared with September, were as follows:—

	in thousand bales October	September
American	25.55	16.96
Egyptian	6.81	4.22
Indian	4.80	7.60
Sundries	14.68	15.25
Total ...	51.84	44.03

The following statistics relating to the production of Egyptian Sakels during the past six seasons are culled from the annual circular issued by the Liverpool Cotton Association:—

	(In Cantars of 99.05 lbs.)
1929-30	2,706,528
1930-31	2,100,163
1931-32	1,350,007
1932-33	1,252,785
1933-34	1,198,908
1934-35	977,216

According to the Bureau of Agricultural Economics, the world production of all cotton for the 1935-36 season is tentatively estimated at about 26,300,000 bales. This figure is 11 per cent. above that of last season and 3 per cent. above the ten-year average.

PIECEGOODS

Calcutta, November 21, 1935.

There is very little change to report in the local piecegoods market during the week under-review. The firmness in the raw material market has failed to stimulate the demand in piecegoods. Buyers have no confidence in higher prices and are following a hand-to-mouth policy. Manufacturers, generally, are anxious to clear their stocks. Transactions were mostly of a retail character.

Business in indigenous goods was the same as last week. Transactions of the week comprise some small lots of grey shirtings, grey khadi, white shirtings and some fancy descriptions. Mills are compelled to make further concessions to buyers, as they are anxious to dispose off the existing stocks, especially seasonal styles.

Sales in Japanese goods were confined to retail lots. Forward business was completely neglected as the replacing costs were far beyond dealers' idea of values.

A slightly better offtake was in evidence in Lancashire styles. Small sales resulted in finer qualities of grey and white yarn dhooties. Business in umbrella cloths, light whites and some specialities has also been reported.

In the yarn section a quieter tone prevailed with very little business passing. The firm conditions in the cotton market did not have any sympathetic influence in this section. This was due to the lack of buying support from consuming districts and cheap sales of Japanese spinnings.

Bombay also experienced a quieter market. Ruling prices are slightly easier due to the falling off in demand. Merchants are hopeful of an improvement in demand in the near future. Transactions were of a moderate nature and were confined to needy lots. Prices in Japanese goods are easier owing to absence of demand. Some retail sales in white shirtings, white mulls and shirting prints were reported. Business in Manchester goods have been of a retail character. Forward trade in stray lots of miscellaneous styles are, were also reported.

Imports of cotton piecegoods and yarns into Calcutta during October show an increase of 2,032 packages, as compared with the previous month. The total number of packages from all outside ports for the month named is returned at 24,597 packages. Compared with September's figures, Great Britain's quota of 5,312 packages shows a decline in trade to the extent of 539 packages, whereas Japan has improved her position by 723 packages to 15,071 packages. Importations from Italy for the ten months ended October are returned at 6,270 packages, as against 10,191 packages for the corresponding period last year, revealing a contraction of approximately 40 per cent.

BULLION

GOLD

Calcutta, November 21, 1935.

The gold market during the past week remained quiet. The absence of appreciable movements in the cross rates is retarding all activities in the market. Operators were unwilling to extend their commitments and the petty transactions that transpired failed to affect the values. Prices, however, were well maintained. Ready and first settlement ruled at Rs. 34-15-0 while second settlement was quoted at Rs. 34-14-9.

Stocks in hand in Bombay amount to 75,000 tolas. Daily arrivals average 12,000 tolas, while the offtake is 42,000 tolas a day. The total imports during last week amounted to Rs. 1,09,853 in bar and coin.

The price of gold in London remained steady at £7-1-5 after improving to £7-1-6½ closed 2d. lower.

The London-Paris cross rate improved from 74.66 to 74.75 at the close. The London New York rate after touching 4.91 13/16 improved at the close to 4.92 5/16.

The total exports of gold from the United Kingdom during the week ended November 8, 1935 amounted to £4,979,000 of which £3,909,000 was shipped to the United States and £975,000 to the Netherlands. The total imports of the metal into U. K. during the same period amounted to £2,119,000 which included a shipment of £1,843,000 from Africa and £113,000 from India.

The production of gold in Canada during August last, created a new record of 294,361 ozs. This figure compares with an output of 285,372 ozs. in July and 265,540 ozs. in August, 1934.

London—Air Mail week ended Nov. 6.

The Bank of England gold reserve against notes amounted to £194,683,975 on the 30th October as compared with £194,323,901 on the previous Wednesday.

During the week the Bank announced the purchase of bar gold to the value of £798,553.

In the open market about £1,040,000 of bar gold was dealt with at the daily fixing. Quiet conditions have continued and, offerings being on a smaller scale, prices ruled above gold exchange parities, to-day's quotation including a premium of 2.1/2d. over dollar parity.

SILVER

Calcutta, November 21, 1935.

Operations in the Bombay silver market were dull and uninteresting throughout the week. Speculative activity was completely absent owing to the uncertainty in the American Government's policy and the situation in China. Price moments were confined to narrow limits. On the whole, the closing prices showed a decline of Re. 1, as compared with those ruling a week ago. Ready and first settlement closed at Rs. 65-9-0 and second settlement at Rs. 66-1.

Stocks on hand in Bombay are unchanged at 35,000 bars. Arrivals are negligible and the offtake is about 5 to 7 bars a day. Imports during last week amounted to Rs. 6,21,982 in coin.

The American Government is a persistent buyer of spot in London at the rate of 29 5/16d. Speculators are the only sellers in London. India has been holding off from the market, though once she appeared as a small buyer. Business transacted was on a small scale. Both Ready and forward rates remained unchanged at 29 5/16d. and 29 1/16d. respectively.

The rate for spot silver in New York was unchanged at 65 3/8c. The London-Shanghai T. T., after improving to 1-2 9/16 closed at 1-2½.

The total exports of silver from the United Kingdom during the week ended November 8, 1935 amounted to £2,122,000 of which £2,114,000 was shipped to the United States. The total imports of the metal into U. K. during the same period amounted to £678,000 of which £573,000 was shipped from Japan.

London—Air Mail week ended Nov. 6.

Until the 4th November the price of cash silver had remained unchanged at 29.5/16d., purchases for account of the American Treasury continuing at this price. Owing to forward sales by China the difference between the two quotations widened considerably, silver for two months delivery being at a discount of 7/16d. on two occasions.

There was a temporary improvement in prices on the 4th November, when 29.1/2d. and 29.3/16d. were quoted for the respective deliveries, but the American Treasury did not follow the rise.

News was received on November 4th of the adoption by the Chinese Government of a new scheme of currency and banking reform. Under the plan the silver dollar is to be replaced by a managed inconvertible paper currency, and in the place of the present several note issues, which are to be withdrawn, there is to be a single note issue controlled by the Central Bank. Silver is to be nationalized and all holders of silver are required to exchange it for legal tender notes.

In effect, China has definitely abandoned the silver standard, although this has really been the case since the restrictions imposed by the Chinese Government in October of last year virtually placed an embargo on the export of that metal.

The new scheme has been generally welcomed as a commendable effort to restore China's currency to a sound basis and the development of the plan will be watced with great interest.

As regards the bearing upon the Silver Market, on the day the news was received prices rose to above the American level on some Indian bear covering, which would appear to indicate a feeling of uncertainty, but the advance was lost yesterday. It is possible that any immediate effect has been largely discounted and, as regards the future, much will depend on the use which the Chinese Government may have to make of the silver it controls and the reaction of the American Government, the policy of the latter remaining the dominating factor.

MISCELLANEOUS

WHEAT

Calcutta, November 21, 1935.

The local wheat market has been quiet but steady during the past week with very little fluctuations in prices. Punjab and Cawnpore Ready were steady at Rs. 3-9-0, while May Beta closed at Rs. 3-9-6. Dry weather still continues in the Punjab and a number of small buyers entered the market. Another bullish factor in the market is that the sanctions imposed by the Government of India excluded wheat from the list of commodities banned. Already shipments to the extent of 25,000 bags of wheat have been made by two Karachi houses *via* Aden for an unknown destination.

The Bombay market has been irregular and prices at the close show a decline of 1 to 2½ annas as compared with those ruling at the beginning of the week. There was no enthusiasm in the market and operations were restricted. Buyers were absent and on pressure of selling by some weak holders prices gave way at the close.

In Karachi, easier conditions prevailed at the beginning of the week on lower foreign cables. Later on, the exclusion of wheat from the list of export article banned in accordance with the League sanctions against Italy and strong Chicago advices imparted some steadiness to the market. Prices are again recovered December quoting around Rs. 24-10. Stocks on hand are estimated at about 2,50,000 bags of which about 1,90,000 bags are estimated to be unsold.

The import and export figures of wheat for the three main British Indian ports as given in the *Indian Trade Journal* from April 1, to November 16, 1935, as compared with the corresponding period last year are:—

Import.

	(In tons) 1935		(In tons) 1934	
	Indian	Foreign	Indian	Foreign
Calcutta ...	148,989	...	148,413	2,968
Bombay ...	106,276	...	108,210	...
Karachi ...	207,632	34	304,792	...

Export

	1935	1934
Calcutta	11	73
Bombay	1,004	774
Karachi	7,550	8,806

As regards overseas markets, prices in Chicago have been steadily rising every day. A nett rise of more than 4 cents has been recorded at the close as compared with the low rates ruling at the beginning of the week. The Canadian Crop estimate which is about seventeen million less than the September figure created a bullish sentiment in the market. Heavy buying by Commission houses and other interests raised the wheat prices. The negotiations of a Trade Agreement with Canada by President Roosevelt, which is expected to the advantageous to the U. S. wheat trade, is also another bullish factor. Prices in London on the other hand have been declining steadily during the week. Australian Parcels for November have dropped to 28s., while Rosafe January/February declined by 2s. Latest advices from Australia indicate that crop prospects are much improved and that this season's outturn is expected to exceed previous year's figure.

MADRAS MARKETS.

PIECEGOODS

Madras, November 19, 1935.

Piecegoods are still in the doldrums and offtake continues to be on a restricted scale. Prices are, however, steady in sympathy with higher replacement costs and the firmer market for raw cotton. In the Yarn section, dull conditions prevail, and clearances have been poor. No forward business is passing at the moment.

METALS

The market has slumped heavily during the week, the decline amounting to as much as Rs. 5/- per candy in the case of Yellow metal and Copper sheets. Yellow metal sheets are now quoted at Rs. 146/- and Copper sheets at Rs. 175/- to Rs. 176/- per candy as against Rs. 150/- and Rs. 180/- last week. Sterling quotations are lower at £43/17/6 per ton for English Yellow metal (December shipment), at £40/2/6 for "Dittman" Yellow metal against £44/10 and £40/15 last week. The quotation for Copper sheets is £52/4/10 per ton against £53/7/6 last week.

GROUNDNUTS

The tone of the Groundnut market has improved and prices have steadied somewhat during the latter part of the week. London quotations for Coromandel machined opened at £13/5 November Sellers and £13/- December Sellers at the beginning of the week and remained unchanged till midweek. On Thursday, the market spurted up to £13/10 November Sellers and £13/6/3 December Sellers. Towards the end of the week, there were sellers at £13/5 for November and £13/7/6 for December positions. Shippers' buying limits opened at Rs. 30/13 and Rs. 31/12 for Machined and Rs. 26/4 for Ordinary (Per French Candy ex-coast godowns). Towards the end of the week, local prices advanced to Rs. 32/12 and Rs. 33/- for Machined and Rs. 27/8 for Ordinary (Per French candy, ex-coast godowns). Free arrivals of the new crop are reported in the Vizagapatam area. The quality is reported to be very good and the quantity believed to be an average output. The market at Vizagapatam is steady, and buying limits of shippers stand at Rs. 9/12 and Rs. 10/- per bag of 164 lbs., Machine shelled kernels for Vizaga harbour delivery. First arrivals of the new crop have also begun in the Guntur area, but from arrivals would commence after a week. The recent heavy rains in the Arcot area have held up harvesting operations in the various centres in the North Arcot district, and harvesting of the new crop will begin as soon as the rains cease.

The Kernel freight market has ruled quiet during the week in the absence of business. The nominal quotation for Marseilles and North continental ports is 27s. 6d. per Ton of 20 cwts. for November/December shipment.

Arrivals of Groundnut kernels for the week ending November 16, 1935 amounted to 14, 836 bags or 1,168 tons against 14,567 bags or 1,147 tons in the preceding week and 5,961 bags or 469 tons at the corresponding week of last year.

HIDES AND SKINS

Air Mail advices report that buyers in London are quite definite in their minds that Tanned Hides are going to be cheaper and that in the meantime the majority of them are keeping out of the market. Most of them complain of the manner in which Madras has been manipulating the market. For instance, they fail to understand why the Madras shippers forced up the market so high a few weeks ago and are now falling over themselves to sell at 3d. per lb. less without any apparent change in the position. The Curriers' summing up of this is that it is purely a ramp on the part of the shippers. Locally, Tanned Cow prices have declined further by about 3 pies per lb. in the case of Light weight hides and Coasts. Bids from London are coming through and the position is likely to improve, should the demand be kept up and supplies curtailed. At present, arrivals are free but will fall off after a week or ten days, as Tanners has cut down soakings recently when the market declined. A meeting of the Periamet JAMAET was held on Friday last when a discussion arose about the desirability of increasing the present minimum selling rates. It was, however, decided to put off further discussion of the subject to the next meeting. The Raw stock market continues to rule firm and prices remain more or less unaltered. Tanned Buffalo has ruled easier in sympathy with the market for Tanned hides. Demand and clearances on American account have been satisfactory, but prices have favoured buyers, current quotation being 9½d. for Heavy Buffalo. Supplies in Madras are plentiful. Arrivals of Tanned Buff Calf, on the other hand, are scanty and business in this section is almost at a standstill. Prices stand at 12d. Arrivals of Tanned Cow Calf are also moderate, but buyers are not displaying as much interest as was the case recently. As is usual before the end of the year, the market for Tanned Goat and Sheep skins has been quieter. Demand from London has been slow at prices below those ruling in Madras.

The following shipments of Hides and Skins were made from Madras to Europe and America during the week ended November 14, 1935:—

To the United Kingdom: 138 bales Raw Goat, 957 bales Tanned Cow hides, 46 bales Tanned Cow Calf, II bales Tanned Buff Calf, 236 bales Tanned Goat and 294 bales Tanned Sheep. To the U. S. A.: 45 bales Tanned Buffalo, and 8 bales Tanned Goat. To Australia: 2 bales Tanned Sheep. To France: 1 bale Tanned Sheep.

Indian Finance

Investor's Supplement

Vol. XVI. No. 20 SATURDAY, NOVEMBER 23, 1935 Price Re. 1

STRATEGIC IMPORTANCE OF 3½ PER CENT PAPER

Stock exchanges seem to be pervaded by a rosier outlook. There is more confidence about the future and, as a result, livelier activity.

Indian finance has, again and again, emphasised that 3½ per cent. Rupee Paper is more than a barometer of the market. It sets the pace of general stock exchange activity. Its fortunes colour the outlook on future prospects.

If 3½ per cent. Rupee Paper is depressed, all sections of the market are depressed and operators are despondent.

If 3½ per cent. Rupee Paper is buoyant, stock markets are buoyant, too; and operators show vim and vigour in undertaking large transactions.

Those who attach value to healthy stock exchange activity must ensure conditions which prevent undue or unjustified oscillations in the price of 3½ per cent. Rupee Paper. It must be reckoned a great fortunate circumstance that by minding one scrip and freeing it from influences which are uncertain and whimsical, the whole range of stock exchanges could be assured of healthy conditions.

MARKETS LOWER ON PROFIT-TAKING.

(By Special Cable)

New York, November 21.

Markets closed lower on profit-taking.
Coppers were strong.

We do wish that the authorities appreciate, fully and sincerely, the strategic position which 3½ per cent. Paper holds in this regard. If markets have a psychology, 3½ per cent. Paper is the quintessence of that psychology.

In the past, the authorities have not only shown a total lack of this appreciation, but they have, on occasions, wantonly and callously, allowed 3½ per cent. Paper to be tossed about by the antics of gamblers. This attitude of the authorities has done great harm to the markets, to investors and, above all, to the Government. Borrowing in India could have been easier and could have been effected on more favourable terms, if 3½ per cent. Paper had not been allowed to be hammered down mercilessly for no rhyme or reason.

It has been always within the ability and resources of the authorities to pull up the gamblers and teach them a lesson. Far from doing this, the authorities have, on most occasions, played into the hands of bear speculators.

The bull was entitled to sympathy. He was left to "stew in his own juice" in the belief that he was artificially taking up the price. The fact that, despite two major cataclysms, 3½ per cent. Paper is back to over Rs. 95 is abundant proof that it was not the bull, but the bear, who was operating against natural forces.

The lesson of the two shocks of this year and of the recovery which intrinsic factors brought about after each crisis must not be lost on the authorities. The fact of the matter is that the fundamental factors of the giltedge situation are all in favour of a higher price for 3½ per cent. Paper.

At the moment, there are three snags.

One is the small margin that there is for rise in 3½ per cent. India sterling paper. Though we believe that the Indian giltedge market stands in a class by itself and must and can be independent of London, the plain truth of the matter is that rupee giltedge is tied to the apron-strings of sterling giltedge.

This being so, there can be a rise in 3½ per cent. Rupee Paper only if, and only to the extent that, there is a rise in 3½ per cent. sterling paper.

Investors in London have shown, in recent weeks due appreciation of the attractive yield on Indian stocks. Those who have been selling Rupee Paper have been, we understand, buying sterling paper. These factors justify the hope that, in the absence of any adverse development, 3½ per cent. sterling paper may reach par in a short while.

MARKETS QUIET

(By Special Cable)

(From R. Gordon Cummings)

London, November 21.

Markets are quiet.
Little early recovery is anticipated.

Nor is there any reason why, even if the Rupee Paper is tied to the apron-strings of sterling paper, it should always lag behind. In simple terms, the gap between the rupee stock and the sterling stock must tend to disappear.

The second snag is the sale of rupee paper by certain investors who seek thereby to transfer their affections to sterling paper. But, as we have already shown, these purchases of sterling stock must pull up the London price, which, in turn, must pull up the Indian price.

The third snag is the contingency of Britain, being dragged into the war. This seems, at the moment, unlikely, as reports to hand indicate that economic and financial sanctions would bring Italy to her senses.

Mr. Gordon Cummings takes a moderately bullish view of giltedge in London. This gives Rupee Paper this moderate measure of bullishness *plus* the margin that now subsists between Rupee Paper and sterling paper and that must, we believe, disappear.

Worth-While Investments:

INDIA

JUTE INDUSTRY AT THE CROSS-ROADS

DALHOUSIE — AN ATTRACTIVE BUY

(By "Watch-dog")

It is somewhat hazardous to make any recommendation of jute shares at a time like the present when the fate of the jute industry, so to say, hangs in the balance. The industry is definitely—and poignantly—at the cross roads, the right turning will take it to continued prosperity, the wrong one to ruin. It is, to me, unbelievable that leadership in Clive Street would be so woefully deficient or Government's attitude to the industry could be so tragically callous, as to result in the industry taking the wrong turning at this critical juncture. *Frankly, I am fully hopeful that a solution will be found.* If this hope materialises, every good jute share is worth buying at current prices. If this hope is doomed to disappointment, Jute Shares must suffer a serious regress in value.

Subject to this reservation, I may recommend the ordinary shares of Dalhousie jute.

From the table given below, it will be seen that profits are rather fluctuating. That has been more due to the nature and trend of the industry than to any intrinsic defect of the company. The dividend record of the Company is very good because the lowest dividend declared is 15 per cent. per annum. A dividend as high as 45 per cent. per annum has also been declared. During the past four half-years, the dividend has been maintained at 20 per cent. per annum.

Year ended.		Profit. on revenue account	Depreciation	Allocations to funds.	Carry forward.	Dividend %. per annum
		Rs.		Rs.	Rs.	
Mar.	'30 ...	4,43,822	...	7,000	3,31,061	45
Sep.	'30 ...	3,79,137	...	7,000	3,31,971	40

Sep.	'31 ...	1,32,314	...	7,000	67,958	20
Mar.	'32 ...	1,86,618	...	7,000	43,252	20
Sep.	'32 ...	1,96,412	...	7,000	72,800	20
Mar.	'33 ...	92,070*	...	7,000	80,359	15
Sep.	'33 ...	1,40,928	...	7,000	91,113	15
Mar.	'34 ...	1,91,059	...	7,000	83,805	20
Sep.	'34 ...	1,63,269	...	7,000	71,907	20
Mar.	'35 ...	2,46,164	...	7,000	1,04,633	20
Sep.	'35 ...	2,38,246	...	7,000	1,44,373	20

* The profit shown is arrived at after writing down the value of jute stocks by Rs. 50,000.

The capital authorised, issued and subscribed is Rs. 30 lakhs, Rs. 15 lakhs being in 15,000 ordinary shares of Rs. 100 each fully paid up and Rs. 15 lakhs in 15,000 shares of Rs. 100 each 7 per cent. (tax-free) cumulative preference carrying preferential claim to repayment of capital.

In 1918, the capital of the company was increased from Rs. 25 lakhs to its present figure by the issue of 5,000 new ordinary shares of Rs. 100 each at a premium of Rs. 200 per share which were offered to the existing shareholders in the proportion of one share for every two ordinary shares held by them.

The total reserves are Rs. 17,73,867 against Rs. 17,76,745 in the previous half-year, Rs. 11,25,000 being in Reserve Fund, Rs. 5,50,000 in Equalisation of Dividend Fund, Rs. 56,530 in Earthquake Insurance Reserve, and Rs. 42,337 in Investment Reserve.

Sundry liabilities are Rs. 8,57,018 against Rs. 6,20,728.

On the assets side, the total block of Rs. 64,69,468 has been depreciated by Rs. 50,42,543 to Rs. 14,26,925. There has been no depreciation for the past so many years as the block has been more than fully depreciated.

Stores are Rs. 87,984 against Rs. 84,919.

Stock of jute is Rs. 12,43,168 against Rs. 14,86,328 and cloth and bags Rs. 3,99,098 against Rs. 2,75,584.

Outstandings are Rs. 3,27,194 against Rs. 2,91,137.

Investments are Rs. 22,42,792 against Rs. 21,30,367. Nearly all of them are in giltedge securities and the market value exceeds the book value by a considerable amount.

Cash and other balances are Rs. 2,50,597 against Rs. 19,348.

The total liquid assets are Rs. 45,50,834 against Rs. 42,77,683.

The total profit for the half-year ended September 30, 1935 was Rs. 2,89,740 against Rs. 2,87,026. The profit on revenue account has been slightly lower but this has been made good by higher interest earnings and profit on sale of investments. Rs. 7,000, the same as previously, has been set aside for Earthquake Insurance Reserve. The dividend has been maintained at Rs. 10 per share. The carry-forward is higher at Rs. 1,44,373 against Rs. 1,04,133. In view of the fact that the carry-forward is at a high level and in view also of the fact that the Rs. 10 per share has been declared even when profits were at Rs. 1,63,269 in September, 1933, we consider it probable that the dividend will be maintained next half-year. There is enough stock of jute on hand and the present high price of jute will not cut into profits. The carry-forward from the previous half-year in September, 1934, was only Rs. 71,907 and now it is Rs. 1,44,373, nearly twice the amount.

At the present price of around Rs. 314, the yield is 6.4 per cent tax-free. Last week, it was quoting at Rs. 300 and there has been an improvement of Rs. 14 since then. Investors would be well advised to go in for the stock at the present level.

Worth-While Investments

BRITAIN

TEXTILE MACHINERY COMPANIES

By R. Gordon Cummings

During recent weeks there has prevailed a more optimistic tone as regards prospects for the Lancashire cotton textile industry. Now that Sanctions are imposed it is reasonable to assume that imports from Italy to this country of cheap cotton goods will fall away, or perhaps, be entirely eliminated. Moreover, the industry itself is rapidly taking steps to put its house in order, while it is generally inferred that should the National Government be returned to power something will be done to ease the present unsatisfactory condition prevailing in most sections of the trade.

I propose, therefore, to deal this week with the shares of companies standing to obtain direct benefit from an improvement in, and rationalisation of, the textile trades. Manufacturers of textile machinery have suffered equally with the manufacturers of cotton goods. Not only, however, have the textile machinery makers lost business from poor conditions in this country, but they have also lost heavily on debts in Russia and an almost complete drying up of orders for new machines from that country.

In 1931 a private company called *Textile Machinery Makers* was formed to take over the assets of six of the leading companies in the industry. The authorised and issued capital of this concern is £3,459,000, of which £1,620,000 is in £1 ordinary shares and £1,839,000 in £1 preference shares. All the preference and almost all the ordinary shares are held by the companies whose assets were taken over.

There are, however, several companies not members of the above combine. Some of these concerns do not confine their attentions solely to the manufacture of textile machinery.

Of the latter, *Mather and Platt* is by far the most important, both from the point of view of size and multiplicity of interests. In fact, this company is most generally known for its patent fire extinguishing apparatus, the manufacture of fire fighting appliances and machinery for the canning industry. It has branches throughout the British Empire and in certain foreign countries. The issued capital is £1,763,660, of which £1,363,660 is in ordinary stock.

Maintained at satisfactory levels up to 1929, profits fell during the depresion to a low level of £67,140 in the twelve months ended December 31st, 1933, and after deduction of preference dividends the sum available on the ordinary capital was only 3.5 per cent., although 6 per cent. was paid in dividends. During 1934 profits were more than doubled at £139,274, but this time the ordinary dividend was restricted to 7½ per cent., despite the fact that 9.2 per cent. was earned. A favourable indication of prospects for the current year is that the interim dividend was raised in July last from 2½ per cent. to 3 per cent. It is reasonable to assume that a final of 7 per cent., making 10 per cent. for the year, will be forthcoming, thus giving an indicated yield of almost 4¾ per cent. of the £1 ordinary units, which can be bought at 42s. 6d.

Although much smaller in size *Tweedales and Smalley* (1920) has made remarkable recovery since a loss of £15,830 was returned in the twelve months ended April 30th, 1932. In respect of the year 1934-35 profits of £50,198 were the equivalent of 11.4 per cent. on the £450,000 issued ordinary capital. Including a final payment of 7½ per cent. the dividend was increased to 10 per cent., from 6 per cent. for the previous year. On account of the current twelve months the interim was raised by 1½ per cent. to 4 per cent. The last balance-sheet showed reserves and undivided profits of £419,591. Obtainable at 16s. the 10s. ordinary shares look ridiculously undervalued on the financial position and prospects. Even on a 10 per cent. dividend basis they yield over 6¼ per cent.

Of the six companies comprising the abovementioned combine, *Platt Brothers & Co. (Holdings)* is the most important, the issued capital being £3,710,160. After falling several years in arrear the 4½ per cent. preference dividend has recently been paid up to September 30th, 1934, while the final twelve months arrears is expected to be paid off in December. This will leave only arrears of dividend from March, 1930 to be paid on the £618,360 7 per cent. preference capital before the 1,855,080 £1 ordinary shares come in for dividends. Those in touch with the position consider that the ordinary shares are a reasonable speculation at their present price of 8s. 3d.

The final company with which I propose to deal is *Howard and Bullough (Securities)*. The issued capital of this company is £1,500,000, of which £1,250,000 is in £1 ordinary shares. Although profits have been very small during the last four years, ordinary dividends have been paid, the distribution for the twelve months to March 31st, 1935 being 2½ per cent. Recent revenue accounts have not included any income from the investment in Textile Machinery Makers, the profits being entirely from other investments, appearing in the last balance-sheet at £684,000. At the meeting in June last the Chairman indicated that prospects of obtaining a dividend on the Textile Machinery Makers investment were much brighter. The £1 shares yield over 4 per cent. at their present price of 12s. 6d.

GANGES MANUFACTURING CO., LTD.

NOTICE

Notice is hereby given that the Fortieth Ordinary General Meeting of the Shareholders of the abovenamed Company will be held at the Registered Office of the Company, No. 2, Fairlie Place, Calcutta, on Tuesday the 26th day of November, 1935, at 12-10 p.m. for the purpose of receiving and passing the Directors' Report and Accounts for the six months ended 30th day of September, 1935, and transacting any other ordinary business that may be brought forward.

The Share Transfer Books of the Company will be closed from the 19th day of November, 1935 to the 26th day of November, 1935, both days inclusive.

Managing Agents.

Calcutta, the 18th November, 1935.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

The outstanding item of news this week is the annual report of Bengal-Nagpur Railway Company. The figures are discussed below. Including the four big companies comprising the Finlay Group, five Indian tea companies have now made known their interim dividends for the current year. Further announcements can be expected during the next few weeks.

* * *

Bengal-Nagpur Railway Revenue Increase.

The Bengal-Nagpur is one of the most important railway companies in India, the mileage worked (including the northern section of the East Coast Railway, but excluding the Mourbhanj and Parlakimedi Railways, which are worked on behalf of their owners) comprising, 3,268 miles.

During the year ended March 31st, 1935, the amount of capital raised was increased by Rs. 31,71,575 to Rs. 79,46,24,384. Taking the rupee at 1/6d. per £ the issued capital has now the sterling equivalent of £56,921,602, of which £3,000,000 is in capital stock, £3,883,500 in debenture stocks, and £50,038,102 as representing the Secretary of State's capital. After adding Rs. 25,94,508 expenditure during the past 12 months on various constructional and renewal works and also adding Rs. 1,03,58,901 for stores, etc., in suspense, the total expended on capital account was Rs. 77,45,41,434, or the sterling equivalent of £56,118,434 at March 31st last.

Turning to the revenue account the train mileage rose during the past twelve months by 1,122,255 miles to 13,820,469, or a total increase of 8.84 per cent. on 1933-34. Gross revenue of Rs. 8,01,78,757 represents an increase of Rs. 56,18,096, or 7.53 per cent. Working expenses on the other hand rose by Rs. 39,23,651 to Rs. 5,63,60,551, representing 70.29 per cent. (70.33 per cent.) of gross income.

As regards passenger traffic the total number of passengers carried increased from 18,342,654 in 1933-34 to 18,904,435, and earnings rose Rs. 5,17,699, or 3.38 per cent., to Rs. 1,58,16,397. The directors state that third class passenger traffic is mainly responsible for the increase in earnings, the number of third class tickets issued rising by 532,531 and earnings from this source by Rs. 4,07,760. There was also an increase in the earnings of first, second and intermediate class passenger traffic, although first class passengers showed a small decrease in the numbers carried.

Compared with the previous years the tonnage of goods carried discloses an increase of 1,504,136, or 10.76 per cent., while total goods earnings rose by Rs. 48,07,322, or 8.78 per cent. The principal increases under these headings were on account of general merchandise, fuel, and service maintenance, material and stores.

The following table explains the increase of Rs. 39,23,651 in working expenses:

	Rs.		
Maintenance of Structural Works	+9,05,666	or	+8.09%
Maintenance and supply of Locomotive power	+12,46,417	or	+8.54%
Maintenance of Carriage and Wagon stock	+21,67,995	or	+32.33%
Maintenance and working of Ferry Steamers and Harbours ...	+51,423	or	+7.93%
Expenses of the Traffic Department	−6,606	or	−.07%
Expenses of the General Departments	+7,712	or	+.17%
Miscellaneous Expenses ...	−3,05,438	or	−6.22%
Rs. ...	+40,67,169		
Less—			
Difference in expenses of worked lines (Cr.)	+85,225	or	+19.52%
	+39,81,944		
Add—			
Difference in rebate paid to worked lines	−58,293	or	−61.34%
Rs. ...	+39,23,651	or	+7.48%

The rise in maintenance of structural works was mainly due to heavier repairs to bridges, service buildings, staff quarters, station machinery and also for loss on obsolete and unserviceable materials disposed of. Part of the increase in replacements and renewals was accounted for by replacing wooden sleepers by metal sleepers on certain sections. The big rise in expenditure on carriage and wagon stock is mostly accounted for by the purchase of 500 open goods wagons.

After payment of interest charges amounting to Rs. 2,73,67,420, the net result of the years working is a deficit of Rs. 35,40,881, which compares with deficits of Rs. 52,66,114 in 1933-34 and Rs. 95,49,093 in 1932-33.

Shareholders received 1¾ per cent. guaranteed interest on July 1st and an interim dividend of ¼ per cent. from reserve. Final payments at the same rate are now proposed, making 4 per cent. for the year. After providing for the dividend now recommended and other authorised expenditure, the reserve, taking investments at market prices, will be approximately £43,000, which includes an investment depreciation fund of £25,000.

* * *

Tea Company Dividends.

The tea companies under the management of James Finlay & Co., are amongst the largest producers in India. Their dividend announcements are, therefore, of considerable importance.

In respect of their financial years ending November 30 the interim payments of four of these companies are:

Amalgamated Tea Estates ...	Nil
Anglo-American Direct Tea Trading	Nil
Consolidated Tea and Lands ...	2½ per cent.
Kanan Devan Hills Produce ...	4 per cent.

These distributions in the case of Amalgamated Tea and Kanan Devan represent no change from a year ago, but a year ago Consolidated Tea and Lands paid 3 per cent. and Anglo-American Direct Tea distributed 3 per cent.

Although these announcements are somewhat disappointing it is too early yet to come to any definite conclusion regarding the year's results.

Chubwa Tea, which is also under the management of James Finlay, is maintaining the interim dividend on the ordinary capital at 2½ per cent.

Stanmore (Anamallay) Estates owns 5,397 acres in Southern India, of which 4,226 acres are cultivated, mainly with tea. In respect of the year ended June 30 last the net profit was £4,365, compared with £15,697 in 1933-34. A sum of £4,570 is transferred to debenture redemption reserve, leaving £6,219 to carry forward. As against 7½ per cent. for the previous twelve months no dividend is to be paid this time on the £120,000 issued ordinary capital.

* * *

Announcements in Brief.

In announcing payment of the usual 2½ per cent. interim dividend on the preference capital, the directors of *India General Navigation and Railway*

(*Continued on page 1602*)

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Friday.

Trading in the Calcutta Stock Exchange during the period under review continued more or less as it was last week. Owing to heavy selling pressure and weaker London advices 3½ per cent. papers were easier. Jute shares were fluctuating within narrow limits. As the session progressed, rather more interest was displayed in coal and tea shares, although the volume of business was small. The feature of the week was the sharp rise recorded in Reserve Bank shares. The Money market continued dull, and Reserve Bank rate was unchanged at 3½ per cent.

Government Securities.—A reaction was in evidence in this section and 3½ per cent. G. P. Notes began to drop down from Monday owing to heavy selling pressure. As the session progressed, weaker London advices brought the rates further down, and at the close a hesitant market recorded Rs. 95-6. Business in other loans was on a limited scale, and the prices for the most part remained unchanged. 3 per cent. Loan 1941 closed at Rs. 103-8, 3 per cent. New Loan 1951-54 at Rs. 100, 4 per cent. Loan 1960-70 at Rs. 109-14 and 5 per cent. Loan 1945-55 at Rs. 118-14. 5¾ per cent. Punjab Bonds (1937) were in better demand, a small lot having been placed at Rs. 107-6. At the close there were sellers of longer-dated issues but buyers in sympathy with weak paper market offered four annas lower than prevailing rates.

Debentures.—In this section scarcity of sellers in Port Trust and Municipal Debentures again hampered transactions, although the demand was good. The only business reported in the former was a lot of 4 per cent. 1916-46, changing hands at Rs. 112-10 and in the latter 5½ per cent. 1932-62 recorded deals around Rs. 124. Of others, 4 per cent. Mymensingh-Bhairab Railways were marked at Rs. 103-4. 5½ per cent. 1915-42 Chowringhee Properties at Rs. 100, 6½ per cent. 1933-43 Hukumchand Jutes at Rs. 103-8 and 5 per cent. 1933-43 Presidency Jutes at Rs. 102-12 were among the transactions.

Preference Shares.—There was good demand for first class preference shares, especially of Jute Mills issues. Transactions included Hukumchand Jutes at Rs. 108-8 (small lot), Lothians at Rs. 144, Agarparas at Rs. 135, and Craigs at Rs. 59-12. Amongst miscellaneous industrials, Bengal Telephones and B. I. Corporations were maintaining their last week's figures of Rs. 14-5 and Rs. 146 respectively. On Wednesday, quite a number of transactions took place in Kesorams fluctuating between Rs. 116-8 and Rs. 118.

Other Investment stocks.—A further rise in Bank shares, with the Reserve Banks in forefront, was recorded since the beginning of the week. Imperial Bank fully paids were higher at Rs. 1,578, although Contributories maintained their last week's rate of Rs. 392. Reserve Banks hardened up, and after fluctuating between a narrow range, closed firm at Rs. 126-4, the highest figure reached being Rs. 126-12 on Thursday. Central Banks were also better at Rs. 36-8, and Behar Bank changed hands at Rs. 55-8. Railway shares also came in for better enquiry, Ahmadpur-Katwas and Burdwan-Cutwas both being quoted at Rs. 90-8 ex-div., Bukhtiarpur Bihars at Rs. 62, Kalighat-Faltas at Rs. 91-8 ex-div. and a small lot of Mymensingh-Bhairab-Bazar Rebates fetched Rs. 94. In shipping issues, I.G.N.'s closed a shade easier at Rs. 95-8 (small lot), Bengal Assam Steamships at Rs. 218-8 and Port Shippings at Rs. 16-8.

Cottons.—Rates remained unchanged. New Victorias were steady at Re. 1-8, Mohini Mills recorded a deal at Rs. 10-12 and Kesorams maintained their last week's figure around Rs. 3-8.

Coals.—This section ruled quiet in the earlier part of the week, but there was greater enquiry towards the close. Deals were recorded in Amalgamated at Rs. 21, Aldihs at Rs. 2-13, Bengals at Rs. 265, New Manbhooms at Rs. 62 and Talchers at Re. 1. Equitables were better around Rs. 38 and West Jamurias were unchanged at Rs. 12.

Jutes.—During mid-week a distinctly steadier feeling was in evidence but it dwindled out as the session closed. Howrahs after having recorded Rs. 49-14 on Wednesday, receded to Rs. 48-14 on Thursday at which it closed. Kamarhattys which were marked at Rs. 509 on Wednesday, closed at Rs. 495. Barnagores changed hands at Rs. 136, Anglo-Indias at Rs. 402-8 and Belvederes at Rs. 332. Of lower grade denominations, Nationals were quoted at Rs. 23-2 and Clives at around Rs. 26.

Electricals.—Bengal Telephones were slightly easier at Rs. 18-2, Dacca Electrics had buyers at around Rs. 20, Mirzapur Electrics closed at Rs. 5-12, Jubbulpore Electrics at Rs. 12 and Rawalpindis at Rs. 21.

Engineerings.—There were keen buyers of Indian Iron and Steels at Rs. 8-15. Bengal Irons came to business at Rs. 3-15. Burn & Co.'s recorded Rs. 246, and Marshalls were dealt in at their last quotation of Re. 1-2. Tata Iron and Steels changed hands around Rs. 152-8.

Sugars.—A steady market was prevalent and transactions were recorded in Balrampurs at Rs. 19-4, Bastis at Rs. 221, Carews at Rs. 20-8, Murree Breweries at Rs. 194 and Punjab Sugars at Rs. 267. Prices of others were more or less unchanged, although Bulands showed an improvement at Rs. 13.

Miscellaneous.—Titaghur Ordinaries were quoted at Rs. 23-4 and Deferreds at Rs. 10-4. Bengals closed at Rs. 102-8 and India Paper Pulps were easier at Rs. 178. Burma Corporations were in good demand around Rs. 8-8. B. I. C. Ordinaries closed firm at Rs. 4. This rise was predicted in these columns a few weeks ago, and is undoubtedly due to the sanctions being imposed on Italy which prevents her from shipping woollen goods to India, benefitting the Cawnpore Woollen Mills, one of which is under the management of the B. I. Corporation. A good demand in Indian Wood Products resulted in a steady rise in the price to Rs. 25. Calcutta Ices recorded Rs. 8-14 and Indian Rubber Manufacturing came to business at Rs. 17.

Teas.—Although the number of transactions were very few, a slightly more interest was apparent towards the close. Bishnauths were marked at Rs. 27-12, Hasimaras at Rs. 40 and Batelis at Rs. 4-15.

THE BALRAMPUR SUGAR COMPANY, LTD.

The Share Transfer Books of the Company will be closed from 6th to 12th December, 1935, both days inclusive.

By Order of the Directors,
BEGG SUTHERLAND & COMPANY, LIMITED,
B. L. GRAY,
Director,
Managing Agents.

CAWNPORE,
19th November, 1935.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Thursday Evening.

Momey.—Money continued easy with interbank call quoting at ¼ per cent.

Securities.—The upward trend of last week continued during the early part of the week. 3½ per cent. Rupee Paper went up high as Rs. 98-9. There were many sellers in the market at this level and the price of Paper went down as a result. Weaker London advices also added to the effect. The close, however, was steady at Rs. 95-8. There was not much change in other securities. 3 per cent. 1941 was quoted at Rs. 103-5 ; 3 per cent. 1951/54 at Rs. 100-3 ; 3½ per cent. 1947-50 at Rs. 104-7 ; 4 per cent. 1943 at Rs. 108 ; 4 per cent. 1960/70 at Rs. 110 ; 4½ per cent. 1955/60 at Rs. 115-6 ; and 5 per cent. 1945/55 at Rs. 119-2.

Shares.—In the share market also there was considerable profit-taking in mid-week and prices were lower. Towards the close there was some recovery and prices closed higher.

Textiles.—In this section some improvement was noticeable. Bombay Dyeings were unchanged at Rs. 765 ; Central Indias at Rs. 268-6 and Centuries at Rs. 225. Colabas were higher at Rs. 143-2 ; Gokaks advanced to Rs. 185 ; Kohinoors were a shade easier at Rs. 205-10 and Swadeshis improved to Rs. 164-6.

Hydro-electrics.—There was not much change in this section. Tata Powers were quoted at Rs. 1,537-8, Tata Hydros at Rs. 163-12 and Andhra Valleys at Rs. 1,641-8.

Iron and Steel.—There was some speculative interest in evidence in this section. Prices were fluctuating on account of profit-taking in this section also. Tata Ordinaries were quoted at Rs. 151 and Deferreds at Rs. 578-12. The second Preferences were quoted at Rs. 158-12.

Cements.—This section was better and there were slight increases in prices. Bundi cements were at Rs. 33-10 ; Gwaliors at Rs. 121-4 ; Indias at Rs.455-10 ; Katni Deferred at Rs. 2,010 and Ordinaries at Rs. 371-4 ; Okhas as Rs. 250 ; Punjabs at Rs. 24 ; Shahabads at Rs. 483-12 and Uniteds at Rs. 120-8.

Miscellaneous.—Bombay Burmahs were higher at Rs. 415. The new shares were lower at Rs. 105-8 and Trams at Rs. 146-14. Belapurs were at Rs. 343-12. Scindias were quoted at Rs. 13-8 and Premier Constructions at Rs. 74-4.

Banks and Insurance.—There was some inprovement noticeable in this section. Imperial Bank fully paids were unchanged at Rs. 1,560 and partly paids at Rs. 385. Reserve Banks were higher at Rs. 126-8, Bank of Indias at Rs. 125 and Central Banks at Rs. 35-14. Bank of Barodas were at Rs. 90 and Unions at Rs. 5-6.

New India Insurances were higher at Rs. 42-8 and Orientals rose by Rs. 120 to Rs. 4,570. Vulcans were unchanged at Rs. 7.

MADRAS STOCK EXCHANGE

(*By Wire*)

(From Our Correspondent)

Friday noon.

The securities market reacted after the hectic trade. The easier tendency displayed by the sterling loans and a general desire to realise profits led to considerable selling all along the line. 3½ per cent. Government Paper fell to Rs. 95-4 at one time closing better at Rs. 95-6. 4 per cent. 1960/70 Loan after touching a peak of Rs. 111 fell sharply to Rs. 109-12 whilst 5 per cent. 1945/55 did not attract buyers even at Rs. 118-14. A large business passed in 3½ per cent. 1947/50 at Rs. 104-10-6 at the close of last week as also in 5 per cent. 1940/43 Loan at Rs. 110-12. The New Loan was dealt in up to Rs. 100/3. Madras has been a consistent seller in all securities at the high levels touched. A general set back will probably result in good buying by operators in this market. Mysore Loans proved unsaleable at the higher prices recently touched. 4 per cent. was taken up in small lots at Rs. 109 whilst 3½ per cent. has been done at Rs. 104-2 closing at Rs. 103-14. 5 per cent. had sellers down to Rs. 119-12 without attracting much attention. 5½ per cent. Mysore Loan changed hands at Rs. 108-8 whilst 6¼ per cent. have been placed at a shade under Rs. 116.

Business in Municipal and Joint Stock Company Debentures was on a small scale with good sellers in Nilgiri Neerugundis and Vellamalais. Among Preference Shares Spencer & Co., 'A' and 'B's were taken up at Rs. 10-12 and Rs. 11 respectively on rumours of additional capital proposals. Premier Constructions Preferences changed hands in large blocks at par. Tata Iron and Steel Second Preferences were steady at Rs. 159. Vasanta Preferences were a firm feature at Rs. 109 with nothing in offering.

Banks.—Imperial Bank both fully paids and contributories gave way closing at Rs. 1,560 and Rs. 387-8. Exceptionally, Reserve Banks were presistently bought closing higher at Rs. 127-8. Indian Bank Rs. 10 shares spurted to Rs. 26-4 with buyers over, whilst Indo-Commercial Bank 'A' Shares noted deals at Rs. 111-4 and Rs. 112.

Public Utilities.—Madras Telephones were taken up at Rs. 20. Rangoon Telephones closed at Rs. 13-12 ; West Coast Electrics at Rs. 10-2 ; and Trichy-Srirangam Electric Small at Rs. 17-8.

Mills.—In this section, prices were steady with business done in Buckingham and Carnatics at Rs. 215. Gokaks at Rs. 175 ; Cambodias Old at Rs. 13, Cambodias New at Rs. 12-8 and Coimbators Cotton Mills at Rs. 108-4. Vasanta Ordinaries changed hands at Rs. 111 with buyers over.

Sugars.—This section was neglected with the exception of Deccan Sugars which had buyers at Rs. 89.

Cements.—This section was also neglected excepting Shahabads which went through at Rs. 483-12.

THE GANGES ROPE CO., LTD.

Notice is hereby given that the Sixty-sixth Ordinary General Meeting of the Shareholders of the above Company will be held at the Registered Office of the Company, No. 2, Fairlie Place, Calcutta, on Tuesday, the 26th day of November, 1935, at 12-20 p.m. for the purpose of receiving the Report and Accounts for the period ended on the 30th September, 1935, and for the transaction of any other business that may be brought forward.

The Share Transfer Books of the Company will be closed from the 19th day of November, to the 26th November, 1935, both days inclusive.

MACNEILL & CO.,

Managing Agents.

Calcutta, the 18th November, 1935.

Planting.—This section was dull.

Miscellaneous.—No business transpired. Scindias were transacted at Rs. 14 whilst Tata Steel Ordinary and Deferreds were done several times at prices varying between Rs. 147 and Rs. 152-8 and the Deferreds between Rs. 590 and Rs. 625. Both the shares after touching low levels of Rs. 147 and Rs. 575 showed an upward tendency closing at Rs. 152 and Rs. 610.

With the exception of giltedge the other sections closed with a steady undertone.

LONDON STOCK EXCHANGE

Markets on the London Stock Exchange were generally quieter. There has been a slight marking down in prices in most cases. In the giltedge section, Home Funds and Indian Loans have closed steady. 3½ per cent. 1931 was quoted at 97, 4½ per cent. 1958-68 at 114, 3½ per cent. 1954-59 at 105 and 2½ per cent. Consols at 85 3/8, 3½ per cent. Conversion at 107¼, 4 per cent. Funding Loan at 117, War Loan at 105 3/8 and Victory Bonds at 115¼.

Among other sections, Home Rails were marked down. Oils were irregular. Teas showed a declining tendency. Minings were steady and Industrials were lifeless.

NEW YORK STOCK EXCHANGE

The improvement of last week was maintained. General Motors went as high as $58 7/8 and U. S. Steels $50 3/8. They closed lower on profit-taking at $57½ and $49 3/8 respectively. Anaconda Coppers were strong at $24.

MEETINGS

Date, 1935.	Name of Companies.	Time.	Remarks.	Books closed from 1935	Dividend proposed per share.

NEAR APPROACH OF ELECTION SLACKENING BUSINESS

HEAVY BUYING OF ELECTRICAL EQUIPMENT SHARES

By R. Gordon Cummings

By Air Mail

Special for **"INDIAN FINANCE"**

London, November 11th, 1935.

The near approach of the General Election has at last brought about a slackening in business on the Stock Exchange. To-day, being Armistice Day, may, of course, have led to a moderate decline in business on the absence of many dealers during part of the morning session.

There is no doubt, however, that operators are choosing to adopt a more cautious attitude pending the result of the Poll. Earlier in the period under review the upward movement of last week was in evidence, but on Thursday and Friday there was a noticeable decline in turnover.

More from lack of support than from any heavy selling, Gilt-edged stocks finish the week on an easier tone, *War Loan* being 104⅝ after 105, *3½ per cent. Conversion* 106½, *Local Loans* 94¾, and *2½ per cent. Consols* 84¾. *India Loans* remain comparatively firm, with the 2½ per cent. closing at 73, the 3½ per cent. at 96, the 4 per cent. at 108, and the new 3 per cent. at ½ premium.

In the Foreign bond market, *Brazilians* have been stronger at rising prices, but *Chinese* and *Japanese* Loans close distinctly dull on the somewhat uncertain political outlook. Chinese stocks have also been affected by currency developments.

More activity than for some time past has been witnessed in the Home Railway market, buying being encouraged by the proposed Governmental assistance on construction work. *Great Western* ordinary has risen to 48¼, while *London Midland & Scottish* is higher at 18, *London & North Eastern* second preference at 21, and *Southern* deferred at 20. There has been little doing in Foreign Railway stocks, although *Argentine* issues have been bought on every reaction.

Turnover in the Industrial markets has slackened off after earlier activity at rising prices. A feature has been some heavy buying of *Electric and Musical Industries* at up to 26s. 6d. The reasons are discussed later. Elsewhere *Amalgamated Metal* are 26s., *Boots Drug* 48s. 6d., *British Aluminium* 42s. 6d., *Dunlops* 37s. 6d., *Imperial Chemical* 36s. 6d., *Radiation* 71s. 9d., *Salt Union* 42s., *Sudan Plantations* 33s. 6d., *Turner & Newall* 59s., *Unilevers* 32s., and *United Molasses* 20s.

One of tht most active sections has been that for road making and contracting shares, buyers being attracted by the proposed Government expenditure of £100,000,000 on public works. *Associated Cement* are 65s., *Eastwoods Cement* 54s., *Ragusa Ashphalte* 16s. 3d., *Inns* 4s. ordinary 9s., and *Atlas Stone* 9s. 9d. Asphalte shares have risen sharply, but close on the easy side following some heavy profit-taking. Other building shares to respond were *London Brick* at 81s., *Sussex Brick* at 11s., and *Eastwoods* at 57s. 6d.

Breweries have continued to rise, while there has been more business in Textile and Tobacco shares. A feature of particular strength has been *Imperial Tobacco*, which at one time jumped to 147s. 6d. before easing to 146s. Amongst Artificial Silk shares *British Celanese* 2nd preference are below the best at 22s. 9d., while *Courtaulds* are below the highest at 54s.

Buying of Electrical Equipment shares has been heavy. It is generally assumed that such companies will receive substantial orders through the various Government schemes for capital expenditure. *Associated Electrical* have fully justified my repeated recommendations by jumping to over 39s., while *British Insulated* are 91s. 3d., *Electric Construction* 29s. 3d., *English Electric* preference 23s., *General Electric* 66s., and *Siemens* 24s. 6d.

Outstanding features in the Iron and Steel group have been *Guest Keen,* on the dividend, and *Richard Thomas,* on the absorption proposals. *Guest Keens,* however, finish at 34s., after having changed hands at over 35s., whilst *Richard Thomas* are below the best at 10s. Other movements include moderate rises in *Allied Iron* to 40s. *Dorman Long* to 21s. 6d., and *Stewarts & Lloyds* to 32s. 9d. *Baldwins* are 8s. 1½d., *Hadfields* 18s. 9d., *Hawthorne Leslie* 25s., *Staveley Iron* 48s., *United Steel* 32s., and *Vickers* 18s.

Motor shares have been active, but prices do not show a great deal of change except in one or two special instances, such as *Rover,* which close much higher at 19s. 6d. Pending the result of the General Election Aircraft shares have quietened down. All the same *General Aircraft* keep steady at 6s. 3d., and *Napiers* at 12s.

The Oil market has quietened down to some extent. The undertone is, however, strong. Some of the out-of-the-way shares have received more attention. For instance, *British Controlled* preference have risen smartly to 7s. 3d., and *Mexican* and *Canadian Eagles* to around the common price of 6s. *Attock* are somewhat quieter at 22s. 6d., but *Shell Transport* keep reasonably firm at 79s. 6d.

Conditions in the Mining markets cannot, apart from one or two specialities, be called encouraging, for after every burst of activity it is usual to find a moderate relapse followed by comparative inactivity for fairly lengthy periods. Despite these adverse conditions many shares keep reasonably firm. Amongst the finance shares *African and European* are 40s. 3d., *Anglo-American* 31s. and *Johannesburg Investment* 73s. 9d. In the developing properties group *Klerksdrop* have fallen to 5s. 6d. after the issue of shares on behalf of the first subsidiary. *West Spaarwater* keep steady at 5s. 3d., while *Van Dyk Consolidated* are 38s.

There has been more doing in Australian shares, the particular feature being steady buying of *Great Boulder Mining and Finance* at over 4s. *Paringa* are also higher at 4s. 3d., but *Commonwealth Mining* have slipped back to 11s. 4½d. Several attempts have recently been made to get the West African gold market going, but so far with little success. There has been some buying of *Ariston,* which have recovered to 8s. 9d. Other prices include 22s. 9d. for *Gold Coast Selection Trust,* 8s. 9d. for *Marlu Gold,* and 4s. 6d. for *Tarkwa Banket West.*

In sympathy with a decline in the price of the commodity, business in Rubber shares has eased off. Tea shares are also comparatively quiet on poorer auction advices.

Repatriation of American-owned Shares.

When the British and American stock market booms were in progress during 1928 and 1929 large blocks of equity shares in British companies were bought by American interests at what must now be considered in many cases very high prices. American holders of these shares mostly decided to nurse their purchases through the slump. Some time ago, however, there was a move to repatriate lines of these shares, the most notable instance being that of Boots Pure Drug Company, control of which was brought back to this country by a syndicate headed by Tobacco Securities Trust.

Since then other blocks of shares have been repurchased from their American holders, often at prices well below the original cost. Undoubtedly transactions of this nature would have been much greater had it not been for the restrictions imposed by the British Treasury on the export of capital to foreign countries. In the case of big deals it has always been necessary to first of all obtain the permission of the Treasury before completing the transaction.

Some time ago a big line of ordinary stock of *Associated Electrical Industries* was brought back to this country. A City syndicate has only recently purchased from American holders a further block of approximately 170,000 £1 ordinary units in this company for a sum, which, I understand, is in the neighbourhood of £300,000. It is calculated that the American holding in Associated Electrical is now reduced to about 40 per cent. of the total ordinary capital. Rumour, strongly backed by facts, also has it that the 29 per cent. interest of Radio Corporation in *Electric and Musical Industries* has been bought by a British syndicate for a sum stated to be about £2,250,000. Hence, the activity in *E. M. E.* shares.

While it is impossible to give any figures on the subject, there are big lines of shares in British companies still held in America. Providing the sanction of the British Treasury can be obtained I feel certain that most of these shares will eventually be brought back to this country, more particularly as their American holders can now obtain prices far and away above those ruling even two years ago.

I must point out that so far the marketing of repatriated shares has been so carefully carried out that the prices of shares already held in this country have tended to rise rather than fall during the process.

Two Good Steel Dividends.

Readers of these notes will no doubt remember that well over six months ago I was continually, and have since continued to do so, drawing attention to the promising prospects of the British Iron and Steel industries. Subsequent events have well justified my continued advice to buy most of the leading shares in these industries.

I can remember particularly referring to the lock-up merits of *Guest Keen and Nettlefold* £1 ordinary shares, which at the time the last report was issued could be bought at about 23s. I calculated that last year the company earned over 7 per cent. free of tax on the issued ordinary capital, and ventured to forecast that an ordinary dividend was almost a certainty for the current year. I am particularly pleased, therefore, with the decision of the directors to pay an interim dividend of 2½ per cent. tax free on the £6,434,468 issued ordinary stock, which last received a dividend of 10 per cent. tax free in respect of the year to March 31st, 1930. Although the £1 ordinary units have risen to around 35s. I must still counsel retention.

The market is going for a final tax free dividend of 5½ per cent., which would make 8 per cent. tax free for the year.. At the current price of 34s., the shares therefore, offer an indicated gross yield of over 6 per cent.

One of the smaller but one of the best managed companies in this group is *Whitehead Iron and Steel,* which has up-to-date works in South Wales. In an interim report the directors state that profits for the half year to September 30th last, excluding those of a subsidiary company, amount to £114,123, compared with £87,477 for the corresponding period of 1934. Despite the increase in the ordinary capital by the recent scrip bonus of 25 per cent., profits are now more than sufficient to enable the directors to raise the interim dividend to 12½ per cent., from 10 per cent. last year. The £1 shares are quoted at 135s.

B. S. A. Profit Disappointment.

One of the most disappointing companies connected with the iron, steel and armament groups is undoubtedly the *Birmingham Small Arms Company,* which manufactures a wide variety of products, including motor-cars, bicycles, rifles, etc. Contrary to expectations net trading profits for the year to July 31st last have again declined, the figure of £1,841 going against £15,181 in 1933/34, and £135,713 in 1932/33.

As a debit balance of £69,714 was brought in it is not possible to pay any of the dividend arrears outstanding from August 1931 on the £203,150 5 per cent. A preference and the £350,580 6 per cent. B preference shares.

Owing to the fact that the management is under process of reorganisation the market is taking a favourable view of prospects, and, although there has been some forced selling, the £1 ordinary shares are comparatively steady at 9s. In the light of recent results I must say that my faith in this company has been badly shaken. All the same I feel that it should be given another chance, so that holders of the shares would probably be foolish to sell before another twelve months results are available.

A Few More Words on Home Rails.

In accordance with my previous predictions the weekly traffics of the four Home railway companies continue to improve. Compared with the corresponding periods of 1934, weekly traffics have now risen for five weeks in succession, the latest statistics showing a gain of no less than £94,000 for the week ended November 3rd.

Particularly encouraging is the aggregate rise of £50,500 from coal and coke revenue, which earlier in the year was showing steady weekly declines. This improvement in what has recently been one of the most disappointing sources of revenue is mainly attributable to the activity in the heavy industries.

At this stage it is worth while examining the traffic figures for the 44 weeks to November 3rd. Taking revenues for the corresponding weeks of 1934, total revenue from passenger traffic this year has risen by £1,207,000, while merchandise can now record a net gain of £10,000. On the other hand coal and coke traffics are still £174,000 behind the takings of last year. When it is remembered, however, that merchandise traffics were £67,500 behind the 1934 takings at the end of the first 39 weeks of this year, and coal and coke no less than £391,500 down on last year, the improvement in the past five weeks is such as to encourage holders of railway stocks.

A further analysis discloses that of the individual lines the *London, Midland & Scottish* can record an increase to date of £632,000, spread over each section of traffics. The *Southern Railway* comes next with a net increase of £175,000, the *Great Western* third with £163,000, and the *London and North Eastern* last with a net gain of only £73,000. The total net increase of the four lines is therefore £1,043,000.

Had the market not been overshadowed by the likelihood of the companies being forced to restore the remainder of the wages cuts, estimated to cost over £2,000,000 per annum, Home railway stocks would by now have been well on the up grade. Only this week the market was encouraged by the proposal to float a Government guaranteed loan of £30,000,000 for capital construction works. In my opinion, however, this factor is of little account as figures I have prepared show that expenditure on capital account over the last few years has averaged well over £7,000,000, whereas the new money will, spread over the suggested five year period, mean only an average of £6,000,000 a year.

The rating appeals have not yet been brought before the House of Lords. There is no excuse for any further delay and the first of these appeals, *i.e.*, that of the Southern Railway, should come forward for hearing at any time now. I anticipate that the companies will be favourably dealt with.

Industrial Company News.

Three companies whose shares I have recommended on various occasions have made some encouraging announcements.

Maden and Ireland, the shoe, etc., manufacturers, reports a net profit of £20,124 for the twelve months to September 30th 1935, which compares with £15,445 in 1933/34. As already announced preference dividends are brought up to date and ordinary dividends resumed with a payment of 8⅓rd per cent. After meeting these distributions, together with an extra half year's preference dividend up to September 30th, 1934, a sum of almost £11,000 is left to be carried forward. In actual fact earning on the ordinary capital exceeded 18 per cent.

Jury Holloware (*Stevens*) is paying an interim dividend of 3 per cent. on the 5s. ordinary shares. This company was only made public early this year, when it took over an old established business manufacturing various kinds of enamelled and similar utensils. The 5s. ordinary shares have been well bought at 6s. 3d. They should be held.

I am disappointed with the dividend announcement of *Associated British Malsters.* In respect of the year to August 31st last there is to be no increase in the ordinary dividend, which remains at 10 per cent. Before passing judgment I prefer to await the publication of the profit figures, which, I am sure, will be better than the dividend would indicate.

Rhodesian Copper Shares.

One of my pet selections in the Rhodesian copper share market has always been *Rhodesian Selection Trust.* For some time the 5s. ordinary shares have fluctuated between a highest price of 10s. 9d. and a lowest of 7s. 6d., compared with the present quotation of 9s.

The company's report for the year to September 30th last is now to hand. This shows a small loss of £1,430, increasing the debit balance to £4,396. In the balance-sheet the holding of approximately 64 per cent. of the issued share capital of Mufulira Copper Mines accounts for £3,113,721 of the total assets of £3,216,764. On the other hand capital and general reserves total £791,118, which, after allowing for the profit and loss debit, gives a net valuation of £2,327,000 for the 5,471,200 ordinary shares of 2s. each held in the Mufulira company. This is the equivalent of 8s. 6d. per Mufulira share, which, according to that company's balance-sheet have a break-up value of approximately 6s. 9d.

My calculations are based entirely on balance-sheet figures and do not take any account of the very promising prospects. Those in touch with the position calculate that the Mufulira company will become one of the cheapest producers of copper in the world when once it is operating under full normal conditions.

I can only repeat that Rhodesian Selection Trust shares represent one of the most promising lock-up investments for those in a position to forego immediate dividends, but looking for eventual capital appreciation.

Market Pointers.

Insiders have been selling *Commonwealth Mining* shares and buying *Goldfields Australian Development* at 15s. 3d. This need not alarm shareholders in the Commonwealth company.

I hear favourable opinions regarding the prospects of *Gold Mines of Kalgoorlie.* This company is under excellent management and its various properties are developing according to expectations. Obtainable at 10s. 6d. the 10s. shares are a healthy speculation.

O. K. Bazaars, the South African stores company, 5s. A shares have been heavily bought this week, the price rising to over 44s. on the announcement that net profits for the twelve months to June 30th were £142,793.

As was to be expected from the raising of the dividend by 5 per cent. to 15 per cent., net profits of *Yewis Berger & Sons,* the paint and varnish manufacturers, have risen—by £39,000 to £141,392 for the year to July 31st.

An interesting development in the Insurance world is the decision of the *North British and Mercantile Insurance* directors to distribute a capitalised bonus and to sub-divide the existing shares, which have a nominal value of £5, but are only 25s. paid up. The proposal will mean the capitalisation of 37s. 6d. per share.

Writs have now been served on three of the directors of *James and Shakspeare,* the produce broking company, which was heavily involved in the pepper speculations. Incidentally the liquidator is proposing payment of a first dividend of 1s. 3d. per £ to creditors.

Some of the recent buying of *Royal Mail* and *Elder Dempster Realisation* ordinary shares was brought about by rumours that various assets were under negotiation for sale. One rumour had it that the Realisation companies were to market their holdings of ordinary shares in Union-Castle Mail Steamship. This rumour is now officially denied. None-the-less the eventual disposal of these shares is a certainty.

Buying of *Ariston Gold* shares was encouraged by the remarks of the chairman at the meeting of *Gold Coast Selection Trust,* which company has a large stake in the Ariston. Developments at the mine are proceeding satisfactorily ; the future is distinctly bright. Aristons are worth putting away.

East African Gold 5s. shares, now changing hands at 8s. 3d., are worth watching. Not so long ago Belgian interests subscribed for 300,000 shares at 7s. on the understanding that these should not be sold at below 9s. 6d. prior to December 31st next. Developments on the various properties are proceeding in a manner which should assist the "shop" in raising the market price to over 10s.

(*Continued from page 1596*)

Company state that no interim distribution will be made on the ordinary shares. This is the same as a year ago.

The interim dividend on the £200,000 issued capital of *Delhi Electric Supply and Traction Company* is being maintained at 4 per cent. actual, as for many years past.

In respect of the half-year ending December 31 next, a dividend of 2½ per cent. actual, together with a bonus distribution of 1 per cent. actual out of reserve, making a total of 3½ per cent., is to be paid on the £800,000 capital stock of *West of India Portuguese Guaranteed Railway Company.* These payments are at the same rates as in December, 1934.

WALL STREET IN AIR MAIL WEEK

MARKETS ON THE UPWARD TREND

UTILITIES HIGHER

By F. Rocke.

By Air Mail

Special for "INDIAN FINANCE"

Wall Street has been again on the upward trend and turnover was at one time above the three million mark. There was a holiday on Tuesday owing to the Election day. The gasoline and crude oil and the steel price increases stimulated the markets. Business opened on the Stock Exchange in a regular manner and the Saturday short session was active with a turnover of 1,260,000 shares against 1,180,000 on the previous Saturday. Motor, Steel, Utility, Silver, Rubber and Oil shares advanced. After the Election Day holiday the market opened strong and the Dow Jones Industrial Index went to a new post-depression high. Motor shares set the pace, closely followed by other Industrials while towards the close even Rails strengthened.

The close yesterday was strong and turnover was at its highest for the week at 3,080,000. The election rebuff to the new deal acted as a stimulant. The Dow Jones Industrial Index was at 142.9. A striking feature was the improvement in Public Utilities. American Telephone and Western Union advanced rapidly the latter rising by as many as four points.

On the Bond Market, speculative issues were inclined to move higher while Treasury issues were reactionary. On the foreign exchange, market attention was chiefly centred on the Chinese currency and on French francs.

The general opinion about railroads is growing more favourable. Earnings are at a higher level and carloadings figures though at present they are subject to a seasonal decline, are definitely better. Rails have shown some strength during the week and it may well be that the market turns bullish of railroad stocks.

The general oil situation is becoming better. There have been increases both in crude oil and gasoline prices. The advance in crude oil prices in California has been very sharp and they are now at a level prior than that to the cut at the end of last August and the best for over two years.

The daily average production of crude oil in the United States in the week ended November 2, was 2,798,350 barrels against 2,797,950 in the previous week according to the figures of the American Petroleum Institute.

Utilities have had a good week. The Utility Holding Company Act was judged to be "unconstitutional in its entirety" yesterday. This is the first legal test case since the measure became law. The judgment was given at Baltimore, Ohio, by Federal Judge William Coleman. As a result of this prices of almost all Utility shares advanced.

According to the *Iron Age* steel mill activity was at 52.5 per cent. of capacity during the week against 53.5 per cent. the previous week.

This section derived considerable stimulus from rumours of price increases in semi-finished steel owing to the higher price of pig-iron. General Motors have doubled its consumption of steel by the adoption of the "turret top" for all models.

Carnegie Illinois Steel, a U. S. Steel subsidiary, has increased its prices for blooms, slabs, billets and sheet bars by $ 2 per ton.

Pig-iron production in October totalled 1,978,000 tons against 1,773,000 in September.

There has been a sharp increase in automobile production. Production of motor cars and trucks for the week ended November 4, totalled 76,740 units against 62,015 in the previous week and 17,116 in the corresponding week last year. Automobile sales to consumers in October are estimated at 147,000 in September and 140,880 in October 1934. The October sales were the highest since 1930.

From figures issued by the Automobile Manufacturer's Association, the October output by its members totalled 210,392 units compared with 59,329 in September and 94,059 in October of last year. Production for the first ten months amounted 2,24,289 against 1,852,657 units for the corresponding period of last year. The figures do not include production by the Ford Motor Company which is not a member.

The Ford Motor Company finished its millionth car for the year during the week and the total production for the full year 1935 may probably be 1,180,000 cars.

Auburn Automobile Corporation is to offer $3,000,000 new Debentures, convertible into Common at $50 a share to present shareholders at par.

Business Pointers

Freight carloadings in the week ended October 26, totalled 707,800 cars, an increase of 83,500 cars over the corresponding week of 1934 but a decrease of 25,100 from the previous week.

Power production in the past week totalled 1,897,180,000 kilowatt hours, an increase of 13.7 per cent. over the figure for the corresponding week in 1934.

November 8, 1935.

BOURSES IN AIR MAIL WEEK

Paris.

The Bourse was closed for two days at the beginning of the week. It reopened after the holidays in a bright mood. Internationals were firm. Mines were exceptionally strong but Retnes were dull. Later there was some profit-taking in evidence and an easier tendency was noticeable. There was some recovery later on and the close was quiet and firm. The chief features during the week under review were the strength of Thomas Houston and Chargeurs Reunis which closed at 153.50 f. and 177 f. respectively.

On the Coulisse, there was a sharp advance in diamond shares and De Beers Preferred was quoted as high as 1,037. The close was barely steady. Shares in the Gold Mining Group also advanced.

	Oct. 31	Nov. 4	Nov. 7
4½% Rentes, 1932 "A"	84.35	83.70	83.75
4½% Rentes 1932 "B"	83.30	82.60	82.70

Sub-Nigel	965.00	991.00	996.00

Berlin.

The Bourse presented a dull appearance throughout the week. There were occasionally some rallies and the close for the week was firm. Banks and industrials closed higher but minings were barely maintained. Shippings were lower.

General Reserve ...	10,000 0 0	39,541 11 0
There remains a balance of ...		Rs. 26,709 14 7

Which the directors recommend should be dealt with as follows :—

In payment, on application, of a dividend at the rate of 5% per annum, free of income-tax	18,706 0 0
Leaving to be carried forward ...	Rs. 8,003 14 7

Output.—Raisings for the last three half-years were as follows :—

	Tons
Half-year ended 31st August, 1935 ...	10,575
" " 28th February, 1935 ...	9,379
" " 31st August, 1934 ...	10,091

Working Results.—Competition from Bengal Coal still remaining very keen, there is no evident improvement in the demand for Assam Coal.

The effect of the concentration of output from one opening, to which reference was made in the last report, is reflected in the increased profit for the half-year.

Managing Agents.—Messrs. Shaw Wallace & Co.

Comparative statement of balance-sheets for the last three consecutive half-years :—

	Half-year ended. 31-8-1935 Rs.	Half-year endeu. 28-9-1934 Rs.	Half-year ended. 31-8-1934 Rs.

Calcutta, Friday Evening.

The same easy money, the same nominal rate both in Bombay and Calcutta, and the same total lack of interest on the part of borrowers even at these low rates. In our last week's issue, we examined the causes that would seem to indicate not only the certainty of the continuance of cheap money well into the new year, but even the possibility of a more plethoric supply of credits. Amongst the four causes analysed in this connection, we referred to the probability of an early reduction in the bank rate and suggested that definite action as regards the bank rate could not be postponed beyond December. Events have moved faster than we anticipated. On Thursday morning, it was known that the Reserve Bank had reduced the Bank rate from 3½ per cent. to 3 per cent. In another section of this issue will be found an examination of the meaning and effects of this important decision. So far as this section is concerned, we may content ourselves with elucidating the significance of a 3 per cent. bank rate to monetary conditions and to interest rates. It is generally believed that the cold weather marks the busy season in India. The end of November is said to inaugurate livelier trade activity and, as a consequence, a larger demand for finance. That November-end has been chosen for carrying into effect a reduction in the bank rate must be construed as emphatic testimony to the opinion of the Reserve Bank authorities that money conditions would remain less steady in the coming season than in the past. Viewed this way, the 3 per cent. rate which is to take effect from this week affords authoritative confirmation of the views advanced in these columns in favour of a continuance, and even acceleration, of the present phase of abundant credits.

The Treasury Bills operations of the past three months have shown that, without recourse to foreign funds, the resources available from within India are ample enough to allow the Government to borrow short-term funds for anything like Rs. 40 crores. In this regard, we must again stress the self-containedness of the Indian money market. When we turn from domestic to international finance, the most outstanding feature of recent months is the colossal movement of short-term funds and the hydra-headed flood of gold across the Atlantic. India has been singularly free from these hectic capital and gold movements. The exodus of gold that is still persisting in the case of this country is only a continuance of the earlier phenomenon. So far as the flight of capital is concerned, it is now conclusively proved that there is left in India hardly any sum that can take wings and fly. Nor do money rates ruling in India allow of any considerable transfer of funds from London for utilisation in Indian Treasury Bills. This perfect autonomy of the Indian money market is a factor which has been stressed on earlier occasions in these columns. We had also elucidated the implications of a market that is provided with adequate resources of its own and which can remain unaffected by the shocks to which international finance has proved so easily liable. This immunity from adverse influences from abroad places the credit of India in an unique category. British Funds are exposed to the blasts and counter-blasts of "bad" money rushing in and out of London. On the other hand, government securities in India have only to contend against influences of a purely domestic nature. These influences have, are, and will continue to be, extremely favourable to higher giltedge price levels. The long-term view about giltedge must, therefore, remain markedly optimistic.

The real meaning of this state of affairs is that what binds rupee securities to the apron-strings of sterling securities is not intrinsic factors, but sentiment. It is this sentiment which is availed of by speculators ; and as the authorities do not appreciate the full significance of the intrinsic forces that rule the giltedge market, speculators are able to play havoc irrespective of the fact that the long-term view is so favourable. At the present moment, however, we may express the hope that the reduction of the bank rate is an indication of a changed outlook on the part of our authorities both as regards the money market and the giltedge market. If the continuance of cheap money is more or less certain save for occasional pressure caused in the busy season ; if it is granted that the Government need not and will not come into the market for any new money at least for a year or two ; if it is realised that the floating debt must needs be reduced by at least Rs. 15 crores in the last quarter of the fiscal year ; and if it is further understood that 3 per cent. at the threshold of the busy season may be taken as a promise of 2½ per cent. at the end of it, we maintain that giltedge is assured of rosy prospects.

Exchange has been very steady. The reduction in the bank rate has had no appreciable effect except that the forward rates, have steadied somewhat. There have been a few export bills for late deliveries in 1936. On the sterling tender day, applications for £1,020,000 at 1s. 6⅛d., were received and allotted in full.

The closing rates are: 1s. 6 3/32d., November 1935—December 1936 T. T. ; with some sellers at 1s. 6⅛d. for January/March T. T. There were spasmodic buyers of ready T. T. at 1s. 6⅛d.; otherwise the rate was 1s. 6 9/64d.

Bills may be quoted: 1s. 6 3/16d., for 1935 and 1s. 6 13/64d., for 1936.

Short credits were in plentiful supply, rates being unchanged. Call money may be quoted ½ per cent. in Calcutta and ¼ per cent. in Bombay, lenders over.

Firms' money for call, three day's notice, seven days' notice and term deposits for onemonth, twomonths and threemonths quoted ¾ per cent. Twelvemonth deposits quoted 2 per cent. to 2½ per cent.

SAVINGS
It may not be easy to save money at the present time, but it is even more necessary than in the past.
A convenient method of preparing for the payment of periodical demands for such purposes as holidays, insurance premiums, income tax, passages, medical expenses and school fees is to open a SAVINGS BANK ACCOUNT with Lloyds Bank and to place a small sum away regularly.
Interest is allowed at the rate of 2½% per annum. WITHDRAWALS CAN BE MADE BY CHEQUE.

* Markets closed.

Thursday Evening.

The rise in starling has continued unabated during the week under review. The sterling—dollar rate has gone up from 4.93 1/16 to 4.93 15/16 on November 27, as compared with 4.91 13/16 a fortnight ago. The sterling-franc rate also has risen from 74.94 to 75.03. A glance at the table at the head of this article will show that sterling bids fair to lose the advantage of the depreciation which it had undergone during the last one year. For, a year ago sterling-dollar rate stood at 4.99 3/8 and the sterling-franc at only 75.78. It is impossible that the British authorities would have allowed this appreciation of sterling to come about without any effort on their part to check the rise. The market steadiness of the sterling-franc and the sterling-dollar rate during the middle of the period under review, that is, from November 23, to November 26, suggests the interference of the Control in the exchange market. It is interesting to note that the immediate effect of the increase in the Paris bank rate effected on November 21 last, saw a rise in the franc in terms of sterling from 74.96 to 74.94. But the effect of the heroic action of the Bank of France proved to be short-lived ; and on November 23, the franc again fell to 74.87 at which level it stood until November 26.

On this occasion, however, the further increase in the French bank rate from 5 to 6 per cent. has been followed by a rise of sterling from 74.97 to 75.03. The sterling-dollar rate has duly reflected the change in the position of sterling. It is sometime now since the theoretical link between the dollar and the Continental gold currencies has been translated into practice in the foreign exchange markets. One might say, therefore, that the period of divergent trends in the sterling-dollar and the sterling-franc rates has been left behind.

The immediate effect of the latest shock to confidence in the franc is a change in the position of gold in the London market. It is interesting that the rise in the sterling-franc rate from 74.97 to 75.03 is not accompanied by any fall in the sterling price of gold in London. On the other hand, the London price has increased fractionally from 140s. 11d. to 141s. The reason for this is to be found in the fact that the gold exports from France which are no doubt on a large scale, and are causing great anxiety to the authorities in that country, have not sufficed to meet the general demand for this unquestionably safe medium of hoarding. It might be wondered whether it is not possible for every individual, who desires to transfer funds from France to foreign countries, to withdraw the requisite amount of gold from the Bank of France, but actually the rules regulating the withdrawal of gold from the Bank have been so devised that there would be in practice an effective check on the outflow of gold without exposing the authorities to the charge of trying to evade the obligation to pay out gold. These tactics have during these years of the financial crisis become quite familiar ; and it is no wonder that faced with a crisis like the present, the French authorities do not consider it beneath them to avail themselves of these safeguards. So far as foreigners are concerned, the rule, which requires two days' notice for the withdrawal of gold from the Bank of France, and the consequent uncertainty of the exchange laws form an effective obstacle to a foreigner's attempts to buy gold from the Bank of France for purposes of export. Investors, therefore, have recourse to the London market and the pressure of demand for gold at that centre has reversed the movement of the price of gold which was witnessed nearly two months ago. It will be remembered that at that time, the downward movement of the price of gold was brought about not only by the changes in the leading international exchanges, but also by the fact that a large section of those, who held their funds in the form of gold in London, were obliged to sell their holdings. The crisis in the franc and the consequent decline of sterling with the general feeling of unsettlement created thereby have reversed this movement. The tendency to hoard gold has again gained a fillip.

The increase in the price of gold bids fair to continue for sometime more. For the Bank of France has agian announced an increase in its official rate this time on Tuesday November 26. The Paris rate, therefore, now stands at 6 per cent. It is interesting to note the Bank of France has effected three successive increases in its official rate, each time by one per cent. from 3 per cent. to 4 per cent. on November 14, from 4 per cent. to 5 per cent. on November 21 and from 5 per cent. to 6 per cent. on November 26. This is a measure of the concern which is generally felt regarding the franc and this, as our Overseas Letter this week brings out clearly, is due to the difficulties of the political situation in France.

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of bussiness-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours?

You have only to let us know your requirement and leave the rest to us.

NATIONAL INSURANCE CO., LTD.

THREE PER CENT.

We congratulate the Reserve Bank authorities on their decision to reduce the Bank rate from 3½ per cent. to 3 per cent. as from this week. This is, in one sense, a measure long overdue ; all the same, it is, in another sense, a bold move. One may ask what courage there could be in the authorities carrying out an action which was considerably overdue. The answer to such a query is that the official policy in India is deliberately deflationary ; that the pet fad of Olympus is the exchange and a high exchange ; that, in the relentless pursuit of this objective, the need or use of cheap money is hardly realised ; and that with the Government hardly friendly to an active and comprehensive cheap money policy, it bespeaks great courage and resoluteness on the part of the Reserve Bank authorities to have decided on reducing, just at the threshold of the busy season, the bank rate to a level which we have not known since 1914. For long, the intrinsic forces pervading the monetary situation in the country have been entirely out of tune with the bank rate. Nor is this a mere recent experience. While the bank rate was ruling at 4 per cent. in 1932, *Indian Finance* urged, again and again, that the rate was untenable and unjustified ; and that the Official Minimum must be lowered to 3½ per cent., if not to 3 per cent. In our discussions with the Imperial Bank officials at the time, we were curtly told that a lowering of the rate below 4 per cent. was unthinkable. Were not the shareholders of the Imperial Bank to be looked after? —we were asked. When we pointed out that the bank rate was more than a domestic concern of the Imperial Bank and its shareholders and that, because of the status of the Imperial Bank as a kind of bankers' bank, its rate was of paramount importance to the entire money market, all the reply which was vouchsafed to us was that the matter would be considered in due time. The rate was reduced to 3½ per cent. on February 16, 1933.

* * *

Thus, 3½ per cent. has been the ruling rate for two years and nine months. On many occasions during this period, even this rate of 3½ per cent. was at total variance with the intrinsic conditions in the money market. This glaring discord has been particularly noticeable since the last Spring. Interbank call money has been quoting ½ per cent. in Calcutta and ¼ per cent. in Bombay, lenders being uninterested even at these low rates. Short credits have been hardly usable for months and months. Interbank call money went abegging, and none so poor to accept the gift. That there has been a considerable shrinkage in the advances which banks have made to traders and industrialists, is only too obvious. So far as the banks as such are concerned, we can give figures only for the period commencing July, 1935, that is, from the date when the Scheduled Banks joined the Reserve Bank system. Prior to that, we have to study the Imperial Bank figures as illustrative of the general position. On February 17, 1933, the total advances made by the Imperial Bank amounted to Rs. 28.33 crores. By November 22, 1935, they came down to Rs. 18 crores ; the shrinkage in trade demand in the case of this one institution is thus no less than Rs. 10 1/3 crores. With the investments under loans and advances thus reduced, the Imperial Bank has had to increase its portfolio of giltedge securities. On February 16, 1933, Investments held by the Bank came to Rs. 35.51 crores. Besides this, the Bank had advanced Rs. 1 crore to the Government on ways and means account. The outlay was thus Rs. 36½ crores. By November 22, 1935, government securities held by the Bank had increased to Rs. 50.49 crores. The Bank has thus had to augment its giltedge holdings by Rs. 14 crores to make up for the decreased demand on account of trade.

* * *

It may be assumed that the experience of the Imperial Bank was the common experience of all banks in India. On analysing the figures of the Scheduled Banks during the past five months, it is noteworthy that advances made by all the banks in India have fallen from Rs. 102.82 crores on July 5 to Rs. 80.14 crores on November 22 and bills discounted from Rs. 3.90 crores to Rs. 2.98 crores. The total decline is thus nearly Rs. 24 crores in less than five months. In the face of these developments and in the face of the persistence of call money rates at ½ per cent., lenders over, in Clive Street and ¼ per cent., lenders over, in Hornby Road, it was clearly demanded of the Reserve Bank authorities to reduce the rate to a level which will more truly reflect market conditions. While the new rate is in greater consonance with the money market of to-day, it is still doubtful if 3 per cent. could be considered as an accurate barometer. If we have in mind the current money conditions and these conditions alone, a rate like 2½ per cent. would seem more appropriate. But it cannot be forgotten that the busy season—that is, busy from the point of view of trade and stringent from the point of view of money—is ahead of us ; and that the rate now put into effect must be such as proves suitable amidst cold weather finance conditions. We may, therefore, be grateful for this mercy of 3 per cent. bank rate and hopeful that, when the busy season draws to an end, the Reserve Bank authorities may well decide on a further lowering of the official rate.

* * *

That the money market interests will benefit from this wholesome step, there need be no doubt. Fixed interest bearing securities must show further appreciation ; equity shares of good industrial concerns must also show improvement. With the lower yields forthcoming on giltedge and semigiltedge securities, the process of converting debentures from higher interest rates to lower rates, must receive a fillip. Interest charges on working capital would also be much lower. Activity on the various exchanges like the stock exchange, and bullion exchange would be stimulated. But the real significance of the 3 per cent. bank rate is that the benefit of cheaper money must be communicated to the rural interests. Such benefit can be communicated in two ways. In the first place, cheaper money may, in broad terms, be said to lever up commodity prices. In the second place, the advances made on produce in upcountry centres must hereafter carry a lower rate of interest. In the case of produce loans made by banks, the rate charged is usually in terms of the bank rate, that is, two per cent. or three per cent. higher than the bank rate as the case may be. Now that the bank rate is lower by ½ per cent., it stands to reason that financing of agricultural produce will be cheaper by ½ per cent. In this connection, we must however, point out that the general custom is for banks to define the rate on advances in terms of the bank rate and, at the same time, to specify a minimum. This clause "subject to a minimum of . . . . " must now be modified. We wonder whether banks will let the old formula stand or whether they will really take steps to extend to the agriculturists the advantage of a lower bank rate. In regard to produce finance, the Imperial Bank holds a dominant position. One may be sure that the Bank will take immediate steps to reduce the minimum by ½ per cent. If this is done, other banks will have no other alternative than to follow suit. It is thus that the benefit of a lower bank rate will be directly communicated to rural India. From this point of view, we look upon the present reduction in the bank rate as a gesture on the part of the Reserve Bank authorities that they are fully alive to their responsibility to initiate active measures for the amelioration of financial conditions in so far as they pertain to agriculture. The first move is thus a good move ; and let us hope that what is well-begun will prove well-done.

FOREIGN TRADE & INDIAN ECONOMY

The *Review of the Trade of India for* 1934-35 issued during the week by the Director-General of Commercial Intelligence and Statistics undoubtedly calls for careful perusal, though it makes no significant departure from the established routine of a detailed examination of the changes in the exports and imports of the various commodities with the principal customers of India. One need hardly refer to the fact that the form of official publications is somewhat hard set and that even the advent of an economist of the calibre of Dr. Matthai cannot bring about an immediate change in the purpose and content of the *Review*. While it is, therefore, understandable that the *Review* should be too closely true to type, we must urge, for reasons which must be obvious, that the Department should endeavour in the coming year to move out of the rut of official routine and to lend more point to the findings and conclusions. It is true that permanent officials of the Government should not consider themselves free to express personal opinions in the course of their annual reports. But it should at least be possible to expand the *Review of the Trade of India* into an annual economic survey recounting the fortunes during the year of Indian industry and internal trade and finance and setting the experiences of our foreign trade in the broader picture of the national economy. We trust even the Government of India have outgrown the notion that India's foreign trade is nearly the whole of Indian economy and that a review thereof should suffice to acquaint the public with the fluctuations of our national economic fortunes and to provide the material with which to frame the national economic policy of the future. Time was, no doubt, when it could be said that foreign trade more or less filled the entire picture of Indian economy. But the last decade has seen the policy of discriminative protection at work. And during the years of the depression, international free trade has been, so to say, checkmated by a series of insidious and complex forced moves. The nations are obliged, whether they will or no, to direct more and more attention to the structure of the internal economy. And even if advanced industrial nations begin to develop their internal economic resources, how much more would India have to, with her vast industrial potentialities?

* * *

Though this change in the economic position is at least five years, if not a decade, old, the Government of India have not thought it necessary to widen the scope of the official reviews. Such remarks as officials might make about the general economic state of the country are only of an incidental or a merely prefatory kind. The Finance Members of the Government of India, and particularly Sir George Schuster, often endeavoured to give the budget statement a wider economic setting. The report of the Controller of Currency also opens with a reference to the monsoon and the output of the principal agricultural crops and changes in index numbers and exports of principal commodities. But it is time that there should be a collation of all the available data relevant to the question. The *Monthly Survey of Business Conditions in India*, which was instituted nearly two years back, is but a modest beginning of what we are now urging for ; and we trust that the next review will show that we have not appealed in vain for a fuller economic survey.

* * *

We maintain that a study of the volume under review will bring out the force of our plea. If the wealth of statistical tables and charts in the *Review* brings out anything, it is the futility of the hope of expansion in foreign trade and a consequent improvement in the country's economic well-being. We are not referring at this stage to the fact that such improvement as may occur merely through the expansion of the foreign trade would fall far short of the aspirations of the people. We suggest rather that the scope for increase in exports, imports and the favourable balance of trade is extremely limited and that to pin our hopes of progress on our trade with foreign countries is to invite disappointment.

* * *

The World Economy Survey, published annually by Mr. J. B. Condliffe under the auspices of the Economic Section of the League of Nations, leaves no room for doubt or scepticism in this score. For, year after year, Mr. Condliffe has stressed the extremely

limited nature of the present revival and the increase in the barriers to international trade. Hardly any country has attempted in recent years to set an example to the rest of the world in the matter of lowering the tariff. Only during the last one year, the United States of America has made a sincere and valiant effort in that behalf, the latest instance being the treaty between the United States and Canada. We do not underrate the extent to which the United States might bring about a change in international trade relations ; but the most optimistic estimate of such a change would not bring within the range of practical politics an expansion of the principal exports from India to foreign countries. While the plea for economic nationalism derives the utmost strength from a study of the trends of world trade and of economic policy in foreign countries, a perusal of the *Review of Trade* will of itself establish the wisdom of India directing more and more of her attention to the development of internal resources and constructing a national economic policy with its centre of gravity shifted far away from the sphere of foreign trade. To determine the scope of foreign trade it is useful to think only in terms either of particular countries or of the commodities of which we have an export surplus. For, to talk of international trade as such has no longer any meaning. With the growing vogue of bilateral trade pacts, not to speak of economic nationalism, the chances of nations increasing their import trade in the hope that a healthy national balance would be attained through a devious, but, none the less, reliable, process of multi-lateral trade relations are to-day next to nothing. It follows, therefore, that it is not unscientific to attempt to appraise our trade prospects by examining the position of our export staples or our trade relations with our more important customers.

* * *

It must also be remembered that, taken as a whole, our foreign trade has failed to show the improvement necessary to revive confidence in the expansion of our imports and exports as the sovereign remedy for our economic ills. Exports of Indian merchandise have, during the last three financial years, increased from Rs. 203.23 crores to Rs. 212.10 crores and, during the last two, years, the increase amounts to only 3 per cent. Imports have made a better showing, having increased from Rs. 115.36 crores in 1933-34 to Rs. 132.29 crores in 1934-35, an increase of 15 per cent. But even this makes up only in part the sharp fall in imports in 1933-34 from the level of 1932-33. It is well known that our balance of trade position has been maintained during the years following the abandonment of the gold standard only by a phenomenal flow of gold from this country. But even this gold export has shown a steady decline during the last three years; and however one may view the prospcets of the continuance of gold exports, it would be idle to overlook the significance of the decline. Nor can one underrate the importance of the fact that, for the increase of imports that India has experienced during these three years, she has had to acquiesce in more than a proportionate increase in the import trade into the country. There can be no doubt that such increase in imports is far too high a price for the improvement in exports. The importer's position of vantage may be said to be almost a permanent feature of India's trade relations. The *Review of Trade* gives index numbers of the values of imports and exports. Though they have been constructed without due allowance for the difference between the rates of import duties in the base year 1913-14 and each subsequent year, it is clear that India has always had very unsatisfactory trade terms and that the importer has always had the better bargain. Only of the last two years, can it be said that there has been some degree of adjustment of import and export prices. The index for exports has remained stationary at 70 while the index for imports has declined from 79 to 77. In the nature of things, it

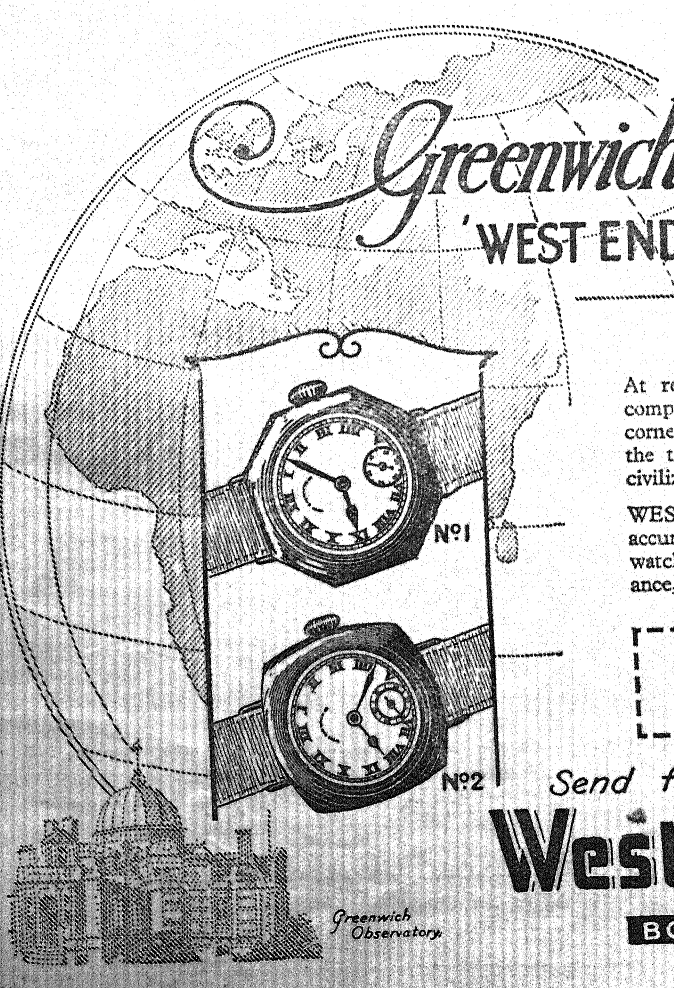
is idle to expect an undeveloped agricultural country to have much of bargaining power in its dealings with advanced industrial nations.

* * *

We may now turn to an examination of our trade relations with foreign countries and the position of our export staples. Taking our export staples first, it is difficult to choose a commodity which has a growing market abroad and which, through an increase of exports, can come to the relief of the national economy. In this study, it is obviously useless to compare the value of exports at the present time with the value of the post-war or any pre-depression period. For then, one would have to take into account the fall in prices. It is, therefore, necessary to consider the volume of exports. Taking the case of raw cotton, it is necessary to note that the exports in 1934/35 amounted to 615,000 tons against 727,000 tons in 1929-30. A scrutiny of the trade statistics will show that the United Kingdom and Japan are the only two countries which have increased their offtake of Indian cotton during this period. All the other countries have effected substantial reductions, and when it is remembered that the more important of them have been deliberately reducing their imports of raw materials, it would be realised that the chances of expansion in our exports of raw cotton depend almost solely on the United Kingdom and Japan. Both these countries, it need hardly be said, are keen comepetitors with the Indian cotton mills in the home market for piecegoods, and both the Mody-Lees Pact and the Indo-Japanese Trade Agreements show clearly that an increase in the exports of cotton with either of these countries cannot be achieved without our consenting to an increase in the imports of cotton piecegoods. We do not believe that the cause of Indian economy will be well served by contriving an increase in the exports of raw materials by agreeing to an increase in the imports of manufactured goods. The posiion with regard to jute is, no doubt, different, as India has the monopoly of this commodity. But here again, a serious disparity between the figures of the pre-depression period and the last financial year is noticeable. For the exports of raw jute in 1934-35 amounted to 752,000 tons against 807,000 tons in 1929-30, and exports of gunny bags 423,000 tons against 522,000 tons in the pre-depression year. Exports of gunny cloth were for 1,651,000 yards in 1929-30 and they declined by 1934-35 to 1,063,000 yards. The *Review* points out that the trade in paper bags, which are the best known substitutes for gunny bags, has apparently made some progress during the year under review. Though we are not among those who are disheartened by the fear of substitutes, we think it too optimistic that the market for jute goods abroad will revive to the same extent as before. But even allowing for an improvement in our jute exports, the outlook of India's foreign trade is, by no means, so bright as the supporters of free trade would try to make it out. The most serious setback has been in the case of our trade in grains. The quantum of our exports of grains, pulse and flour in 1930-31 was 2,613,000 tons and from that level it has slipped down to 1,765,000 tons. Wheat is nowhere in the picture of our export trade. Rice has lost one market after another. Groundnuts show a difference of 200,000 tons between 1929/30 and 1934/35. Oil seeds have, no doubt, made a better showing, but it will be farcical to urge that our future economic policy should be based on the prospect of an increase of exports of our oil seeds, which in the best of times amounted in value to only 10 per cent. of our total foreign trade.

* * *

The outlook is not altered by a consideration of our foreign relations. Space does not permit a detailed consideration of the issues involved. It is well known that with the aid of the Indo-Japanese and the Indo-British trade pacts, the volume of trade passing between India and each of the two countries has been increased during recent times. The results, which have so far been apparently achieved, have emboldened many economists and businessmen to join the cry



Greenwich sets World's Time
'WEST END' WATCHES INTERPRET IT for INDIA

At regular intervals, the correct time, as scientifically computed at Greenwich Observatory, is flashed to the corners of the earth and thus fixes a standard by which the time can be accurately calculated in all parts of the civilized World.

WEST END watches give a consistently high standard of accuracy in time-keeping and fortunate possessors of our watches in India agree that in actual practice their performance, judged by Greenwich, is precise to a very high degree.

for bilateral trade pacts, though they should have been struck with the obvious impossibility of improving the exports and the favourable balance of trade by nicely balanced commercial advantages with every other foreign country. Discussions on the Ottawa Pact have made it clear that the increase in the trade with the United Kingdom must be accompanied by a serious fall in the trade with the Continental countries. It is certain that the policy of improving the foreign trade by means of trade pacts will prove very much like attempting to lift oneself by pulling at the boot-straps. It is, no doubt, very disconcerting in the present state of India's national economy to be confronted with the conclusion that the scope for improvement of foreign trade is very limited. But for one, who can realise the vast potentialities of the internal economy and the possibility of creating a balanced economy on the basis of a much larger and more varied internal production, the fact of India's foreign trade being in a blind alley must be a welcome change rather than otherwise.

POWER AND LIGHT

Eavesdropper writes:—

I have, on sundry occasions, dwelt on the vast potentiality of South India from the industrial and investment point of view. The shares commended in these columns have justified my confidence; and investors shrewd enough to act on the tip have every cause for satisfaction. I may vouchsafe another tip this week—this time, it is a public utility. Madras Presidency is specially suited for electrification projects. The vast network of hydro-electric schemes has brought the amenities of cheap electricity to far-flung mofussil towns. There has been, as a consequence, much activity in this line; but most of the retail distribution has been undertaken by the municipalities themselves. Where, however, a place is beyond the reach of hydro-electric supply, public companies have been promoted in a good few cases; and these show, in every instance, far more economic outlay on capital than does a project of like size anywhere else in India. The Nellore Power and Light, prospectus of which appears elsewhere in this issue, is a significant instance in point. For a town with a population of half a lakh and many industrial concerns like rice mills, a total block expenditure of Rs. 3¼ lakhs must be deemed most prudent husbanding of resources. The company has commenced supplying current to consumers; this means that it has started earning revenue. But it is only at this stage that the company is making a public issue of its shares. The expenditure till this stage was found by the original body of shareholders (only Rs. 80,000 paid up), the managing agents and by credit from machinery suppliers. The present issue is 1,370 shares of Rs. 100 each—and the total issued capital will then come to Rs. 3 lakhs. Dividend from the very first year is assured because of the share issue being made at a stage when the business is a going concern. It is not often that an investor is able to get at par a first class public utility share of this kind. The managing agents are Chari and Chari Limited—and, besides being agents for two other town electric supply concerns, they had acted as contractors to Government and municipalities for no less han a dozen towns as regards installation of the distribution system. The District Board is represented on the directorate by its Chairman, the Kumara Raja of Venkatagiri, and has shown its confidence by taking debentures for a lakh. The M.S.M. Ry., always reluctant to depend for electric power on private sources of supply, has scrapped its power plant in the towns catered to by Chari and Chari and switched on to the utility company. This is a measure of the repute enjoyed by the firm for trusty and reliable work in electrification. Nellore

INDIAN TEA
the most inexpensive drink for Indians

It is justly claimed that Indian Tea is the cheapest drink in the world, except water. It is within the reach of all men and women, rich or poor. One pice worth of Indian Tea makes five cups. Indian Tea is absolutely safe, because it must be prepared in boiled water which is free from all germs. This most inexpensive drink for you, Indian Tea, can therefore contain nothing that can cause harm to your system. It only serves as a splendid refresher. Indian Tea is not only the cheapest but also the purest drink for Indians.

✻ HOW TO PREPARE TEA

Use good Indian Tea. Boil fresh water. Rinse with warm water a clean and dry earthenware tea pot. Take one teaspoonful of tea for every person, and one extra for the pot. Allow five minutes for infusion; then pour out into cups, adding milk and sugar.

A three per cent. bank rate in India merits a paean of praise. It is, truly, an occasion for thanksgiving. It celebrates a significant monetary policy. Rich in the immediate beneficient results, its promise for the future is richer. If it is a reduction to three per cent. on the eve of the so-called busy season, what hopes does it not raise for the morrow after the busy season? This is the first definite gesture of the Reserve Bank authorities that they are not only the moulders of the destiny of money market centres, but the guardian of rural financial conditions. For, all produce loans given by banks in the mofussil are in terms of the bank rate; and a lowering of the Official Minimum means lesser interest charges on the financing of commodities. Above all, the action of the Reserve Bank in reducing the rate at the present juncture must be in the nature of a well-needed tonic which may accelerate the pace of trade recovery. It is true that, in certain sections of the press and most sections of the markets, there has been considerable talk in recent weeks of the possibility of a lower bank rate. Nevertheless, the announcement, on Thursday, of the Bank's decision to lower the rate by ½ per cent. did not lose anything of the quality of a pleasant surprise. For, everyone was keenly aware of the opposition of bankers as a class to reduction in bank rate; and there was a general impression that keen fight was going on behind the scenes between the protagonists of a lower rate and its opponents. The advocates of three per cent. rate won; and the announcement caused much relief and great glee.

It is not for me to apportion credit for this grateful and graceful step. To pay a compliment to one may well be construed as registering censure on another. Which reminds me of the vogue of Indian astrologers. When the latter are reading the horoscopes, they might stress, on every reference to the mother or the wife, that the lady was of an exceedingly chaste character. This praise of the purity of the woman is less a compliment to her than a reproach on the lack of it in her lord and husband. The Indian astrologer would not hurl a brickbat at any the smuttiest character; his tactics consist of proffering a bouquet to the opposite and of resting content with the insinuation. So may my encomiums of this one or that other for the overdue reduction of the bank rate be interpreted as innuendoes adversely reflecting on some others. 'Mum' is the word for me; and let me prove my faith in the golden quality of silence.

There has been some grouse from bankers that this important change in the bank rate was not communicated to at least the more important of them by phone or otherwise. In the pre-Reserve-Bank days, it was the custom for the Controller of the Currency to vouchsafe, to the Agent of the Chartered Bank, information of any expansion or contraction of currency or of any such significant move; and the Agent of the Chartered Bank, as president of the Exchange Banks' Association, was expected to transmit the tidings to others. On the present occasion, no such message was sent. The announcement was merely posted on the Notice Board of the Reserve Bank; and those, to whom it had any concern, were to know the news only by this means. Was this not scurvy treatment from the Reserve Bank authorities? asked some. It is nothing of the kind. The procedure adopted here is exactly on a par with that in the Bank of England—or, for the matter of that, in any central banking institution. When, for instance, City circles in London are anticipating a lowering of the bank rate, a long queue of over two hundred persons may be seen, on Thursday mornings at 10 sharp, in front of the Notice Board in the Bank of England premises. The hush of expectation prior to 10 a.m. and the bustle of excitement if there be a change are amongst the impressive spectacles of the City. The Governor of the Reserve Bank of India deserves encouragement, not censure, in his objective to establish in this country traditions analogous to those that have grown round the Bank of England. By all tokens, there is cause for jubilation that the master-mariner is again at the helm of Reserve Bank affairs. So far as this week's notable event is concerned, as the earth bringeth forth her bud and as the garden causeth the things that are sown in it to spring forth, so the three per cent. rate will cause health and bloom to spring forth before all the cities and the country-side.

Apropos my comments last week on "exclusive" European clubs, the Australian cricket team made, almost con-currently, a great gesture of goods taste and abounding grace. The team is being feted in the Western Presidency; and the members have been made honorary members of two "exclusive" Karachi clubs. The Australians have declined to participate in club amenities which are denied to Indians. The acceptance by the Australians of membership of "exclusive" European clubs would have offended the sense of sportsmanship which has made their first tour to this country a signal success, not from the

narrow point of view of cricket, but from the wider outlook of inter-continental contact. And, more on account of this Indians thoroughly appreciate the spirit that inspired the Australians' refusal. The action of the Karachi clubs makes their "exclusiveness" look uglier on an occasion when canons of sportmanship gave to Indians the same social standing as to Australians. "Abandon Indians, all who enter here", the unwritten law on the lintel of European "exclusive" clubs, has an unwritten sanction in this country, the inviolability of which the Australians must have sensed in their brief experience of India. To flout it in the face of Indians by segregating them from the club courtesy extended to the Australian team is a wanton affront, with which the Australians declined to be associated, showing that they play cricket not on the pitch only—a quality of all good sportsmen.

Throughout the Empire, in great cities and far-flung corners, St. Andrew will be honoured tonight in traditional fashion. Caledonia, stern and wild, will relax in an atmosphere of good cheer charged with the spirit of its native heath and loch. Scotchmen away from home will once again look on the labour of their hand and brain, the substance of their holding, their cannyness, their self-consciousness and their clannishness and will find them all good. If they do not say they are not like others, particularly those born on the wrong bank of the Tweed, St. Andrew's Day ritual is instinct with the thought. In fact, this thought so possesses the ritual that a stranger, however distinguished, is abashed to a becoming sense of reverence of Scots and things Scottish, even upto the haggis and the heather. If their ear be, haply, not attuned to the squirl of bagpipes, they will recall to mind the appeal of the primitive. And in the wassail, in which bits from Burns will flavour "the Land of Cakes", strangers will pay cheerful homage to whisky, Scotland's best blend. "Stay me with flagons, comfort me with cakes" is the psalm of St. Andrew's Day Dinner and the dourest of Scots foregather with "brither" Scots to celebrate. Far be it from me, a stranger who has enjoyed the good cheer of St. Andrew's Day, to attempt to explain the Scot to less fortunate fellow beings; fools rush in where angels fear to tread.

In Calcutta the occasion is one of the major events of the year. Job Charnock's city is the creation of Scotchmen and if, in the genial post-prandial setting of the celebration, Scotchmen develop or rather release a self-satisfied complex, they have good reason. Clive Street is paved with the Scotchman's genius of collecting the elusive bawbee. The shipping on the Hooghly and the mills on its banks bespeak the business of men who hail from Aberdeen or Glasgow or Edinburgh. Higher education here began with Duff and Carey. And of those who have fashioned, according to their light, the destiny of the province, Scotland has contributed the majority. If Calcutta has a special niche in the temporal temple of Scots "who hae", Calcutta has been well served. When glasses are raised tonight to the toasts "The Land We Live In" and the "The Land of Regrets", everyone will respond in spirit.

The latest war news crystalises what has been the unformed apprehension in the mind of millions. Italy's reaction to the extension of League sanctions to oil has brought the hazard of collective war very

near. It is not a surprising reaction. Responsible Italian spokesmen have notified the League and Europe that a ban on petrol supplies would be regarded as a hostile act of a military character justifying military retaliation by Italy. The League, in pursuance of its policy, endorsed by almost the entire body of European national opinion, had no alternative but to apply sanctions in progressive intensity and volume. Italy, delirious with war fever, sees, probably because she wishes to see, in the League's decisions a deliberate provocation to war. The situation is charged with the gravest menace; and, unless wiser counsels prevail, of which there is no indication and hardly a hope, the next forty eight hours may witness the last frenzied move of a distracted dictator. The issues are being forced by Italy out of the range of statescraft. The crime would be Italy's.

When Edward Young, some time about the first half of the eighteenth century, wrote those much quoted and those almost invariably wrongly quoted lines, "Tired Nature's sweet restorer, balmy sleep", he had never tested Indian tea, for the very excellent reason that Indian tea was then unknown. Had he lived about a hundred years later, he might well have substituted "Indian Tea" for "balmy sleep." For, the cup that cheers but does not inebriate does, indeed possess the most remarkable restorative properties. And tea seems to exercise the property of restoring tired nature to the members of the Tea Cess Committee in greater degree even than it does to others. That is the only explanation I can find for the indefatigable manner in which they turn out literature on their particular subject.

Indian Tea: Any Time is Tea Time is the title of an attractive brochure recently published. Before reading it I would have disputed the truth of the statement contained in the second part of the title. I should have said that the early morning and four o'clock in the afternoon were tea time and no others. But I'm not at all sure now that any time is not tea time. But, I must add, craven fear of my bearer will probably deter me from ordering tea to be prepared at any and every hour of the twenty-four. I don't want to lose him; he's been in my service for twenty years. Here is yet another. A remarkably well-got up folder, describing the Plans For The Indian Tea Cess Press Propaganda, 1935-36, affords the layman a very fair idea of the Committee's activities in this direction. The advertising campaign in the Indian Press, covers forty-seven papers, including dailies, weeklies, bi-weeklies and monthlies and an idea of what this meant may be guaged from the fact that the total number of advertising messages, thus disseminated, was estimated at approximately seven million. The Committee "were able to secure free editorial space for propaganda articles to the extent of about 2500 inches," They can now ask their accountant to take his foot rule, measure up these paragraphs and make out cheques for the scribes who had so ably seconded their efforts!

PROSP

Investment in Electrical Companies

Shares in electrical companies compare favourably with gilt-edged paper in point of security. Being public utility concerns, electrical companies, besides being governed by the Companies Act, are also subject to the provisions of the Indian Electricity Act. With few exceptions investments in electrical companies have shown high appreciation over their nominal value. Given honest and economical management there is no reason why they should not secure throughout for the investor good profit unaffected by any such adverse conditions that affect the profits of an ordinary trading company.

Preliminary

The Company was incorporated on 9-4-1930 to take over the license granted by the Government of Madras to Messrs. Chari & Chari, Limited, Madras and known as **"The Nellore Electric License 1930."** No prospectus was issued to the public immediately after the incorporation, the company having commenced business with a statement in lieu of prospectus. The management was of opinion that the then requisite capital could be found by the Directors and their friends.

The Area of Supply

The area of supply consists roughly of about 25 square miles round Nellore Town. Nellore is the District Headquarters of the District of the same name.

Commencement of Supply

The power house has been built and machinery installed. Supply to the public was commenced on 6-6-1934. The generating plant is capable of producing an annual output of 8,75,000 units (which is 40 per cent. of the station load factor). The present machinery and equipment is sufficient to meet the anticipated requirements for a few years to come.

Prospects of Supply

Nellore has a population of 45,895 according to 1931 census. The town has about 10,000 pucca residences. The consumers may be classified as follows :—

1. Private persons having house service connections.
2. The Municipality for street lighting and water pumping.
3. Public bodies taking power for Temples, Hospitals, High schools, Churches and Administrative Offices.
4. Rice Mills and miscellaneous factories.

At present 270 houses have been connected up and the Directors confidently expect another 100 to be connected up before the close of the coming half year.

The Municipality has contracted for the Supply of :

1. Power for street lighting which yields a gross revenue of Rs. 10,000/- per year to the company.
2. Power to water works and this is expected to yield a similar revenue from 1st June 1935.

Nellore District Co-operative Banking Union, Ltd.

LEGAL ADVISERS FOR THE ISSUE

S. Parthasarathy and **V. K. T. Chari,** Madras.

REGISTERED OFFICE

27, Poonamallee High Road, Vepery, Madras.

ECTUS

There are good prospects of fair amount of energy being taken up for public buildings and factories. It must be remembered that Nellore is a well-known rice-producing centre and there are a number of rice mills. The change over from steam or oil engines to electricity will naturally take some time. The Directors expect that power for these mills will be a profitable source of revenue in the near future.

Revenue Prospects and Probable Profits

The Directors give below a probable estimate of revenue and expenditure of the Company for three years commencing from the date of supply of energy to the public. The Agents, Messrs. Chari and Chari Ltd., are responsible for the preparation of the figures. The Directors are confident that in view of their long experience as Electrical Engineers (they have executed various town lighting schemes for the Government of Madras as well as for Municipalities and are also Agents of other electrical companies in the Madras Presidency) these figures represent a conservative forecast of the Company's progress. In order that prospective shareholders who are so inclined may investigate the figures for themselves particulars are given below. While the figures commence only from the third year of supply which corresponds to June 1936 to June 1937, the Directors hope that if the present rate of progress is kept up it will even be possible to pay a dividend of not less than 4% in the second year of supply (viz. June 1935 to 1936.)

It will thus be seen that investment in shares of this concern will afford the shareholders a good return coupled with the safety that usually attaches to all well-managed public utility concerns.

Third

	Revenue. Rs.	Expenditure including deprciation interest charges and all charges. Rs.	Nett profit. Rs.	Percentage of dividend on an effective capital of Rs. in lacs.	Free of income-tax.
For the third year after commencement of supply	1,01,187	74,918	26,269	3.0	8%
For the fourth year after commencement of supply	1,19,525	85,752	33,773	3.5	9%
For the fifth year after commencement of supply	1,41,340	97,065	44,175	4.0	10%

Applications should be made on the attached form and sent with cheque for application money direct to the Company's Brokers, Messrs. **Maconochie & Co.,** Mercantile Bank Buildings, Madras. Cheques should be made out in favour of the Company's Bankers, **The Bank of Hindustan Ltd.,** Madras.

THESE MODERN TIMES CALL FOR HIGH EFFICIENCY

To-day, you can no more afford a private courier than the shipping companies can afford sailing ships. In this telephone age you'd be behind time and your competitors. The telephone is not only a symbol of the 20th century, but a very essential part of it too. You can't imagine a really progressive business without a telephone, and it is just as important for social engagements too.

TELEPHONE! IT'S QUICKER AND CHEAPER

Whether it is a question of business or pleasure, a telephone is at your service—it gets you in touch cheaply, quickly and realistically.

OLYMPUS

(From Our Correspondent)

New Delhi, November 27.

The talk here is the greed of Sir Alexandar Murray for statistics. Sir Alexandar has the reputation of being very hard-working and very thorough. But considering the statistical information he has ordered, his enquiry may last through the winter months and the Commerce Department may look in vain for a report from the Tariff Board. His colleague, Dewan Bahadur A. Ramaswami Mudaliar, has also a well-known thirst for figures. However, I am told that they are going to make every effort to keep within the scheduled time.

* * *

And the same tale about the Niemeyer enquiry, though the cause is different. The Provincial Governments have sent in their material and all these have been forwarded, by air mail, to Sir Otto to catch him before he leaves for India, so that he may read them during the voyage. But what a problem the provinces have created for him! Each one has pitched its demands at the maximum ; each one has coloured the figures to suit its own case.

* * *

Sir Otto must accept those figures. If he does not, what alternative has he? He cannot undertake an independent enquiry ; that would take ages to conclude. He will thus have a tough time. Mr. Nixon will help him a lot in getting an all-India view, but the difficulty is that the provincial governments have pitched their claims so high.

* * *

Perhaps, it would be best for Sir Otto to gather all the material and go home to digest it and write his report. There he would feel more detached and free from local influences. But in spite of his ability, the problem will be found to be very difficult.

* * *

Provincial rivalries have already started as to whether Sir Otto will visit their headquarters ; and, if so, he should visit them all. That is hardly possible and, in the end, the decision may be to make every one come up to Delhi and submit the case for oral examination. Perhaps, that will be the most economical method of using the very limited time he will have at his disposal.

* * *

The Review of Trade of India in 1934-35 has been issued by Dr. John Matthai, Director General of Commercial Intelligence and Statistics. The Review definitely bears the imprint of Dr. Matthai's careful thought and analysis. It is written with less reserve than the Report on the Ottawa Agreement. In fact, the Review supplies just the type of comments which are lacking in the Report on the working of the Ottawa Pact.

* * *

Says he: "Generally it may be said that the countries in the Sterling group have done better than countries in the gold *bloc*. World trade is, however, still much below the level of 1929, the volume of trade in 1934 being estimated at 77.5 per cent. of the 1929 figure. The history of the past few years suggests that measures of internal reconstruction are successful only to a limited extent in stimulating economic recovery."

* * *

Referring to the balance of trade, he says: "In 1913-14 the trade balance with the U. K. was against India to the extent of Rs. 59 crores, that is, India imported in that year much more from the U. K. than the latter bought from India. This wide difference has in recent years narrowed down considerably ; in 1931-32, there was an adverse balance against India of Rs. 11 crores while in the year under review the excess of imports over exports amounted to Rs. 5 crores. The adverse balance with the U. K. in 1932-33 was due to a reduction in exports by Rs. 6 crores as compared with the preceding year and an increase in imports by Rs. 4 crores. In 1933-34 exports advanced by Rs. 10 crores as compared with 1932-33 while imports fell by Rs. 1 crore. In the year under review exports further improved by Rs. 1 crore while imports advanced by Rs. 6 crores."

* * *

He further shows that, taking the British Empire as a whole, the balance is in India's favour to the extent of Rs. 6 crores. As regards other foreign countries Germany alone stands out as having disappointed India. Cotton industry and steel industry did well during the year ; and, otherwise too, one gets the impression that industrial activity in the country did not receive a set-back.

* * *

Talking of matters less controversial, I understand that the nomination of Lady Grigg to the Central Advisory Committee on Education establishes a precedent. Perhaps, this is the first instance of the wife of a Member of the Executive Council being nominated by Government to an advisory official body. Lady Grigg's qualification is that she is Chairwoman of an important sub-Committee of the Society which runs the Lady Irwin College for Indian Girls. Further, she has an alert mind and is very thorough in doing any work to which she puts her hand. She was Secretary of the Pilgrim Society in England and, though I have not received confirmation of this, she has had something to do with education in England. Any way, I hope that Sir James Grigg will not feel embarrassed in making generous allotment to the cause of education because Lady Grigg is on the Board.

* * *

Talking of women's education, I feel like ventilating the grievance here that Hospital services and nursing in India, as exemplified by the Lady Hardinge College and Hospital, Delhi, are not quite what they should be. Every Indian, however highly placed or lowly placed, who comes into contact with such institutions feels that the doctors and nurses are acting, not out of human fellow feeling, but out of patronage to distressed people, and the sting is unbearable. The Governing Body of most of such institutions is supposed to be under official patronage. Why can't some high society lady improve this state of affairs?

(From Our Correspondent)

Bombay, November 27.

"There is little balm in Gilead, a little corn in Egypt" was the heartening message delivered at the 16th Ordinary General Meeting of the Scindia Steam Navigation Company. After providing Rs. 6 lakhs as Depreciation and writing off the debt balance of about Rs. 7 lakhs of previous years, the Report for 1934-35 leaves Rs. 2,77,090 as profit. This favourable balance was due to a series of special circumstances not operative normally, such as a comparatively large quota of freight allowed to the Company under the settlement concluding the recent Freight War to make up for the losses of the previous year. There were also comparatively large exports of rice from Burma, of which a large portion was handled by the Scindia Company. As the Freight War has ended and the previous year's debt balances have been written off, the position may be regarded as satisfactory with a prospect of improvement.

* * *

A notable feature of the working of the Company is the rapid progress of Indianisation in its personnel. The Company has already taken as many as 39 cadets from the training ship "Dufferin" as apprentices and 6 or 7 more will be absorbed in 1935-36. Of the 39, 15 have served their time. The Company has given employment to 29 cadets as officers, a procedure which, in the words of Mr. Walchand Hirachand, is "in singular contrast with the very small number of cadets taken over by other lines with far larger fleets." The Committee of shareholders of the Company recognise in this policy of Indianisation not only a great national service, but a means of running the Company on sound economic lines.

* * *

The occasion gave Mr. Walchand Hirachand an opportunity of inviting attention to the serious disabilities under which Indian Coastal Shipping will operate under the new constitution. At present it is possible, though, as experience has shown, very unlikely, for Government to give, if it were so minded, some sort of preferential treatment to Indian shipping in the national interest. Under the new constitution, such a course would be ruled out, however necessary it may be in the interests of the country, under the comprehensive British safeguards against commercial discrimination. On this political aspect of the question, Mr. Walchand Hirachand suggested that there can be no salvation for Indian shipping unless it allied itself to those political organisations which are strenuously trying to delete the new constitution of its anti-national commercial features.

* * *

Mr. J. F. Nariman's appeal to students to fight mass illiteracy is one of those practical measures which carry in them the seed of a large, lusty growth. Mr. Nariman has been turning over this vital problem in his mind for some time. And finding that financially both the Municipality and the Government are impotent to reduce mass illiteracy, he has struck the happy idea of enlisting the sympathy and the service of Bombay's youthhood in a large national uplift movement. Students, out of their leisure hours, could work among the poorer classes in the city as voluntary teachers without any remuneration; and Mr. Nariman thinks that some of the Municipal school buildings with equipment could be made to serve the purpose of this national

sion about the difficulties of the undertaking. But even a small beginning, such as he has suggested, would create an organisation which might well reclaim a little illiteracy. He thinks that a beginning should be made in the Harijan quarters of the city where free night and Sunday and holiday classes would be held in Municipal quarters. Under the new franchise rules, Harijans, under the scheduled classes, particularly women, will have an additional incentive, because they would get the additional advantage of the right to vote in the new councils. It is a pity that Mr. Nariman, with the best intentions, has involuntarily introduced a sort of communal differentiation in his scheme by adopting Harijans as his first charge. Other classes have as great need of literacy.

* * *

The malpractices in the cotton trade, which have for years past cropped up periodically, are now to be dealt with by legislation. The first reading of the Cotton Ginning and Pressing Factories Act Amendment Bill was carried almost unanimously by the Council last week when the House sat for 25 minutes longer than usual to complete the first reading. The Home Member was confident that the Act would put a stop to the malpractices in the trade and improve the standard and purity of cotton on which Lancashire representative bodies insist as a condition precedent to the more extended use of Indian cotton by Great Britain. This Bill is at present confined to Sind. But the Home Member hopes that before long an All-India measure would be passed by the Central Legislature.

* * *

Of course, there was a certain amount of non-official opposition based on the ground that it would be better for the trade to tackle the malpractices without legislative intervention. Actually, more than half a crore of rupees is lost annually to the trade on account of the malpractices; and the Government took up the line that it is high time that legislative step was taken to check this hitherto unchecked evil. Naturally, the success of the Act will depend upon its detailed provisions and the way in which they are enforced. The Select Committee will have the task of framing such safeguards and provisions as would make the Bill effective. It is hoped that, with the cessation of the malpractices, more Indian cotton will go not only to the United Kingdom, but to Japan. The trade represented by the East India Cotton Association has taken kindly to the legislation and Sir Purshottamdas, presiding at the 14th General Meeting of the Association, made it a point to say that "if cotton cultivation in India is to be brought up to a remunerative basis, more legislative checks of this sort will have to be devised hereafter."

* * *

In these commercial days, it is refreshing to come across a whiff of culture. Such a whiff blew from Sir John Baumont's presidential speech at the anniversary meeting of the Bombay Branch of the Royal Asiatic Society which was attended by His Excellency, the Governor. The Royal Asiatic Society has endeavoured in its long useful life of a hundred and thirty-one years to keep alive the cultural side of the City's life. It possesses the finest private library in the country, which was in danger of perishing owing to lack of funds; a danger which has happily been averted by the generosity of two Bombay businessmen who have subscribed handsomely towards the repair and upkeep of the library. In the course of his address, Sir John Baumont said that "Bombay ought to stand for something more than money-making and cricket.

SOUTH INDIA

(From Our Correspondent)

Madras, November 27.

Quite an engaging controversy is raging over the Tobacco Bill. The Bill was introduced in the local legislature recently and has been referred to a Select Committee, not wholly uninteresting in its composition. Among its members is Mr. C. R. Reddy, who explains in a press statement that he was put on the Committee in his absence and that he has chosen not to decline the honour as the President and Secretary of the Legislative Council have given him an assurance that his membership does not commit him, in any manner or degree whatsover, as the convention, that only supporters of a Bill should serve on the Select Commitee to which it is referred, does not happily obtain in this province. The general sentiment is one of disapproval of the measure, based on the broad principle that taxation being burdensome enough as it is, the imposition of any further tax must necessarily be obnoxious. However, pronounced opposition does, of course, come from the tobacco interests, who have already prepared a plan of campaign against the Bill. The bill is disliked in certain unexpected quarters, though for interesting political reasons. Sir A. P. Patro declares that it will wreck the fortunes of the Justice party as the enemies of the party will parade the Bill at the next elections, as another skeleton in the party's cupboard. The Berhampore knight is, therefore, anxious that his party should not commit the tactical blunder of sponsoring the measure. The *Hindu* has adopted an attitude of intelligent and discriminating support towards the Bill. In the course of a characteristically level-headed leading article, the *Hindu* examines the economic and constitutional objections to the measure and concludes that tobacco justly provides a source of alternative taxation and reinforces its opinion by a reference to the recommendations of the Taxation Enquiry Committee. It, however, makes one reservation, namely, that it is open to question whether a Council, whose term has been so often extended and has, in a sense, ceased to be a representative body, has the constitutional or moral right to consider further taxation proposals. Numerous meetings are being held to protest against the proposed measure. Galsworthy said somewhere that in the British House of Commons, unemployment constituted a nice stick in the hands of the Opposition with which to beat the party in office and incidentally to beat their own party drum during the General Elections. The Tobacco Bill promises to provide a similar weapon in the Congress armoury in the event of the Bill going into the Statute book.

* * *

Among the mementos left by Sir Sorabji Pochkhanawala of his recent visit to this province is an Associated Press interview on banking conditions in South India. Sir Sorabji deplored the high rates of interest at which Banks sought to attract deposits and the equally high rates at which they made advances without regard to monetary and banking conditions in sister provinces. He pointed out the unsoundness of a policy of advances on usurious terms, with its inevitable concomitant of illusory or dubious security. He further deprecated the craze for quick extention of banking operations by an indiscriminate opening of branches. In his view a consolidation of the internal reserve position to the limit of general impregnability is a necessary forerunner to branch banking, as this alone would enable banking institutions to weather those periodical storms, which brew during periods of financial uncertainty. He concluded his interview by pleading for legislative safeguards and for an amal-

There are many refreshing home truths in the interview of Sir Sorabji, which, coming from so authoritative a quarter, must have a tonic effect on a familiar class of banks, which have branches numerous as the leaves of Vallambrosa and whose deposit and lending rates would make our Sowcar friends blush. But Sir Sorabji's statement contains some unhappy generalisations, to which exception has justly been taken by some local Banks, whose lines of business are irreproachable. For instance, it is held that Sir Sorabji might with great profit have refrained from the following undiscriminating onslaught.

> "At any rate, the money-lenders were risking their money and the banks seem to be playing with the public money entrusted to their care."

Nor has the Bombay knight cared to tell us anywhere in the couse of his interview which class of banks his thrusts were directed against. His omission to qualify his remarks has caused undoubted pain in some quarters and there is very poor consolation in being told that those whom the cap fits may wear it. The remark can scarcely apply in any manner or degree to such sound institutions as the Indian Bank, Ltd., or the Indo-Commercial Bank, Ltd., which have withstood the severe strain imposed on them and colossal difficulties created, by a class of banks (to which I have already referred), seeking to attract deposits at absurdly enormous rates of interest. These adverse conditions have not brought down the business standards of these premier institutions.

* * *

Apart from this, it is felt in some quarters that it is not fair to measure Madras banking conditions with the Bombay measuring tape, any more than it is fair to compare Bombay's monetary conditions with those of London. There is a permanent disparity in money rates between Bombay and Madras. For instance, when the call rate is quarter per cent., in Bombay, it is one per cent. in Madras and branches of the same Exchange Bank borrow at these different rates on the same day in the two cities. High money rates in Madras are more an index of the local economic conditions than an index of a lower order of (what Hartly Withers termed) economic civilization.

* * *

The sudden death of Mr. Kenneth Kay on the morning of the 21st instant at his Nungumbakkam residence removes a conspicuous figure from the chess-board of Madras commercial life. As Managing Director of Messrs. Binny & Co., (Madras) Ltd., he had become one of the hubs of the business world of Madras. He joined the staff of the firm in 1901. Hard work and intrinsic merit brought him to the top rung of the ladder. He was a Director of the Buckingham and Carnatic Co., Ltd., and The Bangalore Woollen Cotton and Silk Mills Ltd. That the best Textile labour conditions in the whole of India obtain in the Buckingham and Carnatic mills was acknowledged even by that fastidious body, the Whitley Commission. This was not a little due to the indefatigable efforts of Mr. Kay, whose solicitude for labour had been the envy and despair of many a trade union leader. The shares of the Buckingham and Carnatic Co., Ltd., are considered as good as gilt-edge, in view of the peculiarly strong financial position of the Company ; and as the man at the helm of the company's affairs, Mr. Kay played no insignificant role in shaping its destinies. Mr. Kay was for sometime chairman of the Madras Chamber of Commerce as also the Employer's Federation of Southern India. He was also for two years a member of the Madras Legislative Council. He was on the Port Trust from 1923 to 1930. Mr. Kay gave evidence before the Special Textile Tariff

EXCHANGE CLEARING IN GREAT BRITAIN

AN IMPORTANT PRECEDENT

GOVERNMENT'S ATTITUDE

By Dr. Paul Einzig

By Air Mail

Special for "**INDIAN FINANCE**"

London, November 18.

On November 9, within five days of the fourth anniversary of the conclusion of the first exchange clearing agreement, the British Government took steps to apply that system for the first time. Until then, it had always refused even to consider the idea. Notwithstanding the pressure from business quarters—especially from the London Chamber of Commerce—of creditors of various defaulting countres, the Government's policy was opposed to the adoption of any measures which would interfere with the freedom of the foreign exchange market. It is true that in 1934, when Germany threatened to default upon all her external financial and commercial liabilities, the Government rushed through Parliament the Debts Clearing Offices Act which provided for the establishment of exchange clearing for the collection of amounts due to British subjects by compelling British debtors of the foreign countries concerned to make payment into the clearing account instead of transferring the amounts direct to their creditors. It would be difficult, however, to form an opinion as to how far the Government was really prepared to apply that act. Fortunately for the British interests involved, the German Government made concessions regarding the service of the Dawes and Young Loans and also regarding commercial arrears. Had it chosen to call our bluff, in all probability nothing would have happened and no clearing would have been imposed upon payments to Germany. In 1934 the Government was not yet ready to create a precedent for exchange clearing.

Nor has the Government shown in the meantime any indication that it has changed its attitude. The report of the League of Nations enquiry on exchange clearing was in all probability largely influenced by the hostile attitude of the British Government towards the system. Hence the unwillingness of the League Committee to propose any measures which might improve the working of exchange clearing. All the report was concerned about was to denounce most emphatically the real or imaginary disadvantages of exchange clearing and to propose steps for its speedy abolition. The fact that disadvantages arising from exchange clearing for countries, which do not participate in such arrangements, receive more than their due emphasis in the report is in itself sufficient to indicate the British Government's influence on the Committee.

If, in spite of this, the Government has now decided to embark upon exchange clearing, it is owing to the situation that has arisen as a result of economic sanctions against Italy. Since April last, a payment agreement has been in operation between Great Britain and Italy which amounted to compulsory clearing on the Italian side and voluntary clearing on the British side. Thus, Italian importers of British goods were compelled by their authorities to pay the purchase price in lire into the clearing account kept in Rome, and British importers of Italian goods were merely requested to pay the purchase price into the clearing account kept by the Bank of England. There was no compulsion on the British importers did not make use of the clearing arrangement. Consequently, a balance of about £2,000,000 accumulated in favour of British exporters who had to wait for months before their claims were paid.

As a result of the Geneva decisions, the British Government had to impose a complete embargo upon Italian exports to Great Britain. Consequently, it prevented Italy from liquidating the accumulated balance on clearing account. As a result, British exporters were threatened with the complete loss, or at any rate, the complete freezing up of their claims. On the other hand, there was nothing in the sanctions to prevent British importers of Italian goods from continuing to pay in cash their debts to Italian exporters. Indeed, the amount of such debts at the beginning of November was over £1,000,000. Had things been allowed to take care of themselves, Italy would in due course have obtained free exchange amounting to £1,000,000, since the Italian authorities discouraged importers from accepting any further payments through clearing. To prevent this and at the same time to secure British exporters at least part of their claims, the Government reluctantly decided to adopt compulsory exchange clearing. By Order in Council it decreed that all British debtors to Italy have to pay their debts henceforth into the account of a new controller of Anglo-Italian debts appointed for that purpose. It has become unlawful to transfer payments to Italian creditors by any other channel.

On November 9, 1935, the British Government abandoned the principle of *laissez-faire* concerning the foreign exchange market. It is true that the Government took care that the arrangement should not have the appearance of exchange clearing. Instead of compelling British debtors to pay their debts into the Italian clearing account, a special account has been established. The word exchange clearing is not even mentioned in the Order in Council. All this, however, does not alter the fact that the arrangement is exchange clearing both in substance and in form. Nor does the limited sphere of application of the arrangement make any difference to the principle. It is true that the clearing will only operate for the collection of amounts owed for imports from Italy prior to the application of the sanctions. Once all the outstanding debts are collected, the arrangement will cease to operate Notwithstanding this, its adoption constitutes a precedent of first-rate importance, comparable with that of the adoption of the first protective customs duties.

It remains to be seen whether this first step will be followed by similar steps in the same direction. British exporters and creditors victimised in various countries such as Rumania, Spain, Brazil, etc., will in all probability demand that they should receive the same treatment as British creditors of Italy. Pressure in favour of the adoption of exchange clearing in relation to various countries will in all probability increase. The existence of a precedent will, on the other hand, reduce the Government's resistance to the pressure. It remains to be seen whether the Italian compulsory clearing will remain an isolated arrangement for the time being, or whether it will be followed by the adoption

SANCTIONS NEUTRALISE ELECTION RESULTS

LURE OF OLD RUSSIAN BONDS

By Francis Williams

City Editor: The "Daily Herald," London

(By Air Mail)

Special for **"INDIAN FINANCE"**

London, Nov. 18.

From the speculator's point of view it was unfortunate, though from the investor's point of view, perhaps, not so unfortunate, that the opening of the first post-Election account on the Stock Exchange should coincide with the date of the beginning of economic sanctions against Italy.

This fact, with its inevitable accompaniment of front page stories in the newspapers of Italian threats against Britain, helped to temper the enthusiasm with which the Stock Exchange would otherwise have greeted the big Conservative majority at the elections.

I say that it was less unfortunate for investors, because I think it is most desirable that investors should, whatever their political opinions, realise that the difficulties of the international situation remain just as great, if not greater, than before the election; and those difficulties are likely to over-shadow markets for some considerable period ahead.

Until we have a more definite announcement than we have yet beet given of the extent of the Government's armament programme, it is difficult to know how iron, steel and shipbuilding shares will be affected. It must, however, be remembered that such shares have already risen substantially in expectation of the Government's programme, many of them to-day standing at levels completely unjustified by past profit earnings.

The wise investor, therefore, will go carefully, and, if he decides to buy such shares, will be careful to choose those, which have a reasonable past record and whose current market price is not based entirely on future prospects.

Recently there has begun a little speculation in pre-revolution Russian bonds. This speculation is based on the belief that a Russian loan of some kind is to be issued and that, either as part of the loan scheme or prior to it Russia will come to some settlement with old creditors.

I would not advise anyone to buy old Russian bonds on such a belief.

I believe there is a possibility that there may be a Russian loan some time in the not too distant future. Various discussions of an informal nature are now taking place in the City and elsewhere.

But I think it may be taken as definite that the Soviet Government is still as definitely opposed as ever to any substantial settlement of the claims of old creditors. It is possible that old creditors may get something, but the something will be so small that it does not justify any buying of the bonds at present.

If the Russian loan does come off, the Iron, steel and engineering industries will benefit substantially. So also will manufacturers of plants for boot and shoe making factories and for paper making works.

In act, although the Russian loan proposal is still very very much in the air, a purchace of shares in sound companies engaged in the manufacture of such plant might well prove profitable over a period.

The League of Nations has just published an interesting survey of the yield on Government bonds all over the world which I pass in for the benefit of gilt edge investors.

That yield ranges for 2.78 per cent. in the United States to 10.75 per cent. in Rumania. The United States credit at the moment, therefore, it will be seen, stands highest; Britain comes second, with a yield of 3 per cent., Sweden third with a yield of 3.27 per cent, and South Africa fourth with a yield of 3.33 per cent.

India and Egypt, my readers will, no doubt, be interested to know, are bracketed fifth with a yield of 3.68 per cent.

(Continued from page 1656).

of other similar arrangements. On the whole, it is reasonable to suppose that the chances are in favour of the adoption of exchange clearing in relation to countries which defaulted in particularly unsavoury circumstances. In one or two instances, no sooner is a payment agreement or a debt agreement concluded than it is broken by the debtor. Countries, which have exchange clearing agreements with most European countries, obtain free exchange as a result of their exports to Great Britain. They cheefully default, however, on payments due to Great Britain for their purchases. So long as they know that they can do so with impunity, there is no inducement for them to meet their liabilities. The moment, however, they realise thtt the British Government is quite prepared to establish exchange clearing against them, the mere threat of the loss of their main source of free exchange will probably be sufficient to induce them to make an effort to meet their liabilities. In some instances, however, it may become inevitable to apply the clearing in order to safeguard British business and financial interests.

POLITICAL PROSPECTS

With the General Election drawing to a close, the political horizon is clearer. Not that it was clouded before the Elections; the National Government took care that election breezes would not collect clouds. The opportunism of the National Government has been justified. There is now no doubt that Conservatives will continue in office, with Party readjustments which will not substantially weaken the Government majority. The sturdy common sense of John Bull has not been hustled into any sort of "freakism". Sir Oswald Mosley, for instance, is now a prophet verily without honour in his country. The Fourth Estate which, in the last General Election, abandoned the pen for the poll, is content this time to ply its legitimate profession. Independent Labour and Communist candidates have made a miserable showing. Liberals, a small Centre, are disorganised and disunited. Labour will consolidate more firmly its power and prestige in the new House of Commons. In fact, as the Election proceeded, it was clear that, apart from Party nomenclature, the issues before the electorate are actually one and indivisible.

Sharp political divisions, either in principle or practice, are conspicuously absent from party polemics. Class warfare, the old struggle of the "have-nots" against the "haves", is not exploited. Post-war social and industrial legislation and economic planing have reduced the duress of the poor, while the middle class is not blind to the facilities and opportunities which are growing automatically out of a new order, however empirical. The lower and middle classes, who carry the decision of a General Election, have an assurance of security in the Conservative outlook; and security, both economic and national, is the one predominant note in the Election orchestra. Even Labour dare not drown the volume of the note by Party tymbals—rather is it playing an attuned accompaniment on an unaccustomed flute.

Nor has nationalisation evoked either the anathema of the capitalist or the enthusiasm of the proletariat. Both recognise that nationalisation is functioning, unostentatiously, but none the less steadily. Many essential national services are nationalised; and it is a sign of the time that the last National Government went in for more nationalisation than the last Labour Government. Road transport, marketing boards, industrial control and State guarantee for finance have come to be commonplaces of legislation. And the electorate, with its redeeming quality of compromise, is aware that to-day the common ground of the Parties at the polls is larger than the area in dispute. It might well prove that the new Parliament will see the traditions of the two party system more firmly established than they had been in the twenties.

"Credit and confidence" was the theme of Sir Samuel Hoare who, in the absence of the Prime Minister, was the principal speaker at the Lord Mayor's banquest at the Guildhall. He insisted that the equipment of the Services must be adequate to defend the cause of peace. He said that during the National Government's term of office British credit has been improved almost beyond recognition; more men and women are being employed than in any previous period of the country's history; industrial

output is higher than ever in the boom years; and a thousand new houses are being built every day of the year. And credit and confidence would never have been restored without a stable Government and a sound and steady policy.

Referring to the controversy between Italy and Abyssinia, Sir Samuel asked rather melodramatically "What was to be the attitude of the British Government, Were we to pull our blinds down on the world and cower round our fireside while a flood was descending outside? How attractive it might have been to many of us, particularly to those of us who value Italian friendship and honour Italy for the services that she has rendered to the world, to turn our backs on the world, to say that the experiment of the League had failed, to admit once again that great controversies can only be settled by war, to drift back to the world of force and selfishness that we hoped the peace had brought to an end. We had given our word in the Covenant and we were bound to keep it. We had raised our voice against the doctrine of force, and we could not abandon the friends of peace. We had great influence in the world and it would have been a miserable abdication not to exert it." "Friends of Peace" have, however, an indefinable quality on which Sir Samuel Hoare did not enlarge.

The "gold clause" has had another legal facet added in a judgment in the King's Bench Division. After Feist's case in this country, came the verdict of the Supreme Court of the United States: then the judgment last week of Mr. Justice Branson, who found for the Crown on a petition of right in respect of bonds of the 1917 Twenty-Year Five and a Half per cent. Coupon Gold Loan issued in the United States by the Government of the United Kingdom. The bond provided that principal and interest would be paid at the option of the holder either in New York "in gold coin of the United States of America of the standard of the weight and fineness exiting on February 1, 1917" or in London in sterling at the fixed rate of 4.86½ dollars. His Lordship refused to accept the Crown's contention that payment was determined by the United States law. The gold clause, His Lordship found, was inserted as a customary clause, without any special reference to the possibility of the United States going off the gold standard. The presumption that a Sovereign State would not submit to any Court but that of its own country was so strong that only an express stipulation (absent in this instance) could displace it. It was not now possible for the Government's agents to make payment in the United States according to the terms of the bond. The requisite gold coins are not in existence and, even if the British Government possessed them, American recipients would be acting illegally in accepting them. So much of the bond as related to payment in gold coin in New York had therefore become void, while the obligation to pay in London at the fixed rate of exchange calculated on the nominal amount of the bond remained. The general effect of this judgment will leave the question of the gold clause, under British law, undecided.

There was a further fall—the third in succession—in the Treasury Bill rate. The £45,000,000 of bills on offer were allotted at an average discount of 10s. 9.91d. per cent. compared with 11s. 1.32d. per cent. last week and just on 13s. per cent. three weeks ago. For bills dated Monday to Friday, inclusive, tenders at £99-17-3 received about 82 per cent. of their requirements, higher tenders being allotted in full. For Saturday bills tenders at £99-17-4 and above were fully allotted. Faced by the prospect of further outside competition, discount market houses decided to sacrifice a higher rate in favour of a larger share of the bills. Total applications at £63,955,000 were only £300,000 higher than a week earlier. It would appear that in the event many secured larger allotment than for some time past. A surplus of £2,348,129 of revenue over expenditure is revealed in the Exchequer Return for the week to Saturday last. The figures make a rather less favourable showing than a year ago, when there was a surplus of £5,119,403. Ordinary revenue for the week amounted to £12,694,830 compared with £13,349,284 in the same week last year. Of the total, nearly £2,500,000 was secured from income-tax, while the bulk of the remainder represented Customs and Excise receipts. Total ordinary expenditure was £10,346,701 against £8,229,791 and was absorbed almost entirely by the supply service.

The Court of Directors of the Bank of England have agreed to recommend to the proprietors in April next that Mr. Montagu Collet Norman, the present Governor, be re-elected Governor for the year ensuing, and that Mr. Basil Gage Catterns be elected deputy Governor. The present deputy-governor is Sir Ernest Musgrave Harvey. Mr. Montagu Norman has been Governor of the Bank of England since 1920.

U. S. A.

NEW A. A. A. CORPORATION

The Administration has formed the Federal Surplus Commodity Corporation controlled by the Agricultural Adjustment Administration under the direction of Mr. Chester Davies, administrator of the A.A.A. Mr. Davis has explained that the organisation is primarily concerned with the marketing of surpluses through domestic channels, but it will also have broad powers to finance farm exports under the Agricultural Adjustment Act's export subsidy amendment, funds for which are to be obtained from Customs receipts. The Commodity Corporation will have over $100,000,000 annually at its disposal; and it is expected that, apart from cotton, export of tobacco and other commodities will likewise be subsidised. On the other hand, it is stressed that the Agricultural Adjustment Administration is not contemplating the disposal of Government controlled cotton by means of the new corporation.

President Roosevelt has signed an authorisation for the Government's signature of the Canadian-American Reciprocal Trade Treaty. No time has been fixed for the signing of the treaty. It is believed that the details of the agreement will probably be published at the time of the signing of the treaty. Rumours as to the terms are already beginning to circulate, and it is reported that both countries will cut the liquor tariff and, in addition, there are indications that American products on Canada's preferential list will include automobiles, iron and steel products, chemicals, certain texiles, non-ferrous metals, coal, gasoline, machinery, hardware and cutlery.

In return for these, it is believed that the United States will make concessions in respect of cattle, milk, cream, lumber and certain varieties of fish. It is also reported that President Roosevelt will exercise his authority to reduce duties on Canadian

products by 50 per cent., while Canada will grant the United States her intermediate tariff, plus special concessions, with average reductions of over 25 per cent. The American reduction on the liquor duty, which is reported to be 50 per cent. would, it is said, be limited to "American type whisky", meaning that there would be no change in the existing duties on Scotch and Irish whisky. A joint statement by Prsident Roosevelt and Mr. McKenzie King, Prime Minister of Canada, states:—"The President of the United States and the Prime Minister of Canada have considered the question of increased trade, which has been discussed for some time by representatives of the two nations. There is complete agreement on the objective of a greatly increased flow of trade for the benefit of both countries, and substantial progress has been made to this end. It is recognised that such an increase would be beneficially felt in all activity, because trade is but another word for increased employment, transportation and consumption".

The feature of Wall Street during the week is European buying of American equities, though the view that it is unparalleled is exaggerated. The average volume of trading is currently running near 2,000,000 shares, which is low compared with 1929. Whether it represents European confidence in the American recovery or a flight of European capital from the alarms of war or is an "equilbrating" international movement of capital is a matter more of conjecture than opinion. All that can be definitely stated is that, when in January 1934, the United States entered upon *de facto* stabilisation of the dollar the American security market was cheaper than certain European markets. At the two periods when the United States security markets were at their lowest points—in July 1932, and in February 1933, —the pound was at a considerable discount on the dollar. In spite of a great rise in American securities, their price in pounds to a British investor shows no conspicuous advance. And the American economy, which for 1935 is on a level of 10 per cent. higher than 1934, has risen more consistently in the past six months than other national economies. The weekly statement (November 13) of the Federal Reserve member banks contains for the first time an item showing deposits on account of foreign banks. This item has not been reported previously, though there has been much speculation as regards the volume of these deposits. Such deposits on November 6 totalled $372,000,000, a decrease of $1,000,000 from last week, but an increase of $249,000,000 over the figure for the corresponding week of last year.

The international aspects of silver have been accentuated by the acute weakness of the Hongkong and Shanghai dollar, in terms of silver pegged at 65⅝ cents in New York. Actually, there is no official or even formal recognition of the difference between America's silver policy and her silver programme. The policy, laid down at the London Conference of 1933, was the extension of the monetary use of silver in the direction of its remonetisation. The programme was the series of executive and legislative acts ostensibly in furtherance of this policy. With two exceptions, the programme has aimed at raising the price; the exceptions being (*a*) the legislation prescribing that the metallic reserve of the American currency shall consist of both silver and gold at a ratio of one to three and (*b*) direct aid extended to Cuba to acquire silver for monetary purposes. Outside this, the programme cannot be reconciled with the policy; for an indefinite campaign for raising the price of silver over "an uncertain period", in the language of *The Economist*, "to an unspecified maximum" made it impossible for any "silver" nation to frame a monetary policy. As things are, a change in silver policy is improbable, as a change would require an Act of Congress. Also, the Treasury profit on silver to be acquired by its ultimate revaluation is not a small consideration.

The Federal Reserve Board's index of production was 88 in September, one point above August and 19 points above September, 1934. The figures throw up two facts—(*a*) that the average for the year to date is higher than that for 1934 by far more than 1934 was above 1933 and (*b*) that the change is due largely to the continuance into the autumn of the spring level in 1935, compared with the violent decline in 1934. Except in building, the September figures are almost identical with March figures. The great expansion in residential building is an outstanding feature. The index of "factory employment" was a bit lower in September than in March, though, in view of the building data, one is not inclined to infer more unemployment.

FRANCE

DEMOCRACY IN DANGER

The clouds are thickening as much on the financial and the economic, as on the political, horizon. The two have never been clearly demarcated in the public mind. A threat to the franc has often been equally a threat to the Premier; and, conversely, the possibility of a Cabinet crisis has led to the certainty of large movements of gold to foreign countries. On the present occasion, however, the two dangers have arisen at about the same moment and bid fair to keep step with one another. The rise in the bank rate from 3 to 4 per cent. which the *Banque de France* announced on Thursday comes in the wake of an efflux of gold which shows

no promise of abating for some time. The evil day of devaluation, which successive governments in France have endeavoured to postpone, is, doubtless, nearer, perhaps more so than M. Laval or any opponent of M. Paul Raynaud would imagine. The cuts, which M. Laval imposed by means of decrees are at last coming home to roost. By the end of September fiscal receipts were 22 per cent. below the estimates and the progression from month to month in this decrease is unmistakable. Foreign trade is fast ebbing away. Industrial production would have followed suit, but that the Government are propping it up with a large-scale loan expenditure on Public Works and what is more significant, armaments. The only effect of this policy has been to take up the general index of production from 93 in July and August to 94 in September, at which level it is a point below that of September 1934. Bankruptcies and judicial liquidation are likewise on the increase. While the expenditure on Public Works has served to prevent a decline in the indices of industrial production it has not failed to shake the confidence of the investor and the *rentes* are again a falling market. It would hardly do to explain the setback in the national economic life, as M. Regnier, the French Finance Minister, is attempting to do, by attributing it to non-monetary causes such as the re-equipment of French industry in the years after the war and the consequent decline in the demand for the products of heavy industries. The more sombre features of the French economic situation could, perhaps, have failed to attract public attention but for the sharp conflict which started a fortnight ago between M. Laval and the Chamber Finance Committee. The latter are attempting to "humanise" some of the decree laws by restoring certain cuts in the interest of the small rentiers and *fonctionnaires*. M. Reginer pointed out that the "humanising" process would result in a new deficit of over 2½ milliard francs. The failure to compose these differences has generated and sustained the flow of gold from France. It may, therefore, be expected that the efflux of gold would persist and that the week's increase in the bank rate would prove to be one of a whole series.

The reason for the persistent drain of gold is to be found in the political situation. The puzzles of French politics to-day are not such as can be resolved in a few weeks. For France is more or less in a ferment. Strong and deep undercurrents are flowing; and the surface, never very placid in itself, is beginning to be more and more distributed. In common with the rest of the civilised world, France has her social problems which accentuate class acerbities and increase the chaos of party politics. It is no longer as easy as it was in the past for the French political groups to make a family settlement of ministerial jobs behind a series of apparent cabinet crises. For the French political groups are now face to face, or so at least it is believed, with the growing menace of fascism. The air is thick with misgivings about the activities of the various Leagues—the Solidarite, the Francists and such other imitation Nazis and the Croix de Feu, the stronghold of Fascisim. Slogans and catch words figure prominently. Is democracy in danger? Will the Republic fall? Will there be a march on Paris? Will M. Laval resign? What will become of the Government? One has only to be present at the Radical Socialist Congress held recently to know with what sincerity and seriousness these misgivings are held. Herriot has waxed eloquent, and appealed to the authority of Michelet and Victor Hugo and to the inherent love of the French for the principles of liberty, equality and fraternity. People were carried back to olden days, of the invincible and inevitable "union of the Tiers Etat and the proletariat", the formidable union that had captured the Bastille in 1789, the solidarity that organised the 1848 revolution. Imagination was stirred by a reference to the Jacobins, the *Coup d' Etat* of Napoleon III, Brumaire, and General Boulanger. The need for the revival of that spirit of love for liberty has now come, the need for a new leader, the man of Destiny, a Fuhrer, a Mussolini; nay, even a Joan of Arc to save France in her last battle with Fascism. That is what was at the back of the appeals made during the Congress. Can Fascism come to pass? *Le Fascisme ne passera pas,* exclaims M. Daladier.

What has given rise to this expression of such strong feelings about the Fascist menace is, the activity, militaristic and otherwise, of the Croix de Feu, the most powerful Fascist organisation in France. The *Populaire* revealed an alleged strategic plot of the Croix de Feu for the occupation of the Paris suburbs and the *Oeuvre* publishes a speculative account of about a hundred or more villas, all private, around the Bois de Boulogne, owned by Croix de Feu sympathisers. And what better stronghold can be found for a Party that entertains ideas of a *Putsch.* The members of the Party have been meeting secretly in hundreds and thousands, on private grounds and at silent hours making their entry and exit in private cars. The alarm of the Left has been roused and the Press raised a regular howl about it even as early as April when a deputation consisting of Radicals waited on Laval, to draw his attention to the elaborate preparations made by the organisations for celebrating July 14th and specifically demanding stern action. In spite of M. Laval's assurance that the Croix de Feu planes flying over Paris on the National Day will be chased down, the Fascists marched up the Champs Elysees.

And if ever there was need to take steps to put a check to the militarist tendencies of this subversive organisation, "which is openly preparing for civil war" it is now; and the resolutions passed in the annual session embody this spirit. If the tone of the resolutions was not more definite and threatening, it was due to Herriot, who, being in the Cabinet, thought it fit to temper it down, to make it a kind of warning rather than an ultimatum.

The Crois de Feu is, no doubt, one of those Leagues, whose suppression the left groups are now loudly demanding. But it is a question whether it is Fascist, as the Black Shirts and the Nazis are understood to be. The younger members claim that the Croox de Feu is essentially Franch, moulded after the fashion of the Parisians, specially suited to the needs of France in her present state, with principles and policies in keeping with the spirit of liberty and individualism characteristic of the French. They disclaim all ideas of a Putsch: much less a pro-Italian policy. They are definitely "anti-Fascist." They hate Mussolini, so they say, as much as they do Hitler; and they are "sincere Republicans without any exception" as much as any Jacobin could ever be. And what do they want? To create a National Socialism in France, not after the model of the Hitler Youth Regiment, not after the fashion of the Braenstuit organisation of Tieste, but a model of its own, some thing quite French, *a la Francaise* a hundred per cent. French. "In accordance with France's tradition of liberty, in fact something *tres a gauche,* involving a large measure of legislation against banks and insurance companies, and with no connection with Hitler or Mussolini." In fact, they claim that the Croix de Feu contains within its ranks 'admirable materials' with which to reconstruct France. Colonel de la Rocque and his movements may not be such as to inspire confidence.

But can one judge the Croix de Feu by the professions of its younger members? Even assuming their sincerity, who can overlook the fact that like other Fascist parties, in Germany and Italy, the Croix de Feu has its close affiliation with big business? It apes the militarist methods of the Nazis; and when private associations begin to drill themselves, it is hard to acquit them of plans against the State. But, again, Colonel de la Rocque is by no means a French Hitler. Caution is his most prominent trait; and the circumstances which argue against a *coup d'etat* weigh with him a great deal. Whether the Croix de Feu is Fascist or not, fears of an immediate Fascist upraising are clearly exaggerated.

The Left groups cannot be expected to be free of such apprehensions. From the time of the last session of Parliament they have been demanding strong action from M. Laval.

The measures that Laval has taken, included in the last batch of decree laws, though not calculated to give satisfaction to the Radicals as falling below the expectations, for all the row they kicked up, must prove effective in tempering down their activities. Laval has gauged the situation only too well and has, therefore, thought fit not to precipitate an open conflict with the organisation. The Radicals too, would have risen in revolt, and would have at least demanded their three members to resign from the Cabinet had it been Doumergue, a year ago. But now the situation is changed. Mainly because of the absence of a coherent government to take the place of Laval, M. Guornut, the former Chairman of the Stavisky Committee of Enquiry and who has a plan of expressing in sympathetic form the average feeling of radical congresses, did not hesitate to declare that "there is no use stopping the Laval "experiment" so long as there is no coherent government to replace it. "The great danger is not that the Laval Government will last till next year's election but that a dictatorship is established in France in the meantime." The National Day of July 14, passed off quietly. The Armistice Day has also passed off quietly. Both in Paris and the other big cities the members of the Fascist Leagues marched with tricolor flags to the War Memorial Monuments when they were followed by the 'Popular front' adherents with red flags. There were no violent demonstrations. But the elements of a conflict are still present.

(Continued from page 1657)

board. He was primarily responsible for the introduction of the Indian element in the boards of Companies under Binny's management. He was barely 56; and it was little expected that Death would lay an abrupt hand on his still active shoulders.

* * *

The Annual Conference of primary Land Mortgage Banks, the sixth of its kind, met in the premises of the Central Land Mortgage Bank on the 23rd instant. Sir M. Ramachandra Rao's address welcoming the delegates was read by Diwan Bahadur T. A. Ramalingam Chettiar. The address traced the progress of Land Mortgage Banking in the province and referred to the remarks contained in the report of Mr. M. L. Darling to the Government of India to the effect that Madras led the other provinces in this department of activity. The address thanked the Government for its uniform co-operation. It would be remembered that the Government of Madras guaranteed the principal and interest on the debentures of the Central Land Mortgage Bank and recently the total amount of debentures which carried this guarantee had been increased to one crore of rupees. The Bank had taken advantage of the prevalent easy money conditions and had redeemed all debentures carrying interest at 6 per cent. and above and converted a major portion of its 5 per cent. debentures into 4 or 3½ per cent. issues. A large portion of the bank's debenture issue carried interest at 4 per cent. or 3½ per cent.; and the total amount of debentures outstanding was in the neighbourhood of 60 lakhs of ruppees. The reduction in the debenture issue rate had enabled the bank to pass on the benefit of such reduction to the ultimate borrower the ryot, to 6½ per cent. as against 8½ per cent. which he had to pay earlier. The question of financing the out-door staff employed by the Bank bristled with difficulties, as the Bank, with an extremely limited and inelastic margin of profit, could not undertake the responsibility. The attention of the Government had already been drawn to the importance of shouldering the burden, as the Land Mortgage Bank functioned on the same basis as a department of Government. The address referred to the obstacles in the way of establishing branches unprotected by a system of delta, river or channel irrigation and which depended on rainfall for carrying on agricultural operations. Reference was also made to the difficultly felt in lending on the mortgage of land coming within Zamindari jurisdiction, owing to such lands, in a large number of cases, not carrying *pattas,* which after all constituted the fundamental evidence of title to land. The address concluded with a reference to the absence of political or factious spirit in the administration of the Land Mortgage Bank and to the high standard maintained by the Primary Banks. The address was a modest survey of a year's work, well done, in the direction of bringing relief to the agriculturist. Sir M. Ramchandra Rao, to whom Madras, owes this useful institution, deserves to be congratulated on the degree of success that has attended his efforts.

JUTE AND JUTE GOODS

JUTE

Calcutta, November 28, 1935.

Sentiment in the jute market has taken a definitely easier tendency during the week under review. The chief reason for the weakness is selling pressure of a profit-taking nature. Heavy liquidation by 'bulls' in the *fatka* market has brought down the prices by nearly Rs. 2-8.

Demand from overseas has been moderate. Mills have been out of the market throughout the week.

Mofussil markets continue to be strong and there is keen competition among buyers in all centres. It is said that a considerable quantity of jute is in the hands of middlemen who are financially strong and who sell sparingly.

There is considerable difference of opinion in jute trade circles regarding the size of the present crop. An important jute importing firm has revised their estimate of the crop. They expect the arrivals by the end of this season amount to 82 lakhs of bales, as against their previous estimate of 75 lakhs of bales.

In the loose jute section, the market has been easier owing to lack of demand. Sellers are very keen for business and are freely offering on the basis of Rs. 6-6-0 per maund for Indian Jat Fours. At the beginning of the week mills purchased a small quantity of Indian Jat 4's on the basis of Rs. 6-8 per maund.

The *Pucca* Bales section ruled quieter and the price for Ready Firsts has declined to Rs. 37-8 as compared with Rs. 38-12 at the beginning of the week. Small business has been reported daily with shippers for Firsts from Rs. 38-12 down to Rs. 37-8 per bale for prompt shipment. Lightnings and Hearts for November shipment have been at Rs. 34-8 and Rs. 30 per bale respectively and Outports Tossa assortment for prompt delivery at Rs. 36-12 per bale.

The *Futka* market has been easier during the week owing to heavy liquidation by 'bulls', and prices have given way by about Rs. 2-8. The change in the rules of the market, giving the buyers the option of transfering their purchases from one delivery to another at a premium of As. 12 per bale, has brought about a satisfactory change in the market. Before the introduction of this rule there was great pressure of deliveries in the market every three months. The bulls were stampeded into selling and they had to pay Rs. 2 to Rs. 2-8 premium for the next delivery. Now owing to the disappearance of the high rate of premium, there is not even half the selling pressure that used to be experienced before the introduction of the rule.

JUTE MANUFACTURES

Calcutta, November 28, 1935.

The shortage of Ready goods in the market still help the prices to be maintained in the hessian market which ruled quiet but steady during the past week. Lower rates have been offered towards the close of the week but buyers are holding off from the market.

There has been very little demand from America during the week. Mills are keen sellers for forward positions and are unable to find buyers even at a very substantial discount from ready rates.

Rumour-mongers are very busy in market circles. It is reported that the Indian Jute Mills Association are submitting a scheme of export quota for jute on the lines of tea export restriction. But how far such a scheme would help the Indian industry and whether such a scheme is practicable are questions which meet with much controversy. It is said that the Government of Bengal are quite willing to pass legislative measures to help the jute industry and the matter is in the hands of the Government of India to approve of such legislation. The European circles seem to be very optimistic as regards the attitude of the Government of India. It must be remembered that last year in December when the Viceroy was in Calcutta the Association tried to induce the Government to readjust the duty on jute manufactures and raw jute, which did not meet with any success. The general belief in market circles is not at all optimistic regarding any Government legislation.

Business has been very much restricted in the market. 40 in 10 oz. sold at Rs. 10-11 basis for Ready and 40 in 7½ oz. at Rs. 8-13 basis for December shipment. January-June 11 porters were done at Rs. 10-6, while Rs. 9-1 was paid for 40″ × 8 oz. for Ready shipment.

Heavy Goods are bad and easier. There is practically no demand. A small business has been reported earlier in the week in B. Twills at Rs. 22-6, Liverpools at Rs. 25-12 and Sacks at Rs. 23-12, all for November shipment. Prices are easier at the close Liverpool Twills and B Twills quoting Rs. 25-9 and Rs. 22-1 respectively for Ready.

Total report sales for the week ending Saturday the 23rd November, 1935.

JUTE BREVITIES

Economic Sanctions and Raw Jute Trade.

The following table shows how far the sanctions against Italy may affect the jute trade, if the export of raw jute to Italy is banned by the Government of India. So far, the list of articles published by the Government does not include raw jute.

(Quantities in 000's Tons and Values in Lakhs of Rs.)

Year		Exports to Italy Quantity	Value	Total Exports Quantity
1929-30	...	54.9	189.7	806.9
1930-31	...	42.2	92.3	619.7
1931-32	...	44.1	86.1	586.6
1932-33	...	37.5	66.0	563.1
1933-34	...	65.1	95.6	748.2
1934-35	...	87.0	126.9	752.5

The exports of raw jute to Italy from 1st April to 30th September, 1935, amounted to 34,088 tons. During the last few years Italy has been competing with Indian manufactures in foreign markets. For instance, the exports of jute manufactures from Italy into the United States for the first 7 months of this year amounted to 1,034 tons, as against 521 tons during the corresponding period of 1934, *i.e.* an increase of 98.5 per cent.

Exports of Jute Goods.

The following table gives the total exports of jute bags and jute cloth from India from January to September 1935, as compared with the corresponding period in 1934 and 1933.

Jute Bags :—

Imports into Tanganyika.

During the first seven months of the current year the imports of sacks into the mandated district of Tanganyika amounted to 105,000 dozen, valued at £27,000.

Jute Carpet Industry in France.

There was an enormous increase in the export of jute carpets during 1934 from France, the total quantity amounting to 913,100 kg., valued at 11,600,000 francs, as against 262,400 kg., valued at 3,410,000 francs in 1933.

COTTON AND COTTON GOODS

COTTON

Calcutta, November 28, 1935.

There was a short-lived spurt in the Bombay cotton market earlier in the week under review, owing to bullish advices from America. The prolonged spell of unfavourable weather and the poor ginnings of 8,437,000 bales envisaged a further reduction in the American crop. In sympathy with a strong New York market, sentiment in the Bombay market became bullish at the commencement of the week. A sharp advance resulted owing to the feverish covering by "shorts" and option dealers. Considerable buying by Japanese interests also resulted. As a sequel the price of Broach April/May was pushed up to Rs. 229-8. On the following day the market witnessed a sharp reaction in sympathy with New York, where prices fell sharply due to Pool liquidation. The market was flooded with selling orders and as a sequel Broach April/May receded to Rs. 226. Thereafter, the market assumed a quiet but steady tone. Selling was not resumed by the operators who preferred to await further developments. Price fluctuations were confined to narrow limits, Broach April/May ruling roundabout Rs. 226.

Oomra Dec./Jan. improved to Rs. 211 earlier in the week, but towards the close declined to Rs. 207-12, while Bengal Dec./Jan., after touching Rs. 207-12, closed at Rs. 151-12.

Crop movement is still slow. Arrivals in the respective cotton areas were very small, though a slight increase in the Punjab was reported.

Demand from abroad was not encouraging and mills are not inclined to effect purchases in the absence of any improvement in the piecegoods market.

The bullish American Ginning Report, which indicated a crop under 11 million bales, and the strength of spot in the South, gave a sharp fillip to the New York cotton market. On the publication of the report on November 21, the market witnessed a rapid advance. Middling spot spurted up to 12.45 and December to 12.02. But the advancing trend came to a stop on the following day when the Manager of the Cotton Pool announced the Government's decision of releasing this season a part of the 4,450,000 bales of cotton held by the Government under the 12 cent loan. Doubts were expressed about the continuance of crop restriction next season. The market soon developed a sagging tendency under pressure of renewed liquidation by "longs" and unloading by the Pool authorities, especially in December, January and March positions. Though trade interests continued buying, the rates could not be maintained on heavy selling pressure. Prices steadily declined, Middling spot quoting at the close 12.25, December 11.82 and March 11.61.

French spinners are reported to have purchased freely in Liverpool, where the market ruled steady. In sympathy with a strong New York market, prices improved on November 21 to 6.77 for spot and 6.56 for December. The market received good support from trade interests. Large buying orders were placed by Bombay, Continent and trade interests. Prices slightly receded towards the close in sympathy with New York. Middling spot closed at 6.75, December at 6.49 and March at 6.42. The Egyptian section was very strong. Sakel further improved steadily and was quoting at the close 10.31, while March advanced to 9.10 towards the close.

The United States Census Ginning Report issued on November 21 placed ginnings to November 13, 1935 at 8,437,000 bales, compared with 7,750,000 bales ginned up to October-end and 8,633,000 bales ginned during the corresponding period last year. Since the ginnings were too small and indicated a reduction in the crop estimate, the report was construed to be bullish.

PIECEGOODS

Calcutta, November 28, 1935.

The local piecegoods market continued quiet and uninteresting with very little business in all sections. Dealers believe that the absence of demand at present is only a lull after the heavy purchasing witnessed before three weeks. Prices have not, however, suffered any appreciable decline. Up-country dealers are practically out of the market.

Demand for indigenous goods has been very negligible and the few retail orders were chiefly for mill stocks and prices are below replacing costs.

Importers of Japanese goods had to be content with small sales of ready goods of seasonal variety at bazar rates. Forward sales have been conspicuous by their absence.

Lancashire section was very quiet with scattered sales in unimportant lines.

In Bombay, trade has been slow and clearances are negligible. Traders are awaiting the outcome of the Tariff Board. In the indigenous section prices have been ruling steady. Fresh business was on a limited scale. Japanese goods are dull with practically no demand and prices sagging, in spite of firmer replacing costs. As far as British goods are concerned there have been some retail sales at steady rates. Forward sales are impossible owing to higher replacement costs.

The stock position of both indigenous and imported piecegoods in Bombay is very encouraging. The total stocks with the Mills at the end of October amounted to about 85,000 packages, of which 62,000 packages are sold. At the beginning of this year the total stocks reported was 68,000, which steadily increased to 113,000 packages in August, the unsold stocks being 25,000 packages. Stocks with dealers have also been largely reduced. Stocks of imported goods at the end of October declined to 31,000 packages from 36,000 to 38,000 packages during July to September. Considering that during July-September the monthly shipments into India varied from 15 to 20,000 packages and in October the imports amounted to 26,000 packages, this decrease in stocks is very satisfactory.

There was a slight setback in the imports of both cotton yarn and piece-goods into British India during September as compared with the previous month. Imports of cotton yarn of all descriptions amounted to 3.3 million lbs. as against 4.5 million lbs. during August. Sendings from the United Kingdom increased by 91,000 lbs. to 784,000 lbs., while those from Japan and China dropped by .2 million lbs. and 1.2 million lbs. respectively to 1.3 million lbs. and 1.2 million lbs.

The total imports of cotton piecegoods excluding fents into British India amounted to 73.9 million yards, *i.e.*, 4.6 million yards less than in the previous month. Sendings from the United Kingdom at 33.8 million yards were down by 5.4 million yards as compared with the previous month, while those from Japan advanced by 1.5 million yards to 39.5 million yards.

Imports of fents into British India declined by 1.8 million yards to 3.4 million yards as compared with the previous month. It is interesting to note that sendings from Japan dropped by 2.3 million yards to 2 million yards. Sendings from the U. S. A. advanced by 531,000 yards to 958,000 yards.

BULLION

GOLD

Calcutta, November 28, 1935.

With the improvement in the Sterling rate in terms of the dollar and the franc, the price for gold in the Bombay market has declined during the week. The market was quiet but steady, throughout the week. Business was sluggish and no appreciable movements in prices were witnessed. Ready and first settlement remained steady around Rs. 34-13-0 but towards the close prices improved by an anna. The rate for second settlement, after declining to Rs. 34-12-3 closed at Rs. 34-12-9.

Dealers in gold are concerned at present about a possible demand of a margin of 5 per cent. by banks on all gold delivered to them against contracts. The banks demanded 5 per cent. margin from 18th instant, but the dealers being unwilling to transact business on the new terms, they decided to postpone the operation of the rule to December 5, with a view to arrive at an amicable settlement before that date. The Bombay merchants deal in several thousands of tolas of gold every day and a demand for an increase in the margin will mean that a part of the merchants' outlay will be locked up for a period, which will cause considerable inconvenience and loss of interest to the merchants.

Arrivals from upcountry average 10,000 totals a day, while the daily offtake is about 2,000 totals. Imports during last week amounted to Rs. 23,807 in bar and coin. Stocks on hand have increased to one lakh tolas.

The price of gold in London receded to £7-0-11 during the week, as compared with the closing rate of £7-1-6½ last week. At the close gold was quoted £7-1-0 per fine ounce.

The Sterling has been gaining strength day by day both in terms of the dollar and franc. The Franc rate steadily improved to 75.03 as against 74.75 a week ago. The Sterling-Dollar rate also improved to 4.93 15/16 at the close, as against last week's closing rate of 4.92 5/16.

Gold valued at Rs. 64,70,103 was exported from Bombay for Europe and America during the week ended November 23.

The total value of gold exported from Bombay since Great britain went off the gold standard now amount to Rs. 2,53,04,10,649.

The staggering total of £1,960 millions worth of gold is at present stored in American vaults, according to the latest Treasury statement and the stream is embarrassingly increasing. Of the 135 millions that have flowed in since September, France has contributed 92, Britain 30 and Holland 12.

The exports of gold from U. K. during the week ended November 15, 1935 amounted to £2,927,000 of which £1,258,000 was shipped to the Netherlands and £812,000 to U.S.A. The imports of the metal into U.K. during the same week amounted to £3,875,000 of which £1,812,000 came from South Africa and an equal amount from France.

London—Air Mail week ended November, 13.

The Bank of England gold reserve against notes amounted to £195,482,528 on the 6th instant, as compared with £194,683,975 on the previous Wednesday.

Purchases of bar gold announced by the Bank during the week amounted to £975,131.

About £1,860,000 has been dealt in during the week; despite the larger offerings, prices have been fixed daily well over the gold exchange parities. To-day's quotation showed a premium of 2d. over the shipping parity to New York.

The following were the United Kingdom imports and exports of gold registtred from mid-day on the 4th November, to mid-day on the 11th November :—

Imports.

	£
British South Africa	1,843,144

SILVER

Calcutta, November 28, 1935.

In the absence of any encouraging news from foreign centres and owing to the lowering of the American rate of purchase in London, prices in the Bombay silver market declined steadily in sympathy. Large selling orders were placed by a prominent operator and in the absence of buying support prices receded to low levels. Ready touched Rs. 64-12-0, first settlement Rs. 64-15-0 and second settlement Rs. 65-3-0. On the closing date the market witnessed some buying by chokseys and prices gradually improved to Rs. 65-3 for Ready, Rs. 65-6 for first settlement and 65-10 for second settlement.

Stocks are unchanged at 35,000 bars. Arrivals are still negligible and the daily offtake is about 5 bars. Imports during the week amounted to Rs. 6[illegible]049 in coin.

America has lowered her buying limit in London to 29 3/16d. at which rate the spot price remained steady. The forward rate has also receded to 28¾d. from 29d. India was the chief seller and all sales were absorbed by America. Speculators also appeared as sellers of small quantities.

The price of spot silver in New York remained steady at 65 8/8c. The London-Shanghai T.T. rate receded to 1-2 15/32 from 1-2½ at the beginning of the week.

The exports of silver from U.K. during the week ended November 15, 1935, amounted to £2,802,000 of which £2,730,000 was shipped to U.S.A. The imports of the metal into U.K. during the same week amounted to £448,000 of which £305,000 was shipped from Japan and £61,000 from India.

London—Air mail week ended November 13.

The main event of the past week was the announcement on Saturday of the embargo imposed by the Hongkong Government upon the export of silver and silver coin. As, however, this development had been generally expected to follow after the announcement of the new Chinese currency measures, it was without any immediate effect upon silver prices. American support has maintained the cash price at 29.5/16d. but forward quotations have shown some fluctuations. Offerings have varied in volume but Chinese sales continue and there has been some liquidation of speculative long positions. On the other hand, Indian bear covering and fresh Indian and general speculative buying have been in evidence and this demand for forward caused improvement in the price for that delivery on several occasions, quotations on the 8th and 11th Nov. being 29.3/16d. The total amount of the metal acquired by America during the week was, in consequence of this demand rather smaller than of late. A slight reaction ensued on 13th to 29.1/16d. and prices to-day are unchanged.

Uncertainty as to the future continues but there is nothing to indicate the imminence of any important change.

The following were the United Kingdom imports and exports of sliver registered from mid-day on the 4th Nov. to mid-day on the 11th November :—

TEA

CALCUTTA AUCTIONS

Calcutta, November 28, 1935.

At the resumption of this week's auctions of teas for export on the 25th Nov. the total quantity submitted for sale amounted to about 24,400 packages of which 20,200 packages sold at an average price of 9 annas as compared with 8 annas 8 pies realized at the corresponding auctions last year. The quality was generally similar to last weeks representing all districts. There was a good demand with prices of clean common descriptions showing little change. Medium teas were slightly irregular and lower and many of the medium varieties were withdrawn under bid. A fair proportion, however, have been sold on the basis of 3 pies below last week's rates.

The total quantity offered for sale at the auctions for internal consumption on November 26, amounted to about 15,900 packages, of which 8,600 packages were Dusts. There was good competition for all descriptions and prices were fully firm to occasionally dearer. Other grades were very strong. Prices of leaf teas were fully firm and of broken grades firm to 3 pies dearer.

The following are the full particulars of sale No. 24.

LONDON AUCTIONS

The offerings at the auctions in London for the week ending November 28, comprise 45,000 packages of Indian, 20,000 of Ceylon and 4,000 of Java teas.

Indian Tea.

At the auctions on November 25 of Indian teas, 24,400 packages were submitted for sale. The market was firm with a good general demand, particularly for low-priced qualities. Any changes in quotations were in favour of sellers.

Ceylon Tea.

At the Ceylon auctions on November 26, the total offerings amounted to 20,000 packages. The tendency of the market was firm. Coloury medium sorts sometimes advanced but light liquoring teas were irregular.

Java & Other Teas.

The total quantity of tea submitted for sale at the Java auctions on November 21, amounted to 3,700 packages. The market was very firm with a good enquiry. Tippy teas were in request and realized better prices.

Tea Average.

The following were the average prices of tea per lb. in the London market during the week ending November 21, as compared with the previous week :—

		Week Ending Nov 14 lb.	Week Ending Nov. 21 lb.
Indian Tea (Northern)	...	12.87d.	12.87d.
Indian Tea (Southern)	...	12.04d.	12.21d.
Ceylon Tea ...	...	14.27d.	13.88d.
Java Tea ...	...	11.76d.	12.91d.
Sumatra Tea ...	...	9.66d.	10.49d.

The following figures of tea exports taken from the Calcutta Customs daily entries and received periodically from Chittagong are issued by the Indian Tea Association.

Quality of tea entered for export to United Kingdom for the first half of November, 1935 :—

Calcutta—Black 13,154,117 lbs. Green nil; Chittagong—Black 7,798,625 lbs. Green nil.

Quality entered during the corresponding period last year.

Calcutta—Black 10,891,319 lbs., Green nil; Chittagong—Black 3,698,170 lbs., Green nil.

Total from April 1, 1935 to November 15, 1935.

Calcutta—Black 108,556,404 lbs., Green nil; Chittagong—Black 58.070,012 lbs., Green nil. Total 166,626,416 lbs. Total from April 1, 1934 to November 14, 1934, 169,725,781 lbs.

SUGAR

Calcutta, November 28, 1935.

The local sugar market was quiet and dull during the past week. Demand for both Java and Desi sugars was very poor. Prices for Java sugars have declined by four to six annas as compared with last week. Java Refined Ready was quoting at the close Rs. 10-6-0. Java White Ready quoted Rs. 10-2-0 and Steamer Rs. 9-12-0. In the Desi sections the market is steady, Desi White (1st Crystal) quoting Rs. 9-12-0 to Rs. 10.

The Bombay market ruled easier and prices have suffered a decline of 5 to 6 annas in nearby positions. Last week's sales amounted to about 3,500 tons.

An easier tendency prevailed in Cawnpore due to the advent of the crushing season. There was a good enquiry for first production from Bengal and a large business has been reported. The premier sugar mill agents in Cawnpore are said to have sold the whole production of one of their mills amounting to about 1 lakh bags at Rs. 8-8.

The Java market was unchanged with minimum business passing. The limits are unchanged at F. 4-20. The s.s. Ranee, Northmoor and Nurmahal are due here on 25th and 27th instant with a total quantity of 3,850 tons from Java.

The stocks in the main parts are :—

(In bags : 10 bags=1 ton.)

		1935		1934	
Calcutta	...	(23rd Nov.)	33,849	(23rd Nov.)	28,070
Bombay	...	(22nd Nov.)	110,000	(24th Nov.)	58,000
Karachi	...	(22nd Nov.)	28,000	(23rd Nov.)	60,000
Madras	...	(18th Nov.)	23,000	(19th Nov.)	16,000

MISCELLANEOUS

WHEAT

Calcutta, November 28, 1935.

The local wheat market remained steady during the past week. In sympathy with strong foreign advices, prices advanced slightly. The bullish trend of rice and other foodstuff markets and the steady demand for flour were other contributory factors for the rise. Punjab and Cawnpore Ready closed at Rs. 3-9, while May Beta improved to Rs. 3-9-3.

The Bombay market was irregular. Operators were not willing to follow the rise in Chicago and Liverpool markets and buyers were scarce in the market. Delhi Cawnpore Ready and May closed easy at Rs. 4-10-9.

The Karachi market was quiet and easier during the early part of the week, but later on improved on strong foreign advices. Arrivals from upcountry averaged 3,000 bags per day and last week's shipments totalled 8,105 bags.

Shipments of wheat to foreign countries from Karachi and Bombay from August 1 to date totalled 39,000 quarters, against 38,000 quarters during the corresponding period last year. All these shipments were to the United Kingdom, with the exception of a small quantity for Aden.

The import and export figures of wheat for the three main British Indian Ports as given in the *Indian Trade Journal* from April, to November 23, 1935, as compared with the corresponding period last year are:—

Import.

	(In tons) 1935 Indian	Foreign	(In tons) 1934 Indian	Foreign
Calcutta	150,953	...	152,544	2,968
Bombay	108,257	...	114,403	...
Karachi	209,233	...	306,841	...

Export

	1935	1934
Calcutta	11	73
Bombay	1,062	854
Karachi	7,569	9,025

The Chicago market was strong during the first part of the week and closed earlier. On reports of unfavourable weather in Argentine and the strength of outside markets, the rates advanced to $1.00 for December and 99 5/8c. for May contracts. Towards the close an easier tendency was witnessed and prices receded by about 2 cents from the highest touch. The rate for Australian wheat in London steadily improved to 28s. 9d. for November delivery. Rosafe January/February also improved to 27s. 4½d. on November 25, closing quiet 3d. lower. Reports from Argentine show that an exportable surplus of 9,000,000 quarters is expected. The Australian crop is estimated to amount to 140,000,000 bushels. The Canadian Bureau Report estimate the spring crop at 274 million bushels, compared with 292 million bushels in the September Bureau Report.

MADRAS MARKETS.

PIECEGOODS

Madras, November 28.

No improvement has taken place in the dull conditions recently prevailing, though prices keep steady at the previous levels. Very little forward business is passing. Clearances and collections from upcountry are poor. The Yarn market has been quiet with no quotable change in prices.

METALS

The tone of the market for Yellow metal and Copper remains easier. Quotations are unchanged at Rs. 145 to Rs. 146 per candy for Yellow metal and Rs. 175 to Rs. 176 for Copper sheets. The precipitous decline in the prices of Yellow metal from Rs. 160 to Rs. 145 in the course of a few weeks has scared away buyers upcountry, with the result that stocks in Madras are accumulating. October shipments would augment the already heavy stocks in the bazaar. Sterling quotations for December shipment stand at £44 for English and £40-5 for Dittmann with Copper sheets at £52-12-6.

GROUNDNUTS

The market is steadier and prices have further improved during the week. London quotations for Coromandel Machined opened at the beginning of the week at £13-10 November Sellers and £13-7-6 December sellers, and advanced steadily to £13-12-6 November Sellers and £13-8-9 December Sellers in mid-week. Towards the close, there was a further advance of sterling prices to £13-15 November sellers and £13-11-3 December sellers. Shippers' buying limits opened at Rs. 33 for Machined and Rs. 27-8 for Ordinary (Per French candy, ex-coast godowns, at the beginning of the week, and advanced steadily to Rs. 33-13 to Rs. 34 for Machined and Rs. 28-8 for Ordinary (Per French candy, ex-coast godowns) at the end of the week. A prominent European firm is reported to have bought Machined at Rs. 33-4 for December 30 delivery and at Rs. 34 for December 5 delivery (Per French Candy ex-Harbour godowns). The market continues to rule steady at Vizagapatam, where shippers' buying limit stood at Rs. 33-8 per French Candy ex-Port godowns. Current rate as Vizagapatam has advanced to Rs. 10-6 per bag of 164 lbs. for Machined kernels, port delivery. At Pollachi, rose variety Machined is quoted at Rs. 29-14 to Rs. 30 and red variety Machined at Rs. 28-14 and Rs. 29 per French Candy, ex-Pollachi godowns. Harvesting of the Winter crop is in full swing in the Arcot area, and first arrivals have commenced in some of the centres in North Arcot.

The Kernel freight market has been quiet with limited enquiry from shippers. A small line of distressed space was done at 26s. 6d. per ton of 20 cwts. for November loading to North continental ports, but no further business is reported. January/February space is offering at 27s. 6d. (Per ton of 20 cwts.), with no business resulting so far.

Arrivals of Groundnut kernels into Madras for the week ended November 23, 1935 amounted to 8,407 bags or 661 tons, against 14,836 bags or 1,168 tons in the preceding week, and 5,857 bags or 461 tons at the corresponding week of last year.

HIDES AND SKINS

Air Mail advices from London report that it is difficult to forecast the trend of the market for Kips. The market had more or less established itself on the basis of about 11½d.-11¾d. for Coconadas 7-7½ lbs. and Prime Bangalores 8-8½ lbs. with Primes 5-5½ lbs. at about 13¼d.-13½d. It is generally believed that business is likely to be fairly active between now and the end of the year provided this range of prices can be maintained. That is to say, that once Curriers find that Madras has got down to a point at which they cannot work at less, they are likely to start to come in and buy, but the great point to be avoided is a sudden advance in prices from about the above basis. A slight and gradual increase by about ½d.-½d. would not put any great check on business, but any substantial advance is almost certain to stop Curriers buying immediately and would mean a protracted period of negotiation before any bulk business was possible. As regards Tanned skins, it is reported that Buyers generally have become nervous of the market, more especially for Tanned Goat, and this is having the effect of keeping purchases to just normal requirements. The demand is still for the lower grades, but spot stocks of these in London are practically exhausted. During the week, the local Tanned Cow market has ruled steady and London bids are now ¼d. higher. Arrivals are now on the slow side. There is a good demand for Light weight hides, but Mediums are not wanted. The Raw hide market has ruled very firm owing to good demand from Exporters. Arrivals of Dry hides have begun in the North, and are quoted at Rs. 6 per 20 lbs. for Dharbhanga/Purnea and Rs. 8-8 to Rs. 9-8 for Firma. Tanned Buffalo market is dull both here and in London, though local prices have kept steady. A little enquiry is reported for Tanned Buff Calf from London at lower prices. The market for Tanned Cow Calf is weaker and prices have receded by about 1d. to 1½d. In the local market, Tanned Sheep is steady as also Light weight Goat. Forward business is quiet, as Buyers are not prepared to pay the high prices asked by Madras. It is reported that about 6 lakhs of skins of both Madras Sheep and Goat will come before Buyers at the Public sales opening in London on December 2, approximately the same quantity as was tendered at the last series. The market opinion is that Sheep is likely to meet with good demand.

The following quantities of Hides and skins were shipped from Madras to Europe and America during the week endeed Novmber 21, 1935: To the United Kingdom: 16 bales Raw Goat skins, 18 bales Tanned Buffalo, 805 bales Tanned Cop hides, 10 bales Tanned Buff Calf, 44 bales Tanned Cow Calf, 108 bales Tanned Goat and 70 bales Tanned Sheep. To U. S. A.: 19 bales Raw Goat and 109 bales Tanned Buffalo. To France: 4 bales Tanned Goat.

CORPORATION OF CALCUTTA

NOTICE

The Preliminary Electoral Rolls for the ensuing Fifth Municipal General Election of the general constituencies referred to in Schedule III of the Calcutta Municipal Act, 1923, as subsequently amended have been prepared and published at the different places noted in the list annexed hereto on the 15th November, 1935 and the public are hereby informed that the gentleman or gentlemen whose name or names are noted against each such constituency as shown below have been appointed as the Revising Authorities for such constituency. All claims under Section 25 of the Calcutta Municipal Act, 1923, for being included in the Electoral Rolls for such constituency or objections to any name entered in such rolls as contemplated in that Section must be preferred to the Revising Authority or Authorities concerned in writing at the Central Municipal Office, 5, Surendra Nath Banerjee Road, Calcutta, so as to reach him on or before 5 p.m. of the 20th December, 1935. Such claims and objections shall be signed by the person making them and shall state the grounds on which they are based, and where they relate to an entry in the Preliminary Roll shall give the reference to or the particulars of that entry. It may also be noted that as companies, firms, joint families or other associations of individuals possessing the necessary qualifications can vote only through their duly nominated representatives, steps should be taken, if the name of such representative has not already been registered, to apply, on or before the date and hour specified above, to have the names of such representatives registered by the Revising Authority concerned. It should be distinctly understood that no complaints regarding errors or omissions, etc., in the Electoral Rolls will be considered after the expiry of the above date.

A complete copy of the roll of each of the said constituencies can be inspected at the Central Municipal Office, Calcutta, during office hours, and copies of such roll are available for sale in the Records Department of the Central Municipal Office. The price of the Electoral Roll of each constituency is Re. 1 per roll of over 16 pages and As. -/8/- per roll containing 16 pages and less. Further particulars may be obtained from the Electoral Roll Officer, Central Municipal Office, Calcutta.

J. C. MUKERJEA,

Chief Executive Officer,
Calcutta Corporation.

Investor's Supplement

Vol. XVI. No. 21 SATURDAY, NOVEMBER 30, 1935 Price Re. 1

YOUR INCOME FROM 52 GREAT BRITISH INDUSTRIAL COMPANIES

Do you know that by investing about £22 upwards in the THIRD and FOURTH BRITISH FIXED TRUSTS you can become part-owner of 52 GREAT COMPANIES and thus safeguard your capital by spreading it over the leading branches of British Industry?

The 52 Companies are divided into two groups or "Units"—28 in a "THIRD BRITISH" Trust Unit and 24 in a "FOURTH BRITISH" Trust Unit.

THE BRITISH FIXED TRUST Sub-Units provide investors abroad with:

(1) A SOUND LONG-TERM INVESTMENT in the form of a Bearer Certificate.

(2) REGULAR QUARTERLY DIVIDENDS collected and distributed by the Trustee.

(3) EXACT KNOWLEDGE of what they hold and its day-to-day value.

(4) A MARKETABLE SECURITY.—All the shares are quoted on the London Stock Exchange.

(5) PROSPECTS of capital appreciation and increased dividends as trade revives.

(6) SERVICES of: (a) The Trustee—LLOYDS BANK LIMITED
(b) Auditors—PRICE, WATERHOUSE & Company
(c) MANAGERS with limited powers.

Ten Sub-Unit Certificates and upwards (costing around £11) may be purchased in either of the Trusts. The buying and selling prices of the Sub-Units are based on the current market prices of the constituent shares. You may sell your holding at any time you may wish to do so. British subjects not resident in the United Kingdom holding British Fixed Trust Sub-Units are entitled to claim repayment of British Income Tax under certain conditions, particulars of which are given in the booklet.

Coupons may be presented for encashment at the current rate of exchange at the undermentioned Branches of Lloyds Bank Limited.

Write for explanatory booklet and daily quotations to LLOYDS BANK LIMITED at: Bombay, Calcutta, Karachi, Rangoon, Amritsar, Delhi, New Delhi, Lahore. Rawalpindi, Simla, Srinagar (Kashmir),

to the undermentioned Brokers:

THE BENGAL-NAGPUR RAILWAY COMPANY LIMITED

Chairman's speech at the Seventy-seventh Ordinary General Meeting of the Bengal-Nagpur Railway Company, Limited, held at 132, Gresham House, Old Broad Street, E.C.2, on 14th November, 1935, Sir Trevredyn Wynne, K.C.S.I., K.C.I.E., in the Chair.

The Report of the Directors on the accounts of the undertaking for the year 1934/35 has been sent to all Members, and, with your permission, I propose to take it as read.

The gross earnings for the year we are considering, *viz.*, 1934/35, were 56 lakhs more than the receipts for the preceding year 1933/34, and I feel justified in thinking that our receipts for the year 1935/36 will be higher than for 1934/35, as up to date there is an increase of 35 lakhs compared with the same period last year.

About two-thirds of our traffic consists of coal, minerals and raw products required by the Tata Iron and Steel Co., the Indian Iron and Steel Co., and the Bengal Iron Co. The work of these Companies, and the source of supply of their raw materials, are situated on our Railway. The total tonnage carried for these Companies during the year 1934/35 was ten million tons, an increase over the tonnage carried in 1933/34.

Apart from mineral traffic, there was an increase in general goods traffic, due to the activities of our Commercial Department and in part to the extension we recently constructed from Raipur to the South East, which connects our main system and Central India with the Port of Vizagapatam. This extension has opened out an area of 125,000 square miles of country which previously had no railway facilities.

At the present time the Financial Member of the Viceroy's Council is having a searching investigation made to ascertain why the Railways of India are unable to earn sufficient to pay the interest on their capital as well as working expenses.

Practically the whole of the capital expended on Indian Railways has been provided by the Government of India, and the Financial Member has to meet a deficit from other sources. Such an investigation is well justified at the present time.

I have received from India a long list of subjects to be examined and considered, which will no doubt eventually result in reducing working expenses and so increase net revenue. They are too voluminous to deal with in this speech, and I will confine myself to two subjects only of—

(1) The existing system of quotations of rates.
(2) The administration and working of Indian Railways.

The rates charged for the carriage of goods on Indian Railways are governed by the Classification of every kind of goods traffic. To each class there is a maximum and minimum rate between which a rate may be quoted.

A Committee was appointed a year ago to examine the existing Classification and improve it. This Committee has now advised that the number of classifications should be increased to 16 classes, and increase of six more than the existing classification, but the maximum and minimum of each class is still maintained, and any reduction below the minimum of any class cannot be quoted without first obtaining the sanction of the Railway Board, which involves delay. This does not help to increase traffic, and the main complaint of the public is the general inability to obtain from a Railway the quotation of a firm rate expeditiously and without inordinate delay.

I understand that English Railways are also subject to reference to a higher authority when quoting a rate below the minimum rate ruling; but the limitations imposed in the English system are not in fact applied restrictively, and the procedure is such as to

Rates within 40 per cent. of the standard scale are reported to the Minister of Transport, but they do not need his consent, and are, I understand, applied without delay. Rates which fall more than 40 per cent. below the standard must technically receive the Minister's assent before they are put in force. The need of putting the rates in force immediately they are agreed by the Railway Companies is recognised. Rates have in some cases been quoted 75 per cent. below the standard scale, but no objection has been made to the reduction. There is in effect no minimum, and in this respect the English rating system has a liberty which is denied to the Indian system.

In addition to this freedom I find that under the Road and Rail Traffic Act, English Railways are empowered to arrange "agreed charges," which I understand means that practically in quotation of rates they have a free hand.

It seems to me that classification and maximum and minimum rates on each Indian Railway for all traffic on its own system should be abandoned, and rates that will induce increased traffic and help to develop new trade should be allowed to be quoted. In other words, Indian Railways should work on the same principle as English Railways for goods traffic.

The question of rates to competitive ports, and of traffic passing over two or more systems, requires most careful consideration as the present practice results in creating competitive rates and unnecessary loss of Revenue.

Turning now to the administration of the Railways in India, one cannot help being impressed by the tendency to increase centralisation, which has become manifest of recent years.

The Railway Board was created in 1905 and consisted of three members and a very small office. Each Railway was a community, the members of which were interested in working their railway economically and endeavouring to make it pay its way.

After the war, in the year 1920-21, a Committee was sent out to India to advise whether in future all Railways should be under direct management by the State. A majority of the Committee recommended this step and, as a consequence of the Committee's report, a much more elaborate Railway Board than that set up in 1905 was created, consisting of a Chief Commissioner, four Commissioners, six Directors, and a largely increased office and statistical staff.

As might be expected, this body has developed into a great bureau, and correspondence with the Railways on every possible subject has vastly increased. There is further the exercise of pressure by the Legislative Assembly in many matters of administration and orders are, in consequence, apt to issue from the Railway Board, applicable to all Railways in India, irrespective of the different conditions under which each Railway has to work.

One cannot help feeling that this is a retrograde step and in this connection I would like to quote two extracts from the report made in 1922/23 by the Indian Retrenchment Committee, of which the late Lord Inchcape was Chairman. The first was "that Agents of Indian Railways should become General Managers and made responsible for the administration, working and financial results of their Railways and should be free to conduct their undertaking on a commercial basis." The second is "We are convinced that in a country like India, with its vast territory and differing people and circumstances, it is an impossibility to control the detail of all the Railways from Delhi and Simla as at present."

With these remarks, gentlemen, I now beg to move that the report and accounts be approved and adopted.

Mr. Fredk. Schooling seconded the resolution, which, in the absence of questions or comments, was carried unanimously.

THE DIVIDEND

The Chairman.—"I now beg to move that the sanction of the company be and is hereby given to the recommendation by the board of a final dividend at the rate of 5s. per £100 on the Ordinary stock of the company for the financial year ended 31st March, 1935. This is to be paid to members on the register on 31st December, 1935, together with the guaranteed interest of £1 15s. per cent. then due, making with the interim dividend paid on 1st July, 1935, a total distribution of 4 per cent., for the year, less income-tax."

Sir Charles Stewart-Wilson, K.C.I.E. (deputy chairman), seconded the resolution, which was unanimously adopted.

The Chairman.—"I beg to propose that Sir George Godfrey and Sir Benjamin Robertson, K.C.S.I., K.C.M.G., C.I.E., be re-elected directors of the company."

Sir Ernest Bell Kt., C.I.E., seconded the resolution, and it was carried unanimously.

On the motion of Mr. A. C. Carr, seconded by Mr. R. D. T. Alexander, the auditors, Messrs. Gerard Van de Linde and Son and Messrs. Peat, Marwick, Mitchell & Co., were reappointed auditors of the company.

A cordial vote of thanks having been passed to the

Indian Finance

Investor's Supplement

BANK RATE AND GILTEDGE

Reduction of the bank rate from 3½ per cent. to 3 per cent. is an outstanding event, not only of this week, but of the war and post-war era.

Last time we had three per cent. bank rate was in 1914. There was no Imperial Bank at that time. The three Presidency Banks had separate existences; and their bank rate policies were not always in accord. In 1914, for instance, the Bank of Madras did not reduce the rate below 4 per cent., while the Bank of Bombay and the Bank of Bengal did.

It may, therefore, be said that there was no all-India three per cent. rate in 1914.

Another striking difference is that while, in the pre-war period, bank rates were constantly being changed, we are now getting accustomed to a long run of the same rate. 3½ per cent. bank rate had been in force from February 17, 1933. That is, this rate has been in force for two years and nine months. In this regard, the present vogue is in violent contrast to what was prevailing not only in the dim past of pre-war age but in the recent past of a decade or so after the war.

MARKETS LOWER

(By Special Cable)

New York, November 27.

Markets have been lower on profit-taking.

There has been a general marking down in prices.

There is every indication that there will be as little monkeying with the bank rate as possible in the future.

By all tokens, the three per cent. bank rate is assured of a six months run. It cannot be more. It may be less. For, should the bank rate persist to be out of tune with intrinsic money conditions, why not 2½ per cent? What more natural than further reduction?

One may, perhaps, hazard the guess that by the end of this busy season, we may achieve a record by a 2½ per cent. bank rate. Current omens are favourable to so hopeful a view.

All of which is a great and powerful tonic for giltedge. 3½ per cent. Paper has crossed the Rs. 96 mark. It shot up, at one time, to Rs. 96-12. Profit-taking in subdued frenzy brought the rate down by a few annas.

This is, we believe, no more than a reaction. A very necessary reaction. A very welcome reaction. This is the best sign of consolidation of gains so far won.

It is possible to take a brighter view of the future—because most influences at work in the giltedge market are healthy and heartening.

Also, more cheerful news is forthcoming from London. It is rumoured that the British Government have decided on announcing the entire redemption of the 3 per cent. 1933/42 Treasury Bonds.

This is a scrip in the case of which the Treasury may redeem no less than 10 per cent. of the outstanding amount per year. The words "no less than 10 per cent." are no bar to the Government deciding to redeem a far bigger proportion.

Last year, while the City circles in London were expecting the authorities to redeem 10 per cent., the Treasury came out with the announcement that 40 per cent. will be repaid. This was something of a bolt from the blue. Bankers did not like it and were even resentful. But the spokesmen of the Treasury maintained that they were there not to humour bankers but to carry out the operations of the Government to the best advantage of the latter.

It may well be that, in the present year also, a surprise of this kind may be sprung on the market. The outstanding amount on the 3 per cent. 1933/42 Treasury Bonds is £44 million. It is quite on the cards that, at a very early date, the Treasury announces its intention of repaying this entire sum of £44 million.

MARKETS IDLE

(By Special Cable)

(From R. Gordon Cummings)

London, November 28.

Gilt-edged are flat and Coppers strong.

Markets are idle. There is an uncertain feeling in evidence.

We have wired our London correspondent for confirmation of this report; but, up to the time of writing, no reply has been received.

If the report about this redemption turns out to be correct, it should have a very bullish effect on the London giltedge market. This may be interpreted as an immediate and substantial cause for further improvement in rupee securities.

That a further rise especially in 3½ per cent. Rupee Paper is indicated, is proved by a comparison of giltedge prices on the eve of the last debacle and those ruling now.

The New Loan was issued at Rs. 96-8. And 3½ per cent. Rupee Paper was then about Rs. 95-8. The New Loan is now Rs. 100-4. 3½ per cent. Rupee Paper is roundabout Rs. 96-8. Does this not suggest that an overflow of investment demand to Paper is inevitable?

INDIA

EXCELLENT IN EVERY WAY

CALCUTTA HYDRAULIC PRESS COMPANY

(By "Watch-dog")

Among the allied industries that are advantageously placed, the jute pressing industry deserves the attention of investors. The jute pressing companies benefit, of course, with greater production in the jute industry. But, even in times of depression, the volume of turnover is sufficient to ensure the pressing companies a reasonable margin of profit. Hence, they are assured of steady progress; and when prosperous times come, it is all the better luck for them.

The Calcutta Hydraulic Press Company is the best among the group. Its financial position is exceptionally strong; and, from a glance at the table given below, it will be seen that the Company has had an excellent record from every point of view. The profits, of course, are seasonal, the half-years ending June being leaner periods and the half-years ending December being the fatter periods. As such, the half-yearly dividends also are lower and higher in the periods respectively. During recent years, the dividend for the whole year has been 10 per cent. Last half-year it was raised by 1 per cent. to 6 per cent. per annum. It is possible that this heralds an early return to the conditions of December 1931.

The Company has four presses with a total capacity of 3,000 bales per day. The managing agents are Messrs. Andrew Yule & Co., Ltd.

Half-year ended.		Profit.	Depreciation	Allocations to funds.	Carry forward.	Dividend %. per annum
		Rs.	Rs.	Rs.	Rs.	
June	'30 ...	45,193	11,404	...	13,906	8
Dec.	'30 ...	48,777	15,665	...	7,108	10
June	'31 ...	34,998	10,225	...	7,791	6
Dec.	'31 ...	1,25,395	25,000	25,000	6,186	20
June	'32 ...	26,375	7,201	...	5,540	5
Dec.	'32 ...	92,397	26,000	...	11,937	15
June	'33 ...	34,639	16,956	...	9,620	5
Dec.	'33 ...	87,104	26,000	...	10,724	15
June	'34 ...	33,085	15,009	...	8,800	5
Dec.	'34 ...	69,248	...	...	18,047	15
June	'35 ...	54,621	30,025	...	18,571	6

The capital authorised, issued and subscribed is Rs. 12 lakhs, Rs. 8 lakhs being in 8,000 ordinary shares of Rs. 100 each and 4 lakhs in 4,000 preference shares of Rs. 100 each.

In April 1929, the capital of the Company was increased from Rs. 8 lakhs to its present figure by the capitalisation of Rs. 4 lakhs standing to the credit of Reserve Fund and creating thereby 4,000 ordinary shares of Rs. 100 each. These new shares were distributed free to the existing shareholders in proportion of one such share for each share held.

The General Reserve is Rs. 5,75,000 as against the same in the previous half-year.

Sundry liabilities are Rs. 1,87,582 against Rs. 1,82,984.

On the assets side, the gross block of Rs. 16,43,374 has been depreciated by Rs. 12,28,074 to Rs. 4,15,300. The net block value is only just above one-third of the total paid-up capital.

Stock of jute is Rs. 57,460 against nothing previously.

Outstandings are Rs. 1,36,938 against Rs. 2,54,265.

Investments are Rs. 8,68,657 against Rs. 7,40,876. All of them are in giltedge, book value being well below market value.

Cash and other balances are Rs. 1,26,797 against Rs. 1,97,551.

Total liquid assets are Rs. 11,89,853 against Rs. 11,92,692.

The profit for the half-year ended June 1935 is the highest first half-year profit since June 1930. In view of the fact that no depreciation was provided for the half-year ended December 1935, Rs. 30,025 has now been set aside for depreciation; and, even after such allocation, it has been found possible to raise the dividend by eight annas. Good first half-years have been followed by good second half-years; and we believe that the profits for the current half-year may prove high enough to step up the dividend for the current half-year too. The carry-forward at Rs. 18,571 is the highest since 1930.

At the present price of around Rs. 175½, the yield on the ordinary share is 5.5 per cent. free of tax on the basis of the dividend for the whole of last year. The first half year of 1935 has already witnessed a rise in the dividend; and the yield on the dividends for the entire year should be higher. The shares are worth buying both from investment considerations and on the prospect of capital appreciation in the future.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

The outstanding event of the past week has been the publication of the annual report of the big Indian base metal producer, Burma Corporation. An analysis of the figures discloses a very satisfactory improvement in the profit-earning capacity of this prominent Company. Other items of importance include some interesting comments on the position of Indian railways, while the affairs of several other prominent concerns identified with India are dealt with.

* * *

Rise in Burma Corporation Profits.

In the year 1919 the *Burma Corporation* was formed to acquire the undertaking of Burma Mines Ltd. The Company, which has now an issued capital of Rs. 13,54,16,890 (subsequently to be reduced by a repayment in cash of Re. 1 per Rs. 10 share), owns extensive zinc, lead, silver and copper mines, of about 10 square miles in Upper Burma. Various other properties are also held under lease from the Indian Government for 30 years to December 1949. The Company owns its own smelting plant and has a connecting railway with the lines of Burma Railways.

Operations during the year-ended June 30, 1935, resulted in a net profit of Rs. 68,29,545, compared with Rs. 44,37,012 in the previous 12 months. Before crediting sundry revenue and charging depreciation and taxes, the operating profit was Rs. 94,74,559, as against Rs. 69,70,104.

In their report the Directors attribute the substantial improvement during the past twelve months to the larger revenue derived from silver and to the marked appreciation in the prices of both silver and other metals during the June quarter, when the opportunity arose to dispose of a considerable tonnage of lead stock. Other factors having a bearing on the increased profits were a further reduction in operating expenditure, the absence of any charge in connection with the examination of the Wa States, carried out last year, and the reduced charge for depreciation, which, since 1929, has been on a continuously declining scale.

The following table gives comparable figures taken from the revenue accounts of the past two years-ended June 30, 1935:—

	1935 Rs.	1934 Rs
Metal Sales	2,50,71,883	2,26,98,432
Metal Stocks	19,99,434	26,83,035
Miscellaneous Income ...	6,23,201	5,37,650
Total Revenue ...	2,76,94,518	2,59,19,117
Operating Expenditure ...	1,08,77,124	1,14,51,878
Reports & Experimental Exps.	nil	2,62,137
Freight, Shipping, and Realisation Charges ...	62,24,812	62,18,304
Depreciation	11,91,640	15,01,372
Sundry Expenses ...	4,94,822	4,79,044
Taxes	20,76,575	15,69,370
Net Profit	68,29,545	44,37,012

From the 1935 profits a sum of Rs. 4,00,000 (nil) is transferred to reserve, and, after deducting Rs. 63,47,667 for dividends totalling 6½ as. per share, the surplus on the year's working is Rs. 81,878, which, with the balance of Rs. 2,26,184 brought in leaves a credit of Rs. 3,08,062 to carry forward. In the previous year dividends of 5 as. per share absorbed Rs. 42,31,778, leaving a surplus of Rs. 2,05,234, which was added to undivided profits of Rs. 20,950.

On the statistical side production for the two years-ended June 30, 1935, was as under:—

	1935	1934
Lead (tons)	70,560	70,560
Refined Silver (ozs) ...	5,775,913	5,892,046
Zinc Concentrates (tons) ...	73,404	64,037
Copper Matte (tons) ...	9,750	11,100
Nickel Speiss (tons) ...	4,421	3,800
Antimonial Lead (tons) ...	1,200	1,255

Throughout the year under review demand for lead was well maintained in all markets. Compared with a year ago the average price realised for lead fell by 10s. 7d. to £11. 6s. 0d. per ton. In the case of spelter the average price fell by £2 15s. 5d. to £12 16s. 7d., and of copper by £4 14s. 3d. to £32 5s. 8d. per ton. On the other hand the average price of silver rose by 6.7879d. to 25.8332d. per standard ounce. All prices are based on those of the London Metal Markets.

After taking account of the extraction of 5,762,601 tons in the past twelve months, ore reserves at June 30th 1935 were 3,965,199 tons, compared with 4,062,511 tons at June 30th 1934. The present assay values of these reserves is 18.7 ounces silver, 24.2 per cent. lead, 15.1 per cent. zinc, and 0.87 per cent. copper, compared with respective figures of 18.9 ounces, 24.6 per cent., 14.8 per cent. and 0.84 per cent. at the previous year-end. Development work on the numbers 7 and 8 levels of the Burman Lode has yielded results exceeding expectations.

Turning to the balance-sheet, the Directors state that although steps have already been taken to reduce the issued capital by a repayment of Re. 1 per share, the cash distribution will not take place until next January. Accordingly the issued capital for the purposes of the accounts remains unchanged from previous years at Rs. 13,54,16,890 in Rs. 10 shares. As favourable opportunities occurred during the year certain investments were sold in order to provide the necessary funds for the forthcoming capital repayment. Those investments still retained by the Company had a market value at June 30th last in excess of the balance-sheet figure.

After making adjustments for the final dividend appropriations figures of the last two years' balance-sheets are summarised hereunder:—

	1935 Rs.	1934 *Rs.*
Assets—		
Property, etc. ...	11,76,83,554	11,85,26,615
Stores & Plant ...	30,61,624	31,65,617
Liquid	2,69,24,457	2,24,53,204
Total	14,76,69,635	14,41,45,436
Liabilities—		
Capital	13,54,16,890	13,54,16,890
Creditors, etc.	95,52,850	65,10,529
Reserves	23,91,833	19,91,833
P. & L. A/c.	3,08,062	2,26,184
Total	14,76,69,635	14,41,45,436

Burma Corporation shares have fluctuated extensively in recent months. At one time they had a sharp fall on the fact being appreciated that with the decision to repay part of the capital, prospects of further expansion would necessarily be greatly restricted. Estimates have been made, unofficially, that the life of the properties is now little more than ten years. But, on the other hand, sales of the Company's products are now at substantially higher levels than even a few months ago. Maintenance of base metal prices at existing levels seems to be reasonably assured for some time to come and rising prices are well within the bounds of possibility.

Taking all factors into account I consider that the Rs. 10 shares are well worth holding for at least another year. There is every reason to believe that the next interim dividend payment will be increased.

Railway Arministration Criticised.

Speaking at the annual meeting of the *Bengal-Nagpur Railway Company,* the Chairman, Sir Trevredyn Wynne, K.C.S.I., K.C.I.E., drew attention to the anomalies existing in the rates charged for the carriage of goods on Indian Railways, these charges being governed by the classification of every kind of goods traffic. In his opinion "the classification and maximum and minimum rates on each railway for all traffic on its own system should be abandoned, and rates that will induce increased traffic and help to develop new trade should be allowed to be quoted. In other words, Indian Railways should work on the same principle as English railways." The Chairman also went on to criticise the ever-growing volume of correspondence necessitated by the workings of the Railway Board and the exercise of pressure by the Legislative Assembly. A more detailed review of the speech will appear next week.

* * *

Calcutta Electric Investigation.

During the last few days the market price of *Calcutta Electric* ordinary shares has fallen sharply on reports that an inquiry into the Company's working is taking place in Calcutta, following an agitation for lower prices.

From a recent high record of 69s. the £1 ordinary shares fell to 62s. The closing quotation is 62s. 9d.

I am given to understand by those in touch with the situation in London that there is no necessity for undue alarm regarding the outcome of this inquiry by the Calcutta Municipality.

* * *

Shipping Dividends Passed.

In respect of the year-ended September 30th last it is announced by the Directors of *Peninsular and Oriental Steam Navigation Co.,* that they are unable to recommend any dividend on the deferred stock, which has not received anything since 6 per cent. for the year 1930-31.

The dividend is also passed on the ordinary shares of *British India Steam Navigation Co.,* which is controlled by the P. and O. The last payment on the ordinary capital was 2½ per cent. for the year to September 30, 1932.

Both Companies are, however, meeting the half-yearly dividends on their preference capital.

* * *

Public Utility Dividends.

For the year-ended June 30th, 1935, the *Oriental Gas Company,* which supplies gas in Calcutta and Howrah, is maintaining the dividend on the £300,000 issued ordinary capital at 8 per cent. tax free, by a final payment of 4½ per cent. Net profits amount to £34,047, compared with £31,903 in 1933-34, and £42,732 in 1932-33.

As for many years past, the interim dividend on the £200,000 ordinary capital of *Cawnpore Electric Supply Corporation* is to be maintained at 3 per cent.

* * *

Indian Brevities.

In respect of the year ending April 30th next the interim dividend on the deferred stock of *Indian and General Investment Trust* is being maintained at 5 per cent. actual. Although carrying on business as a general investment trust, this company held 14 per cent. of its investment in Indian and Ceylonese securities at April 30th, 1935.

Net loss of *Consolidated Coffee Estates,* which owns 6,380 acres in the Province of Coorg, was £2,077 for the twelve months to June 30th, 1935, compared with a profit of £370 in 1933-34. No dividend, as for the two previous years, is to be paid on the £60,000 issued ordinary capital, while the credit balance carried forward is reduced from £2,537 to £460.

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Friday, Nov. 29, 1935.

The feature of the week under review is the reduction of Reserve Bank rate from 3½ per cent. to 3 per cent. on and from November 28. This news came as no great surprise to financial circles, as the change was heralded last week by the announcement by the Imperial Bank of a reduction in the interest allowed in Savings Bank accounts. The effect of this reduction on the Calcutta Stock Exchange was immediately felt, particularly in the gilt-edged section, which was especially firm and active. 3½ per cent. Paper after being done as high as Rs. 96-12 closed easier at Rs. 96-9.

A sharp rise in Reserve Bank shares was recorded, which after touching Rs. 132, closed firm at Rs. 130.

In Jute shares, the same unsatisfactory condition continued although in mid-week a steadier market for Howrahs and Kamarhattys only was witnessed due mainly to bear covering. No news is forthcoming as to further development regarding the Jute Mills Association crisis, but it is believed that the non-member mills are seriously contemplating of entering into an agreement with the Association before the advent of the New Year. This makes the outlook brighter although it is difficult to hazard a guess at the moment.

While some enquiries were apparent in coal shares without any fair amount of business being transacted, Tea shares were completely neglected contrary to expectations, although London advised a good demand for tea with no material change in prices.

In other sections, Sugar and Electrical issues were in good demand, and among Engineering shares, Burn & Co. showed a sharp rise.

Government Securities.—Gilt-edged securities declined during the earlier part of the week due to profit taking, but this was soon counteracted by the announcement of reduction in the Bank rate. 3½ per cent. G. P. Notes after rising up to Rs. 96-14, closed easier at Rs. 96-9. The weakest spot in this section was the 4 per cent. Loan 1960/70, which dropped down to Rs. 109-10 on Tuesday but as the session progressed, recovered partially to Rs. 110, at which it closed. On the other hand, the 3 per cent. New Loan 1951/54 remained remarkably steady throughout the week, and closed at Rs. 100-6. 3 per cent. Loan 1941 closed at Rs. 103-3, 3½ per cent. Loan 1947/50 at Rs. 104-12, 5 per cent. Loan 1940/43 at Rs. 110-9 and 5 per cent. Loan 1945/55 at Rs. 119. 3 per cent. Government Papers also came to business around Rs. 85.

Debentures.—Among the Debentures of Public Bodies, a slight reaction was apparent. As only two transactions were reported in these, it is not easy to say whether the rates are really lower or not. A small lot of 4 per cent. 1908/38 Calcutta Municipals changed hands at Rs. 104 and 4 per cent. 1915/75 Calcutta Port Trusts were dealt in at Rs. 104. In Industrials, there were some isolated transactions due to complete absence of sellers, which included 6½ per cent. Hukumchand Jutes at Rs. 103-12, 6¾ per cent. Rohtas Sugar at Rs. 103-12, 8 per cent. Bateli Tea at Rs. 100-8 and Kyang Tea Seed at Rs. 5-8.

Preference shares.—There was again a good demand for all the better class issues, but the turnover was limited due to sellers being scarce. In Jute Mill issues Ballys were dealt in at Rs. 142, Fort Glosters at Rs. 148, Howrahs "A" at Rs. 138. Kamarhattys at Rs. 129, Khardahs at Rs. 128, New Centrals at Rs. 143 and Unions at Rs. 146. Of others, small lots of Bowreah Cottons both "A" and "B" were dealt in at Rs. 155 and Rs. 59 respectively, Bengal Telephones maintained their old rate around Rs. 14-6, B.I.C. were better at Rs. 148 and a lot of I.B.P. changed hands at Rs. 120.

Other Investment Stocks.—A reaction in Imperial Bank Fully Paids resulted in dropping down of rates to Rs. 1,565, but at the close recovered to Rs. 1,572-8. Contributories likewise were also easier at Rs. 387. While Central Banks continued to maintain their last week's position at Rs. 36-8, a rapid rise in Reserve Bank shares from Rs. 127 to Rs. 132 was recorded. At the close they were steady at Rs. 130. A parcel of Bank of Behar was sold around Rs. 57. In Insurance shares, Hindusthan Co-operatives were better at Rs. 30 and Himalayas came to business at six annas. In Railway shares there was good support for 3½ per cent. Guaranteed Issues of Kalighat Faltas and Katakhal Lala Bazars. Of others Arrah Sasarams came to business at Rs. 53. Darjeeling-Himalayans at Rs. 62 and Bankura-Damodars at Rs. 90-8 ex-dividend. In River transit Companies, I. G. N.s were dealt in at the low rate of Rs. 95 and Bengal Assam Steamship around Rs. 219. A parcel of Calcutta Steam Navigation also came to business at Rs. 128.

Cottons.—Not much interest was noticeable in this section, New Victorias maintaining their rate around Re. 1-9 and Kesorams at Rs. 3-8. A lot of Dunbars came to business at Rs. 118.

Coals.—A fair demand continued for selected stocks, but business was on a restricted scale. Bengals were dealt in at Rs. 282, but receded to Rs. 279. Equitables at Rs. 38-2. Unions at Rs. 16, Mundulpurs at Rs. 6-4, North Damudas at Rs. 3 and West Jamurias at Rs. 12 were among the transactions.

Jutes.—The opening of the session witnessed an unchanged and dull market, but as the week advanced some improvement in Howrahs and Kamarhattys was noticed, apparently due to bear covering, the former rising from Rs. 49-6 to Rs. 53-2, but closing easier at Rs. 51-14 and the latter rising from Rs. 505 to Rs. 524, closing at Rs. 520. Clives were fluctuating between Rs. 26-8 and Rs. 26-12, Nationals between Rs. 22-12 and Rs. 23-6 and Nuddeas between Rs. 46 and Rs. 46-8. Of higher priced shares, Anglo-Indias closed at Rs. 413-8, Barnagores around Rs. 139-8, Belvederes changed hands at Rs. 331, Fort Williams at Rs. 274-8, Gourepores at Rs. 648 and Kanknarrahs at Rs. 422-8.

Electricals.—There was again good support in this section with several good features. Bengal Telephones were wanted around Rs. 18, but with no sellers. Agra Electrics closed at Rs. 114, Ajmers at Rs. 12-4, Cuttacks at Rs. 8-5 Daccas at Rs. 20-8 and Jubbulpores at Rs. 12.

Engineerings.—Arthur Butlers were in good demand, but as the sellers were scarce, the rate rapidly rose to Rs. 12. The special feature of this section was the sharp rise recorded in Burn & Co., which closed at Rs. 278. Indian Irons were attracting lesser attention, closing at Rs. 8-8 Bengal Irons after fluctuating between Rs. 3-14 and Rs. 4, closed better at Rs. 4-1 on Wednesday. But there was a complete absence of business in these shares on Thursday. Britannia Buildings closed at Rs. 3 and Marshalls were easier at Re. 1.

Sugars.—Bulands were in good demand at Rs. 14, Cawnpores closed at Rs. 35, Carews recorded Rs. 20-12, and Murree Breweries were wanted at Rs. 196 cum-dividend. Rohtas changed hands at Rs. 12-10 and Samastipores at Rs. 9-8.

Miscellaneous.—In Paper shares, while Titaghur ordinaries and deferreds were steady at old rates at Rs. 23-6 and Rs. 104 respectively a sharp rise in Bengals was recorded, which closed at Rs. 111. A further drop in India Paper Pulps resulted in their closing at Rs. 177-8. Among others, Burma Corporations were steady at Rs. 8-6, B. I. Corporations at Rs. 4-1, Calcutta Ices at Rs. 9-14, Indian Wood Products at Rs. 25 and Walford Transports at Rs. 1-14. Parcels of Bengal Bonded Warehouse "A", "B" and "C" came to business at Rs. 673-8, Rs. 85 and Rs. 135 respectively.

Teas.—Exceptionally dull conditions prevailed throughout the whole week. The transactions included Central Cachar, at Rs. 71, East Indias at Rs. 11, Ruteemas at Rs. 8-8, Sarugaons at Rs. 9-8, Tukvars at Rs. 15-12 and Tezpores at Rs. 9-6.

MADRAS STOCK EXCHANGE

(*By Wire*)

(From Our Correspondent)

Friday noon.

The course of business during the week under review was characterised by feverish activity in all sections. The announcement of a reduction in the Savings Bank rate by most of the banks in the early part of the week and the announcement of a reduction in the official bank rate from 3½ per cent. to 3 per cent. on Thursday morning culminated in raising the normal activity to a hectic pitch. The Government Securities Paper sustained its reputation as the market index by opening listless at Rs. 95-9 and after losing a couple of annas early in the week soared to Rs. 96-5. On Wednesday evening consequent on the bank rate reduction it went up to Rs. 96-12. Thereafter it was reacting to Rs. 96-8 at which level the pendulum seemed like oscillating more gently. Short and medium-dated issues were in fair demand with 3 per cent. 1941 Loan being done at Rs. 104-5 ; 5 per cent. 1939/44 at Rs. 109-2-6 ; and 3 per cent. 1951/54 at Rs. 100/6. Among long-dated loans 4 per cent. 1960/70 proved popular at Rs. 110-8 and 5 per cent. 1945/55 Loan at Rs. 118-14. Among the Mysore issues 3½ per cent. 1951/58 came in for brisk turnover at Rs. 104-2. The other issues were lifeless.

Banks.—Reserve Banks are fast becoming the stormy petrel of the Stock Market. They were the centre of unusual and enthusiastic activity during the week. Large blocks of shares moved up-country at rates varying from Rs. 127 to Rs. 130. Indian Banks big and small came in for attention at Rs. 126-4 and Rs. 26-4 respectively. Indo-Commercial 'A' had good demand at Rs. 111-8 with nothing offering. Quilon and Travancore Nationals were done at Rs. 26-12 and Rs. 54-8 respectively.

Fixed interest securities.—With the exception of Premier Construction Preferences which came in for anxious selling at par on rumours of a debenture by the company, there was nothing doing in this section.

Public Utilities.—Dehri Rohtas found buyers at Rs. 11 ; Karaikals at Rs. 41-4 ; Trichy-Srirangams at Rs. 177 ; South Arcots at a rupee discount and West Coasts at Rs. 10-4. Vellores were transacted at Rs. 15 ex-dividend.

Mills.—Kaleeswarars were absorbed at Rs. 292 while Buckingham and Carnatics were taken up at Rs. 216. Cambodias noted a deal at Rs. 13 cum-dividend. Sitarams were done at Rs. 53-8 and Coimbatore Cotton Mills at Rs. 108-4. Vasantas continued to have good buyers without attracting sellers.

Miscellaneous.—More heartening news regarding the merger led to United Cements finding buyers at Rs. 122 and Shahabads at Rs. 473-12. United Breweries were done at Rs. 103-8. Scindia Steams have evoked great enthusiasm, several deals being noted at Rs. 14 and Rs. 14-4. The shares closed steady at Rs. 15. Premier Construction Ordinaries at Rs. 71, New Indias Rs. 42-8 and Singarenis at Rs. 6-12 were among the other transactions of the week. Tata Ordinaries and Deferreds were brisk at Rs. 152 and Rs. 605. Though the closing levels were slightly lower, the market closed with a firm undertone.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Thursday evening.

Money.—Money continued easy with interbank call quoting at ¼ per cent.

Securities.—The reduction in the Reserve Bank rate from 3½ per cent. to 3 per cent. gave the fillip to an otherwise quiet market and prices soared high. 3½ per cent. Paper which was ruling steady at about Rs. 95-8 jumped up and the closing quotation was firm at Rs. 96-12. There was some improvement in values in the short-dated and medium-dated loans also. 3 per cent. 1941 Loan was slightly lower at Rs. 103-2 but 3 per cent. 1951/54 was higher at Rs. 100-6 ; 3½ per cent. 1947/50 at Rs. 104-15 ; 4 per cent. 1943 at Rs. 108 ; 4 per cent. 1960/70 at Rs. 110-8 ; 4½ per cent. 1955/60 at Rs. 115-6 ; 5 per cent. 1939/44 at Rs. 109-2 and 5 per cent. 1945/55 at Rs. 119-1.

Shares.—With the strength in securities market, there was an all-round improvement in the share market also.

Textiles.—This section ruled a shade easier and prices were slightly lower. Bombay Dyeings were at Rs. 762-8 ; Central Indias at Rs. 266-14 ; Centuries at Rs. 220-10 ; Colabas at Rs. 141-4 ; Gokaks at Rs. 173-2 ; Kohinoors at Rs. 205-10 and Swadeshis at Rs. 161-4.

Hydro-electrics.—There was some interest in evidence after a long time. Tata Powers were higher at Rs. 1,553-8, Andhra Valleys at Rs. 1,645 and Tata Hydros at Rs. 165-10.

Iron and Steel.—The raising of the Bank of France rate on Friday last and the weakening tendency of the Franc had an unsettling effect in this section and prices sagged. Later, there was some rally and prices were steady. The closing rates for Steel Shares are, however, slightly lower than last week. Tata Ordinaries closed at Rs. 149-12, Deferreds at Rs. 592-8 and Second Preferences at Rs. 158-14.

Cements.—Owing to the revival of merger proposals this section was livelier and some rises were recorded. Bundis were quoted at Rs. 35-10 ; Gwaliors at Rs. 121-14 ; Indias at Rs. 456-4 ; Katni Deferreds at Rs. 2,060 and Ordinaries at Rs. 371-4 ; Okhas at Rs. 251-4 ; Punjabs at 24-14 ; Shahabads at Rs. 472-8 and Uniteds at Rs. 119.

Miscellaneous.—Belapurs were unchanged at Rs. 343-12, Bombay-Burmahs at Rs. 415 and Bombay Trams at 147-8. Scindias were strong at Rs. 14-4 and Premier Constructions were lower at Rs. 72 on rumours of a new debenture issue.

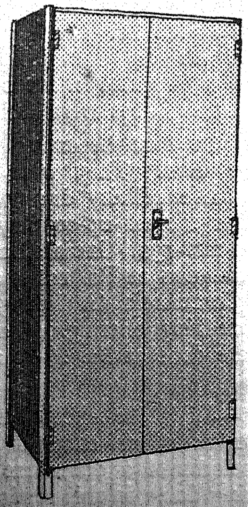
Banks.—Reserve Banks were the centre of activity and they were quoted at Rs. 127-12. Imperial Bank fully-paids were unchanged at Rs. 1,560 and Contributories were easier at Rs. 382-8. Bank of Barodas were at Rs. 101-12 ; Bank of Indias at Rs. 124-8 ; Central Banks at Rs. 35-14 and Unions at Rs. 5-5-6.

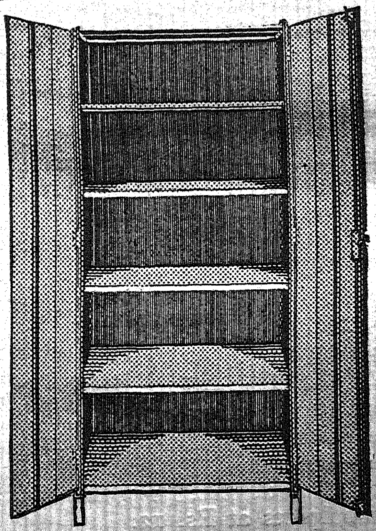
LONDON STOCK EXCHANGE

Markets have been dull and quiet but prices have continued steady in the absence of selling pressure. Giltedged were firm. 3 per cent. Indian New Loan was quoted at 98½, 3½ per cent. 1931 at 97½, 4½ per cent. 1958/68 at 115 and 2½ per cent. Consols at 85⅜, 3½ per cent. Conversion at 107⅜, 3½ per cent. War Loan at 105⅝ and Victory Bonds at 115½. Among other sections Home Rails were firm. Coppers were strong. Oils were easier Anglo-Iranians, Burmas and Royal Dutch being quoted lower. Minings were steady and Industrial were better supported.

NEW YORK STOCK EXCHANGE

After a period of hectic trade prices have reacted and even the leaders General Motors and others have come down. There has been a general marking down in prices. General Motors are at $56½ after being as high as $58½, Anaconda Copper at $24⅜ and U. S. Steel Common at $47¾.





GODREJ'S

STEEL STORAGE

– CUPBOARDS –

Made of best quality rolled sheet steel cleaned absolutely free of rust and scale prior to painting. Spray-painted with undercoats of non-corrosive paints and finished with high quality stove enamels. Finally backed in gas ovens to ensure permanence of the enamel on steel surface.

ELECTION RESULTS STIMULATE MARKETS

ARMAMENT AND ELECTRICAL SHARES RISE

By R. Gordon Cummings

By Air Mail

Special for "INDIAN FINANCE"

London, November 18th, 1935.

Since last writing, conditions throughout almost the whole of the London Stock Exchange have been much more active. The return of the National Government to power with a large majority cheered the City immensely.

Prices of the leading stocks commenced to rise on the eve of Polling Day; during Thursday, the actual polling day, the rise continued; and on Friday, with most of the results known, there was a very firm opening in the morning, but during the afternoon profit-taking followed at the close of the fortnightly account.

It was generally expected that "boom" conditions would prevail this morning. Consideration of the fact that economic sanctions were to take effect from to-day had a dampening influence, however, on speculative enthusiasm. All the same numerous further small rises were seen.

Amongst individual markets, gilt-edged stocks have again risen sharply on balance, although closing below the highest levels of the week. *War Loan* after being 106 bid, finishes at 105½. Elsewhere in the gilt-edged market, 2½ *per cent. Consols* are 85¼, 3 *per cent. Conversion Loan* 104⅜, 3½ *per cent. Conversion* 107⅜, and *Local Loans* 96. *India* stocks are also easier following earlier strength, the 2½ per cent. being 75, the 3 per cent. 87, the 3½ per cent. 97½, and the new 3 per cent. 1 premium. British Municipal and Colonial stocks have been in better demand, some of the latter showing substantial gains to-day.

With war clouds rapidly looming again over China and Japan the bonds of these two countries have been sold. The tendency in the South American section has, on the other hand, been firmer, particular features of strength being *Brazilian* and *Argentine* Loans.

Home Railway stocks have been moderately supported, but with the Southern Railway rating appeal opening before the House of Lords to-day, buying has been restricted until the course of the case can be more accurately assessed. *Great Western* ordinary is now 49½, *London Midland and Scottish* 18¼, *Southern* deferred 21, and *London and North Eastern* second preference 21½. *Argentine* stocks have provided an especially bright feature in the Foreign Railway market, the view being taken that something will shortly be done to alleviate the present heavy losses suffered on foreign exchange.

Activity in Armament shares immediately followed the Election. There has also been some heavy buying of Iron and Steel shares and the leading industrial equities.

In the Armaments group *John Brown* are 20s., *Hadfields* 19s. 9d., *Vickers* 19s., and *Swan Hunter* 26s. 9d. Steel shares to move up include *Dorman Long*, now 22s. 6d., *Guest Keen* to 35s., *Staveley Iron* to 48s. 3d., *Stewarts & Lloyds* to 34s., *Richard Thomas* to 11s., and *United Steel* to 33s. 6d. All closing prices are above the best of the day.

Reflecting the large increase in orders which should result from various Governmental construction schemes, the Electrical manufacturing group has gone from strength to strength. *Associated Electrical* are now 40s. 6d., *Electric Construction* 31s. 6d., *General Electric* 69s. 3d., and *Siemens* 25s. 6d. Aircraft shares have returned to favour, the leading issues having risen several shillings. Motors keep comparatively firm at slightly improved levels.

Amongst the various industrial sections *Associated Cement* are 67s. 6d., *Eastwoods* 59s., *London Brick* 82s. 6d., and *Sussex Brick* 11s. 6d. in the building group. Other prices include *Amalgamated Metal* 26s. 3d., *British Aluminium* 43s., *Imperial Chemical* 37s. 9d., *Radiation* 72s. 6d., *Tate & Lyle* 88s., *Turner & Newall* 61s., *Electrical & Musical Industries* 27s. 3d., and *United Molasses* 20s 6d.

Leading Tobacco shares have been well bought at rising prices while textile and rayon shares have improved, although they close below the highest levels. For instance, *Courtaulds* are only 55s. 9d., after 57s.

Selling of Oil shares followed the announcement that no interim dividend would be forthcoming on *Shell Transport* ordinary shares, which are 3s. 9d. down at 79s. *British Controlled* preference have been well maintained, however, at 7s. 6d.

Conditions in the Rubber market have continued dull, with the usual result that prices have dwindled. There has also been little doing in Tea shares.

The tendency throughout the mining markets has been upward, some very useful rises having been seen in the leading Kaffir shares. Australian mining shares have also been firm. Considerable strength has been imparted to the West African market, where *Aristons* have recovered smartly to 9s. 9d.

Despite the sharp fluctuations in the price of the metal, Tin shares continue to be bought by far sighted investors. Copper shares are higher.

After the General Election.

Now that the General Election is a thing of the past it will be useful to weigh up the future possibilities of Stock Markets. The return of the National Government pleases financial interests in the City and the rest of the country. Satisfaction, however, is sometimes apt to create a feeling of false security, more particularly when the satisfaction is so widespread as in the case of the Election results.

Those who pause to consider the future will appreciate that we are now in sight of what may almost be termed a new economic theory, a theory having for its basis the conjuring of prosperity out of nothing.

The National Government has already borrowed several leaves from the Labour Party Policy. Most prominent of these borrowed ideas is the spending of huge sums of money to create employment. While these schemes are in themselves excellent the Government has not yet had the courage to tell us how they are to be financed. I think that I am almost safe in saying that the several hundreds of millions required to carry through these schemes will not be raised by taxation.

What will probably happen will be a growing snowball of "credit" prosperity, based on a revolving scheme of Government supported industrial inflation and a begging of the day for settlement.

How the Money will be Raised.

Dealing with this question in its latest monthly review one of the leading Stock Exchange firms, which, I should imagine, is one of the most conservative from the political point of view at least, sums up the matter by saying:

"We may be sure that a National Government returned to power, will be chary about additions to the already heavy burden of direct taxation. The fact that wealth must be distributed more equitably amongst the population is a policy which has been adopted by every political party, and the pace of this redistribution, which has been increasing with great rapidity during the past twenty or thirty years, cannot be accelerated without creating serious disturbance to the economy of the nation and creating a situation which would jeopardise the values on which it is based.

"It would appear, therefore, that to a considerable extent the money will be raised by loan. It so often appears to be thought that because deposits in the banks amount to astronomical figures that there is a vast amount of 'idle money' as it is called, awaiting some outlet which will offer more than the meagre return it now brings in. To a limited extent this is true. No doubt large sums would be taken off deposits to subscribe Government loans for Defence or Public Works. What we quarrel with is the idea that such money is at present lying idle, instead of its being realised that it is being to a large extent very actively used by bankers to finance current trade. Bankers, met with a demand for the withdrawal over a relatively short period of 100, 200, 300 millions to subscribe Government loans, must either realise securities, and at a price which will offer a more attractive return than the new issues, in which case the public, which takes what the banks offer, will draw on their deposits to make payment and so cause the banks to sell still more securities."

Time alone will prove or disprove the contentions of this firm.

In my own opinion we are entering, if not already living in, a "fool's paradise". There are as yet no early signs of a material set-back in British trade, but sooner or later we must, unless world trade recovers, come to the stage when a serious stock-taking of the position will be essential, if we are not to lose a great part of the recovery which has already taken place.

A Word of Warning.

While economic Sanctions imposed by a group of countries on another country are effective it is impossible to look for any expansion in the international exchange of goods. Although it is not prepared to admit the fact, the Stock Exchange has to-day taken cognisance of Sanctions. Towards the close of business an element of caution was distinctly noticeable in the gilt-edged and industrial markets.

All the same the under-lying tone is firm; the open position is of easily manageable proportions; and the outlook is such as to cause little fear of any violent upheavals.

I would be the last person to urge at the moment the wholesale turning out of good class securities. I cannot even go to the extent of advising the sale of other than highly speculative shares.

Despite these factors, however, this is not the time for investors, and especially speculators, to be tempted out of their depth. Open commitments should be kept to the minimum and holders of British Government stocks should be prepared to realise at short notice.

Latest News from British Industry.

Many announcements have been made by important British companies during the past few days. As space is limited this week I can only refer to these items of news in summarised form.

Taking the Steel industry first, latest statistics show that the output during the month of October reached the highest level for 8½ years, the figure of 907,300 tons comparing with 855,900 tons in September, and 812,000 tons in October 1934. Production of pig-iron was 544,300 tons in October last, compared with 529,600 tons in September, and 527,100 tons twelve months previously.

To finance the acquisition of the assets of Ebbw Vale Steel Iron and Coal company, *Richard Thomas & Co.*, is to make an issue of ordinary shares on bonus terms. At the same time I understand that the outstanding debenture stocks will be converted to a lower interest basis.

Yarrow & Co., the marine engineers, shipbuilders, etc., reports profits of £30,680 for the twelve months to June 30th, compared with £37,032 in 1933/34. The dividend is maintained at 10 per cent., earnings being 23.6 per cent. (29 per cent.) on the £150,000 issued ordinary capital.

Railway Traffics.

Home Railway traffics for the 45th week of 1935 again disclosed an increase, totalling £63,000. A rise of £33,000 in coal traffics is accounted for by heavy movements on fears of a strike amongst the miners.

The interim dividend on *British Oxygen* ordinary shares is raised by 3 per cent. to 7 per cent. For the whole of 1934 the dividend was 15 per cent., but I understand that the raising of the interim is dictated by the policy of reducing the disparity between the interim and final distributions and not from any increase in profits.

The Court has now sanctioned the capital reduction scheme of *Imperial Chemical Industries.* In due course one £1 ordinary share will be given in exchange for every four 10s. deferred shares. By this operation the issued capital will be reduced by £5,434,141 to £89,565,859.

Repatriation of the 1,700,000 10s. ordinary shares of *Electric & Musical Industries,* held by Radio Corporation, the American company, is now confirmed. Messrs. Morgan Grenfell and Edward de Stein have bought this holding for £2,044,000. In due course the repatriated shares will be marketed through the usual channels.

Motor Industry Prosperity.

An interim dividend of 50 per cent. is declared by *Vauxhall* Motors, which is controlled by General Motors Corporation, New York.

Profits of *Humber Limited* rose by £7,333 to £231,927 during the twelve months ended July 31st. Dividend on the deferred shares is 10 per cent.

S. Smith & Sons (*Motor Accessories*) record an increase of £12,027 to £137,383 in profits for the twelve months to August 3rd. Preferred dividend is maintained at 14 per cent. and deferred ordinary distribution at 25 per cent. During the year capital was, however, increased by £64,000, so that present payments take £63,000 in all, against only £50,000 last year.

Total dividend on the 1s. ordinary shares of *Dennis Brothers,* the commercial motor vehicle manufacturers, is 150 per cent. for the year, compared with 133⅓rd per cent. A special non-recurring bonus of 50 per cent. free of tax is also to be paid out of surplus on assets realised.

Brewery and Sugar Company Results.

Two of the leading brewery companies are increasing their final ordinary dividends. Total distribution of *Bass, Ratcliffe & Gretton* is brought up to 22 per cent., as against 20 per cent., and *Benskin's Watford Brewery* dividend is raised by 2½ per cent. to 17½ per cent. for the twelve months to September 30th last, the final distribution being 11½ per cent. (10 per cent.).

The directors of *Tate & Lyle,* the big sugar manufacturers, recommend a final ordinary dividend of 14 per cent., which, with the interim of 6 per cent., makes a total of 18.2857 per cent. for the year, compared with 22½ per cent. a year ago. Since the interim payment was made on account of the past year the ordinary capital has been increased by a 40 per cent. scrip bonus.

Two of the leading manufacturers of brewing sugar report satisfactory progress. *Manbre & Garton* is increasing the ordinary dividend for the year from 13½ per cent. to 14 per cent. and the deferred from 65 per cent. to 68.8 per cent., while the full report of *Associated British Malsters* reveals that net profits during the year ended August 31st, 1935 rose by £4,102 to £94,758. After allowing for preference dividends, earnings on the £250,000 ordinary capital were 22.8 per cent. (21.2 per cent.). As already announced the dividend is maintained at 10 per cent. The consolidated balance-sheet reveals that reserves and undivided profits of over £498,000 go against fixed assets of £1,215,000.

Other Important Industrial News.

The ordinary dividend of *Unilever Limited* is being maintained at last year's equivalent rate. Owing to the method whereby dividends are declared, the sterling equivalent this time is 3⅓rd per cent. as against 3¼ per cent. a year ago, the change in the Dutch exchange rate accounting for the difference.

In their quarterly report the directors of *Wiggins, Teape*, the paper manufacturers, indicate that net profits for the nine months to September 30th last were £219,535, an increase of £42,514.

A second interim dividend of 4 per cent., making 8 per cent. to date, is to be paid on the 5s. ordinary shares of *Eno Proprietories*, the vendors of patent medicines.

Net profits of *British Cotton and Wool Dyers' Association* for the six months to September 30th were £27,812 (£17,225). The figures are struck after providing for all expenses, repairs and specific depreciation.

Including a bonus of 2½ per cent., the total distribution on *Charterhouse Investment Trust* ordinary shares is to be maintained at 10 per cent. I fully anticipate the report will make a strong showing.

Mining Developments.

Considerable interest is attached to the quarterly report to September 30th last of the big Canadian company, *International Nickel*. The net figure of $7,742,584 goes against $4,005,166 in the corresponding quarter of 1934, and $5,420,615 in the June quarter of 1935. Profits for the nine months to date total $18,080,827 ($14,017,808), equal to $1.14 ($0.86) per common share.

The big decline in the average market price for zinc during the twelve months to June 30th, 1935 was responsible for a fall of £9,556 to £145,428 in the profits of *Imperial Smelting Corporation*, which holds extensive interests in the metal industries. Although preference dividends are earned with a small surplus it is not possible to pay any ordinary dividend. Prospects for the current year are much brighter, the prices of base metals have risen sharply since June 30th.

Quarterly report of *Roan Antelope Copper* mines estimated the net profit for the three months to September 30th at £99,000, as against £74,345 in the corresponding quarter of 1934.

Interim dividend on *Central Mining & Investment* £8 ordinary shares is to be maintained at 8s. per share.

One of the outstanding features in the West African Mining market has been the long awaited recovery in the price of *Ariston* 2s. 6d. shares. Buying was encouraged by the excellent monthly report for October, this showing a working profit of £14,467—the highest figure for many months.

A second interim dividend of 5 per cent., making 10 per cent. to date, is declared on the 5s. shares of *Associated Tin Mines of Nigeria*.

Market Pointers.

Judging by recent increases in the export duty it is evident that the Dutch Government is making every effort to control the output of native rubber. Eventually these efforts will be rewarded.

A third interim dividend of 5 per cent., making 15 per cent. to date, is declared by *London Brick Company & Forders*.

Considerable disappointment followed the decision of the directors of *Shell Transport & Trading* to defer for the present any decision as to an interim dividend. I feel strongly that matters other than the present profit earning capacity of this big enterprise have influenced the directors in deciding to omit an interim dividend, which has been taken to be almost an accepted fact. On no account should the shares be sold.

After falling to 18s. 6d. on the passing of the dividend, *Peninsular and Oriental Steam Navigation* deferred units have recovered smartly to 20s. Until the full report is published they should not be parted with.

East African Gold Fields 5s. ordinary shares keep firm at 8s. 3d. I understand that a big market operator may shortly take an interest in these shares.

A. W. Consolidated Stock Trust 5 per cent. income debentures have been the subject of some good buying at up to £52.

Until something more definite is known as to the attitude of the miners on the question of a general strike, coal shares will continue to fall in price. The position will need careful watching, more so as exports will be affected by the coming into force of Sanctions.

BOURSES IN AIR MAIL WEEK

Paris.

The Bourse was open for the first time during the winter season 1935-36 on Saturday. It was closed on Monday on account of Armistice Day. The general tendency was irregular and political factors were responsible for this. Rentes declined and Banks were irregular. The raising of the Bank discount rate to 4 per cent. did not have any effect. The fall in rentes was sharp on the last day. Internationals were steady. Royal Dutch were higher at 21,790.

On the Coulisse, there was some improvement in diamond shares and De Beers Preferred were quoted at 1,045. Shares in the Gold Mining Group were strong.

	Nov. 8	Nov. 12	Nov. 14
4½% Rentes, 1932 "A"	83.30	83.55	81.70
4½% Rentes 1932 "B"	82.25	82.30	80.45
Banque de France	8,840.00	8,850.00	8,865.00
Credit Foncier de France	3,090.00	3,090.00	3,035.00
Suez Canal Shares	18,195.00	18,095.00	18,025.00
Thomas Houston	152.00	150.50	146.00
Chargeurs Reunis	172.50	163.00	168.00
Raffinerie say	1,580.00	1,575.00	1,568.00
Central Mining	1,758.00	1,758.00	1,768.00
Rio Tinto	1,400.00	1,390.00	1,407.00
Royal Dutch	21,280.00	21,490.00	21,790.00
De Beers Preferred	1,046.00	1,046.00	1,045.00
Rand Mines	625.00	633.00	653.00
Sub-Nigel	1,000.00	1,003.00	1,023.00

Berlin.

Easy conditions were prevalent on the Bourse early in the week. Banks were irregular. Minings were sold and Shippings were unsteady. But towards the close, a firm tone was in evidence. Banks were higher with Reichsbanks improving to 179. In Electricals, Siemens advanced to 163.5. Among Minings, Harpeners were back again at 108.

	Nov. 8	Nov. 11	Nov. 14
Reichsbank	176.50	177.40	179.00
Farbenindustrie	146.50	145.50	145.75
Siemen	162.50	159.90	163.50
A. K. U.	53.10	52.90	52.00

WALL STREET IN AIR MAIL WEEK

TURNOVER NEAR THE FOUR MILLION MARK

HEAVY BUYING OF ALL SHARES

By F. Rocke.

By Air Mail

Special for "INDIAN FINANCE"

Very heavy trading was witnessed once again during the week. The markets were closed on Monday on account of Armistice Day. The opening day of the week was a day for Utilities. Following up last week's decision of the Federal District Court of Baltimore that the Public Utility Act was unconstitutional there was an extremely active session, large blocks of Utility stocks changing hands at increased prices. Turnover in first hour was 1,310,000 shares the largest figure recorded since July, 1933. The total turnover for the day was 3,350,000. The Saturday short session was not so active as it was anticipated and there was a certain amount of caution in evidence. There was some profit-taking and markets closed irregular. On re-opening after the week-end holidays, Wall Street did not show any tendency to improve. Trading continued on a diminished scale for two days after which the boom was once again resumed by good political news regarding the President's budget and legislative plans. There was heavy buying of almost every share. Almost all the industrials joined in the advance. Some of the most notable rises were recorded by U. S. Steel at 49 3/8, Allied Chemical at 163½, International Harvesters at 62½, Atchison at 51¾, Bethlehem Steel at 47⅞, Kennecott Copper at 28¼ and General Motors at 58¾. The turnover totalled 3,950,000 shares, the highest since February 7, 1934.

On the Bond market, Government issues were firm and domestic obligations were higher.

Special margin requirements for "when issued" securities were announced on Wednesday by the Stock Exchange Business Conduct Committee, in order to enable the Exchange to apply for registration of securities or rights for dealing on a "when issued" basis.

Upon net long commitments in "when issued" rights the required margin is to be 100 per cent. of the net sum, payable by the member carrying the account upon settlement of contracts.

Upon net long commitments in other "when issued" securities the margin is computed by subtracting 55 per cent. of the current market price from the net sum payable when the contract is settled, but, if this 55 per cent. exceeds the net sum, the surplus has no value for margin purposes.

Rails were stong on reports of higher October earnings. Chesapeake Ohio and Great Northern were particularly strong.

Utilities maintained their improvement of last week. On Monday they were heavily bought. Prices jumped to higher levels. American Telephone rose to 148½ from 145⅞, Columbia Gas to 15¼ from 14⅝ and Consolidated Gas of New York to 32¾ from 30⅞.

It is widely believed that the Supreme Court verdict on the Utility Act will also be the same as that of the lower court. A revolt against the measure by utility holding concerns is likely and it is believed that they will refuse to register with the Securities and Exchange Commission as they are required to do by the Act not later than December 1. It is also rumoured that a new modified Utility Bill for action by Congress early in the new year is also being drafted by Government experts.

Oils participated in the general strength of the market. The daily average production of crude oil in the United States in the week ended November 9, was 2,802,250 barrels against 2,798,350 in the previous week, according to the figures of the American Petroleum Institute.

Gasoline stocks on November 9, totalled 40,780,000 barrels.

According to *Iron Age* steel mill activity for the past week was at 54 per cent. of capacity against 52.5 per cent. the previous week. Demand is continuing to expand broadly and there are no signs of anticipatory buying in view of the price increases.

An advance in finished steel prices is expected shortly following the strength of semi-finished products. The price of heavy melting steel scrap at Pittsburgh has been raised 50 c. per ton.

Steel ingot output in October totalled 3,116,184 tons against 2,829,835 in September and 1,481,902 in October, 1934.

Shipments of finished steel from the U. S. Steel Corporation were 686,747 against 614,933 tons in September and 343,962 tons in October, 1934.

There have not been any new developments in the automobile industry. Motor shares were again prominent during the week.

Estimates of the fourth quarter output filed with the Department of Commerce by Automobile Manufacturers total 750,000 units. This is double the 1934 level.

The Ford Motor Company has won an appeal in the Supreme Court for an award of $2,115,313 the interest on an over-assessment of income-tax in 1919.

General Motors' sales to domestic consumers in October totalled 68,566 units against 66,547 in September and 69,090 in October, 1934. Sales to dealers in the United States, Canada and overseas totalled 127,054 units against 39,152 in September and 72,050 in October, 1934.

Business Pointers.

Freight car loadings in the week ended November 2, totalled 680,662, a decrease of 27,164 from the previous week but an increase of 67,614 over the corresponding week last year.

Electric output in the past week totalled 1,913,684,000 kilowatt hours, an increase of 1 per cent. over the previous week and 14.2 per cent. over the corresponding week last year.

ADAMJEE JUTE MILLS, LIMITED.

NOTICE is hereby given that Dividends at the rate of Rs. 3-12-0 per share on 7½ per cent. Cumulative Preference Shares (Tax free) and at the rate of Re. 0-10-0 per share on Ordinary Shares (free of Income-tax) for the half-year ending 30th September, 1935 have this day been declared payable at the Registered Office of the Company on and after the 2nd day of December, 1935, between 11 a.m. and 4 p.m. on week days and 11 a.m. and 1 p.m. on Saturdays. The relative Dividend Warrants are being posted to the shareholders registered in the books of the Company.

By Order,
ADAMJEE HAJEE DAWOOD & CO., LTD.,
Managing Agents.

"STEPHEN HOUSE,"
Calcutta, 22nd November, 1935.
5, Dalhousie Square, East,

FOURTH BRITISH FIXED TRUST

Distribution of 3-3/5ths Pence Per Sub-Unit

Municipal and General Securities Company announces the third distribution by the Fourth British Fixed Trust of 3-3/5ths. pence per Sub-Unit, free of tax, payable 15th November on presentation of Coupon No. 3 at the City Office of Lloyds Bank, Limited, 72, Lombard Street, E.C.3.

The payment is in respect of dividends received by the Trust for the half-yearly period ended 5th October. An earned balance of .072d. per Sub-Unit is carried forward. The dividends included in the present distribution corresponding to those in the same period of the initial distribution last year, show an increase of approximately 1/5th penny per Sub-Unit, but the initial distribution of 5-3/5ths. pence covered a period of eight months and included thirteen more dividends.

A total of twenty-seven dividends—eight Final, eighteen Interim and one Cash Bonus—from twenty-two out of the twenty-four Companies in the Trust fell due in the half-year. Of these, twenty-three were paid at the same rates, with a maiden Interim by Ranks, and three were increased, namely, Babcock & Wilcox Final 4 per cent. (against 3 per cent.), Wm. Cory Final 12-1/2 per cent. (against 10 per cent.), and "Shell" 12-1/2 per cent. free of tax (against 7-1/2 per cent.). The present half-yearly distribution does not include any proceeds from the sale of "rights" or capital return. The last two Coupon payments do not cover a full year's dividend from each of the Companies, an Interim only from United Dairies being included.

The gross return on the distribution for the year ended 5th October at the original issue price of 20s. 6d. is £4. 7s. 8d. per annum, which includes 1s. 6d. per cent. net capital return on the sale of one odd Bonus Share per Unit. The gross yield at the current price of 21s. 3d. ex-div. is estimated at £4. 4s. 9d. per annum, excluding proceeds from the sale of "rights," etc.

Friday Evening.

Banks continue as uninterested in short credits as ever. They are reluctant to take any funds unless it be for three months or four months, in which case, the maximum they are prepared to pay is ¾ per cent. Interbank call money continues to be freely on offer at ½ per cent. in Calcutta and ¼ per cent. in Bombay; and we have again to record that these rates represent only the ideas of the lenders, there being practically no borrowers. Last week's reduction of the bank rate to 3 per cent. did, as was expected and as was intended, strengthen and accentuate the present sentiment of cheap money and the future hopes of the continuance of cheap money. Another factor calculated to lend further emphasis to continued easy money is the announcement, early in the week, of a 2½ per cent. British Treasury Funding Loan 1956/61 for £200,000,000 at an issue price of £96½, and of 1 per cent. Treasury Bonds 1939/41 for £100,000,000 at an issue price of £98. That the type of loan chosen on the present occasion is a one per cent. loan, is an unique event in the annals of British borrowing. It is true that the Bonds are short-term. They are repayable in 1939 at the earliest and 1941 at the latest. We may, perhaps, assume that repayment in the case of a one per cent. loan would be at the later date. In other words, the Treasury Bonds now issued must be deemed a six-year loan. Looked at from this ponit of view, that is, from the point of view of the loan being a six-year loan, the one per cent. type of loan that has now been put out with such conspicuous success must be considered a heroic achievement. It is also true that the issue price of the Treasury Bonds is £98. Assuming that the loan will be repaid in 1941 rather than in 1939, a discount of £2 in the issue price would bring the yield on the bonds to round-about 1.4 per cent. It must be acknowledged that the British Chancellor of the Exchequer has now succeeded in securing a six-year accommodation at a rate which, until recently, was the rate for, say, twelve months' Treasury Bills.

Equally remarkable from the point of view of the money market is the decision of the British Treasury to redeem the 2 per cent. 1935/38 Treasury Bonds. These bonds were issued in the autumn of 1932. It is no small tribute to the credit of the British Government and no mean expression of the daring, courage and skill of the British Treasury officials that the Treasury has been able to redeem the whole of a low interest issue as 2 per cent. 1935/38 Bonds at the earlier date of redemption. These loan operations afford a remarkable proof of the present cheapness of money in the London market and may also be taken as an indication of the faith of the British authorities in the beneficent uses of a cheap money policy and of their determination to persist in such a policy. In India which attaches great—and even exaggerated—importance to monetary trends in London, the current week has served to lend authority and weight to the lay impression that the busy season of this year will not mean any dearness of money.

Such weekly returns as have significance to the money market continue to suggest that, far from the current stage being the beginning of the busy season, December is more like a further extension of the slack season. The statement of the Imperial Bank for the week ended November 29 shows a small rise of Rs. ¼ crore in Advances while the rise in investments is over Rs. 1 crore. The Imperial Bank is, presumably, continuing its investments in Treasury Bills. Investments stand at a total of Rs. 51½ crores. Advances have shrunk to Rs. 18¼ crores. Cash balance is still as high as Rs. 18 crores. The statement of the Issue Department of the Reserve Bank for the week ended November 29, shows total notes issued at the high record of Rs. 194.96 crores, of which notes in circulation are Rs. 160.37 crores and notes held in the Banking Department are Rs. 34.59 crores. Rupee coin continues to swell up; and the latest figure is Rs. 58.82 crores. It is obvious that a good part of the increase in paper note circulation is accounted for by the return of silver coin from circulation. Turning to the statement of the Banking Department of the Reserve Bank, the position of Government balances has shown further improvement. On November 8, Government deposits had dropped so low as Rs. 6.28 crores. This figure would have been lower were it not for a ways and means advance of Rs. 1 crore taken by the Government from the Reserve Bank. The ways and means advance disappeared from the accounts as on November 22, on which date Government deposits stood at Rs. 8.17 crores. The cash balance of the Government on November 29 was Rs. 11.88 crores. The next return of the Reserve Bank should show a shrinkage in Government deposits as it will cover a period in which the usual month-early disbursements should have been made. From to-morrow begin large-scale payments to the market against Treasury Bills Maturities. Total Maturities in December are as much as Rs. 16.65 crores.

Up to the time of writing, the Government have not announced the revival of Intermediate Treasury Bills. Is this to be construed as a token that the authorities will be tapping the market for short-term bills only on the tender day ? It is difficult to say, at the moment, what exactly are the intentions and plans of the Government. In any case, there can be no harm in balancing Treasury Bills maturities with Treasury Bills sales during December, leaving the actual reduction of the floating debt till the final quarter of the financial year. This means that, in our view, there is a case for re-starting sales of Intermediate Treasury Bills at the tap-rate in the remaining weeks of December. There is, of course, the embrassing possibility of the Reserve Bank being inundated with vast sums in the form of intermediate Treasury Bills. But the authorities have always reserved to themselves the right to discontinue intermediates without notice. Considering the present condition of the money market, and considering the present ways and means position of the Treasury, we should, therefore, suggest that the next week's Treasury Bills *communique* should announce the commencement of intermediate Bills. Be this as it may, there can be no doubt that money conditions will continue extremely easy well into the New Year. In view of this admitted position and in view of the new loans put on the market by the British Treasury in the current week, the future of giltedge in India is all the rosier.

During the current week the exchange market was as good as dead. Business has been sparse but rates have remained steady. The rates, however, are more or less nominal. On the weekly sterling tender day, applications were received for £3,965,000 at 1s. 6 1/8d. Allotment was on the basis of about 25 per cent.

The closing rates are: 1s. 6 3/32d., December 1935—December 1936 T.T., with a small amount available at 1s. 6 1/8d., for February-March T.T. There were small buyers for Ready T.T. at 1s. 6 1/8d., the general rate being 1s. 6 9/64d.

Bills may be quoted: 1s. 6 3/16d., against confirmed letters of credit for any position up to December 1936. Without confirmed letters of credit, the rate was 1s. 6 7/32d., for any position.

Money was easy—easier than ever if that was possible. Banks are still reluctant to take any money at all unless it be for three or four months.

Firms' money for call, three days' notice, seven day's notice and term deposits for onemonth, twomonths, threemonths and fourmonths deposits quoted ¾ per cent. Twelvemonths deposits quoted 2 per cent. to 2½ per cent.

LLOYDS BANK
LIMITED
INCORPORATED IN ENGLAND
1677

SAVINGS
It may not be easy to save money at the present time, but it is even more necessary than in the past.
A convenient method of preparing for the payment of periodical demands for such purposes as holidays, insurance premiums, income tax, passages, medical expenses and school fees is to open a SAVINGS BANK ACCOUNT with Lloyds Bank and to place a small sum away regularly.
Interest is allowed at the rate of 2½% per annum. WITHDRAWALS CAN BE MADE BY CHEQUE.

* Markets closed.

Thursday Evening.

The downward course of the franc and the rise in sterling were, for the first time, arrested at the beginning of the period under review. But the reverse movement has not been persistent. Though, during the first three days sterling declined both in terms of the franc and in terms of the dollar, the two latter currencies again suffered a relapse. It is not necessary to mention that the rise in sterling was more than is indicated in the table at the head of this article as only the closing quotations of each day have been taken. In fact, sterling rose as high as 75.01 in terms of the franc on November 28 and the franc-dollar rate rose to 15.19. This marks for the present the nadir of the franc in as much as on the night of November 28, it was definitely known that the French political disturbances would not culminate in the overthrow of M. Laval and the recrudescence of ministerial chaos.

The fact that, for some time more, France will continue to enjoy a stable government has its obvious significance to the foreign exchange markets. The immediate effect of the vote of the Chamber was that the franc rose in terms of sterling from 75.01 to 74.88 and from 15.19 to 15.18 in terms of the dollar. But, as mentioned at the beginning, the rising tendency of the franc has not lasted during all the subsequent days covered by this review. The recovery of the franc was only up to the extent of 74.78 on December 2. Since then, a distinct weakness has been noticeable and the franc was quoted at 4.82 on December 3, 74.91 on December 4 and 74.94 on December 5.

There has been no report about the French political situation which could sustain strength and prevent a decline in the franc. It is understandable that the initial triumph of Laval, though it was followed by an immediate strengthening of the franc, has not been sufficient to re-assure the public mind fully as to the security of the French currency. For the debate on the motion of confidence in the Government moved by the Left Parties showed clearly that even the opponents of devaluation have not altogether ruled out the possibility of such a step. More than one speaker has referred to the manner in which devaluation was brought about in 'Britain 'and the extent to which Britain has helped herself and the world by taking such a step. M. Regnier, the Finance Minister, declared that the Government would not devaluate the franc to please the banks, but that, if they were given a proposal for a common currency with the other nations, they might consider the proposal. They could not, however, fix the franc on melting currencies such as the pound and the dollar. M. Paul Raynaud, the leader of the devaluations, emphasised that devaluation should be carried out at a time of calm and not of crisis. Thus the difference between the Government and the devaluationists may be said to have visibly narrowed during recent times. In these circumstances one cannot but rely on another round of devaluation in Europe. The speculation which Dr. Einzig has indulged in this issue as to the line on which the French situation might develop, may, in the light of the news of M. Laval's triumph, seem to be wide of the mark. But, in the long view it will be found to be quite valid.

The contrast between the interest rate in the gold bloc countries and that in Great Britain has been brought out clearly by the issue of a Treasury Funding Loan (1561-61) of £200,000,000 at 2½ per cent. per annum and of Treasury Bonds (1939-41) at £100,000,000 at one per cent. per annum. The issue price of the Funding Loan is £96-10-0d. per cent. and of the Bonds £98 per cent. Of the proceeds of the new Government loans £150,000,000 will be devoted to redeeming the issue of 2 per cent. bonds, January 1935-38 made on October 1, 1932, in which connection it is pointed out that it is a remarkable proof of the present cheapness of money and the high credit of the British Government that the Treasury is able to redeem the whole of this small interest issue before being compelled to do so. The remainder of the proceeds will be used to redeem £44,000,000 of 3 per cent. bonds leaving the balance available to reduce the floating debt.

This is the first time in history that the Treasury has been able to arrange a loan at the nominal rate of one per cent. The other important devaluationist country, namely, the United States, has also raised during the week new loans to the extent of $900,000,000 half of which is in 2¾ per cent. 10-year Treasury Bonds and the other half in 1½ per cent. 5-year Treasury Bonds. Holders of $419,000,000 worth of 9½ per cent. notes maturing on December 15 were offered an exchange for either of the new issues.

TREASURY BILLS

Tenders for Rs. 2 crores of 3 months' Treasury Bills were opened on Tuesday, December 3.

The total amount offered was Rs. 3,78,50,000. Tenders at Rs. 99-12-0 per cent. and above were accepted in full and those at Rs. 99-11-9 per cent. allotted approximately 64 per cent. Lower tenders were rejected. The total amount accepted was Rs. 2 crores, the average rate of accepted tenders being rupee one and pies nine per cent. per annum.

Tenders for Rs. 2 crores of 3 months' Treasury Bills will be received on Tuesday, December 10. Successful tenderers should make payment on Friday, December 13. Other conditions are as usual.

During the week ended November 29, bills for Rs. 3,75,25,000 were renewed in favour of the Issue Department of the Reserve Bank.

STERLING TENDERS

On Wednesday, December 4, tenders to the amount of £3,965,000 at 1s. 6⅛d. were received and were allotted approximately 25 per cent.

£1 million will be offered on Wednesday, December 11. Successful tenderers will have to take delivery of the allotments on Friday, December 13.

The total amount of sterling purchased by the Reserve Bank of India during the week ended November 29, was £1,000,000 at 1s. 6⅛d.

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of bussiness-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours ?

You have only to let us know your requirement and leave the rest to us.

NATIONAL INSURANCE CO., LTD.

LOOK AT THIS PICTURE—AND THAT

If, three years ago, Mr. Neville Chamberlain dazzled the world by the consummate tact and extraordinary brilliance of his conversion operation in respect of the 5 per cent. war loan for £2,000 millions, his achievement, in the current week, in the form of the successful floation of one per cent. Treasury Bonds —one per cent. type of loan is a record in the annals of British borrowing—is no less resplendent. It is the kind of operation that must at once impress the imagination and excite the envy of the Chancellors of the Exchequer of other countries. It is an operation which must shame the Indian monetary authorities and fill the Indian public with pain that despite the sanctity that is attached to British example and British practice, the Government of India have singularly failed to plan loan operations in this country on lines as daring and as fruitful as has the British Treasury. So far as *Indian Finance* is concerned, the success of British operations is a matter for mixed feelings. It gratifies our conceit to feel that our faith in a three per cent. borrowing rate for India stands vindicated. It saddens us to think that many a golden opportunity has been lost through the clumsiness or self-diffidence of our authorities. The difference between the technique of borrowing by the British Treasury and that of the Indian Treasury is vast and striking. In England, the conversion operators have not been a series of tiny affairs as in India. Two or three gigantic operations ; and colossal loans on high interest basis have been converted into loans on low interest. Again, the yield offered on the New loans in Britain is not more than what the market expected, not even equivalent to what the market expected, but considerably lower. In the case of India, the issue price has always been lower than general expectations. In other words, a new loan in London stimulates giltedge prices. A new loan in India is a painful shock to the giltedge section. In the conditions prevalent from time to time, the British Government manage to get as favourable terms as possible for themselves. In relation to the conditions prevalent in India, the Treasury has always been eager to give more than what is justified or expected.

* * *

The purpose of the loans issued this week is mainly for conversion and partly for finding new cash which can be utilised for reduction of the floating debt. Notice has been given of the repayment of 2 per cent. 1935-38 Treasury Bonds for £150,000,000. It has also been announced that the outstanding amount on the 3 per cent. 1933-42 Treasury Bonds will be paid off in full. As was pointed out in last week's issue of the *Investor's Supplement,* this is a scrip in the case of which the British Treasury may redeem no less than 10 per cent. of the outstanding amount per year. The words "no less than 10 per cent." are no bar to the Government deciding to redeem a far bigger proportion. The market was accustomed to place a literal and narrow interpretation on these words. It thus happened that while, a year ago, City circles in London were expecting that, as usual, 10 per cent. of the Treasury Threes would be redeemed, the Government came out with the announcement that 40 per cent would be repaid. This gave a bad jolt to the market at the time. In view of last year's experience, market circles were expecting, in the current year, that the Treasury might pay the entire amount outstanding on the 3 per cent. 1933-42 bonds. The balance that remains to be paid off is £44,000,000. When it became known last week-end that the entire sum of £44 million would be redeemed, the announcement did not, therefore, come as a surprise. Thus, the present position is that £150,000,000 of 2 per cent. 1935-38 bonds and £44,000,000 of 3 per cent. 1933-42 bonds will be paid out. It may be stressed, in this context, that the decision to redeem the whole of a small interest issue as 2 per cent. 1935-38 bonds reflects the highest credit which the British Treasury enjoys and the highest skill which British Treasury officials are capable of.

* * *

The total amount that will be raised by the loans of this week is £300,000,000. There are two loans, one a short-term and the other a medium-term. The short-term loan is in the form of one per cent. Treasury Bonds 1939-41 for £100,000,000 at an issue price of £98 per cent. The medium-term loan is in the form of a 2½ per cent. Treasury Funding Loan 1956-61 for £200,000,000 at an issue price of £96½. The total proceeds of loan will thus be £300,000,000. This will leave £100,000,000 for such purposes as the Treasury may deem fit, inclusive of reduction of the floating debt. Both the loans have been well received in the London market, and they were quickly subscribed. These loan operations have been successful in themselves and, what is more, have imparted a buoyant tone and cheerful temper to the whole range of giltedge securities. There have been considerable advances in the price of British funds and other prime stock. While most other countries are grappling financial conundrums of baffling complexity and difficulty, the British Government have afforded unambiguous proof of their abounding self-confidence in their own credit and in the integrity of the London giltedge market, and of their faith in the smooth tenor of world events. It is, perhaps, not a mere coincidence that the same week that brought us news of these loans has given an inkling of the peace talks that seem to be proceeding with favourable chances of success than on earlier occasions. In any case, it may be taken as certain that neither the British Government nor the London money market are unduly worried about any violent shocks from the Italo-Abyssinian war.

* * *

We can only hope that the Indian authorities have as much confidence in the credit of India and as firm a determination to utilise the credit in the best interests of national economy. Possibilities of conversion operations in the case of India are as immense and as splendid as those which the British Government have had and have utilised to the full. The impetus to prices, which was given by the success of the two loans, has naturally been felt by India sterling stocks also. There is still a big gap between the yields on India sterling loans and those on the securities of Governments analagous to the Indian Government. We should, therefore, consider that, in the new situation created by the loans of this week, there will be greater appreciation of the worth and value of India sterling stocks amongst British investors. We look forward to a substantial rise in the sterling stocks of the India Government. In the second place, there is still a gap between 3½ per cent. sterling paper and 3½ per cent. Rupee paper. There is hardly any justification for this gap to continue. It must not be forgotten that there is hardly any scrip available in the market in spite of prices having reached very high levels. The New Loan issued a few months ago at Rs. 96-8 is now quoting Rs. 101-4. With money cheap; with considerable investment demand, present and prospective; and with the encouraging news both about the Italian war and the London market, there is every reason to beleive that the future progress of prices in the Indian giltedge market would be and could be on such lines as to enable the Indian monetary authorities to take as great an advantage of their credit as the British Government have been able to do in England. Unfortunately, the British Chancellor of the Exchequer has courage and adroitness. The authorities in India are steeped in timidity and soaked in amateurishness. They are the kind of people who will give away 2 or 3 per cent. issue price to investors who do not expect them. The lesson and example of recent British borrowings must be to teach our authorities here that timidity does not pay in borrowing and timidity does not accord with high credit of the State.

INDO-AUSTRALIAN TRADE

India's trade with Australia and the possibility of expanding it have been brought to the fore by the recent visit of a Trade Delegation from the Commonwealth. The Delegation has no recognised official status, and it is, therefore, more in the nature of a visit of prominent businessmen with a view to explore the avenues of increasing trade with this country, than an official delegation ready to negotiate with the Government of India regarding the terms of a mutually favourable settlement. Though the unofficial of this trade delegation is in itself a recognition that the question of Indo-Australian trade is not, at any rate, at this stage, a matter for official negotiation, there are many who see in the visit of the Australians another step in the progress of the policy of the bilateral trade treaties which is dear to their hearts. For our part, we are hardly surprised that the irrational attitude, which lies behind the advocacy of trade pacts, threatens to deprieve people of a sense of proportion.

* * *

A glance at the table of imports and exports between India and Australia should suffice to convince one of the lack of possibilities of expansion of trade in these articles. However much it might be desirable that Australia and India should draw together on the strength of close commercial ties, it can hardly be contended that there is at present any means of bringing about that object. For Australia's share of our import trade in 1934-35 was only 0.7 per cent. and exceeded 1 per cent. only in the year 1931-32. In the pre-war years; it was no more than 0.5 per cent. Likewise, the share of the Commonwealth in our export trade was 1.8 per cent. in 1934-35 against 2 per cent. in the previous year and 2.9 per cent. in 1932-33. If it is realised that a bilateral trade pact is a double-edged weapon, which, while ensuring the trade with one country, endangers the trade with many others there would be little support for the view that a trade pact should be concluded with a country which has so little a share of our foreign trade.

* * *

It may be wondered whether Australia may not be induced to take more of India's exports by committing ourselves to no more than a lower range of duties on certain classes of goods. Such a question is natural, as the supporters of trade pacts are wont to cast greedy eyes, on the more important markets for our export stables. But the question can be answered only after a scrutiny of the different items constituting the trade between India and Australia. The following table furnishes the principal items of our import and export trade with Australia for the last three financial years and for the first seven months of the current financial year with the comparable figures for the two previous years.

It will be seen that the only item of export to Australia, which exceeds the one crore mark, is gunny bags and that the exports of other commodities account for only insignificant amounts. In any negotiation between the two countries for closer commercial relations, the Indian delegates can hardly be blamed if they are keenly aware of the fact that jute and jute goods are a monopoly of this country and that no *quid pro quo* need be given for the import by a foreign country of these commodities. It is quite certain that India's exports of tea and coffee to Australia are capable of a comparatively vast increase. But we would hold that no special inducements to Australia are needed in this instance and that the increase is largely in the hands of the trades concerned to effect.

* * *

The imports from Australia are more disheartening to the supporter of a trade pact with that country. For the total value of imports into this country

was less than a crore in 1934-35 and not much over it in the earlier years. The only important item is raw wool, of which India imported only 21 lakhs worth in the last financial year. Though the volume has shown an increase from 2.8 million lbs. to 3.0 million lbs. during these two years, it has been fairly stationary during the last three years. Any decision to increase the imports of raw wool would necessarily have to be based as our Delhi correspondent points out in the letter published in this issue, on a definite policy regarding the woollen industry in India. Whether the Government of India decide on developing the woollen textile industry or not, it is necessary to remember that the encouragement of the manufacture of woollen goods in India, with raw material imported from abroad, would not be exactly in accordance with the policy of discriminating protection as laid down by the Fiscal Commission.

* * *

It is in consideration of these facts that the Australian Delegation has decided to rest content with a general survey of the ground without making any efforts at actual trade negotiations. The sentiment, which Mr. R. F. Sanderson, Leader of the Australian Delegation, expressed in a press interview, are particularly to be commended. It is refreshing to hear, in these days of senseless grab for markets, that the visit would enable the Australian business interests to beware of trade development in spheres where India is likely to make rapid progress.

* * *

It is not to be inferred, however, from this analysis of the trade figures that the trade between India and Australia has no possibilities of expansion. One has to remember, in the first place, that the Cochin and Vizagapatam harbours open up new vistas of trade between India and Australia. Mr. Sanderson expressed the hope that Australia would one day play the same role in far eastern trade as Britain in the West. Though India has no desire to cramp the economic progress of the Dominion, she cannot help wishing that Australian economy would be more complementary to that of other nations of the world than British economy has been in the past. The fact that during 1934-35 India imported from Australia, for the first time, iron and steel materials, mainly ingots, blooms and billets and slabs of steel amounting to 10,000 tons raises the fear that Indian industry might be faced with serious competition in this sphere. But we prefer to believe that the imports of steel, like the imports of wheat, are a temporary phenomenon and that the opening of the South Indian harbours will afford new scope for the aspirations of Australian trade in India.

THE WAR

There have been so many variations in the news said to be coming from Addis Ababa or from Rome or from Paris that one is left guessing as to what has happened or is happening in the Abyssinian war zone. Reports of Itallian successes are released only to be denied or discredited; and the same uncertainty attaches to reports of Abyssinian counter attacks. All that can be said is that Italian troops have occupied a large area of Abyssinia, which offers strategic advantages to their campaign; and it may be assumed that Italy's modern military equipment has inflicted heavy losses on the defenders, who can hardly be called an army. Guerilla tactics have, it is claimed, hampered the movements of Italians and their long line of communications is said to have often been in danger. The sudden change in the Italian high command in Abyssinia would seem to imply that all is not well. The recall of Marshall de Bono and his cold reception at home are an index of the discontent that is felt in Italy regarding the progress in Abyssinia.

It has been suggested that Marshall de Bono was doing so well in Abyssinia, from the military point of view, that Signor Mussolini, trapped in Europe by his own aggression, had no alternative but to call the Marshall. It was the Marshall's job to conquer Abyssinia as quickly as possible: it was Signor Mossolini's job to provide him with war materials: and one can understand the Director's predicament when the League's sanctions began to dry up supplies. Why Marshall Badoglio, not an enthusiast over the Italian campaign in Abyssinia, was selected to take Marshall de Bono's place is another of those incongruous elements which envelop Italy's intransigence. And, his selection coming so quickly after his inspection of, and report on, the Tigre front, may be taken to mean that there is a difference of opinion on the strategy of Marshall de Bono and that headquarters at Rome have not swapped Marshalls in midstream without good reason. Whatever the facts are, the Italian plan has undergone a notable alteration.

* * *

This background probably explains the latest news of peace talk. According to reliable Paris reports, well-informed circles, think that, without there being anything definite, the atmosphere is more favourable for peace than ever before and that when M. Laval and Sir Samuel Hoare will meet the week-end, there will be enough fresh material on which to make another bid for peace. An exchange of territories between Italy and Abyssinia, with an Abyssinian outlet to the sea is, it is rumoured, one of the proposals under consideration. From Rome comes the news that Signor Mussolini has put forward secretly the minimum for compromise. Monsieur Laval has communicated to Signor Cerrati, the Italian Ambassador at Paris, the final proposals which France and Britain regard as a possible basis of settlement in the expectation that they would elicit an assuring response from Signor Mussolini, before the oil embargo meeting of the League. Rome is said not to be optimistic, as the Anglo-French proposals postulate, it is believed, a simultaneous suspension of hostilities.

* * *

It is believed that the suggestions outlined by M. Laval are (*a*) the cession by Italy to Abyssinia of Port Assab, together with a strip of territory on which a railway could be built from Addis Ababa to Assab: (*b*) the cession by Abyssinia to Italy of the whole of the Province of Ogaden and (*c*) rectification of the Tigre and Harar frontiers, with the return of Aksum and Adowa to Abyssinia. Obviously, in these, as in the earlier, peace proposals, Abyssinia is not a participant: that is, Abyssinia is to be carved according to the necessity of her invader or the diplomacy of her self-appointed wards British and foreign experts are said to be engaged in co-ordinating the proposals which would, in their view, constitute a reasonable basis for a settlement.

* * *

It may be that Signor Mussolini's bluff will be called by the impending embargo on oil and other key commodities: but the resentment of being baulked will be yet another of those explosive elements on which European peace is precariously perched. The resentment, already boiling over, will concentrate on Britain, whom Italy openly charges with manipulating the League Machinery, not for peace, but for gain. Britain's indifference to Japan's annexation of Manchuria is recalled with heat against her untiring exploration of League sanctions to cripple Italy in Abyssinia. Nor has the Italian Press failed to point out the position in Egypt. While Britain has sponsored Iraq's application for admission to League membership, she has persistently deprecated Egypt's candidature. England is muddling things in Egypt; and the Italian Press makes the point that self-interest in Egypt is Britain's motive in repudiating the League in the one case and utilising the League in the other.

The Italo-Abyssinian conflict may end under League pressure and Signor Mussolini's Empire ambitions may be thwarted. But that will only bring out the difference between the prevention of war and the establishment of peace.

EMPIRE OF INDIA'S INTERIM BONUS

As is to be expected, the interim valuation of the liabilities and assets of the Empire of India as on February 28, 1935, (that is, three years after its last quinquennial valuation) has produced very satisfactory results, enabling the company to increase substantially their interim bonus rates allowed to policies that will become claims during the last two years of the quinquennium ending February 28, 1937. In the previous regular valuation of the company as on 1932 February-end, the surplus disclosed was sufficient to declare a bonus of Rs. 15 per thousand per annum on whole life policies and Rs. 12 per thousand per annum on endowment policies and the same rates were allowed as interim bonus during the first three years of the current quinquennium. And the present result of an interim valuation have enabled the company to increase the interim bonus rates, (applicable to the remaining two years of the quinquennium) to Rs. 18 per thousand per annum on whole life policies and to Rs. 16 per thousand per annum on endowment policies.

* * *

Till recently, many Indian companies did not allow interim bonus to policies that become claims between two valuation dates, at the same rates as those declared in the previous valuation but granted only a much lesser rate. It is only as a result of keen competition that more and more offices began to grant interim bonus at the same rates as those declared in the last valuation. But to grant interim bonus at rates higher than those that prevailed at the last valuation, has not so far proved to be the fortunate experience of any Indian life office. In this respect, Empire of India has scored a big and well-deserved triumph. This, we are sure, will further enhance the prestige and popularity of the company to a considerable extent and may help it also to score higher and higher new business.

* * *

We trust, the directors have given very careful thought and consideration before arriving at this decision of increasing substantially the interim bonus rates. We have to strike this note of warning at the present moment particularly because of the very conservative investment policy pursued by the directors. More than 75 per cent. of the total assets amounting to Rs. 4½ crores is invested in giltedge and other trustee securities, government securities, forming 59 cent. of the total assets. It is well-known that, during the past four years, the yield on this class of securities has fallen down to a considerabel extent, from 6 to roundabout 3 per cent. As such, the interest source of profit (which is the chief one) of all insurance companies and particularly of those that invest only in the above class of securities is sure to fall to a great extent. In the case of Empire of India, there is still a difference of 1.2 per cent. in the earned interest yield over the rate of 4 per cent. assumed in its previous valuation. But if the present state of affairs in the giltedge section continues to persist for some more time, the average yield is sure to fall down still further. On the other hand, there may have been other compensating features such as improved mortality and reduced expenses that must have overweighed even the present trend towards lower yields. In any case, Empire of India authorities are the last people to take any step of this kind without fully appreciating its significance for the future. This only stresses the impregnable strength of the company and its trmendous inner reserves.

OTTAWA PACT

Of the many ills that have flowed from the Ottowa Pact, not the least is the profusion of literature on its effects. Much of it is amateurish ; not a few of the writings are interested, interested in the more gross sense that the writer is looking for official favour. We are relieved, therefore, to find the latest pamphlet on Ottawa written by Mr. Atul K. Sur. Mr. Sur is one of the younger Bengalee economists and has his eyes more on current happenings and the future prospects of Indian economy than on the dusty shelves of the Imperial Library. Though Mr. Sur's main conclusions are in accord with those of most critics of the Ottawa Pact, his desire to reason out objectively for himself is evident in every page. But the experience of Ottawa has not served to diminish his faith in trade pacts. We, for our part, go much farther than that the Ottawa Pact is a bad bargain. The bilateral trade pact is inherently vicious ; and the fact that Mr. Sur is not of the same view cannot prevent us from recognising the worth of his study.

A good long while ago, I wrote on the ethics and economics of leisure. With that admixture of the serious and the light, for which he is reputed, Bertrand Russell has now written a hymn in praise of idleness. As an exposition of the misfits that owe their origin to our failure to understand the full implications of such developments as modern science, latest machinery and mass production, *In Praise of Idleness* and other essays (By Bertrand Russell—Published by George Allen and Unwin Ltd.,—Price 7s. 6d. 1935) merits careful study and serious thought. The star pieces from my way of thinking are the first essay urging four hours work for all instead of the present over-work for some and unemployment and starvation for many others, and a later essay under the name 'The Modern Midas,' in which are examined most of the stupidities of the post-war era in relation to international finance and commerce. The theme in each of the thesis is so obvious and its truth so self-evident once you had read what Bertrand Russell has to say, that you begin to wonder how you had not thought of it before. And the problems posed are so fundamental in nature and so far-reaching in the extent of their sway that even if the present essays do not make world statesmen sit up now and think, the day is not far off when their minds, too, should be working in tune with the ideas herein elucidated.

The problem as regards leisure is simple. Modern technique has meant a tremendous curtailment of human labour. That is to say, the amount of labour required to secure the necessaries of life for everyone is to-day only a fraction of what it used to be in earlier ages. The war proved that, by the scientific organisation of production, it is possible to keep modern populations in fair comfort on a small part of the working capacity of the modern world. If, at the end of the war, the scientific organisation, which had been created in order to liberate men for fighting and munitions work, had been preserved, and the hours of work had been cut down to four, all would have been well. But what has actually happened? No one ever thought that the organisation that had grown up somehow, anyhow in the exigencies of the war had elements in it worthy of preservation and perpetuation. On the other hand, all that machinery was scrapped as being of only transient purpose and temporary use. The old chaos was restored. The cry everywhere was for a return to pre-war days and conditions. Those whose work was demanded were made to work long hours, and the rest were left to starve as unemployed. The result is that there is disaster on every hand, in every respect and in every country. Bertrand Russell stresses his case by an apt illustration:—

> "Suppose that, at a given moment, a certain number of people are engaged in the manufacture of pins. They make as many pins as the world needs, working (say) eight hours a day. Someone makes an invention by which the same number of men can make twice as many pins as before. But the world does not need twice as many pins; pins are already so cheap that hardly any more will be bought at a lower price. In a sensible world, everybody concerned in the manufacture of pins would take to working four hours instead of eight, and everything else would go on as before. But in the actual world this would be thought demoralising. The men still work eight hours, there are too many pins, some employers go bankrupt, and half the men previously concerned in making pins are thrown out of work. There is, in the end, just as much leisure as on the other plan, but half men are totally idle while half are still overworked. In this way, it is insured that the unavoidable leisure shall cause misery all round instead of being a universal source of happiness. Can anything more insane be imagined ?"

It is this very insanity which rules modern industry. If anyone suggests a reduction in working hours, he is howled down as a communist; he is a meddlesome busy-body who talks irresponsibly because he has no stake ; he does not, at any rate, understand that it is work that keeps adults from drink and children from mischief. The rich are simply aghast at the idea that the poor must have leisure and can make great use of leisure not only for the betterment of their own lives but for a sunnier, brighter and more satisfied society. As we are situated to-day ; as present society is planned and is accustomed to play and work ; as education has the particular objects and objectives which are now in vogue, the world population suddenly released to ampler leisure would not and might not know how exactly such leisure could be put to the wisest and best use. If the inevitability of leisure in modern economic conditions is realised, people would begin to give as much thought to the ethics and economics of work. A result of that greater reflection on the *what* and *how* of leisure would, no doubt, be a new orientation in mass education and a new conception of civilised society. It is not suggested that a four hour working day means that the remaining hours should be spent in pure frivolity. In the new social system which will come in to being on the universalising of four hours per day, an essential feature is that education should be carried further than it usually is at present, and should aim, in part, at providing tastes which would enable a man to use leisure intelligently Bertrad Russell does not think mainly or even largely of the sort of things that would be

considered 'high-brow.' He has furnished just a rough outline—but an outline that can be easily amplified:—

> "Peasant dances have died out except in remote rural areas, but the impulses which caused them to be cultivated must still exist in human nature. The pleasures of urban populations have become mainly passive; seeing cinemas, watching football matches, listening to the radio, and so no. This results from the fact that their active energies are fully taken up with work; if they had more leisure, they would again enjoy pleasures in which they took an active part."

In the result, one must agree that there is far too much work done in the world, far too much useless, unnecessary, redundant and wearisome work; that this over-zealous devotion to work has its root in the belief that work in itself is virtuous; that the time has come when the exploitation of leisure must engage all those who have been exploiting work; and that, for the new world created by modern technique in machinery and production, what is needed is just enough work for all to make leisure delightful, but not enough to produce exhaustion.

With work for all, and not too much work for any, there will be happiness and joy of life, instead of frayed nerves, weariness and dyspepsia; there will be purposiveness in life in the place of dead routine and dull monotomy; there will be ease and security instead of arduous and unending struggle. And ordinary men and women, having the opportunity of a happy life, will become more kindly and less persecuting and less inclined to view others with suspicion. War itself may be a thing of the past; for, war means long and severe work for all. Good nature can blossom only in a society which is at peace with itself and everyone. It is well-spent leisure that can make society feel at ease.

If superstition about work is responsible for the starvation of millions, superstition about gold is responsible for bankruptcies of nations. The story of King Midas and the golden touch is a simple and familiar story; but, as Bertrand Russell points out, its moral is one that the world finds very hard to learn. The story of King Midas has its entire counter-part in the poignant history of the exactions of indemnities from Germany. The worthy king of the fable was happy and proud when he received the boon that everything he touched would turn to gold; but he was aghast when the food he wished to eat became solid metal before he swallowed it, and he cursed himself for his insane greed when his daughter became a statue of marble as he kissed her. Thus did the most coveted boon become a hundred-fold curse. And what happened at the end of the way affords a parallel in every respect. Looking at the solution devised by the representatives of the victorious allies, Bertrand Russell finds it difficult to believe that the governments were composed of grown-up men not in lunatic asylums. The allies wanted to exact as much as possible out of Germany. So they imposed an indemnity. But what Germany was to pay was many times greater than all the gold in Germany, or even in the world. Germany could not, obviously, pay in gold. Which meant that Germany had to pay in goods or not at all. Then the allies decided that the Germans should pay in the form of such and such goods. But the threat of German competition to the industrialists of each of the allied countries was everywhere resented; and it had to be decided that Germany must not pay in goods. The logic of events led to the ultimate stage which implied that Germany must pay but must not be allowed to make payment in any particular form. To this lunatic situation, as Bertrand Russell puts it, a lunatic solution was found. Why not lend Germany whatever Germany had to pay? When it came to the payment of interest on these loans, it became necessary to lend Germany the money to pay the interest. People were bound to get tired of this game and they did get tired. Ultimately there was bankruptcy first in Germany,

then among those to whom bankrupt Germans owed money, then among those to whom those people owed money, and so on.

All this havoc could have been mitigated if the allied statesmen had not confused between the standpoint of the consumer and that of the producer, or, more correctly, of the producer under a competitive system. "When the indemnities were imposed, the allies regarded themselves as consumers; they considered that it would be pleasant to have the Germans work for them as temporary slaves, and to be able themselves to consume, without labour, what the Germans produced. Then, after the Treaty of Versailles had been concluded, they suddenly remembered that they were also producers and that the influx of German goods which they had been demanding would ruin their industries. They were so puzzled that they started scratching their heads, but that did no good, even when they all did it together and called it an international conference".

Or, take the other superstition about gold. It is an open secret that it was the machinations of France that pushed England off the gold standard in the Autumn of 1931. These machinations had their origin in France's lofty desire to teach England a lesson. The English, too, believed at the time that the divorce from gold was most humiliating to the prestige of London and the integrity of sterling. But what has subsequent experience proved? France did England the best service by forcing the issue in 1931. Nothing better could have happened for British interests than the abandonment of gold standard four years ago. The third superstition about gold, and by far the most absurd, is gold mining. Gold is dug out of the earth in South Africa and conveyed to other countries where it is again placed underground in the vaults of banks. For all the use that gold is put to after it emerges from mines, it might just as well have been left underground in South Africa. One can understand pre-war conditions in which gold was still used for small sums. But how many amongst us to-day know even the look of a gold coin? There is, however, a popular belief that it is the hoard of gold in the cenral banks of the countries that ensures everybody's financial safety. "During the war, when submarines made it dangerous to transport gold, the fiction was carried still farther. Of the gold that was mined in South Africa, some was deemed to be in the United States, some in England, some in France, and so on, but in fact it all stayed in South Africa. Why not carry the fiction a stage further, and deem the gold has been mined, while leaving it quietly in the ground?"

These and other opinions of Bertrand Russell are frankly upsetting to orthodox modes of thought. The vested interests would fight, tooth and nail, against everyone of his suggestions and ideas. Those who control finance propose to perpetuate that control. But there can be no salvation till the present kind of orthodoxy melts into thin air and till world thinkers have clarified the new ecconomic theories suitable for the new world which is definitely upon us and which, in our timidity and conservatism, we are not prepared to recognise.

Martins **SUGGEST**

that there is great scope in Calcutta for the development of the Modern Service Flat. This type of residence, which has taken the world by storm, undoubtedly solves the living problems of thousands of semi-well-to-do people temporarily settled in big cities. They would be very pleased to co-operate in any enterprise that proposed putting up a block of flats to be an outstanding architectural landmark in Calcutta.

BUILDING DEPARTMENT

Inserted by—MARTIN & CO., 12, Mission Row
'Phone: Cal. 6020

OLYMPUS

(FROM OUR CORRESPONDENT)

New Delhi, December 3.

Trade talks dominate the situation here ; and I am sure this is causing undue strain on the Commerce Department. Japan has already taken up the question of revision of her Cotton Agreement ; Iranian Minister for Foreign Affairs had a talk the other day ; the Australians (not the cricketeers) are now in New Delhi ; Ottawa is causing the Department no amount of trouble in preparing a case for the Assembly and trade with Italy is adding its quota of anxieties.

* * *

We have no such body here as the Board of Trade. The Commerce Department, the Finance Department and the Central Board of Revenue are concerned with trade matters in varying degrees and collaboration between them takes time. At the top of it the Government of India has no expert machinery and the departmental knowledge acquired by I.C.S. officials is their mainstay.

* * *

The present experience may lead to a consideration of the overhauling of departmental machinery. The unfortunate part of the affair is that the I. C. S. claims for all departmental posts stand in the way of developing expert advisory bodies. Thus, even where expert advice can be had, such as by the appointment of an Economic Adviser, the claims of I. C. S. men only are considered. A change will occur in this outlook only when Federal Government comes into being.

* * *

The Australian Trade Delegation is not representative of the Dominion Government but has its blessing. Every Dominion feels that it is buying more from India than it sells and that it should have a better market in India. The Australian Delegation came out with that objective. I doubt if much will come out of the Delegation's visit, except that the development of Cochin and Vizagapatam offers possibilities of better trade in fruits. But fruits of the kind they supply are not quite suitable for Indian consumption ; and India herself would like to be self-contained in the matter of her fruit supply. Dairy products, too, cannot be encouraged, but only at the expense of internal development of this industry.

* * *

Wool provides some scope for development of trade with Australia. That, however, will happen, if the Government of India take up a particular attitude with regard to the development of this industry. Government seem still to be uncertain as to what they will, or can, do to help the woollen industry. But if it is decided to let this industry manufacture fine quality of woollen goods, then Australian wool would be in demand ; not otherwise. But so far as balance of trade goes, the fact that jute contributes the largest part of our exports to Australia, cuts the ground from under the feet of the Australians. Jute is our monopoly just as wool is an Australian monopoly and cannot be stressed too highly in the matter of trade exchange.

* * *

At any rate, the Trade Delegation is leaving Delhi to-day with an excellent impression of the courtesy and hospitality it has received everywhere. The Delegation came out to test the possibilities of the market in India and has had a view of it. What it has learnt is that mere statistical datas about millions of population and their consuming capacity, do not apply to India ; that India herself is an agricultural country and that it is no use building up trade in spheres where India herself proposes to go ahead as a matter of national policy. They have learnt all these things from Government spokesmen. The result is that the Delegation has obtained a realistic view of the situation in India and their Leader told me that the only way to develop their business in this country is for the very best brains from Australia to travel in this country and know the market and develop it. The Australian Government acted wisely in associating businessmen with the Delegation. Mr. Sanderson visualizes Australia developing into another England and becoming the centre of trade activity for the East and Far East. How Japan and India will react later on to this is not thought of at present. However, so far as India is concerned she has not to look so far ahead. Her problem with Australia is simple.

* * *

The case of Japan is different. There are some in Japan who have described the Cotton Agreement as a "shameless surrender" of Japanese interests. That is not so, but the fact remains that trade figures for the past six months show that, whereas India has exported the maximum amount of raw cotton to Japan, the latter is below its quota in respect of piecegoods. Two explanations are given to this state of affairs. Firstly, that Japan is not worrying so much about the Indian market, which may be lost at any time, as it is about the markets outside the British Empire and Europe. Japan thinks she will not face restrictions in those markets for some time to come. Secondly, that the machinery of export licenses has restricted initiative on the part of Japanese manufacturers in finding their markets and pushing forward their sales and further that the competitive basis in respect of about a fifth of the export licenses in Japan has put up the price for licenses and has acted as a deterrent to exports.

* * *

Any way, Japan will try to strike a better bargain next time ; and as India cannot afford to let her have a bigger share of this market, Japan will have to look elsewhere. Another complication is that Lancashire has, during the last two months, had an increase in activity which is unprecedented for the post-depression period. And the increased demand is in respect of cloth below 45 counts. This means that the Indian cotton industry may find a potential rival in Lancashire in coarser cloth even at the present level of revenue and protective duties, and the position for the Indian industry may worsen, if, as a result of the Tariff Board enquiry, any reduction of duty on Lancashire goods takes place.

* * *

About loans and bank rate. I read the other day in a local paper a suggestion that the Government of India will shortly float another rupee loan. Well, one cannot expect any official to confirm or deny such a report, but the fact of the matter is that the Government of India has ample funds ; there is no liability maturing immediately. Perhaps, the speculation is based on the reduction in the bank rate by the Reserve Bank. This reduction was under consideration for some time and the Government of India were in closest consultation with the Bank authorities and approved the plan for reduction in the rate.

GATEWAY OF INDIA

(From Our Correspondent)

Bombay, December 4.

A comprehensive resolution aiming at the improvement of the system of education, moved in the Legislative Council by Mr. V. N. Jog, had to be held over owing to a full agenda which did not admit of the resolution being squeezed in. The resolution asked the Government to overhaul the machinery of secondary education whereby the existing courses of studies should be reshaped and bifurcated "at a certain stage" so that those who wanted to take vocational training or enter the University might be educated accordingly. Mr. Jog argued that the existing system of education was not only bad, but barren of any good results.

* * *

Our system of education—and not in this Presidency alone—is undoubtedly defective; or rather not suitable to present day needs. India (and Bombay along with India) is changing rapidly: what was admirable or adequate twenty years ago is now unavailing. A new economic, industrial and agrarian orientation has raised new educational issues; and, while it is necessary to adapt our education to changed circumstances, it is not possible to scrap the whole system inconsistently. Something more quitable has to replace it and, till that something comes into being, it is rather unreasonable to charge to education all our shortcomings.

* * *

I agree with Mr. Jog that the present curriculum does not cover the requirements of the country, specially in regard to secondary education and vocational training. The habit of looking at education only through the University lens has dragged in a load of misfits and it would profit the Presidency much were the habit discarded. At the same time, let there be no quibbling over the outstanding fact that the present education has wrought that change in our outlook that demands a re-adjustment. India (and Bombay with it) is the creation of the system we decry—a system that has set our feet and turned our face to a great goal. Other forces would undoubtedly accelerate our progress and the whole country is insisting on re-modelling, much as Mr. Jog would, a weapon that has served the country exceedingly well.

* * *

Even the Government of India have appreciated the trend of changed conditions and Provincial Governments have moved tentatively away from what is sometimes called higher education and sometimes academic education. The Central Government circularised Provincial Governments some time ago on the subject—the first motion of that cumbrous machinery which is the safeguard of the administration. Now that the machinery has moved, it will probably gather momentum by such motivation as Mr. Jog's resolution which, I hope, will be taken up at the next session of the Council, thus giving an opportunity to Government to indicate its mind on the measures implicit in the resolution.

* * *

While on the subject I may suggest that Sir Tej Bahadur Sapru's vigorous denunciation of graduate-manufacturing factories was overdone. There is nothing despicable in "a clouded land of culture," any more than there is anything despicable in milk-selling graduates. In the United States and in Europe there are graduate waiters and graduate bricklayers and, possibly, graduate butchers: the work is done all the better by a graduate. It is the economic resultant that is the Indian graduate's duress. If one has to choose, the cultured beggar is better than the vulgar one; it is the very essence of culture that it is above the beggar's bowl.

* * *

Bombay has received two Committees—one on income tax and the other on delimitations. The former has begun working, with the assistance of Khan Bahadur T. B. Vacha, Income Tax Commissioner. The Delimitation Committee is expected to complete its work in a week, which will include consultation with officials, the consideration of representation of Indian trade and commerce and of the scheduled castes. The Bombay Corporation will have its own axe to grind and Labour will not be denied another hearing. Most of the evidence before the Committee will be *in camera*—a procedure which does not commend itself to Indian opinion. So many important decisions will depend on the evidence that public confidence would be ensured only by an open investigation.

* * *

The first session of the Ahemedabad Students' Conference was remarkable for the consciousness of the need of social reform. To re-construct Indian society was the dominant feeling of a gathering of students who in the years to come will take, each in his place, a turn at the national workshop. The Conference was composed mainly of Hindu boys and girls, with a sprinkling of Muslims of both sexes. The feeling of brotherhood and sisterhood was excellent; and, more on account of what the Conference stands for than its results, I welcome it as one of the agencies for a better rationing of the two communities.

LARGEST PRESSED STEEL TANK IN THE WORLD

3½ MILLION GALLON RESERVOIR IN THE HIMALAYAS FOR MURREE

On a site so inaccessible that aerial-ropeway and bullocks provided the only possible forms of transport —where snow for a quarter of the year prevented all possible progress : under such conditions this immense steel tank was completed in under six months, a fitting commentary on the efficiency and resources of the Braithwaite organisation.

SOUTH INDIA

(From Our Correspondent)

Madras, 2nd December, 1935.

The Central Delimitation Committee, more affectionately termed The Hammond Committee, arrived here last week. The Committee opened and closed taking oral evidence in the City with dramatic suddenness. Sir Laurie Hammond's reputation for tactful handling of witnesses and for getting the best out of them, without letting them wander away from the point, had preceded him. When giving evidence before Committees and Commissions, many a witness has found the temptation to make excursions into fields distinctly beyond the scope of the Committee's examination difficult to resist. If these public-spirited gentlemen, who display such commendable anxiety to benefit particular sections or interests by the weight of their evidence, realised that irrelevance on such occasions involves a waste not only of the Committee's time, but also of the tax-payer's money, it will not be necessary to have men of the type of Sir Laurie Hammond presiding over committees.

Among the diverse interests whose points of view were urged before the Committee were, the Southern India Chamber of Commerce, the University of Madras, the Indian Christian community, the Nattukottai Nagarthars, Depressed Classes, Labour, Moslems, European Commerce, and women. The oral evidence revealed, among other things, the absence of co-ordination between the various chambers of commerce. Another rather disconcerting spectacle was that of a certain commercial body, dead as a door nail, suddenly springing into life and claiming the rights of a special constituency to itself. An interesting feature was the manufacture of a brand new "merchants' chamber," a few days before the Committee's arrival. The Chamber's first function was to submit a ponderous memorandum to the Hammond Committee. I am hoping it will not be its last function. No Congressman gave evidence before the Committee, in obedience to the firman issued from Headquarters. If the recommendations of the Hammond Committee are to be based on Madras evidence, there will be numerous sectional constituencies with only a very small number of general constituencies. We shall, indeed, have a pitiful democracy—a democracy distorted beyond recognition by a kind of amateurish plastic surgery. That would be representative government on prohibitive terms and it is unlikely that the Hammond Committee will let us in for it.

The Rotarians of Madras were treated to a thought-provoking address at a luncheon meeting on Friday last by Major H. G. Howard, on Electric Power Supply in this province. Major Howard's unique position as the helmsman of the Electricity department of the Madras Government enables him to speak with inside knowledge of the subject. His speech served to shake the self-complacency into which South India is gradually lulling itself in regard to the spread of electricity in this part of the country. Major Howard stated that electrical development is in its infancy in this province. That in recent years there has been rapid development does not alter this fact. As against 19 licensed electricity undertakings in 1929, we have 49 to-day. The supply of hydro-electric power from Pykara has certainly stimulated the spread of electricity. The per capita consumption of electricity in this province is, of course, considerably less than in the Bombay or Bengal presidencies, while the capital expenditure on electrical development by the Madras Government was approximately a third of what the Punjab Government had spent. The Major thinks we are still very far away from the saturation point. He pointed out the importance of establishing a series of transmission systems or grids in the province.

The figures given by Major Howard of comparative per capita consumption of electricity in diverse countries are not exactly soothing to our vanity. Sweden seems a voracious consumer with 825 units while Great Britain comes a good second with 370. France takes the third place with 350, while Italy follows with 270. Coming nearer home, we drop to single digits, with Mysore consuming 9 units. And what about Madras? It comes off with a meagre 1.50. Saturation point, indeed!

Major Howard next dwelt on the desirability of constituting an Electricity Board for Madras. He also pointed out the importance of reconciling the interests of the consumer and shareholder. It is to be hoped that the Electricity Board when constituted will be able to reconcile these points of view without calling upon existing electricity undertakings to make undue sacrifices. South India is beginning to outlive her reputation for shyness of capital; and somehow the South Indian investor has ventured to put quite a lot of money in electricity companies, convinced that the investment is as good as gilt-edge. Any impetuous step on the part of Government may easily dislocate the present satisfactory working of these companies and in turn frighten the investor out of the field. Nationalisation of public utilities is an excellent maxim of the socialist copybook, but is yet a far cry. Meanwhile, it is important not to smother the tender plant of incipient investment-mindedness, which it has taken so much time and trouble to rear in South India.

By far the most significant statement made by Major Howard is that it is wrong to think that hydro-electric power is in every case more economical than steam. The reason is not far to seek. To quote his words: "On a strictly economic basis, it is a question of balancing the annual charges on the hydro-electric system against the higher production costs but lower fixed charges of the steam turbo-electric system." This is probably the reason behind the proposal to establish three large-scale thermal stations to meet the electrical requirements of the Circars. These together with the Mettur and Pykara hydro-electric systems in the South will constitute the provincial grid-system, which will amount to a realisation of Major Howard's dreams. In this connection, Major Howard has to provide a satisfactory answer to the undoubtedly embarrassing, but inescapable, question: Will the interests of existing sound concerns in the Circars like the Vizagapatam Electric Supply Co., Ltd., be sacrificed at the altar of the thermal station scheme? Everybody's good wishes go to Major Howard in his splendid efforts to make South India Electricity-minded; but let him not allow the grid idea develop into a Moloch crying for the blood of the existing young electric supply undertakings in South India.

The Indian Coffee Cess Committee met the other day at Bangalore. The committee decided to make Bangalore the headquarters of the committee. After appointing two sub-committees—the Executive and Marketing sub-committees, the committee discussed the quesion of propaganda for Indian Coffee. The committee agreed on the necessity of a propaganda campaign, both in this country and the United Kingdom. The Marketing Sub-Committee has been entrusted with the task of exploring the possibilities of co-ordinating the work of the Indian Committee with the work of other coffee producing countries. The sub-committee will also arrange for a marketing survey which will enable them to start propaganda in places where they will obtain early results. The committee recommended to the Government of India that the rate of cess for the present should be annas eight per cwt. They also decided to start propaganda in the first instance in the Deccan. The committee will, in co-operation with the Mysore Coffee Growers' Association, arrange for a demonstration at the Hyderabad Exhibition in February, 1936.

THE FRENCH CRISIS

HOW LONG WILL THE FRANC RESIST?

FINANCE AND POLITICS

By Dr. Paul Einzig

By Air Mail

Special for "INDIAN FINANCE"

London, November 25.

When in June last M. Laval succeeded in obtaining full powers from Parliament to deal with the financial situation, the crisis of the franc, which broke loose in May, came to an abrupt end. It was generally believed, however, that with the re-assembly of Parliament, France would be faced with another currency crisis. As is so very often the case, the prophets proved to be right, for the wrong reason. It was taken for granted, especially after the publication of M. Laval's unexpectedly drastic decrees, that the parties of the Left would never ratify measures which would expose them to unpopularity just before the general election. For this reason it was assumed that the refusal of the Chamber to ratify M. Laval's deflationary measures would be the cause of the crisis. In reality, developments in the sphere of politics have overshadowed questions of monetary policy completely. At the time of writing it looks as though France will experience a very critical period during the coming weeks. In face of the possibility of violent disturbances caused either by the Fascist leagues or by an attempt to dissolve them, the financial question has for the moment faded into insignificance. Indeed, it appears that the parties of the Left are now quite prepared to put up with M. Laval's deflationary decrees, provided that the latter is willing to tackle the Fascist leagues with a firm hand.

Paradoxical as it may sound, it is possible that Colonel de la Rocque and his Fascist Croix de Feu have for the moment saved the franc. But for the fear of the Socialists and Radical Socialists inspired by the activities of this organsation, M. Laval would probably have a hard time in having his decrees ratified and in having the budget for 1936 passed. As it is, he now finds the Chamber much more inclined to endorse the broad outlines of his deflationary policy than he ever dared to hope. Provided he is able and willing to undertake the disbanding of the Fascist leagues, he is likely to meet with no insurmountable resistance to his financial policy. It is only, if he cannot satisfy the parties of the Left that he will tackle the Fascist leagues firmly enough, that his Government is likely to be overthrown.

Thus, the gold drain is likely to go on persistently during the next few months. It is widely assumed that the French authorities are not likely to view the heavy outflow with equanimity, and that, sooner or later, steps will be taken which will, in practice, if not in law, amount to an embargo on gold exports. Nobody knows how long the outflow is likely to be allowed to continue. Many people believe an embargo or an export tax is imminent, but others are convinced that the reserve ratio will have to be much lower before any such drastic steps are taken.

Part of the funds taking refuge from France finds its way to London. This would not have been the case but for the consolidation of the National Government and the removal of the danger of a Mediterranean war. London is considered once more a safe refuge for foreign capital, whether in the form of sterling balances or gold deposits. Hence the rising trend of sterling during the last few days, a rise which would have been much stronger but for the operations of the Exchange Equalisation Account. The latter is endeavouring persistently—though not quite persistently enough—to prevent an unwanted rise in sterling. In doing so it is recovering some of the gold it lost during the last few months. Since the Bank of France was the recipient of the gold spent in support of sterling, it is only fair that no objection should be raised against British official withdrawals in connection with the present operations of the Exchange Equalisation Account. And yet, if an embargo is placed on gold withdrawals from the Bank of France, it will be partly in order to check the British official withdrawals.

The flight from the franc, however, is likely to continue for some time. Between now and the re-assembly of the Chamber on Thursday the movement will continue unabated, in spite of M. Laval's agreement with the Finance Committee. If the re-assembled Chamber should fail to pass the vote of confidence demanded by M. Laval, then the political crisis will accentuate the outflow of gold to no slight degree. Even if the crisis should be averted, or if it were to lead to a mere re-shuffling of the present Government, uneasiness about the political outlook would continue. Should M. Laval or his successor undertake to dissolve the Croix de Feu, fears of violence and civil war would in themselves be sufficient to induce French capital to seek refuge abroad on a large and increasing scale.

Should, contrary to anticipations, the parties of the Left assume Government, the flight from the franc would become further accentuated, both for political and financial reasons. While a Government based mainly on the parties of the Right can rely upon the support of the Army, in extreme emergency a Radical-Socialist Government would probably be refused assistance against the Croix de Feu. Thus, the chances of disturbances would be much stronger. From a financial point of view, the knowledge that the parties of the Left are much less dogmatic about devaluation than M. Laval will be borne in mind. In any case, Radical Governments have in France acquired the reputation of creating budgetary deficits rather than balancing them. Under their rule the deficit is bound to widen.

How long is the franc likely to resist the adverse pressure? Assuming that M. Laval succeeds in retaining power, technically he may be in a position to hold out until the general election. By that time, however, conditions in the country will be so unfavourable as to make a defeat of the parties supporting the Government a certainty. M. Laval is too clever a politician to sacrifice his political future for the sake of prolonging the agony of the franc by another six months. And yet the country as a whole is not in favour of devaluation. When the inevitable happens, it will have to come in a way which places Parliament before a *fait accompli* and which releases the Government from responsibility for it. It is, indeed, unthinkable that a devaluation law could possibly be discussed and passed by a French Parliament. The only way, in which the franc can be devalued, is by confirming a depreciation which has already taken place. This was what happened in 1928 when the franc was devalued to one fifth of its pre-War parity, and this is what will in all probability happen in 1936.

If and when the embargo on exports of gold comes, it will come gradually. Already the Bank of France is making use of various devices to discourage the outflow. Possibly before very long the Government will go a step further by introducing an export tax on gold. Such a measure would have considerable popular appeal as it could be presented as a measure taken against the wicked foreign speculators. Few people would realise at the outset at any rate, that it amounted to a devaluation of the franc. If a 20 per cent. export tax was established then the

MOTOR REVOLT AGAINST STEEL RING

NEW STEEL WORKS IN BRITAIN

GRISIS IN THE FRANC

By **Francis Williams**

City Editor: The "Daily Herald," London

(By Air Mail)

Special for **"INDIAN FINANCE"**

London, Nov. 30.

Judging by the Cabinet appointments, Mr. Baldwin has decided to go reasonably slow in his armament programme. Mr. Winston Churchill is still left in the wilderness ; and Lord Londonderry, whose outspoken delight in bombing planes has long been an embarrassment to the more peace-minded members of the Government, has been dropped with so hard a thud as to create not only a minor sensation in political circles but a social crisis which has resulted in Conservative M.Ps being robbed of their usual magnificent—though somewhat over-crowded—eve of Parliament jollification at Londonderry House.

One feels sorry for the Conservative M.P. but glad for the country that even a Conservative Government such as this finds Lord Londonderry's enthusiasm for death from the air embarrassing.

For the moment, therefore, there still remains mystification as to what the Government's exact armament plans are to be ; but an expectation that the profits of the armament companies, though, no doubt, they will still be quite handsome, will not be so considerable as was at one time anticipated by the optimists of the City.

Meanwhile, the iron and steel leaders have been making themselves thoroughly unpopular with certain of their consumers by raising prices, with the result that the Morris and Austin motor organisations, both big users of steel, have revolted, the Morris revolt, however, being purely verbal up to date, while the Austin directors, who apparently believe that the steel chiefs are past preaching to, have actually decided to build a steel plant of their own to supply their requirements.

It is still a matter of doubt, however, whether a plant on such a comparatively small scale as this will be, can be run sufficiently economically to give the Austin Company much material advantage from this move.

But it is important because it does draw public attention to the fact that the steel industry as it now exists under the protection of tariffs, has developed into a monopolistic ring, which is not only putting up prices against consumers, but is also, as I know from certain information which I have received, doing its best—and in such matters it is a pretty substantial best to prevent any new steel works from being set up.

It is the opposition of the steel ring which has prevented so far the completion of an economically sound and socially desirable scheme for starting up a new steel works at Jarrow.

More I think will be heard in the future of this steel ring, and it is not impossible that the Government may be forced by pressure of public opinion to take some action to make it pay a little more notice to the needs of consumers.

Meanwhile, in a protective home market—doubly protected indeed, first by tariffs and secondly, by the agreement with the International Steel Cartel which prevents any rapid increase of imports the steel industry is in a position to make substantial profits and is, I believe, making them.

Home demand is still rising and export trade moving though slowly—upwards.

Home demand is the big thing for the industry at the moment and what with armaments, even if on a smaller scale than originally anticipated, ahead, and signs of an increase in construction of office and factory buildings, in which, under modern methods, steel is used to a substantial extent, the outlook for some time seems comparatively rosy.

As I write, the Bank of France has just announced its third bank rate increase in a fortnight. I do not imagine that even the French authorities believe that this increase will be of any practical importance. The whole history of the past few years shows that during times of crisis Bank Rate rises have either no effect at all or exactly the opposite effect from the one which they should have in theory.

To raise the Bank Rate at a time when gold is leaving the country is, however, the correct thing to do and French bankers are, of course, always correct.

In this case it is, perhaps, particularly necessary to be outwardly correct because there is more than a suspicion that the bankers themselves have been responsible for the crisis and have, to put it bluntly, manufactured it in order to try and frighten the Left Wing group of parties in the French Parliament, who are growing restive under the double irritation of deflation and of M. Laval's hardly disguised love for Fascism, both abroad and at home.

It has now become part of the well-tried tactics of the Right Wing political parties, with whom the bankers and big financial interests are allied in their belief in deflation rather than devaluation and in, if there has to be an alternative, Fascism rather than Socialism, to frighten the French public by a financial crisis whenever there seems any danger that the Left Wing parties may decide to revolt against M. Laval and form a new combination more favourably inclined towards devaluation.

Previously these steps have been successful, French public oponion has been duly frightened and has become amenable to further doses of deflation and economy, and the financial crisis has stopped as soon as the Right has won its political victory.

At the moment the Left is, however, in a more rebellious mood than ever before and the schemes of the bankers may, possibly, this time go awry. They may even find that their own pet crisis runs away with them and becomes unmanageable, with the result that the devaluation which they fear becomes inevitable. But though that is a possibility it is not yet, I think, a probability, and for the moment the French financial crisis ought still to be taken with at least a grain of salt.

(*Continued from the previous page*)

real mint parity of the franc is lowered in practice by 20 per cent. To begin with, the franc will probably not be allowed to adjust itself to the new parity but will be supported by official sales of gold and by e[illegible]ange restrictions. Gradually, however, it will [illegible]llowed to slip down, and it is only after the excha[illegible]e rate has adjusted itself to the new parity that the Government will introduce the bill for the devaluation of the franc.

It is possible that France will simply suspend the gold standard and allow the franc to find its own level. This cannot, however, be done until the technical strength of the franc has declined quite considerably. However it may be, it is now taken for granted that 1936 will witness the collapse of the resistance of the franc.

OVERSEAS' NEWS: By Air Mail

Week ended Nov. 23

UNITED KINGDOM

GOVERNMENT'S VICTORY

The Government is dissolved: long live the Government. That is the general feeling in the country at the Miniserial majority at the polls. The latest figures of votes cast show that there were 11,616,237 for the Government and 10,653 for the Opposition, out of an electorate of over 31,000,000, the largest number of voters in the history of the country. At the dissolution of Parliament, the number of seats occupied by the National Government supporters was 516, against 99 on the opposition benches. The strength of the Parties after the 1929 election was—Conservatives, 260: Socialists, 287: Liberals, 60: others, 8. The margin between Government and the Opposition, 11,616,237 against 10,653,826, is narrow compared with the majority of 7,500,000 which brought the National Government into office in 1931, and has provoked the suggestion of the *Manchester Guardian* that the New Parliament is not representative. It was a choice between the National Government and Labour, and, for reasons I mentioned last week, the electorate shied at Labour.

The "safe" attitude of Mr. Baldwin is indicated by the omission of Mr. Churchill from the new Cabinet. A fortnight ago, a good deal of kite flying was going on, and Mr. Churchill was counted a certainty. Various portfolios were, as it were, earmarked for him, and it was expected, or apprehended, according to one's complex, that Mr. Baldwin would have no choice but to invite Mr. Churchill to join the Cabinet. The certainty is now the other way about. Mr. Churchill's brilliance has a pyrotechnic quality, and Mr. Baldwin wants to avoid political fireworks. Mr. Macdonald is out of the picture, and, if his relief is as great as the electorate's, the polls have done the ex-Prime Minister a good turn.

The response on the Stock Exchange to the results of the General Election has been good. Prices were marked up sharply on the trend of the election, and with a little early hesitancy, which was dissipated as Government's victory became certain, the upward movement continued. Giltedge securities led the way, and, though business was not large, there was sufficient support to maintain prices. "Irredeemable" issues were singled out for special attention. Indias moved up in sympathy and Colonials were firmer. Home Rails continued their upward movement, assisted by a shortage of stock in many cases. Preferences became stronger. Foreign Bonds were firm, with Brazils and Japanese prominent. Industrials were busy, and, though some profit-taking took place, it was off-set by a good deal of "new time" buying. Mining shares came in for a notable expansion in public interest.

By an overwhelming majority, members of the Mineworkers' Federation have voted in favour of strike action, if necessary, to enforce wage claims. The National Executive of the Federation will report the result of the ballot to Mr. Baldwin, with a request for an early conference. Co-ordination with the Trades Union Congress, which is pledged to support the miners' claims, will be effected. A last moment intervention by Government might, it is hoped by the Miners' leaders, avert a stoppage. The miners demand that wage claims should be dealt with on a national basis. The owners have refused this demand since the last national stoppage in 1926.

The Election manifesto, issued by the National Government, pledged the unification of mining royalties and the establishment of central selling agencies to improve the internal price structure in preparation for higher wages. Before the dissolution of the old Parliament, the Minister for Mines secured definite promises from owners in all districts that central sales would be established as quickly as possible. This proposal was rejected by the miners as a basis for settling present wage claims. The leaders urged that relief from such a step would be too remote, and that early gains secured would increase profits and not wages.

The *Westminster Bank review* for November states that any disturbance of the relative stability of prices, which the country has enjoyed for the past four years, is more likely to be in the nature of a rise than a fall. Throughout the four years since Britain left the gold standard, the range of movement in the Board of Trade index of wholesale prices has been no more than 8 per cent., whereas over the same period the comparable index of prices in the United States has shown a range of 29 per cent. and that of prices in France one of 32 per cent. There was now a much stronger undertone in almost all commodity markets. Demand had expanded with the revival of world trade, and, as this continues further, recovery in world consumption and in world prices might be expected, it is pointed out.

The suspension of the gold standard checked the fall in prices, which had been proceeding for years, so that the lower levels were not so low as they would otherwise have been, and, in addition, costs have been greatly reduced, so that, despite the continued lowness of selling prices, industrial profits have been much improved. In terms of sterling, British wholesale prices are still nearly 25 per cent. below the average of 1929, while, if they are translated into gold values, they show a fall of 50 per cent. since that year.

U. S. A.

ON THE SIDE OF SANCTIONS

Government's determination to supplement and implement voluntarily the League sanctions, as the country's contribution to the cause of world peace, is hardening. President Roosevelt is taking the longer view. A significant warning to American traders with Italy was given by Mr. Cordell Hull, the Secretary of State, in an announcement from Washington. Reviewing Government's policy regarding "trade with belligerent countries," Mr. Hull said that "the American people is entitled to know that there are certain commodities, such as oil, copper, trucks, tractors, scrap iron and scrap steel, which are essential war materials, although not actually arms or ammunition or implements of war, and that, according to recent Government trade reports, a considerably increased amount of these are being exported for war purposes. This class of trade is directly contrary to the policy of the Government as announced in official statements by the President and the Secretary of State, as also is it contrary to the general spirit of the recent Neutrality Act. The Administration is closely observing the trend and volume of exports to those countries, and within a few days the Department of Commerce expects to have a complete and detailed list of all commodities exported to belligerents, which will enable exact comparison with the lists for the same period last year".

It was thought during the early stages of the Italo-Abyssinian war that the President would have powerful commercial and political interests arrayed against the policy of falling in line with League sanctions; but there is now no appreciable opposition to the Government's pledge to the League "not

only to exercise its impartial influence in favour of peace, but to contribute in every practical way within the limits of foreign policy". The Neutrality Act, passed hurriedly by Congress forbids the export of arms, ammunition and implements of war, but does not cover "key materials", and at the moment President Roosevelt does not possess legal authority to enforce an embargo on shipments of "key materials". Secretary Hull's declaration is a powerful reinforcement of the earliest policy. As a matter of fact, the United States moved ahead of the League in the enforcement of an arms embargo and the imposition of financial sanctions against Italy through the Neutrality and Johnson Acts. At present, copper and oil are the outstanding exceptions to the sanctions list, owing to doubts concerning the attitude of League non-member States. America's attitude will be a valuable contribution to League efforts to coerce a recalcitrant member into a sense of responsibility. There is no illusion in this country as to the actual ultimate issues involved in the war. Not one swallows even with the proverbial grain of salt, the high falutin amendations of the League which originate from the British Foreign Office. For reasons, which are clear to the man in the street, Britain's over-riding interest in the cause of collective peace is assessed at its true value here, whereas the contribution of this country to the cause is pure civilised altruism. The United States stands for peace, because the guarantee of peace is the acid test of civilisation.

The reciprocal trade treaty with Canada has been signed. It is designed to strengthen United States and Canadian friendship and economic relations. The terms of the treaty have not yet been disclosed. Informed opinion expects the treaty to affect American farm dairy products and to increase sales of manufactured goods to Canada. American producers of milk, butter, cheese and cattle have already made a protest in the belief that their interests will be affected. Wheat and lumber producers also view the Pact with concern. Mr. Hull said the Pact would make possible the profitable sale of much of America's surplus production and would also result in the re-employment of a large number of idle American wage earners.

The Guffey Act set up what was described as a "little N.R.A. in the coal industry", which has been challenged on more than one occasion. A final, or what is for the time being taken as final, legal ruling has recently been given. The Federal District Court at Louisville, Kentucky, upheld the Guffey Coal Control Act as a valid exercise of Federal power under the interestate commerce and general welfare clauses of the constitution. The court declared that Congress can subject to Federal control any industry which has a direct effect on the public interest.

America is consuming more rubber. The monthly statistics show that America consumed 42,436 tons of crude rubber in October, compared with 37,553 tons in September, and 31,347 tons in October last year. Stocks declined by 8,387 tons in October to 319,349 tons, compared with 362,362,018 tons at the same month last year. The volume of rubber afloat to the United States increased during the month from 43,413 tons to 49,913 tons.

Following are the detailed figures for last month, compared with those for the previous month and for October last year :—

	Oct., 1935	Sept., 1935	Oct., 1934
Arrivals ...	34,356	34,569	35,298
Consumption	42,436	37,553	31,347
Stocks ...	317,849	326,236	362,018
Afloat to U. S. ...	49,913	43,413	38,247
Consumption reclaimed ...	9,662	8,764	8,167

In the first ten months of this year America has consumed 411,429 tons of crude rubber, compared with 384,493 tons in the same period of 1934.

GERMANY

GERMAN—POLISH TRADE PACT

An important commercial agreement was concluded by Germany with Poland early last week, according to which Poland for the first time accords to Germany a most favoured nation treatment and agrees to open her market to German industrial goods in exchange for Polish timber, butter, pigs and foodstuffs. Poland will, in future, buy, on a larger scale, German machinery of all kinds including textile machinery and larger quantities of chemicals. Altogether about 400 main articles are enumerated in the treaty. In return timber worth about £1,500,000 and pigs to the value of £1,000,000 will be purchased by Germany. According to this agreement about 26 per cent. of the total Polish imports will now be from Germany ; and, as far as Germany is concerned, the exports to Poland may very nearly be doubled. The Agreement will come into force from Nov. 20, and will be in force for one year in the first instance, subject to renewals thereafter. This trade pact must, to a large extent, go to minimise the food shortage that is being experienced in Germany at present.

The outlook of the industry during the coming winter is also not bright. The seasonal increase in unemployment during this period was estimated to be only one million : but this may be anything more than a million and a half. Even for the second quarter the figures published by the Institute for Business Research, show a seasonal decline in activity involving about 1,500,000 persons. The consumption industries have lagged behind the activity of the productive industries for some time and this disequilibrium may as well continue in the coming months. Industrial activity is concentrated on capital goods: the building industry is reviving. Activity in the shipyards also records an increase. In spite of all these signs, the shortage of raw materials remains the main problem, chiefly because the exports have not been adequate.

It is just this consideration of domestic economic conditions that has prompted the Government to declare an embargo on exports of certain foodstuffs and raw materials. The embargo embraces all edible oils and fats (including butter), potatoes, industrial raw materials, iron, steel, non-ferrous metals, textile materials &c. Coal, however, is not among the items on which embargo is placed ; and though this commodity is the subject of previous regulations, it would appear that there is a free hand in its export. This declaration of embargo on many of the commodities comes close after the general agreement of the League of Nations to impose sanctions against Italy: but though Germany, by this embargo, is acting in line with the general principle of League Policy, it is, perhaps true to say that it is considerations of domestic economy that have prompted the measure rather than the desire to satisfy the League. It is perhaps on this gesture that rumoured talks about the possible return of Germany to the League rest. But as far as Germany is concerned, she has long before given up her faith in the League and its principles of collective security. Perhaps the present Italo-Abyssinian conflict may provide an occasion for bringing about a change in the attitude of Germany towards the League: but this remains to be seen as it will depend upon how far Geneva will be able to vindicate the principle of collective security.

JUTE AND JUTE GOODS

JUTE

Calcutta, December 5, 1935.

The jute market has been easier during the first half of the week under review, but later on a firm tone was witnessed. Prices in the *Futka* market touched the low level of Rs. 37-8 on November 29. A firm tone set in on December 3, on bearish covering and prices flared up rapidly, *Futka* prices touching the high level of Rs. 39-6.

Demand from foreign countries has been on a restricted scale. It is reported that a good business has been done from London towards the close of the week. Mills have been buyers of a moderate quantity. It is reported that a large quantity of jute has been bought by some European mills during the past two days.

In the loose jute section, easier conditions prevailed earlier in the week, but the market steadied up towards the close of the week. A small business was reported by mills in European Jat Jute at Rs. 6-8 per maund for Fours. A big firm, who are the Managing Agents of a large group of jute mills, are reported to have purchased towards the close about 60,000 maunds of Indian Jat Fours at Rs. 6-6-0 per maunds. Sellers are reserved at the close and are quoting on the basis of Rs. 6-8 per maund for Jat quality.

The Pucca Bales section ruled steady in sympathy with a strong futures market. Prices were easier earlier in the week and a small business has been reported by shippers in Lightnings at Rs. 33-6 per bale. A moderate business of a speculative nature has also been done. Firsts were done at Rs. 36-10 per bale, for Ready delivery Lightnings at Rs. 34 to Rs. 34-4 per bale and Hearts at Rs. 29-6 per bale. At the close the nominal quotation for Ready Firsts was Rs. 38 per bale.

The *Futka* market was very active during the latter part of the week. A prominent 'bear' operator is reported to be covering his sales. The market was easier during the early part of the week when the price touched the low level of Rs. 37-8. A sharp rise was noticed on December 3 and prices steadily improved to Rs. 39-6 on December 4. At the time of writing speculative activity is rampant in the market and prices have gone up to Rs. 39-10.

JUTE MANUFACTURES

Calcutta, December 5, 1935.

The hessian market steadied up towards the close of the week in sympathy with a strong jute market. The *Futka* market which receded to as low as Rs. 8-2-6 earlier in the week is quoting Rs. 8-6-0 at the time of writing. Negotiations regarding some settlement among the jute mills are still going on and all sorts of rumours are current in market circles. One of those rumours are that the mills would be working 44 hours instead of 54 hours as reported previously by the Chairman in the last general meeting of the Association. Chances of any settlement among the mills are still remote and it is quite unlikely that any legislative measures would be taken by the Government to protect the industry from the catastrophe of overproduction.

Demand from foreign countries has been spasmodic and whatever little business resulted was confined to ready and near positions only. Mills are keen sellers for forward positions without finding any buyers. Foreign buyers are not likely to effect purchases in forward positions unless the present uncertainty about the future of the industry is cleared.

Business reported was very small. Earlier in the week 11 Porters were done at Rs. 10-11 for Ready and Rs. 10-2 for April/September shipment, while Rs. 9-1 was paid for 40" 8 oz. November. April/September 40" 7½ oz. sold at Rs. 7-14 towards the close and 11 Porters Ready sold at Rs. 10-12 and January/March delivery at Rs. 10-8.

Heavy Goods were idle and very little busines has been reported. Higher prices were quoted at the close and a small business was reported. Ready B. Twills sold at Rs. 22-8, while Liverpools and Heavy Cees were quoted at Rs. 25-10 and Rs. 21-12 respectively for December shipment.

The following are the total reported stocks of manufactured goods as at 30th November 1935 as compared with the four previous months and November 1934 at the hands of the mills, who are members of the Indian Jute Mills Association and also of Adamjee, Agarpara, Gagalbhai and Shree Hanuman Mills:—

COTTON AND COTTON GOODS

COTTON

Calcutta, December 5, 1935.

The Bombay Cotton Exchange developed an easy tendency during the first part of the week, but later on recovered to normal levels on bullish advices from New York. Traders did not show any inclination to extend their commitments pending developments in America regarding the announcement of the Government plan of restriction next season. In sympathy with quieter foreign markets prices gave way. The decline was further accelerated by some liquidation by "longs." Broach April/May touched the low level of Rs. 220-12 on November 30. Fluctuations were confined to narrow limits and business was restricted. On December 2, the market assumed a steady tone and the sagging tendency was checked by the American cables disclosing a low crop estimate of under 11 million bales in the next Bureau Report. Broach April/May improved to Rs. 223-8, though a recession in prices was caused in the course of the day by some selling on the part of bazar operators. At the close the market assumed a bullish tendency on receipt of advices from America stating that a reduction of a further 5 to 10 per cent. in the 1936 acreage under cotton is announces. Broach April/May improved to Rs. 225-8, but closed at Rs. 224-12.

Oomra and Bengal December/January contracts declined to Rs. 203 and Rs. 150-4 respectively, but recovered at the close to Rs. 207-4 and Rs. 151-8.

New Crop movement in all centres is very brisk and is reported to be heavier in the Punjab, Sind and the United Provinces than at this time last year.

The Anglo-Italian situation, the French political outlook and the expected Washington announcement regarding the Government plan of restriction of the 1936-37 crop, were the main factors that overshadowed the American markets during the week. The market was devoid of any speculative activity and traders in general were apathetic in their attitude. The rate for Middling spot declined to 12.15, December to 11.74 and March 11.53 in the absence of any buying support. But selling was not in any way aggressive. The market assumed a bullish tendency towards the latter part of the sesion. The more favourable political situation in Europe and the expectation of the next Bureau Report estimating the crop at less than 11 million bales were the main factors that imparted steadiness to the market. A further improvement was witnessed at the close on the announcement of the Washington Government of their intention to reduce further the 1936 crop by 5 to 10 per cent. A reduction of 5 to 10 per cent. of the acreage would mean 24.5 to 31 million acres aiming at a crop from 11 to 12 million bales. The market assumed a bullish tone and Middling spot closed at 12.35 and March at 11.70.

The decision of the Supreme Court regarding the Processing Taxes, it is reported, would not be made during this month. But the general belief in market circles is that in case of an adverse decistion, the same will be circumvented by President Roosevelt.

The Liverpool market was devoid of much activity during the week . The decline in the Egyptian section adversely affected prices of American cotton in Liverpool. Trade Calling supported the market to a certain extent, but buying was totally insufficient to maintain values. Spot prices declined to 6.58, December touched the low level of 6.38 and March declined to 6.33. At the close prices recovered on receipt of bullish advices from America regarding the crop restriction next year. Middling spot closed 6.67, and March 6.46. In the Egyption section Sakel spot after declining to 10.00 in the course of the week, closed at 10.32 and March closed at 9.15.

PIECEGOODS

Calcutta, December 5, 1935.

The local market has been dull and uninteresting with restricted business. Bazar dealers are apathetic and are awaiting the result of the Tariff Board Enquiry. The absence of demand from consuming centres still continues. Forward business was not possible to any extent owing to manufacturers' quotations being very firm.

In the Lancashire section, with the exception of some retail lots of better class white yarn dhooties and some dyed fancy sorts, there has been no other important transactions.

Demand for Japanese goods has been very unsatisfactory. Business in grey shirtings for February/April shipment was the only important transaction of the week.

Indian mill goods met with a poor demand. The week's turnover mainly comprise small lots of seasonal goods at declining rates. Forward transactions consisted of some whits shirtings and light whites.

Bazar rates for cold weather styles are lower, but clearances are slow and a further decline in rates is inevitable unless offtake improves during the next two weeks.

Transactions in the yarn section were on a restricted scale. In view of the present uncertain outlook buyers are hesitant to enter the market. The declining tendency of the raw cotton and the increase in production have shaken the confidence of buyers.

Trade has been very slow in Bombay with small business passing in all sections. The higher replacing prices are mainly responsible for the slack forward business. Demand for British goods has been in small lots only. Merchants are anxious to keep the new arrivals in Bonded Warehouses in anticipation of reduction in tariffs as a result of the Tariff Board inquiry. Sales in Japanese goods are in retail quantities and prices are more or less on the basis of last week. As regards indigenous goods there is a moderate demand at steady prices. Demand for yarns is not encouraging and unless demand from consuming centres improves prices should see lower levels.

Imports of cotton yarn and piecegoods into British India during October showed substantial increases as compared with the previous month. Improts of cotton yarn of all descriptions amounted to 4.2 million lbs., as against 3.3 million yarns during September and 2.5 million lbs. during October 1934. The increase was contributed by all countries, United Kingdom, Japan and China. Sendings from the United Kingdom increased by 91,000 lbs., to 845,000 lbs., respectively to 2 million lbs. and 1.3 million lbs.

The total imports of cotton piecegoods exculding fents into British India amounted to 82.1 million yards or 8.2 million yards more than in the previous month. Sendings from the United Kingdom were up by 3.7 million yards at 37.5 million yards, while Japan increased her sendings by 4.3 million yards to 43.8 million yards.

There were no imports of fents during October as in the corresponding month a year ago. In September, Japan sent imports amounting to 3.4 million yards.

BULLION

GOLD

Calcutta, December 5, 1935.

The gold market in Bombay fluctuated during the week under review in consonance with the movements of Sterling. The difficulties in connection with the French monetary situation were reflected upon the Bombay market, the rate for first settlement receding to Rs. 34-13 on November 28. With the announcement of the vote of confidence of the French Cabinet in M. Laval's Government and the subsequent favourable political situation, the market assumed a steady tone. Sterling eased off gradually. Gold prices improved, first settlement quoting Rs. 34-14-3. But the market was totally devoid of support, both Bull and Bear operators abstaining from any active trading. As a result the whole session was quiet and dull and prices remained stationary. At the close the market was slightly easier. Ready and first settlement quoting Rs. 34-13-9 and second settlement Rs. 34-13-3.

Owing to scarcity of supplies fresh business was small. Arrivals are small amounting to 12,000 tolas a day. Stocks have declined to 75,000 tolas. The daily offtake is not more than 2,000 tolas. Total imports during last week amounted to Rs. 41,183 in bar and coin.

The price of gold in London was £7-0-11 per fine ounce at the beginning of the week, but a steady improvement was noticed on the following days, the price touching £7-1-1 on December 3. At the close a decline of 1½d. was registered.

With the improvement in the French monetary situation the Sterling-Franc and Dollar rates receded steadily to as low as 74.78 and 4.92 15/16 respectively on December 2. The rates improved at the close. The Franc rate stood at 74.91 and the Dollar rate was 4.93 5/16.

Gold Exports

Sovereigns worth Rs. 174,375 were exported from Bombay for London only, and gold valued at Rs. 9,005,096 was exported from Bombay for Europe and America during the week ended November 30.

The P. and O. mail boat "Viceroy of India", which sailed from Bombay for London on Saturday afternoon, carried the gold of the following description:—Bar gold valued at Rs. 4,236,737 for London optional New York, Paris or Amsterdam; bar gold worth Rs. 337,763 for New York optional London, Paris, or Amsterdam: bar gold worth Rs. 1,246,847 for London optional Amsterdam, Paris or New York, bar gold worth Rs. 1,225,950 for New York *via* London; bar gold worth Rs. 165,886 for New York optional London, and the rest was for London.

The total value of gold exported from Bombay since Great Britain went off the gold standard now amounts to Rs. 2,539,415,745.

London—Air Mail week ending November 20.

The Bank of England gold reserve against notes amounted to £196,457,659 on the 13th instant as compared with £195,482,528 on the previous Wednesday.

Purchases of bar gold announced by the Bank during the week amounted to £731,405.

About £1,500,000 of bar gold was dealt with at the daily fixing; there was a fair general demand for the moderate amounts offered and, as a consequence, prices were maintained at a premium over New York parity.

The following were the United Kingdom Imports and Expots of Gold registered from mid-day on the 11th Nov. to mid-day on the 18th Nov. :—

SILVER

Calcutta, December 5, 1935.

The Bombay silver market was quiet and featureless during the past week. In the absence of any encouraging news, traders appeared to be quite indifferent and abstained from any active operations. Owing to lack of support and under pressure of scattered selling by some chokseys prices eased off on December 2, first settlement receding to Rs. 64-14. On the following day, however, when selling pressure was less agrressive, prices recovered by 4 annas. At the close, Ready was quoting Rs. 64-15, first settlement Rs. 65-1 and second settlement Rs. 65-4. The lack of buying support is still felt in the market and prices are tending downwards on every bout of selling.

Stocks in hand are heavy at 35,000 bars. The daily offtake is about 10 to 15 bars. Arrivals are very little. Total imports last week amounted to Rs. 42,730 in coin.

The price of spot silver in London was steady at 29 3/16d. during the first part of the week. On December 2, the price improved to 29¼d. which level was maintained till the close. The forward rate was steady at 28⅞d. America was a regular purchaser throughout the week, while both India and speculators were sellers, though India was a buyer at times. Business done was not on a large scale.

The price of spot silver in New York remained steady at 65⅜c. The London-Changhai T. T., after improving to 1-2 9/16, closed at 1-2½.

London—Air Mail week ending November 20.

The price for cash silver remained unchanged during the week at 29.5/16d., whilst that for two months' delivery was 29.1/16d. until to-day, when it declined 1/16d. to 29d.

The American Treasury continued their purchases of cash silver at a limit of 29.5/16d. acquiring a moderate amount, and there has been further selling by China although on rather a reduced scale.

The present situation in China seems to have occasioned some nervousness in the Indian Bazaars and this has been reflected by reselling from this quarter—particularly in evidence yesterday and to-day.

The Indian Bazaars made some forward purchases in the earlier part of the week and also carried forward bull contracts falling due.

On the whole the market has been rather quiet and in view of the American purchases the cash position is likely to remain steady, whilst that for forward may be somewhat uncertain.

Tht following were the United Kingdom Imports and Exports of Silver registered from mid-day on the 11th Nov. to mid-day on the 18th Nov. :—

TEA

CALCUTTA AUCTIONS

Calcutta, December 5, 1935.

At the auctions of teas for export on December 2, the total offerings amounted to 34,374 packages out of which 20,221 packages sold at an average price of 9 annas 1 pie as against 8 annas 8 pies at the corresponding sale last year. Quality generally has been satisfactory for the time of year. There was a good general demand for all descriptions and last week's rates were maintained in all cases except for medium Assams which were in rather poor request, prices showing an easier tendency.

Offerings for internal consumption at the auctions on December 3, totalled 15,900 packages, of which 8,800 packages were Dusts. All descriptions of Dust quality met with a good demand and sold readily at last week's rates. Among other grades there was good competition and all grades sold well at last week's rates.

The following are the full particulars of sale No. 25:—

Teas with Export Rights.

		Leaf	
		1935	1934

LONDON AUCTIONS

Offerings at the London Tea Auctions for the week ending December 5, comprise 45,100 packages of Indian, 20,600 of Ceylon and 3,100 of Java and other teas.

Indian Tea.

At the auctions of Indian tea on December 2, the total quantity submitted for sale amounted to 26,600 packages. There was a good active demand at firm prices up to 12½d. per lb., but above that a little irregularity was witnessed.

Ceylon Tea.

At the sales of Ceylon Teas on December 3, 20,600 packages were submitted for sale. The market was fairly steady for tea up to 13½d. per lb. Above that there was some irregularity but very little change in values. High-grown tea was comparatively inferior in quality and prices were slightly easier in proportion.

Java & Other Teas.

At the auctions of Java and other teas on November 28, the total offerings amounted to 4,100 packages. There was a good active market and keen competition was in evidence among buyers. Tippy teas were firm.

Tea Average.

The following were the average prices of tea in the London market during the week ending November 28, as compared with the previous week:—

	Week Ending Nov 14 lb.	Week Ending Nov. 21 lb.

MISCELLANEOUS

WHEAT

Calcutta, December 5, 1935.

The local wheat market ruled quiet and interesting during the past week. Trading has been slow. Mills were buyers of small quantities while bazar dealers were hesitant to enter into fresh commitments. Prices have suffered a slight set-back in sympathy with easier upcountry markets. Cawnpore and Punjab Ready declined to Rs. 3-8-6, but closed at Rs. 3-9-6. May Beta, after declining to Rs. 3-8-9 on December 2, closed steady at the same rate.

Reports from mofussil centres are slightly easier. Dry weather conditions continue in all centres and slight showers would be much beneficial at this time. Sellers are at present somewhat reserved.

The Bombay market has been quiet and prices were easier at the close. Buying activity was totally dormant. Operators were unwilling to make fresh commitments in the absence of leading factors. Prices moved irregularly and at the close Delhi-Cawnpore January and May were quoting Rs. 4-10.

The Karachi market was steady earlier in the week owing to strong foreign cables, but towards the close prices have registered a slight decline. Fluctuations were confined to narrow limits. Ready and December closed at Rs. 24-12 and Rs. 24-5-9.

Advices from foreign centres have nothing of an encouraging nature. There was a sharp rise in the Chicago market on November 29 owing to speculative activity, when wheat prices improved to 98 7/8c. for December and 98 3/8c. for May. A steady decline was witnessed thereafter and towards the close December was quoted at 97¼c. while May stood at 96 5/8 cents. In London dull and uninteresting conditions prevailed earlier in the week and prices remained stationary. Rosafe Parcels January/February improved to 27s. 3d. in midweek but declined at the close by 1½d. Australian wheat in London remained unchanged at 28s. 9d. throughout the week, but the market was dull and transactions were negligible.

Quotations:—

Calcutta.	Rs.	A.	P.
Cawnpore Ready	3	9	6
Punjab Ready	3	9	6

Australian South Parcels	28s. 9d.

Chicago (per bashel).

December	$0.97¼
May	$0.96⅝

MADRAS MARKETS.

Madras, December 3.

The value of the trade of the Madras Preesidency for October, 1935, shows a decline on both the Export and Import sides, the reduction amounting to 17% in imports and 6% in exports. On the Import side, the value in October, 1935, amounted to 149.48 lakhs of Rupees against 180.11 lakhs in October 1934, the figure for last month having been affected by the considerable reduction in arrivals of Rice from Siam and Indo-China. Rice imports last month declined in value to Rs. 4.92 lakhs as against 25.77 lakhs of Rupees in October 1934—a decline of Rs. 20.85 lakhs. Increases were noticeable in Yarn and Piecegoods imports, the value being Rs. 7.35 lakhs and Rs. 9.54 lakhs respectively. The value of Exports last month was 208.06 lakhs against Rs. 221.63 lakhs in October 1934. Tea topped the list of exports with a value of Rs. 34.9 lakhs. Groundnuts followed with a value of Rs. 29.33 lakhs (18,728 tons) last month against 35,076 tons of the value of Rs. 38.84 lakhs in October 1934.

GROUNDNUTS

The market was very firm during the earlier half of the week, but became weaker during the latter half. London quotations for Coromandel Machined opened at the beginning of the week at £14 November sellers and £13-16-3 December sellers, but declined to £13-12-6 and £13-7-6 for November/December positions respectively in mid-week. The latest available quotations are £13-13-9 for November and £13-8-9 for December. Shippers' buying limits opened at Rs. 34 for Machined and Rs. 29 for Ordinary (Per French candy of 531 lbs. ex-coast godowns), and advanced to Rs. 34-10 for Machined and Rs. 39-10 for Ordinary in mid-week. Later, prices declined to Rs. 32-12 and Rs. 33 for Machined and Rs. 27-12 for Ordinary (Per French candy, ex-coast godowns). To-day's quotations stand at Rs. 32-4 to Rs. 32-8 for Machined and Rs. 27-8 for Ordinary (Per French candy, ex-coast godowns). A prominent European firm is reported to have purchased Machined kernels up the line at about Rs. 33 and Rs. 33-4 (Per French candy, ex-coast godowns) to the extent of nearly 2,000 to 3,000 tons. Shippers are able to buy freely at their limits and a fair business has been done. Arrivals of the Main Winter crop have commenced in the southern centres such as Tiruvannamalai, and the season will be in full swing in the south in about a fortnight. The latest advices from the Ceded districts report that the standing crop in parts has been affected by drought conditions. This crop will be ready for the market in January.

The Kernel freight market has ruled dull with very little business passing. A Charter has been fixed for December/January loading. Four coast ports to one North Continental or U. K. port at 26s. 6d. per ton of 20 cwts., while Liner space is quoted at 27s. 6d. for January/February shipment.

HIDES AND SKINS

Air Mail advices report that there is a fair demand for Light weights and for Inferiors, but are not more than a penny per lb. over the minimum. Sales would be possible of 7½ lbs. and up if they could also be offered on the same basis. As most Curriers are well covered for orders that they have on hand at the moment, they are indifferent as to the course of the market and unless they receive definite business in finished leather they are not particularly interested in purchasing as a speculation. Things have generally been in an unsettled state, and Buyers are still withholding business as they are of the opinion that it will not be long before Madras will be practically back to minimum. Shipments of Hides in November have been exceptionally heavy around 5,400 bales. The market is oversold, particularly in Inferior Fifths for which buyers are vainly bidding at 9½d. for 5/5½ lbs. and 4¼d. for 11/12 lbs. There have been enquiries for Prime Bangalores 4/4½ lbs. at 14½d., Prime Bangalores 5/5½ lbs. at 13½d. and Pure Coconadas 7/7½ lbs. at 11½d. with sellers over. The market for Tanned Cow has firmed up locally during the week, and prices have advanced all-round by 3 pies to 6 pies per lb. The Raw hide market has been very firm, owing to good continental demand. Tanned Buffalo is easier owing to lack of support from buyers in America. London buyers are holding off, and local prices have eased off by 2 pies to 3 pies per lb. There has been an improvement in demand for Tanned Buff Calf skins for Prime and Best qualities, but supplies in Madras are limited. There is a moderate demand for Tanned Cow Calf primes and these are moving at unchanged prices, but good colour and selection are insisted on by buyers. The market for Tanned skins has ruled quiet both here and in London. Though Buyers have displayed little interest, a small volume of business in Original bales has been put through.

Investor's Supplement

Vol. XVI. No. 22 SATURDAY, DECEMBER 7, 1935 Price Re. 1

BRITAIN AND INDIA

We referred, last week, to the possibility of the entire redemption of the three per cent. 1933-34 Treasury Bonds. Official announcement has now been made about the repayment of the £44 million due on Treasury Threes.

This was quickly followed by news even more heartening. It is now learnt that even the Treasury Twos will be paid off.

These Treasury Twos are the two per cent. 1935-38 Bonds for £150 million. These were issued in October 1932. That a loan on so low an interest basis as 2 per cent. 1935-38 Bonds is to be redeemed, is the biggest bullish factor for British Funds.

MARKETS HIGHER

(By Special Cable)

New York, December 5.

Markets are higher after profit-taking.
Coppers are strong.

Yet more heartening news was to follow. On Wednesday, it was known that the British Government had issued the prospectus of two loans.

The first is a 2½ per cent. 1956-61 Treasury Funding Loan for £200 million at £96½.

The second is 1 per cent. 1939-41 Treasury Bonds for £100 million at £98.

Can this be true—a one per cent. type of loan ! The London market has not known it before. This is the biggest feather in Mr. Neville Chamberlain's plume.

It is only a short loan—the critic may say. It is, true, a short-term loan. But a one per cent. loan will be redeemed at the later date—not the earlier. 1941 must, therefore, be deemed the redemption date. The loan, thus, becomes a six-year loan. A six-year loan on a one per cent. type is, it must be admitted, a real achievement.

The issue price is two per cent. less than par—argues the unabashed critic.

Yes. But even allowing for this, the yield is hardly 1.4 per cent. on the assumption that the loan will be repaid in 1941. A six-year loan with an yield of less than 1½ per cent. is, let us admit again, a feat which only Mr. Neville Chamberlain could have performed.

There are many sins of commission and omission with which the National Government in Great Britain could be, and are, charged. But, if even the devil is entitled to his due, let us own that the borrowing activities of the National Government have been carried out with such daring, skill and triumphant success as we have never known before.

If Mr. Neville Chamberlain is such a wonderful wizard, what about our own Chancellor of the Exchequer?

His very first action on arrival in India showed courage, grip and grit. His first action was the announcement of the repayment of the 4 per cent. 1931-36 conversion loan. We know, as a matter of fact, that the Secretariat counselled him against such an announcement. We were, at that time, the first to applaud this gesture of Sir James Grigg as a token of his ability to keep the Secretaries in their place and to assess the value (or otherwise) of their advice.

His new loan operations at the start were good. We gave him unstinted support.

Then followed a policy of callous indifference to the well-being of the giltedge market and of clumsy tactics in borrowing. We have had some nasty things and some irritating hometruths to say. We said them as we, like Sir James Grigg, do not know any other way than calling a spade a spade.

GENERAL RISE IN PRICES

(By Special Cable)

(From R. Gordon Cummings)

London, December 5.

The success of Government issues has heartened markets. Giltedged, Armaments and Electricals are strong.

Even Sir James must admit that our criticism of his actions was inspired by a fuller faith (than he apears to have had) in the credit of India and by a more resolute desire to utilise that high credit for the highest interests of national economy.

All that is now past. The giltedge market has had two unnecessary night-mares. There has been a loan with too high an yield. There has been far too much shaking of the confidence of investors. But, as we say, all that belongs to the past.

The present phase in the giltedge market is one of healthy activity and broad-based confidence. The stage is, thus, set for conversion operations in India as far-reaching and as beneficent as conversion operations in England.

Will Sir James Grigg show, at least on the present occasion and with the present example of Britain before him, an equal faith in India's credit and an equal determination to place that credit on a 3 per cent. basis for long-term borrowing.

The 3 per cent. 1951-54 loan, issued a few months ago, is now over one per cent. above par. This means that, for medium-term borrowing, India's credit is on a three per cent. basis.

Every omen is propitious for the extension of a like credit to long-term borrowing. Let us hope that Sir James Grigg interprets the signs of the times the same as we do.

Worth-While Investments :

INDIA

DIVERSIFIED, THEREFORE, SAFE

BURN & COMPANY

(By "Watch-dog")

A few days ago, I commended the ordinary shares of Burn and Company. They were Rs. 240 then. They have now advanced to Rs. 270. I believe that further rise is in prospect. It is, therefore, meet and proper that a detailed analysis of the accounts is made, with special reference to the present financial position and the future prospects.

Burn and Company has one of the completest and best planned engineering workshops in India. Except that conditions for the engineering industry have been extremely bad in the past half decade, Burn and Company's workshop in Howrah has been, and must be, a good profit-earning business.

Besides, the Company has two first-rate potteries —one in Raneegunge and the other in Jubbulpore. These are now in a position to contribute substantially to the profits, thanks to the greater vogue of sanitary fittings in buildings.

The Company owns a colliery, too.

Altogether, the eggs of Burn and Company are in such diverse baskets and the reputation which the Company has built for its workmanship and for its products is so universal, that, with depression wearing off, Burn and Company's shares will be amongst the first to respond to improving trade.

The year ended April 30, 1935, was particularly favourable; and it was the best year after 1931. Methinks, 1934-35 results are the forerunner of better results and increasingly favourable prospects.

The Company is now associated with the Martin House—a name that stands for whatever is highest and best in engineering and building industries.

The past record of the company is very good and a dividend as high as 40 per cent. was declared for 1928.

Year ended April.		Profit.	Depreciation.	Carryforward	Dividend %
1925	...	13,93,458	5,43,897	3,88,873	15
1926	...	13,68,757	6,97,040	2,49,584	15
1927	...	18,09,918	3,77,604	2,40,899	30
1928	...	22,95,241	3,47,247	3,27,893	40
1929	...	16,58,349	3,52,927	1,92,314	30
1930	...	11,64,626	3,62,900	1,83,040	15
1931	...	4,80,857	3,93,909	88,988	...
1932	...	5,54,410	3,66,049	96,349	...
1933	...	4,75,153	2,97,814	92,688	...
1934	...	6,96,650	2,98,501	99,837	5
1935	...	8,11,496	3,01,162	1,14,182	7½

The company was formed in 1895 to acquire and carry on as a going concern the old established business of Burn & Co., of Calcutta, Railway and Government Contractors, Engineers, Bridge Builders, etc.

The capital authorised, issued and subscribed is Rs. 70 lakhs, Rs. 42 lakhs being in 42,000 ordinary shares of Rs. 100 each fully paid up and Rs. 28 lakhs in 13,000, 7 per cent. tax-free cumulative preference shares and 15,000 6 per cent. tax-free cumulative preference shares of Rs. 100 each fully paid up. The first issue of 6,000 7 per cent. Preference shares has priority, in respect of repayment of capital only, over both the second 7 per cent. issue and the 6 per cent. issue but no priority in respect of payment of dividend. The second 7 per cent. and 6 per cent. issues rank equally in both respects.

In 1923, the capital of the company was increased from Rs. 49 lakhs to its present figure by the creation and issue of 21,000 new ordinary shares of Rs. 100 each fully paid up and distributed to the existing shareholders as free bonus shares for every ordinary share held.

The total reserves amount to Rs. 29 lakhs.

Sundry liabilities are Rs. 29,60,856 against Rs. 29,83,554.

On the assets side, the total gross block of Rs. 1,83,74,124 has been depreciated by Rs. 1,29,82,866 to Rs. 53,91,258. The net block is considerably lower than the paid-up capital.

Stores are Rs. 12,75,831.

The stock-in-trade in Rs. 23,40,957.

Outstandings are Rs. 27,43,907 against Rs. 25,51,350 which nearly cover sundry liabilities.

Investments are Rs. 5,18,247 against Rs. 4,61,843. They are composed of sundry shares, debentures and G. P. Notes.

Cash at various banks and in hand amounts to Rs. 10,80,170 against Rs. 1,88,020.

The total liquid assets are Rs. 78,62,467—an extremely comfortable position in view of the possibility of Howrah Bridge contract coming to the combine.

The profit for the year ended April, 1935, was Rs. 8,11,496 against Rs. 6,96,650 in 1934, an increase of more than a lakh of rupees. The amount set aside for depreciation is Rs. 3,01,162 against Rs. 2,98,501. The dividend declared is 7½ per cent. against 5 per cent. and the carry forward is higher at Rs. 1,14,182 against Rs. 99,837. The improvement would be maintained by all tokens; and there is, I believe, every likelihood of a stepping-up in the dividend at the end of the current year.

At the present price of around Rs. 270, the yield works out to just under 3 per cent. tax-free. The yield may appear to be on the small side; but the shares must be commended on account of prospects for better trade and on account of favourable chances of capital appreciation.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

The annual report of another of the leading Indian Railway Companies—Madras and Southern Mahratta—has now come to hand.

A number of Tea Companies have announced their interim dividends for the current year. These payments are of a satisfactory nature and reflect the recent improved auction prices for the commodity.

* * *

Madras and Southern Mahratta Railway.

This leading Railway company operates lines with a total mileage of 3,230, of which 2,781 miles belong to the company and the State ; 271 are the Mysore State Lines ; and 178 miles are "worked" by the company. It has also taken up jointly with the Bombay, Baroda, and Central India Railway Company, extensive coal areas in Bihar and Orissa. A railway is being constructed to serve these areas.

The accounts for the year to March 31st, 1935, show that net earnings of the State and company's railways amounted to Rs. 2,77,38,032, the figures being given after excluding all earnings and expenses of Branch lines worked under separate contracts. The final divisible surplus, after charging all expenses, is Rs. 1,72,49,899, and the proportion attributable to the company is Rs. 50,42,748 (Rs. 59,64,432). Excluding the guaranteed interest of 3½ per cent. paid by the Secretary of State, surplus profits received in India amounted to Rs. 20,57,629, to which is added the company's share of surplus profits from the Mysore State Railway, equal to Rs. 53,040. Combined surplus profits for the past year are therefore Rs. 21,10,669.

After making minor adjustments, the net amount received in England was £159,479, to which is added £26,055 from investment income, and from which is deducted £1,326 for London office expenses. Including the sum of £56,199 brought forward, the total sum available is £232,908.

The interim dividend of 4½ per cent. on the £5,000,000 capital stock absorbed £120,452. From dividend reserve is withdrawn £50,000, but against this £7,500 is placed to London Office fund. The final dividend of 4½ per cent. will require approximately £120,000, thus leaving about £34,500 to carry forward.

As previously announced, the total dividend of 9 per cent. for the past year is at the same rate as for 1932-33, but compares with 9½ per cent. for 1933-34.

* * *

Bengal United Tea Interim Statesment.

Shareholders of *Bengal United Tea*, which owns estates in Assam, Darjeeling, and Bengal, are informed that since the accounts for 1934 were issued in July last there has been a further improvement in the financial position. Until the debit balance of £17,211 on profit and loss account at December 31st last is cleared off it is impossible, however, to pay any arrears of dividend on the £105,000 5 per cent. preference capital, thus leaving arrears outstanding from January, 1929.

Based on a restricted crop of 2,375,813 lbs., the outturn to October 31st last was 2,047,120 lbs., compared with 2,346,320 lbs. a year ago. The gross average prices realised for crops sold to October 15th are : 622,823 lbs. at 9¾d. per lb., against 745,688 lbs. at 9d. per lb.

Tea Company Interim Dividends.

Of the Indian Tea company interim dividend announcements this week, five of the statements are in respect of companies under the management of the Planters Stores and Agency. In all cases the payments compare with nothing at this time a year ago.

Deamoolie is distributing 5 per cent. on the £60,000 issued ordinary capital, *Dekhari* is paying 2½ per cent. on the £97,500 issued capital, *Pabbojan* 5 per cent. on the £125,000 ordinary capital, *Rupai* 5 per cent. on the £60,000 issued capital, and *Tara* 5 per cent. on the £52,500 ordinary capital.

The estates of all of these companies are situated in Assam. Recent auction prices for Assam teas have shown an average well above the prices obtained a year ago.

Two companies of the Octavius Steel group have also made interim dividend statements. *Longai Valley Tea* is to pay one year's arrears of dividend on the £29,000 6 per cent "A" preference capital, thus bringing matters up to December 31st, 1929. On account of the year ended December 31st, 1935, *Rungajaun Tea* is paying the final dividend of 3 per cent. on the £18,000 6 per cent. preference capital.

* * *

Brevities.

Bhadra Valley Estates owns 569 acres planted with coffee and tea in Mysore. The accounts for the year to June 30 last show a net loss of £266, which increases the debit balance carried forward to £37,318. No tea was produced during the financial year, but £1,037 was realised from the sale of export and production quotas. The coffee crop was 36 tons.

In respect of the year ending March 31st next the interim dividend on the ordinary capital of *Barnagore Jute Factory* is to be maintained at 5 per cent. actual. The total payment for the year to March 31st, 1935, was brought up to 12½ per cent., by a final distribution of 7½ per cent.

Considerable interest will no doubt attach to the formation of a private company called Taurus Holdings, which has an authorised capital of £350, and which is to deal in shares, debentures, etc. Control of the Company is to rest with the partners of *Hoare, Miller & Co.*, the well-known merchanting company. The only exception to this stipulation is that the Chairman for the time being of Hoare, Miller & Co., of Calcutta, may also hold management shares.

THE TITAGHUR PAPER MILLS CO., LTD.

NOTICE

Notice is hereby given that the One Hundred and Sixth Ordinary General Meeting of Shareholders will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Wednesday, 18th December, 1935, at 12 noon, for the purpose of receiving the Directors' Report, passing the Audited Accounts for the six months ended 30th September, 1935, and transacting the ordinary business of the Company.

The Share Registers of the Company will be closed from the 7th December, 1935, to the 18th December, 1935, both days inclusive.

By order of the Board,
F. W. HEILGERS & CO.,
Managing Agents.

Calcutta, 27th November, 1935.

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Friday Dec. 6, 1935.

The feature of the week at the Calcutta Stock Exchange was an erratic market in Govt. Securities, and a sharp rise and decline in Howrah Jute shares. In the former case, though the undertone was undoubtedly steady, it was apparent that sellers predominated, in 3½ per cent. G. P. Notes, due to uneasiness caused by the rumours of an International crisis in Europe at the end of last week,—in fact Bombay seemed to be biassed ;—but as the week progressed, news was received from London of the proposed issue of two new British Government Loans, which had a reassuring effect, causing a rise in Sterling Securities, and a general improvement in Rupee issues followed. Now comes a Paris message that peace talk is in the air and that Signor Mussolini has made certain minimum proposals, in a very secret and guarded way, of territorial exchange. This will undoubtedly counteract the hesitant situation, and it is anticipated that conditions favourable for a further rise may be witnessed early next week.

In the Jute share section, the psychology of the market is often difficult to understand. A sharp rise in Howrahs was recorded, due mainly to shortage of ready scrip in the market, coupled with the rumour that the Government of India had agreed to receive a deputation from the Jute Mills Association. This rise in Howrahs pulled up the other shares in the section as well, and on the whole it came as a welcome relief to many. But the situation did not last long. On Thursday after Howrahs attained their highest rate of Rs. 56-2, a wild rumour came about that bear sales had all been covered and scrips for ten thousand shares were available for delivery. The result was a rapid decline in the rate, which closed at Rs. 53-14. It was however remarkable that not much decline in other shares was noticeable, although it was feared that the effect of this decline in the rates of the prime favourites would be felt to-day.

In other sections, Bank shares were well supported, but there was nothing of outstanding interest in other shares.

The money market was reported to be steady with little doing and the Reserve Bank rate was 3 per cent.

Government Securities.—This market ruled quiet but the undertone was steady throughout the session. 3½ per cent. Govt. Papers were as low as Rs. 95-5 on Monday, but there was a gradual improvement, and at the close on Thursday were marked at Rs. 96-11. Business was done on a limied scale. There were keen buyers of most of the short and medium-daed Loans, but sellers were few and in many cases transactions could not be completed. 3 per cent. New Loan 1951-54 was slightly easier at Rs. 101-2 but 3 per cent. Loan 1941 was well supported at Rs. 103-10. Small lots of 4 per cent. Loan 1960-70 was done at Rs. 110-12, 4½ per cent. Loan 1955-60 at Rs. 115-14 and 5 per cent. Loan 1940-43 at Rs. 110-10. 5 per cent Loan 1945-55 closed at Rs. 119-2 and 5 per cent. Loan 1939-44 at Rs. 109-9. Transactions were also reported in 4 per cent. Punjab and 5 per cent. U. P. Bonds at Rs. 108 and Rs. 113-14 respectively.

Debentures.—Very few transactions were recorded in Debentures of Public Bodies, which included 3½ per cent. Calcutta Port Trusts 1935-65 at Rs. 101-4, 4 per cent. 1915-75 at Rs. 104-4 and 6 per cent. 1925-55-85 at Rs. 128-4. Not a single sale in either Calcutta Municipal or Calcutta Improvement Trust Debentures could be effected owing to scarcity of sellers, although there were buyers for same. Among Industrials, three transactions were crossed on Tuesday in Railway Debentures, which were 5½ per cent. Ahmadpur-Katwas, 5½ per cent. Burdwan-Cutwas and 5½ per cent. Bankura-Damodar Rivers, all at Rs. 120. The only other transaction reported was in 5 per cent. 1914-54 Clive Buildings at Rs. 103-8.

Preference shares.—This section ruled practically as it was last week. The demand for better class issues continued, but transactions could not be put through owing to lack of sellers. In Jute Mill issues Empires fetched Rs. 148, Aucklands were quoting around Rs. 140 (ex-dividend), Ballys were wanted at Rs. 142-8, Cheviots at Rs. 147-8, Lothians at Rs. 149 and Soorahs at Rs. 119. Among others, two lots of Bowreah Cotton "A" changed hands at Rs. 160 and Rs. 147, while New Victoria Cottons recorded Rs. 5. A parcel of Associated Hotels were done at Rs. 90, and British India Corporations improved further to Rs. 151. Indo-Burma Petroleums were wanted at Rs. 121, at which it closed.

Other Investment stocks.—Firmer conditions prevailed in Bank shares. A small lot of Imperial Bank Fully Paids fetched Rs. 1,585 on Thursday, and Contributories were as high as Rs. 392. A fair turnover took place in Reserve Bank shares, which after fluctuating between Rs. 133 and Rs. 134-12, closed firm at Rs. 133. Central Banks were quoting round about Rs. 37, and Ballygunge Bank changed hands at Rs. 104. In Railway shares Ahmadpur-Katwas changed hands at Rs. 91, Bukhtiarpur-Bihars at Rs. 64, Dehri-Rohtas at Rs. 11-10, Howrah-Amtas at Rs. 110 and Mymensingh-Bhairab (Rebates) at Rs. 94. Among Shipping issues, a number of transactions taking place in I. G. N.'s, resulted in their attaining a closing rate of Rs. 100, as against Rs. 95 of last week, *and further appreciation is likely. The purchase of these round about present prices is recommended.* A quiet market was reported. New Victorias were manitaining their old rate of Re. 1-9, Benares Cotton and Silks changed hands at Re. 1-8, and a parcel of Bengal-Luxmis was done at Rs. 39.

Coals.—During the earlier part of the session rather less activity prevailed and there was an easier tendency, but at the close a moderate inquiry was in evidence, although sellers in some cases found difficulty in completing their orders. Transactions reported include Amalgamated at Rs. 21-2 c.d., Bengals at Rs. 278, Bokaro and Ramgurs at Rs. 8-12, Burrakurs at Rs. 13, Equitables at Rs. 38, New Beerbhooms at Rs. 12-4, New Manbhooms at Rs. 61-8, Sendras at Rs. 11 and West Jamurias at Rs. 12-8.

Jutes.—In the earlier part of the week a better feeling was in evidence among the more speculative stocks and the market advanced strongly resulting in a large volume of business being put through. Howrah opened at Rs. 53-4 on Monday, and after minor fluctuations gradually advanced to Rs. 56-2 at noon on Thursday, when suddenly there was a change in the situation, and a rapid decline resulted in their closing at Rs. 53-14. It is feared that a further decline may take place to-day, unless it is checked by the steadier tone in Jute and Hessian markets. Kamarhattys likewise opened at Rs. 528 on Monday, and after rising to Rs. 565 on Thursday, closed easier at Rs. 552. Anglo-Indias were quoting around Rs. 418 on Monday, but closed at Rs. 450, Belvederes rose from Rs. 342-8 to Rs. 362, Barnagores rose from Rs. 142, and after attaining Rs. 156, receded to Rs. 151. Ballys rose from Rs. 197 to Rs. 215, closing at Rs. 206. Clives gradually rose from Rs. 25-15 to 27, at which it closed. Nationals rose from Rs. 22-12 to Rs. 23-10 and Nuddeas from Rs. 46 to Rs. 51-12. Indias touched Rs. 350, Fort Gloster Rs. 550, Kinnisons Rs. 615, but all were easier at the close.

Electricals.—A steady market continued. Bengal Telephones rose up to Rs. 19-6, Agra Electrics were as high as Rs. 121, Ajmer Electrics improved to Rs. 12-8, but Cuttacks and Daccas were a shade easier than last week, having changed hands at Rs. 7-12 and Rs. 20 respectively. Jubbulpores also shed a few points and closed at Rs. 11-14. There was good enquiry for Muttras round about Rs. 11 and these shares are cheap having regard to 2 per cent. dividend which they are paying for each half-year.

Engineerings.—In this section while Bengal Irons were in good demand and closed at Rs. 4-2, rather less attention was paid to Indian Iron and Steel, which changed hands at Rs. 8-11. Burn & Co. could not maintain their last week's closing rate of Rs. 278, and were fluctuating between Rs. 270 and Rs. 272. Arthur Butlers were in good demand, and were quoting around Rs. 13. A lot of Indian Standard Wagons were done at Rs. 51-4 and Saran Engineerings closed at Rs. 9-12 (cum-div.).

Sugars.—This section was featureless, and prices inclined to sag. Bulands lost their ground and were quoting around Rs. 13-6, Balrampurs closed at Rs. 18-12, but Carews improved to Rs. 21-4. Razas were perhaps the outstanding feature, with buyers around Rs. 133, but no sellers were forthcoming on the descision of the managing agents to subdivide Rs. 100 shares into Rs. 10 shares. No transaction was reported in Murree Breweries, and Samastipores maintained their last week's closing rate around Rs. 9-4.

Miscellaneous.—Paper shares continued to have good support, Titaghur Ordinaries improved to Rs. 25-4, and Deferred Rs. 8 to Rs. 10-12. A further rise in Bengals and India Paper Pulps were recorded, which closed at Rs. 113 and Rs. 185 (cum. div.) respectively. *India Papers are likely to appreciate further and purchases round present lively are recommended.* Of others, Burma Corporations lacked support, and eased down to Rs. 8-2, but British India Corporations were steady at last week's rate of Rs. 4-1. Bengal Bonded Warehouse "B" and "C" fetched Rs. 88 and Rs. 140 respectively and Humayun Properties were quoting Rs. 20-8 (ex-div.).

Teas.—No improvement in this section was noticeable, and in the absence of transactions it was difficult to quote rates closely. Darjeeling Tea and Chinchonas closed at Rs. 183, Teen Alis at Rs. 14-12, Gungarams at Rs. 280, Hasimaras at Rs. 41-8 and Tezpores at Rs. 9-4 were the transactions reported.

THE PORIAPUR COLLIERIES LTD.

NOTICE

is hereby given that the Thirty-fifth Half-yearly Ordinary General Meeting of the above-named Company will be held at the Registered Office No. 12, Mission Row, Calcutta, on Saturday the 21st day of December, 1935, at 11-40 A.M. for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the half-year ended 30th September, 1935, and to transact any other ordinary business of the Company.

The Share Transfer Books of the Company will be closed from the 14th to the 21st December, 1935, both days inclusive.

By Order of the Board,
MARTIN & CO.,
Managing Agents.

Calcutta, the 5th December, 1935.

MADRAS STOCK EXCHANGE

(*By Wire*)

(From Our Correspondent)

Thursday Evening.

The local market is rather having a good time. The hectic activity of last week was also continued during the week. The strong London advices have contributed to the firmness of the market. 3½ per cent. Paper was subjected to considerable selling pressure and the price reacted to Rs. 95-11. But there has been a recovery and the closing rate is higher at Rs. 96-11. It has otherwise been the case with the short and medium-dated loans which after ruling higher earlier in the week closed easier. 3 per cent. 1941 Loan closed at Rs. 103-4; 3 per cent. 1951/54 at Rs. 100-8; 3½ per cent. 1947/50 at Rs. 105-5; and 5 per cent. 1940/43 at Rs. 110-12 and 5 per cent. 1945/55 at Rs. 119-4. Mysore Loans were unchanged.

Banks.—Reserve Bank continued its onward march and was done up as high as Rs. 133. Bank of Hindustans were at Rs. 31-8; Travancore Nationals were at Rs. 55 and Bank of Mysore at Rs. 272; Imperial Bank fully paids at Rs. 1,580 and Contributories at Rs. 388.

Public Utilities.—Madras Telephones were unchanged at Rs. 20. Trichy-Srirangams were done at Rs. 180; Vellore Electrics at Rs. 15 ex-dividend and East Tanjores at Rs. 109-8.

Textiles.—This section ruled firm but there was an easier tendency towards the close. Kaleeswarars were done as high as Rs. 297-8. Sitarams were at Rs. 54-8, Buckingham and Carnatics at Rs. 216 and Vasantas at Rs. 112 with buyers over.

Sugars.—This section was active. Mysore Sugars were at Rs. 27-8 cum-dividend. Deccan Sugars Old and New were quoted at Rs. 365 and Rs. 92 respectively.

Planting.—This section was dull. Highland Produces closed at Rs. 15 and Nilgiri Neerugundis at Rs. 1-7.

Miscellaneous.—Burma Corporations were at Rs. 8-8; Singareni Collieries at Rs. 6-12. Tata Ordinaries were lower at Rs. 149 and Deferreds at Rs. 594.

THE GHUSICK AND MUSLIA COLLIERIES, LTD.

NOTICE

is hereby given that the Fifty-Eighth Half-yearly Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Saturday, the 21st day of December, 1935, at 11-30 A.M. for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the half-year ended 30th September, 1935, and to transact any other ordinary business of the Company.

The Share Transfer Books of the Company will be closed from the 14th to the 21st December, 1935, both days inclusive.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Friday evening.

Money was easy with interbank call quoting at $\frac{1}{4}$ per cent.

Exchange Market.—This section was dull with banks selling T. T. at 1s. 6 3/32d. up to December ; 1s. $6\frac{1}{8}$d. January-March 1936 ; and 1s. 6 2/32d. April-July.

Securities.—The security market was firm throughout the week on account of the strength in sterling advices. The over-subscription of 100 million pounds of 1 per cent. 1941 Loan and 200 million pounds of $2\frac{1}{2}$ per cent. funding 1956/61 Loan imparted a bullish tone to giltedged markets in London as well as Bombay. $3\frac{1}{2}$ per cent. Paper is now quoting at Rs. 96-15. Medium and short-dated securities also have improved on investment demand. 1945/55 Loan was quoted at Rs. 119-4 ; 1947/50 at Rs. 105-14 ; 1951/54 at Rs. 101-7 ; 1955/60 at Rs. 116 ; 1960/70 at Rs. 111 ; 1939/44 at Rs. 109-6 ; 1940/43 at Rs. 110-13 ; 1938/40 at Rs. 108-14 ; 1941 at Rs. 103-8 and 1943 at Rs. 108-8.

Shares.—With the exception of fixed interest bearing securities like banks, insurance and other good dividend paying issues like telephones, hydro-electrics etc., the market has been fluctuating in a narrow range.

Textiles.—There has been pronounced weakness in this section on account of the fears of reduction of duties on textile imports from United Kingdom. Bombay Dyeings were hammered down from Rs. 760 to Rs. 730 but closed slightly better at Rs. 746-4. Centuries on rumours of a big loss in current year had a precipitate fall from Rs. 222-8 to Rs. 200, but closed at Rs. 206-14. Central India was quoting at Rs. 260 ; Colaba at Rs. 140 ; Gokak at Rs. 171-14 ; Kohinoor at Rs. 205 ; and Swadeshi at Rs. 156-4.

Hydro-electrics.—The strength in securities imparted the bullish tone to this section and improved revenue returns of the companies assisted the rise in Tata Powers to Rs. 1,581-4, Andhra Valleys to Rs. 1,660 and Hydros to Rs. 169-6.

Iron and Steel.—Steels have been moving in a narrow range with tendency slightly bearish. We recommend purchases only on a good reaction. Tata Ordinaries closed at Rs. 148-12, and Deferreds at Rs. 587-8. Tata Second Preferences are up at Rs. 162-4.

Cements.—This section has been very steady. Indian Cements are again at Rs. 461-4. But we positively favour liquidation. Investors can take advantage of appreciation that is bound to result on the completion of the merger scheme. Merger negotiations are progressing favourably and we, therefore, recommend purchases of Bundis, Okhas and Katni Deferred shares at current levels. Bundi closed at Rs. 36-2 ; Gwalior at Rs. 125 ; Indian at Rs. 461-4 ; Katni Deferred at Rs. 2,165 ; Ordinary at Rs. 377-8 ; Okha at Rs. 250 ; Punjab at Rs. 25-10 ; Shahabad at Rs. 473-12 ; and United at Rs. 121.

Miscellaneous.—Belapur Sugars have been very steady at Rs. 168-12 ex rights. Bombay-Burmahs after touching Rs. 415 dropped to Rs. 391-4 on heavy selling and recovered at close to Rs. 406-4. Bombay Telephones were up at Rs. 108-8 and we still favour investment purchases. Bombay Trams were steady at Rs. 150-4. Tata Premier Constructions which were neglected at Rs. 72-8 have slightly improved to Rs. 74. Bombay Steamers are sticky around Rs. 284 and in view of increasing competition in the shipping line we favour realisation.

Banks and Insurance.—Bank shares are steadily improving on strength in securities. Imperial fully paids are better at Rs. 1,577-8 and partly paids at Rs. 385. Central Banks closed at Rs. 37-6 ; Bank of Indias at Rs. 126-12 ; Reserve Banks at Rs. 134-8 ; Bank of Barodas at Rs. 105 and Unions at Rs. 5-7.

In the insurance section, New Indias are higher at Rs. 44-8 and Orientals are up by Rs. 200 at Rs. 4,700. Bombay Life Shares were quoting at Rs. 110 with no sellers.

LONDON STOCK EXCHANGE

Active conditions prevailed on the Stock Exchange during the week under review. Giltedged were strong and some sharp rises were recorded. The new issue of Government loans was responsible for the rise. The close, however, has been a shade easier. 3 per cent. New Loan was quoted at $98\frac{1}{2}$, $3\frac{1}{2}$ per cent. 1931 at $97\frac{1}{2}$, $4\frac{1}{2}$ per cent. 1958/68 at $115\frac{1}{2}$ and $2\frac{1}{2}$ per cent. Consols at $86\frac{3}{4}$, $3\frac{1}{2}$ per cent. Conversion at $107\frac{7}{8}$, 4 per cent. Funding Loans at $117\frac{5}{8}$, War Loan at $106\frac{1}{2}$ and Victory Bonds at 116. The new Treasury Funding $2\frac{1}{2}$ per cent. loan 1956/61 and the New Treasury 1 per cent. bonds 1939/41 were quoted at 1/16 discount despite over-subscription.

With the strength in giltedged securities, other sections also were firm. Armaments and Electricals advanced. Tobacco shares registered some rises, Imperial Tobaccos and British American Tobaccos quoting at 152s. 6d. and 117s. 6d. respectively. Minings were steady. Industrials showed some good features. Teas and Rubbers were unchanged.

NEW YORK STOCK EXCHANGE

The market on the Stock Exchange was strong.

FRENCH DIFFICULTIES AFFECT BUSINESS

BOOM IN CAPITAL ISSUES

By R. Gordon Cummings

By Air Mail

Special for "**INDIAN FINANCE**"

London, Nov. 25th, 1935.

France has once again been the "nigger in the wood pile," some uncertainty not unnaturally arising from the repeated increases during the past week in the French bank rate, which has to-day been raised to 6 per cent. Investors, and more particularly speculators, have decided to await developments before opening up new commitments.

Business, as a result of the French difficulties, has fallen to meagre proportions.

The only really bright features to-day have been provided by Giltedged stocks, which have been bought heavily on continental account. Rises on the day are anything up to one quarter. *War Loan* is 105¾, *2½ per cent. Consols* 85⅝, *3½ per cent. Conversion* 107⅜, and *Local Loans* 96⅛. *India* stocks are firmer, the 2½ per cent. being 75, the 3 per cent. 87, the 3½ per cent. 104¾, the 4 per cent. 107½, and the new 3 per cent. ½ premium. *Home Municipal* stocks have been little affected by the re-opening of the issue market.

In the Foreign section, *French* bonds have strangely enough strengthened, while *Japanese* and *Chinese* stocks have recovered several points. *Argentine* and *Brazilian* issues keep firm.

Interest in the Home Railway market has fallen to negligible proportions, with the result that quotations are easier. *Great Western* is 49½, *London Midland and Scottish* 17½, *Southern deferred* 20½, and *London and North Eastern* second preference 20½. *London Transport* C. stock keeps very firm at 105½.

Apart from a few individual features, price movements in the Industrial markets have not been great. Tobacco shares have continued in demand, *British-American* rising to 112s. 6d., *Imperials* to 130s., and *Carreras* A. to 174s.

Textile issues keep firm, with *English Sewing Cotton* at 46s. 9d., *Coats* at 65s., and *Patons and Baldwins* at 62s. *Whitworth and Mitchell* have recovered to 21s. 3d. Although *British Celanese* ordinary have fallen to 13s. 9d., the second preference shares are well supported at 23s. 6d. *Courtaulds* are fractionally harder at 56s.

There has been some profit-taking in certain building shares, *Associated Cement* being 66s. 9d., *London Brick* 84s., and *Sussex Brick* 11s. 3d. On the other hand *Eastwoods* are firm at 60s., and *Ragusa Ashphalte* have further improved to 17s. 3d.

Profit-taking has also been seen in certain Electrical Equipment shares, *Associated Electrical* having come back to 39s. 6d. *General Electric* have, however, jumped sharply to 71s. 9d., while *Crompton Parkinson* have been very active on the annual report at prices varying between 95s. and 100s.

Movements in the miscellaneous sections have been narrow, the principal prices being *Amalgamated Metal* 26s. 3d., *Boots Pure Drug* 49s., *British Aluminium* 43s., Dunlops 39s., *Imperial Chemical* 37s. 3d., *Radiation* 74s., *Salt Union* 44s., *Electric and Musical Industries* 28s. 6d., *Sudan Plantations* 33s. 3d., and *United Molasses* 20s. 6d.

Business in the Iron and Steel markets has tended to die away, but all the same prices are fairly well maintained. *Allied Iron Founders* have fallen to 36s. 6d. on disappointment with the interim dividend of 4 per cent. *John Brown* close at 19s. 3d., *Guest Keen* at 33s. 6d., *Hadfields* at 18s. 9d., *Staveley Coal* at 47s., *Stewarts and Lloyds* at 33s. 6d., *Richard Thomas* at 11s., *United Steel* at 32s. 3d., and *Vickers* at 18s. In the Shipbuilding group *Hawthorne Leslie* have improved to 26s. 6d., but *Swan Hunter* have fallen to 25s.

Although *Shell Transport* have recovered to 81s. on mature consideration of the interim dividend statement, there has been little outstanding movement in the Oil market. *Burmahs* are 82s., *British Controlled* Preference 8s., *Attock* 24s., and *Anglo-Iranian* 67s. 6d.

Gold mining shares have tended to quieten down, but all the same buying of the sound dividend paying Kaffirs has steadily proceeded. There has been little doing in Australian mines, where *Commonwealth* are 11s. 3d., *Great Boulder Mining and Finance* 3s. 9d., and *Gold Mines of Kalgoorlie* 9s. 9d. West Africans have been comparatively quiet, *Aristons* falling sharply to 8s. 9d. on news of a small fire at the mine.

There has been a persistent demand for the leading Rhodesian copper shares, with the result that some very good rises have been witnessed. *Rhodesian Selection Trust* are 10s. 6d., *Roan Antelope* 32s. 6d., *Rhokana Corporation* 109s., and *Selection Trust* 18s.

There have been some big changes over from *Rhokanas* to *Roans*, but the former shares have recovered earlier declines.

Under the lead of *De Beers* preference, which are now over £15, diamond shares have come into demand on rumours that production will shortly recommence.

Sharp fluctuations in the price of the commodity have had little effect on tin shares, which keep remarkably firm.

Interest in Tea shares is small and Rubbers are comparatively neglected.

Boom in Capital Issues.

In accordance with my predictions of a few weeks ago one result of the return of the National Government to power has been a decided revival of activity in the London new capital issue market. During the past week alone a fair number of issues have been made, varying from gold mining propositions to Municipal loans.

After a lapse of several months Home Municipalities are now approaching the public for new money, either for repayment of existing high interest indebtedness, or for the purpose of putting in hand long delayed schemes of expenditure. On Friday, *Sunderland Corporation* successfully borrowed £1,000,000 at 3 per cent., the stock being issued at 99½ per cent. To-morrow the lists will open for a £500,000 3 per cent. loan at 101 per cent. on behalf of the *Brighton Corporation.* I understand that other similar loans amounting to approximately £40,000,000 are only awaiting their turn before making their bow to the public.

Outside of the gilt-edged market, £625,000 3¼ per cent. debentures of the *North Metropolitan Electric Power Company* were privately placed in the market to-day; in the near future Edmundsons Electricity Corporation will issue £2,000,000 of similar stock. To-morrow and Wednesday the lists will open for three industrial issues involving public subscriptions in excess of £1¼ millions.

Cinema Issues—A Warning.

There are various influential reports to the effect that at least three new cinema companies will be floated in the near future. If rumour is correct these issues alone will involve many millions of pounds—one company alone is expected to be capitalised at £3,000,000. At this stage I must utter a strong word of warning regarding the future of the British Cinema companies.

The building of cinema theatres is becoming so intensive in this country that at least three new super theatres must, on the average, be opened each week.

Many of these theatres are owned by private companies, which eventually hope to sell their properties either to the public or one or other of the big cinema groups at a substantial profit. The position is getting so ridiculous that certain small towns and even large ones have now more cinemas than the owners can possibly hope to fill.

Inevitably there will be a serious crash in the cinema industry, involving the loss of enormous sums of money.

In addition to those mentioned above, there are many other issues and introductions, covering a very wide field of enterprise, under contemplation. Unless international complications and disruptions intervene I can safely foreshadow that December and the opening months of 1936 will be busy ones for the Issuing Houses.

Present Issue Tendency.

At this stage it will be useful to examine the present tendency regarding the public raising of new money. The three usual methods of obtaining capital are by a public issue, an offer for sale, or "introduction" to the Stock Exchange.

There is little difference between the first two methods, but between these and the "introduction" policy there is a wide divergence. I have previously commented on the controversies which have often arisen over the "introduction" business, the main criticisms being concentrated on the fact that there is no uniform price at which the public can purchase shares, this depending upon the demand and the control exercised over the marketing of the securities.

A favourable point for this method is the low relative expenditure. The process is simple, the shares being privately issued, the market supplied with a fair line, and a statement similar to a prospectus advertised in two, or possibly more newspapers. On the other hand expenditure in the case of public issues, in the form of advertising, underwriting commission and other incidental expenses is big.

It is not to be wondered at, therefore, that an Issuing House will always consider the "introduction" method before going to the expense of the public issue system. Only last week the managing director of one of the leading Issuing Houses told me that he would always "introduce" shares rather than go to the trouble and expense of a public issue. He pointed out that profits in the promotion business are now cut to a very fine point, with the result that every penny of expenditure has to be carefully watched.

Scottish Banking Results.

Small but satisfactory recovery is shown in the latest annual reports of two of the leading Scottish Banks.

For the year ended October 12th last, net profits of the *Royal Bank of Scotland* rose by £7,831 to £629,258. The ordinary dividend is maintained at 17 per cent. for the year and the carry forward increased by £76,000 to £3,857,144.

The *Commercial Bank of Scotland* reports profits for the year to October 31st last of £396,950, an increase of £17,613 over those of the previous year. In addition to the dividend of 16 per cent., the A. shareholders are this time to receive a special anniversary bonus of 2 per cent.

Comparison of the balance-sheets of both banks with those of a year ago shows that deposits have risen substantially. On the assets side the biggest increases are in cash and gilt-edged securities. In the case of the Royal Bank advances to customers have risen by £866,000, but the Commercial Bank statement shows a fall of £1,281,700 in loans and advances, thus confirming the present difficulty found by banks in profitably utilising their surplus resources.

Prosperous Brewing Industry.

This is the time of the year when many of the leading Brewing companies issue their annual reports. Many of these have appeared within the past few days, but it is only possible to deal with the most important companies.

Outstanding amongst the many satisfactory profit statements is that of *Ansells' Brewery*, which operates in the Birmingham and Midlands district. Compared with a year ago profits for the twelve months to September 30th last have risen by no less than £167,312 to £429,307. The ordinary dividend is raised from 15 per cent. to 22½ per cent.

Another provincial concern to show good figures is the *Holt Brewery*, whose trading profits of £115,859 for the twelve months to September 30th, 1935, compare with £79,661 for the previous nine months. In this case the ordinary dividend is increased from 3 per cent. to 5¼ per cent.

Last week I stated that the dividend of *Bass Ratcliff and Gretton* was to be raised by 2 per cent. to the highly satisfactory total of 22 per cent. The report for the year to September 30th discloses that net profits have risen from £558,913 to £608,335.

Worthington & Co., which is controlled by Bass Ratcliff and Gretton, announces an increase of £18,337 to £385,214 in trading profits. The *Ind Coope and Allsopp* dividend is to be made up to 25 per cent. an increase of 2½ per cent.

In all other cases higher profits are disclosed.

At the present time brewery shares are, in my opinion, one of the few sections in the Stock Exchange worth attention. There is no doubt that prosperity will continue in this industry for some time to come. Profits will, moreover, increase in due proportion to any further revival in British industry generally.

Electrical and Steel Companies' Progress.

One of the outstanding events of the past week has been the almost phenomenal increase in the profits of *Crompton Parkinson*, the electrical equipment manufacturers. For the year ended September 30th, net revenue of £243,810 is no less than £112,000 higher than that for the previous year, while it compares with £102,188 in 1932-33. The cash dividend on the 5s. ordinary shares is again to be 12½ per cent. Fortunate shareholders are, however, to receive a 7 per cent. capital bonus, as for the previous year, and also an additional 100 per cent. capital bonus in ordinary shares.

It is no wonder that the 5s. shares stand at the high price of 100s. All the same I would strongly urge holders to take at least part of the profit, for the present quotation is only justified by the scrip bonuses, which the company may find it difficult to maintain in later years.

The report of *Tube Investments*, the big tube manufacturing company, which is closely associated with *Stewarts and Lloyds*, for the year ended October 31st, 1935, reveals a big increase of £130,048, to £493,863, in net profits. Shareholders, as already announced, are again to receive a cash dividend of 10 per cent. plus a scrip bonus of 10 per cent.

Almost a year ago the capital of *Dorman Long & Co.*, the iron and steel manufacturers and constructional engineers, was drastically reorganised. Under the scheme £2,857,972 non-cumulative 6½ per cent. £1 first preference shares were created. On January 1st next, holders of these shares are to receive their maximum dividend of 6½ per cent.

The ordinary shares of *R. A. Lister & Co.*, manufacturers of oil and other engines, were introduced to the Stock Exchange in July. The annual report to September 30th discloses that profits have risen by £31,809 to £112,678. Contrary to expectations the dividend is only, however, raised by 2½ per cent. to 10 per cent., although shareholders are to benefit from the issue of 37,500 new £1 ordinary shares at 35s., in the proportion of one for every ten now held. The shares fell several shillings to 62s. 6d., as speculators were disappointed with the dividend. There is room for recovery to 70s.

The Locomotive Building Industry.

Recovery in the Iron and Steel trades has gradually extended from one branch to another. As each branch has prospered so has the next one been helped. During the period of depression railway companies all over the world have not been anxious to renew their rolling stock, with the result that locomotive builders have had a very thin time. The Home railways have, moreover, to a large extent been building their own locomotives.

Parsimony such as this cannot be carried on for ever. Sooner or later there will be a world-wide necessity for the replacement of worn out and obsolete rolling stock.

I shall not be surprised to see a process of rationalisation carried out in the locomotive building industry during the next year or so. Manufacturing efficiency and a reduction in costs should therefore be assured. There is also the likelihood of the Home Railway companies deciding to give more orders to private firms; the London Midland and Scottish placed last year an order for one hundred locomotives with the Vulcan Foundry Company.

An examination of the prospects for the four leading locomotive manufacturing companies will be profitable. Before going further, I must point out that all these concerns have suffered extensively in recent years.

Locomotive Shares—Some Selections.

Beyer-Peacock & Co. has an issued capital of £600,000, equally divided into 5½ per cent. cumulative preference and ordinary shares of £1 each. Preference dividends are in arrear from June 30th, 1931, while the ordinary shares have not received any distribution since 8 per cent. for the year 1930. At the last meeting the chairman indicated that the capital would eventually have to be reorganised and further capital provided. Should the reorganisation be carried through the balance-sheet position will be cleared up and the way reopened for resumption of, at least, preference dividends. The preferenc shares are quoted at 14s. 6d., and the ordinary at 6s.

North British Locomotive has an issued capital of £2,000,000 in £1 shares, of which 750,000 are 5 per cent. cumulative preference, and 1,250,000 ordinary shares. Preference dividends are unpaid from July 1933 and the ordinary shares last received a 2½ per cent. dividend for the year 1929. Although there was a debit balance of £33,484 on profit and loss account at December 31st last, I anticipate that this will be wiped out by the current year's profits. Early resumption of preference dividends can, therefore, be expected. The preference shares can be bought at 11s. 6d. and the ordinary at 4s.

Vulcan Foundry has come through the depression in a much better manner than some of the other companies, profits for the twelve months to June 30th, 1935 being £20,545. Not once has an ordinary dividend been omitted for many years, although the last two distributions of 2½ per cent. and 2 per cent. tax free have been paid out of profits on realisation of investments. Apart from £100,000 in preference shares, the capital is £845,097, in £1 ordinary shares, which can be bought at 20s. 6d.

From the point of view of size *Robert Stephenson & Co.* is relatively small, the capital being only £206,250 in 5s. ordinary shares. Owing to conservative finance in the past it has been possible to pay dividends, despite losses during the past four years. At December 31st, 1934, reserves totalled £157,000, whereas fixed assets were valued at little more than £200,000. Last year's dividend was 2 per cent., thus giving a very low yield on the 5s. shares at par. Prospects are, however, good.

Latest Industrial News.

The full report of *Dennis Bros.*, the commercial motor manufacturers, shows an increase of £14,926 to £119,882 in the net profits for the year to September 30th.

The quarterly dividend on the ordinary stock of *J. & P. Coats,* the thread manufacturers, is being maintained at 2½ per cent. actual.

Marks & Spencer, the big chain store business, is raising the interim dividend from 10 per cent. to 15 per cent. This is no indication, however, that the total dividend for the year will be increased over last year's payment of 35 per cent.

The first interim dividend since the company was made into a public concern is declared by *Bristol Aeroplane* in the form of an interim dividend of 7½ per cent.

Cabled results of *Joseph Nathan & Co.* the food specialists, indicate that profits have risen by over £18,000 to £73,943. The directors will recommend payment of two years dividend arrears on the 8 per cent. preferred ordinary shares.

Two "Trust" Reports.

The full report of *Charterhouse Investment Trust* discloses that net profits have fallen from £227,068 to £119,911. It must be remembered, however, that a sum of over £112,000 was included in the figures for the year to November 11th, 1934 in respect of profits on sale of investments, etc. There was, therefore, a moderate improvement in "real" profits during the past twelve months.

"Daily Mail" and General Trust, which has holdings in *Associated Newspapers* and similar concerns, earned increased profits last year. The net figure for the twelve months to September 30th is £301,487, compared with £254,238 in 1933/34. In order to again pay 11¼ per cent. tax free it is necessary to decrease the balance carried forward by £13,587. In their report the directors state that investments, appearing in the balance-sheet at £4,339,000, have a market value in excess of this figure. Investment reserve account now totals £859,235. The £1 shares give the satisfactory yield of 5⅛ per cent. gross at 56s.

Market Pointers.

Latest *Home Railway* traffics show a total increase of £36,000 compared with the corresponding week of a year ago. Gross receipts for the 46 weeks to date have risen by £1,142,000.

The traffic index of *Cable & Wireless* for October was 78.8 compared with 73.6 in October 1934 and 75.5 in September 1935. This is the highest figure for the current year, and also for any October since 1930. As the Court has now sanctioned the capital reduction scheme, early repayment of part of the Preference stock will soon be made.

Profits of *Consolidated Gold Fields of South Africa* for the year to June 30th last were £1,465,185—an increase of £138,109.

Reynolds Bros. £1 ordinary shares have recently risen steadily to 30s. 6d. Despite the profit of several shillings since I first recommended a purchase I cannot yet advise a sale.

I am given to understand that an influential pool has taken over the "repatriated" 1,700,000 10s. shares of Electric & Musical Industries. A rise to 40s. is not beyond the bounds of possibility.

Satisfaction with the interim report has lead to some buying of *British Cotton and Wool Dyers* 5s. shares, which are now quoted at 6s. 3d.

Following the report, *Associated British Malsters* 5s. ordinary shares have fallen to 9s. 3d. At this price the yield is about 6 per cent. A cheap investment!

Proposals to issue further shares on bonus terms have resulted in *Paringa Mining* 1s. shares falling to 3s. 3d. Funds provided by the new issue will be used to speed up development work. Averaging is strongly advised.

WALL STREET IN AIR MAIL WEEK

HEAVY TRADING CONTINUES

CONSIDERABLE FOREIGN BUYING

By F. Rocke.

By Air Mail

Special for "INDIAN FINANCE"

Wall Street has continued active and there has been heavy foreign buying, especially on British account. Rails, Motors, Oils and Amusement Shares were among the strongest groups. The Saturday short session was very active, the turnover being 1,640,000 shares. Steel and Mail Order groups showed the largest gains. Utilities and Rails were steady. On Monday there was some profit-taking and prices closed fractionally lower. The advance was resumed the next day and American Can, Briggs Manufacturing and International Paper were the leaders. But there was a sharp break in prices on Wednesday. The market opened firm in the morning, but a sudden wave of profit-taking set in at mid-day and continued throughout the rest of the session. Prices in all sections were substantially lower. American Can, General Motors and U. S. Steel were among the worst sufferers. This proved a tonic for the market yesterday and the session was active with a firm tone, closing prices being higher all round.

On the Bond market, Government Bonds were steady. Speculative rail obligations were higher.

Rails were steady thoughout the week.

Chesapeake and Ohio has declared the regular quarterly dividend of 70 c. Earnings in the first ten months totalled $3.20 per share against $3.06 in the corresponding period last year.

The New York Central Railroad is to negotiate with the Reconstruction Finance Corporation on the question of extending the loans which mature on December 1.

Oils were strong during the week. It is generally believed that the year 1935 will be better than last year. The statistical position of the industry is good. Consumption of gasoline is running at a record level and prices obtaining at present are higher than a year ago. The crude oil structure also is sound. The price of Pennsylvania crude oil has been advanced by 15 c. a barrel.

From the reports issued for the quarter September 30, 1935, it will be seen that a group of sixteen companies earned an aggregate profit of $22,442,288 in the three months against $16,097,380 in the corresponding period of 1934, an increase of $6,344,908. Results for the nine months ended September last, show that a group of fifteen companies had net earnings totalling $51,995,192 compared with $39,149,946 in the like period of 1934, an increase of $12,845,246.

The daily average production of crude oil in the week ended November 16, was 2,850,600 barrels, against 2,802,250 in the previous week according to the figures of the American Petroleum Institute.

Gosoline Stocks in November 16, totalled 41,561,000 barrels.

Utility companies are refusing to register under the Holding Company Act. United Gas Improvement has filed a Bill in the Federal District of Philadelphia attacking the constitutionality of the Holding Company Act.

Consolidated Gas has likewise refused to register under the Holding Company Act.

The companies are convinced that the Utility Act will be declared unconstitutional. Power output is running at a record level. During the week Utilities were remarkably steady and they even took part in the advance.

Leading copper shares were firm. Domestic copper sales are improving. The total on Thursday was 2,746,000 lbs., three times the volume of the previous day.

The Anaconda Copper Mining Company reports for the first nine months a net income of $7,856,000 (equal to 91 c. per share). The entire net income in 1934 before depletion amounted to $1,927,000 (equal to 22 c. per share).

Kennecott Copper has declared a quarterly dividend of 20 c. against 15 c. paid previously. This Corporation has bought all the stock of American Electrical Works, copper fabricators.

Steel mill activity is running up. According to *Iron Age* steel mill activity for the week was at 54.5 per cent. of capacity against 54 per cent. the previous week. This is the peak rate for the year and the highest since June, 1934. Demand is improving and the orders from the automobile industry have been responsible for the increase in activity.

The automobile industry is continuing well.

Retail sales of Chevrolet Cars in the first ten days of November were 32,657 units—a record for any similar period following the introduction of new models.

The Detroit plant of the Motor Products Corporation has been closed by a strike. The amalgamation of three independent Automobile Worker's Unions is expected to result in sporadic strikes in part-making plants.

Business Pointers:—

Freight car loadings in the week ended November 9, totalled 653,500 cars, an increase of 41,000 over the corresponding week last year, but a decline of 27,200 from the previous week.

Power output in the week ended November 16, totalled 1,938,560,000 kilowatt hours an increase of 1.3 per cent. over the previous week and of 14.6 per cent. over the corresponding week last year.

November 22, 1935.

PREMCHAND JUTE MILLS, LTD.

NOTICE.

The Ninth General Meeting of the Shareholders will be held at the Registered Office of the Company, 102, Sovabazar Street, Calcutta, on Friday, the 20th December, 1935 at 1 p.m. for the purpose of receiving the Directors' Report and passing the Accounts and Balance Sheet for the half-year ending 13th October, 1935 and transacting any other business that may be brought forward.

The Share Transfer Books of the Company will be closed from the 14th to 20th December, 1935, both days inclusive.

By Order of the Directors,
JANOKINATH ROY,
Chairman.

Calcutta, 2nd December, 1935.

BOURSES IN AIR MAIL WEEK

Paris.

The internal political situation and frequent increases in the discount rate of the Banque de France affected the Bourse and there was an irregular tendency in evidence. Rentes showed some strength early in the week but they sagged later on. Banks had a tendency to resist the downward trend. Internationals were steady. Raffinerie say was quoted newly at 806.

On the Coulisse, there was some improvent in diamond shares and shares in the Gold Mining Group, towards the close. De Beers Preferred were quoted at 1,103. Rand Mines and Sub-Nigels were at 639 and 1,037 respectively.

	Nov. 15	Nov. 18	Nov. 21
4½% Rentes, 1932 "A"	82.35	82.30	80.90
4½% Rentes 1932 "B"	81.05	81.05	79.80
Banque de France	8,880.00	8,910.00	8,800.00

† New quotation.

Berlin.

After earlier strength there was an easier tendency on the Bourse during the week. A slight strength was noticeable on November 19, when Reichsbanks were firm at 186, Farbenindustries were up at 148.75 and Siemens at 163.50. The close was, however, easy prices being substantially marked down. There was a holiday on November 20, on account of Repentence Day.

	Nov. 15	Nov. 18	Nov. 21
Reichsbank	181.50	183.25	182.10

COMPANY REPORTS

THE PORT CANNING AND LAND IMPROVEMENT COMPANY LIMITED.

The report for the year ending 30th April 1935 :—

The Directors beg to state that their collections this year amounted to Rs. 6,75,000 against Rs. 6,77,000 last year.

The sum of Rs. 1,901 was collected during the year as Salamy. This amount together with the sum of Rs. 3,280 representing Forfeited Dividends, has been credited to the Reserve Fund, as usual. A sum of Rs. 16,000 is also transferred from Patta Expenses Account to the credit of Reserved Fund this year.

The following amounts have been transferred from Profit and Loss Account to the credit of the undermentioned accounts :—

Rs. 35,000 to the Reserve Fund.
Rs. 1,80,000 to Ryot's Outstanding Doubtful Fund.
Rs. 2,000 to Furniture and Plant Accout for depreciation.

After appropriating the above amounts there remains a balance of Rs. 1,53,134-1-9½ and the Directors recommend that a Dividend of Rs. 25 per share be declared absorbing Rs. 1,50,000 and carry forward to next year's account the balance of Rs. 3,134-1-9½.

Managing Agents.—Messrs. David Sassoon & Co., Ld.

PUBLICATIONS OF THE LEAGUE OF NATIONS

"BALANCES OF PAYMENTS, 1933"

Price : Rs. 4-2-0

Only existing statistical book of reference concerning international accounts (trade in goods and services, gold, long and short-term capital operations). Figures, are given for 32 countries, in the majority of cases for a series of years up to 1933 inclusive. Information is also supplied concerning outstanding international liabilities and assets. In a summary chapter the general tendencies up to September, 1934, are dealt with, special consideration being given to the effect of currency depreciation.

"ARMAMENTS' YEAR-BOOK, 1934"

Price : Rs. 13-12-0

This edition contains monographs on 64 countries, both members and non-members of the League. The information contained is derived from two sources: the communications from various Governments to the Secretariat on the occasion of the Conference for the Reduction and Limitation of Armaments and the official publications of the different countries, such as collections of laws, army gazettes, etc

"NATIONAL PUBLIC WORKS"

Price : Rs. 8-4-0

This book has just been issued by the Communications and Transit Organisation of the League of Nation and is the result of a letter addressed by the Secretary General of the League requesting various Governments to communicate to him the following particulars: (1) A brief description of the main public works undertaken since the beginning of the year 1929; (2) The principal administrative methods followed or contemplated for the execution of such work; (3) The principal methods employed for financing such work; (4) An estimate, as far as possible, of the allocation of expenditure on the execution of the possible works.

"INTERNATIONAL TRADE STATISTICS, 1933"

Price : Rs. 6-14-0

This volume analyses the foreign trade during the years 1931, 1932 and 1933 of 65 countries accounting for 95% of the total world trade. It contains more than 300 tables, which are accompanied by explanatory notes. The data it gives illustrate strikingly the great changes undergone in recent years in the composition and direction of foreign trade, and their effect in the position of the individual countries. The synoptical tables show the percentage distribution of each country's imports and exports by provenance and destination.

Friday Evening.

As a rule, December is marked by nip in the air and pep in the money market. In the present year, the air is nippy all right; but the money market has all the appearances of a slack season month. Apart from the better technique which has been fostered by experience in regard to the handling of the money market by the authorities, demand for finance is conspicuously poor for this time of the year. This is somewhat strange as there has been, without doubt, some improvement in the prices of commodities as compared with, say, three months ago. One would have expected that with higher prices for commodities, banks would be able to employ more funds in the financing of trade. This expectation has not materialised. On the other hand, the amounts lent out by all the Scheduled Banks put together have actually been coming down week by week. This means that the resources amongst the indigenous bankers and other financial agencies are now so large that recourse to banks may become necessary only when commodity prices rise to far higher levels than we have now in recent years. It is to be seen how far the lowering of the bank rate affects the interest rates on loans availed of by mofussil interests, and how far this step will be beneficial in the direction of stimulating commodity prices. However, it may be said, in broad terms, that till agriculturists are relieved of their accumulated indebtedness by suitable planning of land mortgage banks, the growers of staple produce will continue to be at the mercy of money-lenders and their usurious rates. The problem of financing agriculturists eliminating as far as possible the intermediary agencies, is neither easy nor simple. But this is a problem which must needs be solved ; and only after a solution has been found, could any effect of monetary policy of the central banking authority be communicated to upcountry centres. Meantime, suffice it to say for the present discussion that all current indications confirm our earlier forecast that the so-called busy season of this year will prove a conspicuous exception to the rule.

That funds are practically unlendable in the money market centres, must needs have its direct effect on Treasury Bills rates and, to some extent, on giltedge values. The Reserve Bank have not so far announced the reintroduction of intermediate Treasury Bills. The weekly offer continues to be Rs. 2 crores. The market is now settling itself to a rate roundabout Re. 1-0-6. In relation to earlier experiences, one might have thought that such cheap money rates as now prevail must enable the Reserve Bank to sell Treasury Bills at rates much lower than one per cent. But we do not favour any undue lowering of the Treasury Bills rates as too low a rate means that Treasury Bills become the concern of special quarters. The aim in regard to Treasury Bills must be to diffuse their popularity as widely as possible. Towards this end, it is necessary to offer a rate which will be deemed reasonably adequate. In the current week, against Rs. 2 crores on offer, applications received came to Rs. 4.08 crores as against Rs. 3.78 crores on December 3. The average rate on accepted tenders was Re. 1-0-6 as against Re. 1-0-9 on December 3 and Re. 1-1-8 on November 27. The Government have so far been able to provide for all the ways and means requirements without any increase in the weekly sales of Treasury Bills. As will be remembered, there are heavy Treasury Bills maturities in the course of this month ; and there is every indication that the Reserve Bank authorities hope to be able to meet this large commitment on the basis of weekly sales of Treasury Bills for Rs. 2 crores. As on December 6, Government balances had come down from Rs. 11.88 crores to Rs. 8.85 crores. The drop was thus Rs. 3 crores and is largely accounted for by the usual month-early disbursements. Even after providing for such large outgoings, the Treasury did not find it necessary to take any advances from the Reserve Bank on ways and means account. It seems, however, safe to say that the return of the Reserve Bank for the week ended December 13, must show a ways and means advance availed of by the Treasury. There is no harm in mounting up the ways and means advances in the course of September and the first-half of January, as they could easily be liquidated from the surplus revenue collections that would flow in in the final quarter of the financial year.

The lowering of the bank rate, the continued cheap money conditions and the confident hope of further continuance of cheap money have all enabled the government securities market to withstand the terrific shock which it received from the debacle in the silver market. It appears necessary to keep a careful watch over the silver market as operators in bullion on the Bombay market have also commitments in the giltedge market. For this reason, large profits made by speculators in silver have meant bullish activity in giltedge. And *vice versa*.

Silver has had, during the week, one of those upsets, of which, we pointed out as early as August last, 1935 would prove to be too full. The London price has come down within a week from 29 3/16d. to 26⅞d. on December 12. And the last quoted American price was 62¾ c. against 65⅜ c. on December 6. The Bombay prices suffered a serious decline from Rs. 65 to Rs. 57-8. The causes behind this debacle and their significance are the subject of a leading article in this week's issue. Here it should suffice to consider these developments from the comparatively narrow standpoint of this section. In this view, the most important point is that, while, so far, the London and the New York prices of silver have not shown any recovery, the price of silver in the Bombay bullion market has improved from Rs. 57-8 on December 11, to Rs. 58-8 on the following day. This is due to the action of the Board of the Bombay Bullion Exchange, which decided that the silver market in India should not be exposed to the full blast of the changes in the London market which are caused by the vagaries of the American Government. The decision of the Board at its emergent meeting and its action in fixing the minimum price have had the immediate effect of bringing about an improvement of a rupee in the local price of silver. It would, of course, be unwise to exaggerate the significance of the price-changes to the silver market as a whole or to the trends of the immediate future. As we have pointed out elsewhere in this issue, the Bombay Bullion Exchange, despite the large place it occupies in the world's silver market, cannot of itself combat the strong forces that may be set in motion by any change in the American policy. But it is not without significance that the situation in the silver market has been brought under control. It is not pessimism to suppose that, in the absence of any such action on the part of the Bombay Bullion Exchange, the silver market would have witnessed a further decline in the price of silver and consequently a serious disruption. Once an important section of the business world suffers so serious a shock, its repercussions are bound to be felt in other spheres. The drop in silver, which occurred in August, brought out the somewhat close connection between silver and giltedge, as the prices in the latter were forced down by the sales of scrips which the unfortunate speculators in silver had to effect to clear off their commitments. The action of the Bombay Bullion Exchange encourages the hope that a similar untoward development will not be witnessed on this occasion. It may also be that the Bombay market is able to weather the storm better than London. In his last statement, Mr. Henry Morgenthau, the Secretary of the American Treasury, has pointed out that the official purchases have not, on this occasion, been concentrated on London and that they have been distributed over a number of different places. In view of the intrinsic importance of the Bombay Bullion market, one is inclined to hope that a bigger volume of direct transactions with America must, before long, invest the present silver price in Bombay with a larger degree of naturalness.

The exchange market has been steady to firm. The forces ruling the Calcutta market could not have

*Unquoted.

Thursday Evening.

The franc has again pursued a wavy course during the week. The period under review opened with a sharp decline in sterling-franc rate from 74.94 to 74.56 on December 6. Though the fall continued to 74.54 on the following day, it rose again on December 9, to 74.72 ; and it was not till December 11, that the franc improved in terms of sterling to 74.57. It is not difficult to account for this somewhat sharp and swift change; for, in the present position we have to consider not only the changes in the political situation in France but the different interpretations which men are apt to put thereon. The improvement in the franc at the beginning must be attributed to the report that late on December 5, there was a sudden conciliation between the Parties on the question of voluntary armed forces and that, as a result thereof, victory was almost assured for M. Laval. The reports that are to hand hardly suffice for a correct understanding of the motives behind this *volte face* of the French political parties. It is clear that at some psychological moment all the groups agreed that the carrying of arms by unauthorised groups should be penalised. Some doubts were entertained whether the fascist *Croix de Feu* would agree to any enactment to this effect. The Socialists declared that they would be quite willing to disband their defence organisation if the *Croix de Feu* would do the same. M. Laval must have been not a little happy to be able to announce at the end that the representatives of the socialists, the communits and the Croix de Feu had agreed to a law for disbanding of military forces.

This surprising development naturally led to an improvement in the franc. There is no doubt that the agreement on the question of the Leagues is due to a keen appreciation of the fact that the registration of M. Laval would mean a relapse into political chaos, for which neither the Fascists nor the Socialists are at present prepared and as each section is suspicious of the other party being able to gain an advantage out of the confusion, it was possible to patch up a settlement.

While the principal question before the Chamber was a purely political one, it is difficult to ignore the significance of M. Laval's triumph of finance. It must not be forgotten that the reluctance of other parties to assume office is due to the fear that, if there is anyone who is able to carry on the present deflationary policy, it is M. Laval, and that any other leader would insist on a free hand in respect of the gold parity of the franc. Thus it follows that, while the vote of confidence is not on a directly financial question, it is, in effect, the confirmation by the Chamber of its support of the present policy of maintaining the integrity of the franc. M. Laval has thus a clear mandate for continuing to defend the franc against external pressure. To that extent, the developments at the close of last week may be reckoned a bullish factor in regard to the franc. But it is quite a different question how long the pressure would continue, and at what strength, and whether it is correct to assume that the political troubles have been done with. The fall of the franc in the middle of the week seems to suggest that international financial circles still hold that the extremist movements continue to be a latent menace to parliamentary government. This cannot be otherwise ; for political discontent is really rooted in economic distress ; and economic distress cannot even be mitigated till the present policy of deflation is abandoned and the franc is brought into a conscionable parity with gold. So long as no French Government is able to secure the necessary support for the unpopular measure of devaluation, the fight for the franc will have to continue ; and every government that puts up the fight will be threatened by the opposition of extremist groups which are guided by the distress prevalent in the country but are blinded to its real cause. In this analysis, it is difficult to see how one can take a bullish view of the franc and it is on account of the circumstances mentioned above that the decline of the franc and the exodus of gold have persisted even after the spectacular success of M. Laval.

To the sensations of the political situation in France, silver has, during the week, added another. The table at the head of this article shows the change that has come over the silver market and the sudden drop in price which occurred on December 10. The silver crises in the past have acquainted the public only too closely with the results of such a serious drop in the price of silver. In the absence of an early recovery, one might well expect a train of misfortunes. But the causes which led to the drop in the price of silver are shrouded in mystery. The only fact that is known at the time of writing is that the American Government not only reduced their purchasing price, but declined even at the lower level to take all the offerings of the London market. The bullion market had, therefore, no option but to postpone the fixing of prices and the result is clear. The American Treasury has refuted any charge of breach of faith which the silver market might put forth against them by pointing out that the American monetary policy is on a twenty-four hour basis.

TREASURY BILLS

Tenders for Rs. 2 crores of 3 months' Treasury Bills were opened on Tuesday, December 10.

The total amount offered was Rs. 4,08,25,000. Tenders Rs. 99-12-0 per cent. and above were accepted in full and those at Rs. 99-11-9 per cent. allotted approximately 48 per cent. Lower tenders were rejected.

The total amount accepted was Rs. 2 crores, the average rate if accepted tenders being rupee one and pies six per cent. per annum.

Tenders for Rs. 2 crores of 3 months' Treasury Bills will be received on Tuesday, December 17. Successful tenderers should make payment on Friday, December 20. Other conditions are as usual.

During the week ended December 6, bills for Rs. 2,50,00,000 were renewed in favour of the Issue Department of the Reserve Bank.

STERLING TENDERS

On Wednesday, December 11, tenders to the amount of £9,500,000 at 1s. 6⅛d. were received and were allotted approximately 11 per cent.

£1 million will be offered on Wodnesday, December 18. successful tenders will have to take delivery of the allotments on Friday, December 20.

The total amount of sterling purchased by the Reserve Bank of India during the week ended December 6 was £1,000,000 at 1s. 6⅛d.

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of bussines-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours ?

You have only to let us know your requirement and leave the rest to us.

FUTURE OF SILVER

The silver market has suffered, during the week, a landslide, the significance of which may be said to exceed even its severity. For there is no under-rating the extent of the decline and the disorganisation it has caused. The London price of silver, which stood at 29¼d. on November 29, has come down by December 12 to 26⅞d. The dollar price has likewise fallen from 65⅜c. to 62¾c. In Bombay, the shock, which the London market suffered, produced its immediate effect and the level of Rs. 57-8 was touched on December 11, as compared with Rs. 65 on December 6, and Rs. 60-13 on December 10. As on former occasions, the main-spring of these changes is to be found in the American Treasury, for the Treasury officials have shown the same unaccommodating spirit towards the London silver market. It would be recalled that, in the middle of August, the American Treasury reduced its buying price in silver from 30 3/16d. to 30⅛d. ; and later it insisted on buying only at a further decline. On this occasion, a more pronounced spirit of truculence is noticeable. Not only was the rate forced to sag, but the Treasury declined, in spite of repeated appeals, to absorb all the offerings and limited its purchase to a fraction of the total. According to a *Reuters'* message, America was willing to buy 2 million ozs. of spot silver at 28⅜d. per oz,. whereas the brokers have received selling orders for 5 million ozs. and the forward offerings were estimated in the region of 12 million ozs. In such circumstances, the brokers had to abandon all attempts to fix any price as they were bound by the rule that such an action could be taken only when all offerings could be cleared at the fixed price. The result is that, after the London price fell from 29 3/16d. on December 7, to 28¾d. on December 9, no prices were fixed for December 10, and December 11, saw a steep decline to 27½d.

* * *

Up to the time of writing, there is no sign of a reliable improvement in the silver market. Only in Bombay the debacle of mid-week has induced the Bombay Bullion Exchange to take action with a view to stop the rot. Dealings were at once closed, and on Wednesday, the Bullion Board held an emergent meeting and fixed the minimum price at Rs. 58 for Ready and Rs. 58-8 and Rs. 58-11 for the First and Second Settlement. By this action of the Board, the Bombay market has been spared a further decline such as has been the lot of the London market. From the reports to hand, it is clear that there is a volume of bull support ; but it is not clear on what grounds an improvement in the price of silver is now expected. While no one can under-rate the importance of Bombay in the Bullion market, it is too much to believe that the Bombay Bullion Exchange can, by its own official action, counter a downward movement of silver prices, caused by any change in American policy. It is yet too early to attempt an estimate of the trend of silver in the immediate future, as the reasons which impelled the American Treasury to take up its present attitude are altogether shrouded in mystery. With such a large buying programme on hand and the statutory requirements of silver in the reserve increased daily by a phenomenal influx of gold into the country, it is difficult to understand why America should decline to buy the total offerings at the London market at an appreciably reduced price. One cannot help suspecting that the American Government is inclined to effect serious modifications of its silver purchase policy. The news reports suggest that the American Government have at present been influenced by the Sino-Japanese relations. London city circles, according to the *Statesman* correspondent, believe that the American Treasury's action is a definite counter-move against the recent decision of the Chinese Government to demoneties silver which would frustrate America's proclaimed aim to raise the purchase power of the silver-using countries. Senator Thomas is reported to have consented, for whatever reason, to this change in policy. The view that America has been a victim of English astuteness is also attributed to Senator Thomas ; but that view, according to the London *Times*, is less common in the United States that the American people, and at some distance China, have been made the victims of a fallacious American policy.

* * *

One can only say that conjectures about the Treasury's intentions in regard to silver are as numerous as facts are scarce. Mr. Henry Morganthau has shown himself singularly unhelpful in his statement that the American Treasury's monetary policy is on a twentyfour-hour basis. Though this may be an effective answer to charges of breach of faith, which the silver market may lay at the door of the American Government, it certainly makes confusion worse confounded ; for not only does it give no indication of the motive behind the move but it also looks like a prelude to further surprises in this field.

* * *

In these circumstances, any attempt to probe into the minds of the American Treasury officials will necessarily have to be based on a recapitulation of the developments of the American silver policy in recent times, or, in other words, setting the developments of the week in their proper historical perspective. As our readers are familiar with the story of the Silver Purchase Act, it should suffice to recall the fact that at no time was the Silver bloc able to create in Mr. Roosevelt any enthusiasm for the silver policy ; that, though the Silver Purchase Act was passed by the House of Representatives as early as June 20, 1934, it was not till April that the American Government effected two successive increases in the official buying price ; that since April last there has not only been no increase but also two attempts within less than a half year to force down the price of silver. The increase of April last in the official buying price can be easily attributed to the pressure which the silver bloc was bringing to bear on Mr. Roosevelt and the necessity, as it then seemed, of Mr. Roosevelt keeping these influential sections in good humour. Mention may also be made of the anxiety of the American administration to prevent an appreciation of the dollar by some insidious means rather than any blatant interference in the exchange market by the American control. The silver purchases, being part of an avowed official policy, served this purpose admirably. While the action of the Treasury in April is thus clearly understandable, there is no similar explanation of the subsequent events to hand.

But it is not difficult to piece together in an intelligible setting a number of apparently unconnected circumstances and events. One cannot, in the first place, burk the strong contrast between the actions of the American Treasury in April last and its actions in the last half-year. It is quite unreasonable, therefore, to look specially for those circumstances which might have tended to discourage the American Treasury in respect of the Silver policy. In the first place, it was only after April that the American Government were sufficiently awakened to the effects of the silver policy on the world at large. When the Silver Bloc was whipping the American Congress for the enactment of the Silver Purchase Bill, it was naturally expatiating on the benefits of a higher level of silver to world economy as a whole and particularly to the silver using countries like China and India. Some Members of the Silver Bloc, perhaps, even indulged the hope that the Far East would feel grateful to America for bringing about an improvement in the price and status of silver. This attitude shows that little thought had been expended on the practical consequences of a rise in the price of silver ; and it was, therefore, possible for the silver enthusiasts to believe that the silver purchase policy could be carried through to its utmost limit on the strength of the grateful support of the silver-using countries. It was only by the middle of 1935, that it became clear that the silver policy would find little support in the world except among the speculators in the metal. Close on the heels of the April rise in the price of silver came the crisis in Mexico and the change of the monetary system in that country from silver to a paper basis. China found that her financial and monetary problems were being rendered increasingly difficult of solution by the headlong rise in the price of silver. Both countries entered their protests against the American policy ; and while the Chinese remonstrance drew forth only courteous, but evasive, replies, the Mexican delegaion apparently was able to effect a considerable modification of the Treasury's attitude to silver. For, since their visit to America, there has been a change in the policy which it is difficult to overlook. In India, the danger of silver rising to the point at which its metal value would exceed its token value raised many a vague fear in the public mind. It could not be lost on the American Administration that, while the support from abroad was far less than was at first anticipated, the opposition is quite unexpectedly strong.

* * *

The internal situation, too, has not been without change. It would appear that President Roosevelt's anxiety to placate big business has been on the wane during the last few months. For the chances of Mr. Roosevelt enjoying its support in his next electoral campaign are growing less and less; and, if it is remembered that, from the very beginning, Mr. Roosevelt had no deep-rooted personal convictions in favour of the silver programme and that he acquiesced in the Silver Purchases Act and in its partial execution only as a matter of political expediency, he may not be unwilling to avail of an opportunity, when such occurs, to modify his Government's commitments in this regard. Of even greater importance than the change in the political position is the increasing impossibility of a literal fulfilment of the silver programme. The troubles of the franc and the difficulties of the European currencies generaly have, it is well-known, led to a phenomenal influx of gold into America and a consequent increase in the gold holdings in that country. The United States gold supply, says a recent message from Washington, exceeds 10,000 million dollars, for the first time in history. The rise of gold during the last week amounted to as much as 135 million dollars. The excess of gold over legal reserve requirements is as much as 3,070 million dollars, and there is yet no sign of an end to the flow of gold from the Continent to the other side of the Atlantic. The importance of this to the

silver programme may be easily understood, in as much as the Silver Purchases Act requires a ratio of 3 to 1 in the currency reserve, the amount of silver which the American Treasury will have to buy in order to satisfy the provisions of the Act is increasing every month and is more and more out of the control of the Government. Even at the time the Silver Purchases Act was passed, the silver requirements were heavy enough, in all conscience. If to these were added the additional amounts necessitated by the increasing gold reserve, America would have to end with acquiring the greater part of the world's silver at a price which its holders could never have dreamt of. One is, therefore, not surprised to hear that opinion is growing in America that the States are made the victim of a fallacious American policy.

* * *

We may readily admit that our reasoning so far has been one-sided; but we must point out that our explicit purpose was to draw special attention to those circumstances which militate against the persistence by the American Government in the silver policy as laid down in the Silver Purchases Act. But it is obviously too much to expect any early change of a drastic kind. In fact, we have just received the report that Mr. Henry Morganthau denied in an official statement that the United States have stopped purchasing silver and asserted that America had purchased silver every day of the week, thereby continuing to carry out the mandate of the Silver Purchases Act. According to the United States Secretary of the Treasury, the only change lies in his refusal to concentrate all purchases on London and distributing his deals over many different places. But it is significant that he has confessed to the price question being a factor in the Treasury's present tactics, and, in this connection, he quotes the section of the Silver Purchases Act which empowers him, as Secretary of the Treasury, to make purchases of silver on such terms and provisions as are deemed reasonable or advantageous to the public interest. Though Mr. Morganthau declares that his pledge to the members of the silver bloc in Congress to carry out enthusiastically the provisions of the Silver Purchases Act still holds good, we deem it more significant that the Treasury has begun to give importance to the price question. The view that, in any given situation, the Treasury might well attempt to get a favourable price without prejudice to the programme of raising the price of silver might seem plausible to many. But this has to be set against Mr. Roosevelt's pronouncements of August last. At that time he resolved the silver policy into its constituent elements, (1) of bringing about a wider monetary use for siver and (2) the increase in its price. It will be remembered that, at that time, he relegated the latter to a definitely subsidiary position ; and now that Mr. Morganthau claims the right to effect silver purchases at prices advantageous to the public, presumably, the American public, it would not be unfair to suggest that price-raising has not the same importance now for the American Government as formerly. Though it would be unwise to be too dogmatic about the course of American silver policy, we cannot resist the temptation to point out that the events of the week bear out our reading of the situation in August last, when we observed that the silver market would be full of upsets in 1935, that "the American policy is regaining its touch with reality" and that "the American Government are not aiming at even the stability, not to speak of the advance, of the price of silver."

RESTRAINED OPTIMISM

'Restrained optimism has been the key-note of utterances made by chairmen of companies and of commercial bodies as regards the tenor of world trade developments in 1934-35. In this regard, Sir William Wright, in the course of his annual speech as Chairman of the Madras Chamber of Commerce, has followed the

General Manager.

fashion. There will be general agreement with him when he says that the year that is now drawing to a close has not been a very prosperous year ; that there have been, at the same time, definite signs of improvement ; that the worst years of the post-War slump appear to have been left behind ; that this period of stress and strain has, however, been utilised for putting 'our houses in order' ; and that the better class of industrial and commercial concerns are now organised to take advantage of any improvement in trade as and when it occurs. Sir William Wright is justified in viewing the future with a measure of subdued confidence but he would have done well to emphasise on some of the features which should engage the attention of the Government immediately, and the proper tackling of which could accelerate the progress of recovery. For, there can be no doubt that such recovery as has taken place is more the result of a favourable combination of accidents than the outcome of well-designed policy and well-planned action. Sir William himself admits that the high level of exchange which has ruled in the last many months appears to be hardly justified by the actual volume of normal foreign trade. He has little doubt that the steadying influence has been the continued exports of gold. This sums up, in our view, the full defects of government's financial and general policy. The state of our international balance sheet must cause extreme disquietude so long as the maintenance of exchange rests on so artificial a prop as private gold exports. It is these gold exports that have saved the Government from many a dilemma and that has ensured comfort to Government finances in many a direction. Let them, by all means be grateful for this rare phenomenon of gold leaving India in large amounts week after week. But let them not, in their gratitude, forget that this is too good a blessing to last for ever ; for, what is a blessing to the Government is really a curse to the population. Gold exports have lulled Finance Members into a sense of full security. It is time that they wake up to the danger that must materialise the moment gold shipments dry up.

* * *

The problem is simple, yet crucial. What steps should the Government take in order to stimulate exports and to guarantee the materialising of an adequate favourable balance of trade ? It is the duty of the leaders of the business community to urge on the Finance Member that he can, only at the peril of the finances of the country, postpone the tackling of the problem that affects India's international balance sheet. It is treason in this country to suggest that the lowering of the ratio will automatically solve most of the problems in this regard. But, it is clear to everyone who is not committed to be an apologist for the Government, that a rate of exchange which can be sustained only by colossal gold shipments is unnatural, detrimental and injurious. It was, however, not our purpose to raise the ratio question in this comment on Sir William's speech. What we would urge upon Sir William and his colleagues in European Chambers of Commerce is that, ratio or no ratio, it is imperative for India to take measures for securing a far larger favourable balance in merchandise ; and that European commercial bodies will be only playing into the hands of the Government by shirking this issue and by resting content with the sense of false security which gold exports have induced.

* * *

In another context, Sir William has referred to the cheap money policy pursued by the Indian Government through 'judicious currency expansion' and through control of the Treasury Bill rate. Except for the expansion of currency that took place in the few months immediately following the abandonment of the gold standard in September, 1931—most of which expansion was negatived by the contraction which was carried out in the subsequent period—it is altogether wrong to say that the Government have pursued even a moderately expansionist policy as regards currency. The mistake made by most observers in this connection arises from the high level at which paper note circulation stands at the moment. It is true that the total paper notes issued are now a high record at Rs. 195 crores. But the increase in paper note circulation is more or less entirely due to the decrease in the silver note circulation. Silver coins have been returning from circulation ; and to that extent, the total note circulation is affected. Taking paper note circulation and silver note circulation into account, it cannot be maintained that the Government have expanded currency at all. Such changes as have taken place in the assets of the currency reserve are only the substitution of one kind of security by another. *Ad hoc* securities were reduced and sterling securities

were increased. One can say that there is real expansion only if there have been additions to the sterling securities without corresponding cancellation of *ad hoc* securities. In fact, we cannot agree that the Government's currency policy and Treasury Bills policy were any great factor in the cheap money conditions that have obtained except for occasional periods. The real influence that has fostered and moulded cheap money in India is the comfort which Government finances have enjoyed as a result of gold exports and the cheap money that has prevailed in London.

* * *

In other respects, Sir William Wright's speech is an admirable survey of economic conditions as they obtain in Madras and of the economic prospects that confront that Presidency. As *Indian Finance* has often been urging, so Sir William urges that "the scene is set, and it is for us and our friends in the Southern Indian Chamber of Commerce to ring up the curtain on an era of increasing industrial prosperity in this Presidency."

ABYSSINIA ABLAZE

At the beginning of the week, the secret Anglo-French proposals under the implied authority of the League of Nations for a settlement of the war in Abyssinia were mentioned prominently in the House of Commons on a Labour protest motion against the Government's policy. The motion voiced the apprehension of the Opposition that the reported terms of the proposals were too generous to Italy. The motion was defeated by 281 votes to 139; but in the course of a rather heated debate, the Premier admitted that there had been a leakage in France which had made "a most delicate and difficult matter incomparably more delicate and difficult" and that there were considerable differences between the proposals and the Press reports. He deprecated an immediate discussion which might do serious harm, undertaking to inform the House and facilitate an early debate as soon as the proposals were agreed upon. Mr. Atlee, the Labour Leader, said that the published proposals overthrew the whole basis of the League Covenant. More informative than the Premier, Mr. Anthony Eden explained that the proposals were only the first step in a long and complicated enterprise, re-affirming the principle that peace proposals must be acceptable to Italy, Abyssinia and the League and adding that there was no attempt at imposing the terms on any of the parties.

* * *

The reported proposals jointly framed after two months' deliberation by M. Laval and Sir Samuel Hoare were published in *Indian Finance* last week, when the peace atmosphere was believed in well-informed circles in Paris to be propitious. Broadly, these proposals rested, according to Mr. Anthony Eden, on three main principles. Firstly, an exchange of territory definitely advantageous to both Italy and Abyssinia; secondly, the League assistance to Ethiopia for the purpose of social, economic and administrative deveopment: thirdly, special facilities for Italian settlers and companies for economic expansion. Mr. Eden assured the House of Commons that, if the proposals "are contrary to the principles of the League Covenant, it is for the League to say so" and that "we have never said that either party must accept them." The policy of the British Government remains based, Mr. Eden affirmed, on membership of the League.

* * *

Not much water flowed from the Seine to the sea before the unexpected confronted the Anglo-French peace makers. Abyssinia, for whose well-being Paris and London have been labouring, in their self-imposed role, by eliminating Abyssinia from triangular con-

No. 8.

versations and conferences, has suddenly stepped on the diplomatic stage. From the earliest stages of the war, Abyssinia has not placed much trust on Europe's collective good will to the last of the Ethiopian sovereign States, which, geographically and economically, is desirable to at least three of five European Great Powers. And while it was not prudent to antagonise two of the three who proferred their services to save Abyssinia from Italy in their own rather than Abyssinia's interest, the Emperor sought, as best he could, to stay the invasion of a modern army with primitive defences. Italy, on the other hand, beginning to feel the acumulated pressure of League sanctions, with the imminence of an embargo on oil, was more inclined, it is believed, to lend a ready ear to the Paris proposals. So the wheels of diplomacy moved without creaking, the while guerilla tactics and climatic hardships in Abyssinia discounted Italy's war stock.

* * *

The latest reel in the Italo-Abyssinian film is a thriller. Responsible Abyssinian officials describe the Anglo-French peace proposals, with Italy in the near background, as a betrayal of Abyssinian reliance on the League of Nations. It is stated by reliable Press representatives at Addis Ababa that, with the failure of both the Italian Moussa Ali and Ogaden campaigns, the Emperor sees no reason to give up even those territories, while Italian commercial penetration as a condition of peace would exasperate Abyssinian feeling to white heat. Geneva's re-action is said to be definitely hostile to the Anglo-French undertaking and understanding. The majority of the League members have developed so profound a distrust of the inner situation that M. Laval is meeting with collective resistance in his efforts to revive the Committee of Five. French critics denounce the Laval-Eden-Hoare proposals as "monstrous" and reproaches have been hurled at British who, at one stroke, has, it is said, forfeited the prestige she had gained by her firm allegiance to the League. These critics read in the proposals France's and Britain's desire to buy off Signor Mussolini at any price that other members of the League might allow. Now that Abyssinia has made known her mind, opinion at Geneva points to a refusal by the League of the proposals, when they come up before the full Council. Should this as seems certain, come to pass, there seems to be no alternative to abondoning peace "talk" and to proceed with the tightening of sanctions to end the war. The idea of compensating the defiant aggressor of collective peace in cynical violation of collective opinion must be repulsive to members of the League ; and, inasmuch as that was the basis of the Anglo-French terms, the League would enhance its prestige by rejecting them uncompromisingly. As for Abyssinia, it is peace with honour or dissolution. No one will now say that, if it is not the former, it will be the latter.

INDIAN TEA LICENSING COMMITTEE

EXPORT QUOTA 1936-37.

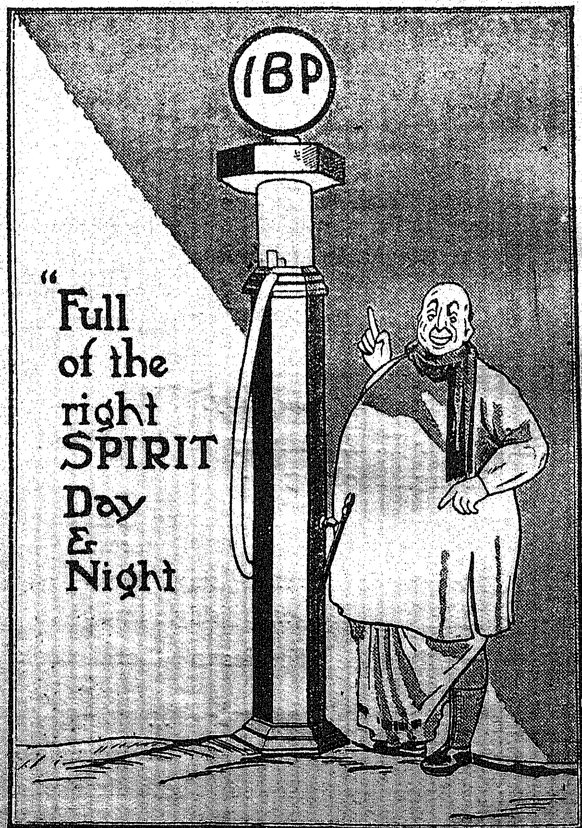
TEA PRODUCERS IN INDIA ARE hereby notified that in terms of Rule 3 of the Rules framed by the Government of India under Section 23 of the Indian Tea Control Act (XXIV of 1933), Tea Estates desiring to be allotted an export quota for the year 1st April, 1936, to 31st March, 1937, are required to submit an application on the form prescribed for the purpose, which must reach the Indian Tea Licensing Committee not later than Saturday, 1st February, 1936. Application forms have already been issued to all registered Estates ; but the Indian Tea Licensing Committee will not hold themselves responsible for any omission in this respect, and Proprietors, Agents, Managing Agents or Secretaries who have not received the Application form are requested to apply for same, in the case of Estates situated in North India to the Joint Controller, Indian Tea Licensing Committee, Royal Exchange, Calcutta, and in the case of Estates situated in South India to the Joint Controller, Indian Tea Licensing Committee, Coonoor.

D. C. FAIRBAIRN,
Assistant Secretary.

ENCOURAGE TRAVEL

Eavesdropper writes:—

The new and better holiday concessions offered by most railway systems in India are an indication that the earlier criticism of railway management being inelastic and un-enterprising is no longer true. "Popularise railway travel" is the popular suggestion. And the railway administrations used to pay heed to this universal plea by raising the fares and reducing the concession schemes. Since the last two years, there has been a welcome change in the attitude of the railway bosses towards the amenities of travel and the expenses of travelling. The response to the recent experiments in connection with concession facilities has been vastly encouraging. Wealth is not accumulation but velocity. Encouragement of railway travel has, therefore, an important place in the increase of national wealth, as it is one of the surest means of increasing the circulation of money. Both in the interest of the railways and of national economy, every possible inducement should be offered



IBP
"Full of the right SPIRIT Day & Night

THE INDO-BURMA PETROLEUM
COMPANY, LIMITED.
RANGOON
Branches:
CALCUTTA BOMBAY CHITTAGONG

to encourage travel. Seeing new countries breaks down parochialism and rubs angularities as nothing else can. In a far-flung country like India, travel has a special significance. For this reason, whoever makes travelling expensive does a serious dis-service. Imbued with these ideas railway administrations have now set about devising novel plans by offering attractive facilities. The Eastern Bengal Railway offers first-class Christmas return tickets for two second-class fares, that is, on what amounts to a single first-class fare. Second and Inter-class return tickets are to be had for one and one-third single fare—quite a considerable reduction. Third-class return tickets are charged one and two-thirds single fares. Who stands most in need of relief is, unfortunately, given the least relief. I would suggest to the Railway authorities that third-class return tickets should be offered on the same terms as return tickets of other classes. "Travel where you like" is a special type of season ticket which the Eastern Bengal Railway has now brought into vogue. And I note that the South Indian Railway and M. S. M. Railway have also analagous plans. By paying Rs. 15 a man can keep travelling all over the railway system each day for seventeen days.

* * *

The Bengal-Nagpur Railway offers return tickets in first, second and inter classes at a fare and a quarter for two journeys. Third-class return tickets are a fare and a half. The concessions given are substantial. I am sure the agents will not have cause to regret a step which helps them and the public. The period over which the concessions extend is calculated to cover an adequate holiday either to the hills or the seaside or a shoot. When one thinks of it, most of us are nomads and would feel grateful alike for the travel and the rest.

(Continued from Page 1790)

contributed to this strength. It is, therefore, surmised that it is Bombay that has lent strength. Due to the better feeling in exchange, applications received on the weekly sterling tender day came to the substantial amount of £9½ million at 1s. 6⅛d., as compared with £3.96 million in the earlier week. Allotment in the current week was on the basis of 11 per cent. against 25 per cent. So far as can be ascertained, the silver debacle has had no effect on the rupee-rate. It has been suggested that considerable sums have had to be remitted from Bombay to London against silver loans. If this report be true, purchases of sterling should have appreciably depressed exchange. Considering that it is Bombay that has imparted a steadier tone to the rupee-rate, the troubles of Bombay operators might be more in respect of their transactions on the Bombay bullion exchange.

The closing rates are: 1s. 6 7/64d., for December-May T.T. ; with 1s. 6 1/8d., available for January 15 April T.T. ; 1s. 6 3/32d., June-December T.T. There were no buyers of T.T. at under 1s. 6 7/64d., before June.

Bills may be quoted: 1s. 6 3/16d , against confirmed letters of credit right through to December. 1/32d., higher was demanded in respect of other bills.

Money remained very easy, with lenders plentiful at ½ per cent. in Calcutta and ¼ per cent. in Bombay.

Firms' money for call, three days' notice, seven days' notice and onemonth, twomonths and threemonths deposits quoted ¾ per cent. Twelvemonths deposits quoted 2 per cent. to 2½ per cent.

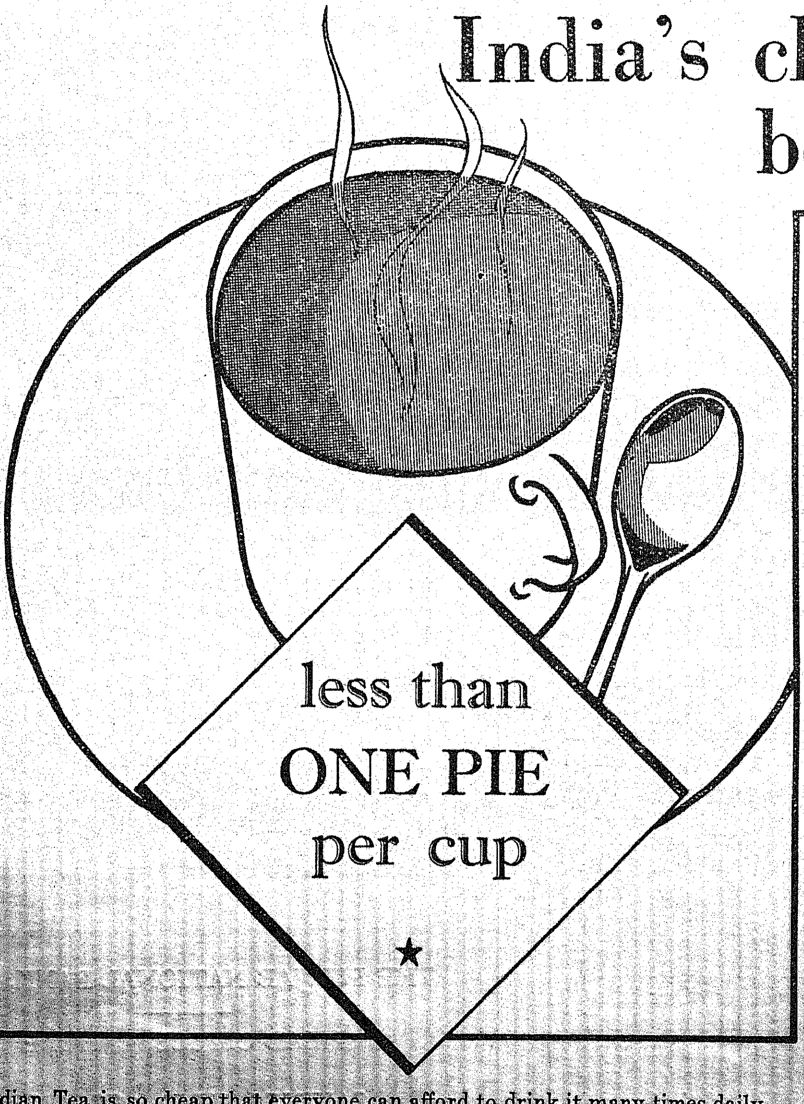
INDIAN TEA

India's cheapest beverage



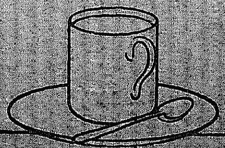
HOW TO PREPARE TEA

Tea to do you good and to taste good must be made the right way. These are only a few simple rules, but these rules must be followed :

1. Use good Indian tea.
2. Use an earthenware teapot, if possible and rinse it with boiling water before putting in the dry leaf.
3. Use one teaspoonful of dry tea for each person and one extra for the pot.
4. Use only freshly-drawn water (not water that has been boiled).
5. Be sure that water is boiling fiercely. Never use water that has been boiling over or simmering for some time.
6. Always pour on the boiling water after putting in the dry tea.
7. Allow the tea to stand for at least five minutes and then serve; adding milk and sugar to taste.

Indian Tea is so cheap that everyone can afford to drink it many times daily. Indian Tea is the delight of millions of people, who find this pure beverage of India more stimulating and refreshing than any other drink.

Indian Tea is India's national beverage, grown on her own soil, and manufactured with her own labour. Why not give your own tea a fair trial? Buy it for your household and see what a wonderful beverage Indian Tea really is.



Your drink, grown in your country-INDIAN TEA

In an earlier regime, pompous and futile elaboration was deemed the quintessence of official pageantry ; in the present, brevity is, as suits the saying, the soul of wit. Neither is all brevity the soul of wit, nor all elaboration the last word in completeness. Of the latter, the mountain of the banking enquiry resulting in the mice of nothing is an unedifying example. Of the former, the pending examination of Company Law reform may be cited as an instance. It is admitted that the Indian Companies Act is wooden, antidiluvian, out of accord with recent developments and present-day conditions, unsuited to current needs—altogether defective and useless for all practical purposes. A managing agent with a modicum of craftiness and with the apt aid of accommodative solicitors, directors and auditors can run a coach and four through the sections of the Companies Act. The managing agent—the boss of the show, the undisputed monarch, the Mussolini of joint stock enterprises, the commercial king who can do no wrong, the prince of munificence who robs many Peters to pay his own Pauls, the be-all and end-all of company administration in India—does not so much as find mention in the Companies Act as it is now fashioned. The auditors are, in the existing order of things, more anxious to save their skins than to discharge a solemn duty by the shareholders who appoint them. With this objective, some auditors are modifying the old style of certificate by omitting the words "we have inspected books and vouchers." Directors are, the exceptions proving the rule, dummies, figure-heads, creatures and henchmen of managing agents, aiders and abettors and, sometimes, participants.

That, for these reasons, the reform of Company Law is overdue, is admitted not only by the shareholders who are the victims but by the better class of managing agents, who are convinced that their continued existence depends upon the purging of the managing agency system of its evils and abuses and that only well-planned reform can protect the good agency houses against the bad ones. If the latter are not mended or ended betimes, they will, everyone is sure, pull down the whole edifice of managing agency. The plea for reform has been urged for years and years. It has been put forward from diverse and even differing platforms. The Shareholders Association in Bombay and *Indian Finance* in Calcutta have cried themselves hoarse that reform was imperative and urgent. In his last Cotton Textile Report, Dr. Matthai stressed the importance and urgency of company law overhaul. Even the Federated Chambers of Commerce, which may be trusted as a zealous guardian of capitalist rights and prerogatives and as an unfailing champion of managing agency, have passed resolutions favouring early investigation of Company Law. Against this background of universal demand for drastic changes in the Companies Act, must be viewed the steps that have so far been taken and that are hereafter to be taken by the Government in regard to this important question.

The preliminary stage in the examination to which the Government committed themselves last year was the study, by a special officer, of the representations received and opinions expressed on this subject from time to time. Mr. Sushil Sen, the Special Officer, did not—and he was not expected or authorised to—examine any witnesses. He received memoranda from sundry commercial bodies and had informal talks with sundry commercial representatives. On these data, he has prepared a report on Company Law reform—and a subsidiary one on Insurance Law reform. These reports have been before the Government now for a few months. As a result of much consideration by the Government, it has been decided to get together an informal committee, which will meet in the middle of January and hope to end its labours early in February. The Law Member is to be Chairman. The Federated Chambers have been asked to nominate a representative. Mr. Nalini Ranjan Sarker is assured of support from most member-bodies ; and it may be taken as certain that he will represent Federation's views on the committee. The Bombay Shareholders Association has to send one representative ; and Professor S. R. Davar will espouse the cause of shareholders. The Bombay Millowners Association, which has also been asked to suggest a name, has put forward Sir Joseph Kay. Mr. W. Lamond, Managing Director of the Imperial Bank of India, is to be a member both because of the large experience of his Bank with joint stock enterprises and because of his own experience as a member of the Banking Committee. On the composition of the informal committee, I have nothing to say by way of criticism. On the other hand, it is, I gladly own, as compact and competent a committee as one could have hoped to get together in India.

I, for one, cannot divine the great idea underlying this proposal of an informal committee. Is it suggested that the matter under discussion is too simple or too trival to merit a full-fledged committee? Or, is the matter so urgent that it brooks no delay and that an informal committee alone can come to an expeditious decision? Or, again, is it only a symbol of the Government's final view that most committees of earlier times have made much noise and achieved little purposes and that an unostentatious procedure in the form of an informal committee is more in the fitness of things? A subject, which has been exciting the public mind for over a decade, is now to be disposed of through sittings that will last a bare three weeks. It is clear that the authorities do not share the public view about the gravity of the issues involved in this enquiry. It is also to be remembered that a large and authoritative section of public opinion is firmly persuaded that the capital market in India will continue to remain taciturn and even hostile to new enterprises until and unless Company Law is so changed as to afford the public a sense of security that there is an alert watchdog in the shape of the State which will track down all offenders and criminals in company management. Indian industrial advancement, which has come to a standstill owing to vagaries of directors and managing agents, stands in urgent need of timely and powerfully stimulus. Such stimulus can be afforded only by a Company Act which satisfies public conscience that the arm of the law will come heavy and severe upon all evil-doers. From this point of view, the future of industrial progress is bound up with the overhaul of Company Law. I welcome this belated endeavour to remove the existing defects and bring legislation up to the standard of needs ; but let the endeavour be as complete and as thorough as possible.

Discussion in a hurry even if it be among the most competent of persons available in the country, cannot conduce to such thorough study and careful appraisal of relevant facts and data, as is called for in regard to so momentous an issue. Nor is there any justification for confining the task of the committee to the study and perusal of documents already received or prepared. Why should new material be tabooed? Why is opportunity denied for the tendering of evidence of such persons and such bodies as have given thought to this matter and may have something important to say? Why should the proceedings of the committee be robbed of that fullness and that publicity which, in themselves, should play an important part in a more correct public appreciation of the importance of well-planned Company Law for well-planned industrial growth? This indecent haste and this dwarfing of the significance of the enquiry into a mere informal affair are, in my view, serious sins which will most adversely affect the scope and utility of the examination now undertaken. Any plea of urgency comes with ill grace from a government who have been evading the issue on every occasion on some pretext or other. Even if time is the essence of this business, it should be quite possible to appoint a proper committee with full powers to summon and examine witnesses and to charge them with special instructions to conclude their labours before, say, the summer or autumn. The same Prospero's wand that brought into being the present Special Tariff Board for three months

labour could have been available for a special Company Law Reform Committee endowed with six months life.

This is not the only defect of the present enquiry. We know that the special officer has submitted a report on the reform of Insurance Law. But we do not know if the informal committee will be asked to tackle and report on insurance law also. There is an even more urgent case for immediate amendment of insurance law. The investment policy of some of our older insurance companies has been marked by such unconscious stupidity or conscious cupidity as to result in considerable weakening of the assets. The Chief Justice of the Punjab will perhaps, have some hard things to say about the state of Insurance Law in India. For my part, I should have been glad if Sir Douglas Young had been invited to sit on the committee to study the working of Company Law and of Insurance Law. The public should insist on knowing from the Government what exactly they propose to do in this matter of insurance law reform so far as the informal committee is concerned. In this country, the public may ask questions ; but the Government are not bound to answer them. Even if they answer them, there are a hundred devices for furnishing answers which answer nothing. I hope that, in this matter, the Government will be able to give a clear and specific reply to the question we have posed.

I must also ask: What about Banking Law? Sir George Schuster was at great pains to establish a Central Banking Committee with over a score of members ; and numberless provincial banking committees, a hundred strong in number of members. The volumes of evidence and reports occupy a whole almirah in our office. Is all that labour to be labour lost? It is quite possible that Sir James Grigg differs on most questions from Sir George Schuster and, in particular, as regards the facile proneness to committees and enquiries which the last Finance Member had. Nevertheless, when the question of company law reform is taken on hand, etiquette and decency demand that whatever views and recommendations have been advanced in the Banking Committee Report as regards banking law should be placed before the committee investigating company law amendments. May-be, the recommendations of the Banking Committee in this regard were jejune: but it is not for the Government to set aside so light-heartedly the views of so important a committee. Let the suggestions of the Banking Committee as regards banking law be placed before the Company Law Committee ; and if the latter finds no use for the suggestions of the other, it is up to Sir N. N. Sircar and his colleagues to say so. All that I urge in this context is that there can be no excuse or justification for shutting out banking law from the purview of the Company Law Committee.

There is something deep down in the normal healthy human breast that tingles at mystery, at secret plots and suggestive clues, at unknown danger and lurking death. When these mystery elements are mixed up in the love of lovely woman, the broth has a rare exhilirating flavour. "Thunder in the Night", which is showing for a week at Madan Theatre, Calcutta's House of Joy, is such a broth. The scene is set in beautiful Budapest in a frame of thrills. And a great detective learns, not to his undoing, that the danger in the light of feminine eyes is more personal than the danger of a fatal shot in a shabby hotel, while thunder crashes.

OLYMPUS

(From Our Correspondent)

New Delhi, December 10.

Doubts have already begun to be felt here as to whether the Cotton Tariff Board would be able to complete its enquiry within the scheduled time. Of course, there are precedents to fall back upon, if such a contingency arises, and, Government's mind is, perhaps, already working in that direction. When the Steel enquiry was in progress, a six months' extension was given to the protective duties pending submission and consideration of the Tariff Board's report. In the case of the Cotton enquiry, a years' extension was granted to the protective duties. The same can happen again. But there is a little difference in the situation then and now.

* * *

The Opposition is not what it used to be then. The Assembly may take a critical attitude to the proposal to extend the duties, if only for the sake of opposition. On the other hand, when it finds that, after all, *status quo* is maintained and duties against Lancashire would remain undiminished—that is all that Millowners even now demand—the extension bill may not be opposed. Or, the necessity for such a course may not arise, as Sir Alexander Murray still remains optimistic about his ability to conclude the work within three months.

* * *

Can he do it? A Chairman, like Sir George Rainey, would definitely not have done it. Sir George used to take meticulous care about ascertaining every fact and weighing it in the balance with an impartial mind. With his method it would have taken six to eight months to arrive at a sensible decision. Sir Alexander Murray may try the businessman's trick. He may weigh the very alternatives and go by the law of thumb. He may hit upon one of them and pronounce it as a fair business deal. Who can say, that such method may not produce at least as good a result? But it may not!

* * *

In any case, the impression here is that Lancashire has put up a weak case. This is, of course, without having examined the various comparative statements submitted by the Delegation. Their case seems, on the whole, to be based on the gesture made by Lancashire in buying more raw cotton from India. In this respect, figures are rather interesting. Just before the Bombay-Lancashire Pact, the British consumption of our raw cotton was 24,000 tons and the year thereafter it went up to 49,000 tons. In 1930 it had gone up to 54,000 tons. Which means that the real cause was comparative prices of Indian and American cotton. 1934, undoubtedly, shows a definite increase over all the previous figures, and it is conceded that 14,000 tons of those 68,000 tons is the result of the sincere effort of a few who are a party to the Pact. But this figure is a drop in the ocean. Can a case for preference be based on this?

* * *

Therefore, it comes to this: that Lancashire's case must stand or fall by the extent to which Lancashire prices ensure fair selling price to the Indian producer. It seems Bombay, by itself, is inclined to let Lancashire 5 per cent. off. But it has not said so, in order to maintain unity of front with Ahmedabad and the other centres! Perhaps the real Bombay feeling has been made known to the Board all the same!!

* * *

The Wheeler Committee wheeled round the Secretariat a lot before leaving New Delhi. Their task was not an easy one. In one Department the Committee was made to judge the efficiency of Indian Officials by being made to talk to an officer on office procedure only a few weeks after he had joined it! However, the fact remains, that, even if Sir Henry Wheeler may take the rigid I.C.S. view, Sir James Rae and Sir C. P. Ramaswamy Iyer have an open mind and propose to give full consideration to the matters without prejudice in favour of the "steel-frame". The chief point they will have to consider will be whether, in future, there should be any reservations for I.C.S., as such, for various posts. It may be that they will find that the future of Indian administration would be better served by leaving the door open to all who deserve the jobs on merit. Unless a solution on fair lines is found, the Committee may find itself split into a majority and a minority. But every one hopes that this will not occur.

* * *

Another question relating to the future is that of the establishment of the Federal Court. Various sites have been examined. Perhaps, ultimetely the choice will fall on the place where at present Imperial Recirds lie on the Queensway. This building was originally planned to be three-faced! It has at present only one. Sir B. N. Mitra, in his days, cut down the costs. Now, if it is made to original design the Federal Court may be accommodated and the artistic view of the Grand Vista may be restored to the original design. The present structure does spoil that view.

* * *

Well the channels here threaten to dry up as the annual exodus to Calcutta is about to begin. The Viceroy will be addressing the Associated Chambers of Commerce on the 16th; but I doubt whether there are any very striking commercial or trading issues on which he will be able to throw fresh light. But it will be a good farewell utterance. The other Executive Councillors will be shortly leaving for the Calcutta meeting of the Executive Council, for which there will be ample business due to the numerous Orders-in-Council which are getting ready for passage through Parliament.

(From Our Correspondent)

Bombay, December 11.

Corporation finance has for days past been examined by the Standing Committee in giving the final touches to the Budget estimates for 1936-37. The revised Budget will be submitted to the Corporation early next month. Income is estimated at Rs. 317.46 lakhs. If the income from the sale proceeds is added, it will come to Rs. 324.12 lakhs. The expenditure is estimated at Rs. 317.63 lakhs. If, to the balance of Rs. 6.49 lakhs, the opening balance for 1936-37 amounting to (estimates) Rs. 21.35 is added, the total surplus at the end of the year will be Rs. 27.84 lakhs.

* * *

The Standing Committee has recommended a reduction in the General Tax of one per cent. and the restoration of the cut in the salaries of the Corporation employees. Both these recommendations are subject to confirmation by the Corporation. The General Tax was raised year before last from 11 to 12 per cent. to meet the liabilities resulting from the merging of the Improvement Trust in the Corporation. The reversion to 11 per cent. from April next means that a sum of Rs. 11 lakhs will have to be found in the Budget for 1936-37, while the restoration of the salary cut involves a sum of Rs. 1,08,000. These 'relief' measures have everything to justify them and the amounts they cover could be raised without difficulty. A little pruning of wastage is all that is required.

* * *

The Communal Award has raised its ugly head before the Indian Delimitation Committee which has begun its sittings. The Committee is composed of Sir Laurie Hammond, Chairman, Mr. M. Venkatasubba Rao (Judge of the Madras High Court), and Khan Bahadur Shaikh Din Muhammad (Judge of the Lahore High Court). The Bombay Chamber of Commerce, represented by Sir John Abercrombie and Mr. W. G. Lely, put up a claim for three seats, instead of two, in the Legislative Assembly under the Communal Award, which allots three seats to the Chamber and one to the Presidency Trades Association, making four in all. The Bombay Delimitation Committee allotted two seats to the Chamber, one to the Trades Association and the fourth to the East India Cotton Association.

* * *

Sir John Abercrombie said that there was no guarantee that the original interpretation of the Communal Award would be adhered to, although the Chamber had been relying on the support of the Government of Bombay, whose opinion, in the first instance, had been that commerce and industry seats should be so allocated as to ensure the return of four Europeans and three Indians. The Committee gave the reply courteous to Sir John, adding that the point would be settled by His Majesty's Government. That ought to comfort the Chamber, as His Majesty's Government have mothered European commerce here and elsewhere with meticulous care.

* * *

Indian commerce has on the other hand been step-mothered. Representative national bodies, like the Indian Merchants Chamber and the Maharashtra Chamber, have protested against the preponderating weightage given to European commerce under one plea or another, not exluding the Communal Award. When the Indian Merchants' Chamber suggested to the Committee that the two seats given to the Bombay Chamber were adequate to European commercial interests and that the seat given to the Bombay Trades Association, also a European body, should in justice be transferred to the under-represented Indian interests, Sir Laurie Hammond replied that the Committee could not entertain the suggestion as the matter has been decided by the India Act. Actually, the Act, while it reserves three seats for Europeans, does not earmark for them any of the seven seats reserved for commerce and industry. To him that hath more shall be given. . . . .

* * *

Labour was represented by Mr. J. F. Gennings, Commissioner of Labour, Mr. R. R. Bakhale and Rao Bahadur R. S. Asavle. Mr. Gennings advocated that labour should be represented through trade unions, because that part of the industrial population "which took the trouble to organise must be benefited." He favoured the delegate system of election. He thought it was important that the individual worker should be given a direct and effective voice in the election. Mr. R. R. Bakhale made a strong plea for the recognition of trade unions for the purposes of labour representation, pointing out that out of 245,000 workers employed in the textile industry in the province the number of workers organised under authorised and registered trade unions was about 28,200, while there were 2,000 workers in unregistered unions, representing 12.3 per cent. of the industrial population. He claimed that percentage was sufficient for purposes of functional representation. Provincial legislatures at present represent about 2.8 per cent. of the population, which electorate would be extended up to 18 per cent. under the new constitution. Those figures prove that trade unions sufficiently represent the industrial population.

* * *

The textile industry presented to the Committee through Sir H. P. Mody and Mr. Malony its case for a continuous permanent seat in the Federal Assembly. The Bombay Millowners' Association had All-India Membership with an aggregate capital of Rs. 9 crores, being a representative body of the Indian textile industry in India. The present allotment of one seat by rotation between the Ahmedabad Millowners' Association and the Bombay Association, it was urged, did not satisfy them in view of the Association's representative character. Sir H. P. Mody, in reply to the suggestion by the Committee to combine both the organisations, stated that it was impossible in view of their different working conditions. Mr. Kasturbhoy Lalbhoy, representing the Ahmedabad Millowners' Association, voiced a similar demand for a permanent seat for the Ahmedabad Association instead of by rotation. He stated that Ahmedabad was a growing centre with vast potentialities and, being away from the seat of the Government, needed independent representation.

* * *

A silver *debacle* has upset Bombay. Like a bolt from the blue prices dropped disastrously yesterday and the market developed every symptom of panic. The *debacle* is attributed to the uncertainty of the American silver buying policy which knocked suddenly the bottom out of the London market. The monetary policies of the United States Treasury are on a twenty-four hour basis, a fact which the London apparently overlooked. There are all sorts of explanations of the sudden cessation of buying by the United States, one of which is linked up with the Sino-Japanese situation. Nothing is known as to whether the States Treasury's action is to be its future policy, an uncertainty that has aggravated the crisis. After the price had fallen to Rs. 56-12, followed by the frantic unloading of bulls, the Board of Directors of the Bullion Exchange fixed the lowest rate at Rs. 58-8, first settlement, and Rs. 58-11, second settlement.

SOUTH INDIA

(From Our Correspondent)

Madras, 9th December, 1935.

Pointed public attention to the increasingly intolerable position of the Indian in South Africa has been drawn by Swami Bhawani Dayal Sannyasi, Representative of the South African Indian Congress, who is now in Madras, in the course of an unvarnished press statement issued last week. The Indian has always been the Cinderella of the South African population. Anti-Asiatic legislation from time to time, especially in Transvaal, seeks to inflict fresh hardships on the Indian, who is acknowledged on all hands to be a peaceful trader, and as forming an important factor in South African commercial life. The Cape Town Agreement implied a recognition by the Union Government that the Indian was part of the permanent population of South Africa and of the obligation on the part of the Union Government to introduce measures for the cultural uplift of the Indian. The Indian on his part recognised the reciprocal obligation to improve his standard of living and began to adopt Western standards in the hope that the Union Government would, in solemn good faith, carry out their promises under the Agreement. But what happened? The Transvaal Asiatic Land Tenure Bill became law, inflicting untold humiliation on the Indian. Under this ruthless and arrogant law, the Indian is segregated in locations and his trading rights are crippled. The Cape Town Agreement has gone into the museum of violated agreements. The Union Parliament passed the Slums Act last year. The object of this measure is to clear slums in municipal areas, and the Act places, in the hands of municipalities, extensive powers for purposes of slum clearance. The Indian population accorded unreserved support to the Bill as it, after all, was a public health measure. An assurance was also given by the Minister of Health, who sponsored the Bill, to the Indian population that there was no racial motive behind the Bill, and that it would not be administered to the disadvantage of the coloured population. The Bill became law. The City Council of Durban declared 26 acres at Mayville, chiefly owned and occupied by the Indian population, slum areas, and the area directly came within the tentacles of that octopus—the Slums Act. Expropriation, which seasonally menaces the South African Indian, was the result.

The Hon'ble J. F. Hofmeyr, the Minister of Health was waited upon by an Indian delegation, but the gentleman seemed to suffer from a sudden loss of memory and was unable to remember his earlier assurances in regard to the Act and said briefly that slums had to be cleared. He said, at a Party Conference, subsequently that the Government of India had not conformed to the Cape Town Agreement!

The Indian is in a rather dreadful soup. At home, he has had a constitution thrust on him containing elaborate safeguards against discriminatory legislation. Abroad, he is being continually discriminated against, expropriated, robbed and ruined, as in South Africa. Will the Overseas Department of the Government of India wake up and note that the Cape Town Agreement is, in fact, dead as Queen Anne, and that something must be done immediately to make South Africa safe, if not overcomfortable, for Indians? I trust the appeal of Swami Bhawani Dayal will not prove a cry in the wilderness.

Very strong exception has been taken to the recommendation of the Local Delimitation Committee that the University seat in the new Legislative Council should be filled by election from among the members of the Senates of the three Universities of the Presidency. The recommendation has been accepted by the Madras Government. The University seat has been so far filled in by election from among the registered graduates of the University. In one sweep, the several thousand registered graduates have been deprived of their franchise. The candidate for the University seat in the Legislative Council has under the new dispensation only to nurse a more compact constituency of 500 senators of the three Universities, instead of the entire body of registered graduates. This is considered retrograde in the extreme and communal in intention. Though there is no organised protest from the registered graduates, the public mind is decidedly exercised at this extremely undemocratic move to replace a vast enlightened constituency by a kind of patch-worked electoral college. Mr. Satyamurthi, who is standing for election to one of the thirty seats on the senate of the Madras University, has done well to make an appeal to the registered graduates on this issue and in asking them not to vote for people, through whose instrumentality they were deprived of their franchise in respect of the University seat in the Legislature.

Local self-government in Madras is becoming a sensational chapter of Ministerial administration. Taluk Boards were abolished some time ago. They went—unwept, unhonoured and unsung. But the Chief Minister found that, by this step, he had unwittingly lifted the lid off a veritable Pandora's box. Dispensation of political patronage has now to be confined to District Boards. There are only a limited number of these District Boards, whereas the number of people who have to be rewarded for party services are legion. The Minister did the obvious thing. He bifurcated District Boards. It was Tanjore and North Arcot, the other day. It will be Chingleput shortly. Of course, these bifurcated bodies are often deficit propositions. But deficits do not disturb the Chief Minister's digestion. If necessary, it is up to these prize-boys, the presidents of the bifurcated bodies, to shut down schools, hospitals and such other superfluous institutions to balance the Boards' budgets. They were not placed in high offices for nothing! The recent elections to District Boards resulted in overwhelming Congress victories in a large number of cases. This did not disconcert the resourceful Chief Minister. He extended the life of the old Boards, so that the newly elected body cannot function for some weeks. In some districts, the election date was postponed. The Rajah of Bobbili thus displayed, in administering his *portfolio*, all the qualities Gardiner ascribed to Lord Kitchener —Ruthless, Relentless and Remorseless. The Justice Party cannot ask for more effective leadership.

Quite a lot of interest has been aroused by the arrival of two Englishmen, Mr. Paul Brunton and Major Alan Chadwick at the Ramana Ashram in Tiruvannamalai. Mr. Paul Brunton is reported to have taken up a house in Tiruvannamalai town, while Major Chadwick resides in the Ashram itself. Mr. Paul Brunton, it will be remembered, is the author of two books, *A Search in Secret India* and *The Secret Path*. Major Chadwick stated that his study of these books irresistably drew him towards the home of this rare ascetic—Ramana Maharishi. The Major has decided to stay as a permanent resident of the Ashram. He said the Maharishi was unique among those who have had glimpses of the spirit, and was different from many others who have attained spiritual beatitude. There was no ponderous teaching in the Ashram and no rigid code of discipline. The sage was continuously "God-Conscious,"—and that entitled him to spiritual leadership.

ITALIAN MONETARY POLICY

AFTERMATHS OF ABYSSINIAN CONFLICT

RECONSTRUCTION PROSPECTS

By Dr. Paul Einzig

Special for "INDIAN FINANCE"

London, December 2.

There can be no doubt that the outlook for a settlement of the Italo-Abyssinian conflict has improved considerably during the last few days. On the one hand, Italy got seriously scared about the likelihood of a full oil embargo with the participation of the United States. On the other hand, the British Government is viewing the Japanese penetration into Northern China with growing concern. There is, therefore, a genuine desire for settlement on both sides, even though it may take some time before the formula acceptable to all parties can be found.

In the circumstances, it is, perhaps, not untimely to raise the question as to what Italy's situation will be on the conclusion of hostilities and the removal of sanctions. Even before the beginning of the Abyssinian conflict the Italian budget was already hopelessly unbalanced, notwithstanding all the efforts of the Government to reduce the deficit by rigid economies and by cutting down, among others, expenditure on public works. Ever since the beginning of this year, large and increasing amounts have been spent on the equipment and dispatch of the Italian expeditionary force to Abyssinia; on their supply of food, armament etc.; on the moblisation of a large standing army in Italy and transfer of part of it to Libya; on the acceleration of the pace of armament; and on the aquisition of huge stocks of raw materials. No reliable figures are available; but there can be no doubt that the public debt has increased to a very large extent. Since the burden of the public debt was already bordering on the unbearable before the beginning of the conflict, after the conclusion of peace it will be found completely out of proportion to Italy's capacity.

At the same time, the Italian price level has risen during the current year to no slight degree. According to official statistics, wholesale prices have risen by some 20 per cent. Considering that already a year ago the Italian price level was hopelessly out of equilibrium with the world level, the result of this rise, which was offset only in part by a moderate rise in world prices, was a further accentuation of the discrepancy. If it was impossible a year ago to reduce Italian prices to the world level, after the conclusion of peace the task is not likely even to be attempted. If the disequilibrium handicapped Italian exports before the conflict, it will do so to a much larger extent after the termination of the conflict. Thus, in spite of the removal of the embargo on Italian exports, Italy will find it difficult to re-capture her lost markets especially as the Govednment will not be in a position to spend large amounts on subsidising exports.

The technical position of the Bank of Italy has also deteriorated considerably. Although no returns have been published since October 20, it is reasonable to assume that the gold reserve has declined further. On the other hand, the liquidation of privately owned foreign assets surrendered to the Government and the collection of gold from the public have provided additional resources. Even so, in spite of the using up of this secondary reserve of the nation, the Italian gold reserve will be highly inadequate, especially as the Abyssinian conflict was accompanied by an expansion of credit and an increase of the note circulation.

In the circumstances, it would be sheer madness to attempt to deflate so as to avoid a drastic devaluation of the lira. The demobilisation of hundreds of thousands of men and the cessation of war orders to industries would in any case create a grave problem of unemployment. If in addition, there should be a deflationary drive, unemployment would soon reach record figures. Nor would the Government be in a position to create employment by public works since it would not possess the financial resources for such purposes. In the circumstances, any deflationary efforts might easily prove suicidal for the regime.

A drastic devaluation of the lira is the only way out. The lira would have to be devalued not only in order to avoid further cuts in ordinary expenditure, price reductions and the contraction of the note circulation, but also in order deliberately to provoke a rise in prices so as to make the burden of the pubic debt less unbearable. At the same time, it is imperative that the lira should be undervalued so as to assist exports and so as to enable the Bank of Italy, to replenish its gold stock. It is difficult to express an opinion as to the extent of devaluation necessary. Much depends upon the duration of the conflict and on the extent of the sacrifices involved. Twelve months ago, a devaluation of 30 to 40 per cent. would have solved Italy's problem. If the conflict were to be terminated to-day, the extent of the devaluation would have to be at least 50 per cent. and possibly more. If the conflict should be prolonged and if in consequence the economic, financial and monetary situation of Italy should further deteriorate, then it may become necessary to devalue to the extent of at least 75 per cent. While it is impossible to forecast the effect of a devaluation of, say, 75 per cent. upon prices, it is certain that even wholesale prices would not rise to anything like the extent corresponding to that of the devaluation. As for retail prices and the cost of living, their rise would lag far behind that of wholesale prices and very far behind the extent of the devaluation. This we have seen in Belgium, where a devalution of 28 per cent. was followed by an increase in the cost of living by 8 per cent.

NEW LOANS AT RECORD RATES

PRECAUTION AGAINST DISTANT TRENDS?

IMPORTANT IMPLICATIONS

By **Francis Williams**

London Dec. 2, 1935.

I am writing immediately on receipt of details of the latest Government financial operation—the issue of £100,000,000 1 per cent. Treasury Bonds 1939-1941 offered at 98 per cent. and £200,000,000 at 2½ per cent. Funding Loan 1956-61, offered at 96½ per cent.

I do not, therefore, at the moment know what the effect would be on the gilt-edged market; but as the new loans are purely to replace existing securities, consisting of £150,000,000 2 per cent. Treasury Bonds, £44,000,000 3 per cent. Treasury Bonds and around £98,000,000 Treasury Bills, I should say that, on the short term view, the operation should lead to a rise in the gilt edged market.

It is, after all, the first time in history that a public Treasury Bond issue has been made at so low a rate as 1 per cent. and the first time it has been possible to issue a 20-25 year loan at as low as 2½%.

But taking the longer view the operation suggests pretty definitely that the Treasury anticipate an increase in interest rates in the future.

Looked at from the immediate financial standpoint, the operation is not, indeed, a profitable one; for, though the Treasury themselves apparently hold that it will on balance leave the interest burden of the national debt practically unchanged, it would appear to the non-Treasury mind, by a simple calculation, that in actual fact interest charges on the new loans will be in the neighbourhood of £6,000,000 a year, as against interest charges of just under £5,000,000 a year on the two lots of Treasury Bonds to be redeemed and on the Treasury Bills which are to be funded.

This leaves out of account the fact that there is capital loss for the Government on redemption as the discount on both loans comes to £9,000,000.

As in the case of neither of the Treasury Bonds was redemption actually necessary, and as Treasury Bills can at present be issued at under 12/- per cent, it would appear that in deciding upon this operation the Treasury has been guided by future rather than by immediate considerations.

And the only future consideration which would guide it to carry through such an operation, is that in a few years' time when, in any event, the Treasury Bonds now being redeemed would have to be repaid, interest rates would probably be higher than to-day.

Possibly, in coming to such a decision, the Treasury is inspired by the hope that industrial revival will by that time have attracted much of the money, which now goes into the gilt-edged market, and will have reduced the amounts the banks have, much against their liking, available for Government investment for lack of demand for bank advances.

But even more probably, they have been guided by more immediate consideration, such as the knowledge that substantial armament expenditure combined with a certain amount of public works expenditure is going to mean the Government coming to the market for new money fairly soon, and that the inevitable result of substantial new Government loans will be a decline in the gilt-edged market and a consequent increase in interest yields. While for the time being this latest operation suggests that we are embarking upon another period of record low interest rates on Government securities, the long term investors should take into account the implications to be drawn from the Treasury's policy in this matter.

(Continued from previous page).

Unquestionably, a drastic devaluation of the lira—the figure of 75 per cent. is only a tentative suggestion, but the percentage should err, if anything, on the excessive side—would kill quite a number of birds with one stone. It would be possible to balance the budget, thanks to the increase of the revenue, which would not be accompanied by a corresponding increase of ordinary expenditure. The burden of the public debt would become considerably reduced. A default, with all its disastrous consequences, would thus be avoided. At the same time, since prices would not rise to an extent corresponding to that of the devaluation, Italy would be able to export and thus to replenish her gold reserve. All deflationary interference with trade could be avoided. After its drastic devaluation, the lira would be viewed with confidence just as the belga has been viewed since its devaluation. Italian capital would be repatriated and would contribute to the increase of the gold reserve. Last but by no means least, rising prices and brisk trade would tend to create a cheerful atmosphere. The demobilised soldiers would be easily absorbed by trade and the evidence of prosperity would divert attention from any disappointment the public might feel at the terms of the peace treaty.

It is essential that the devaluation should be sufficiently drastic to give the operation the appearance of finality. The mere evidence that the Govednment has with a bold gesture cut past losses and has turned over a new leaf would produce a favourable psychological effect. On the other hand, if the devaluation is inadequate in extent, it would create an impression that the situation has been merely patched up and that the operation is merely one of a series of reconstructions which are bound to follow each other. Moreover, since sooner or later other countries will also devalue their currencies, if the degree of devaluation of the lira is sufficient, then there is no need to repeat the operation after the devaluation of a more moderate extent by other countries.

OVERSEAS' NEWS: By Air Mail

Week ended Nov. 30

UNITED KINGDOM

THE NEW CABINET

Now that Mr. Baldwin has formed his new Cabinet, its personnel is being regarded as indicative of the policies of the second National Government with a Conservative vertebrae. Lord Londonderry, a notable figure in the last Government, disappears. Mr. Churchill is, as expected, omitted, and Mr. Amery goes—a rather surprising omission. Mr. Anthony Eden continues to be Sir Samuel Hoare's understudy, which is taken as a pointer that our foreign policy will not change. More spectacular is the "swapping" of the Colonial and Dominion Offices' chiefs, Mr. J. H. Thomas going to the Colonial and Mr. Malcolm Macdonald to the Dominions Office. Mr. Malcolm Macdonald has that quality of tactfulness, very necessary now at the Dominions office, of which Mr. Thomas has not an appreciable amount. The long-drawn-out wrangle with Ireland is attributable to this disability of Mr. Thomas, and it is apparently Mr. Baldwin's idea to pour the oil of Malcolm Macdonald's tact on the troubled waters of Ireland. Lord Halifax quits the War Office to become Lord Privy Seal—a change that probably was necessary to keep Lord Halifax in the Cabinet, as it was not an official secret that this ex-Viceroy of India was not happy at the War Office. On the whole, the composition of the new Cabinet is an earnest of the Premier's wish not to break away from the political and economic moorings that have stood the strain of a series of serious upheavals.

Mr. Atlee, whom India will remember as a member of the Royal Commission on Labour, has been elected as Labour leader in the House of Commons, and Sir Archibald Sinclair the Liberal leader. It cannot be said that Mr. Atlee has a conspicuous gift of leadership, and his selection, in preference to Mr. Herbert Morrison and Mr. Arthur Greenwood, is due more to negative than positive qualities. The enhanced status of the Labor Party in the House of Commons will require of its leader qualities of personality, constructiveness and poise which the Party associates with Mr. Morrison, who suffered in the election for leadership from his alleged "Right Wing" proclivities. Mr. Atlee enjoys a deserved reputation of moderation and integrity ; and Labour has a political sense that in the next five years moderation will keep the State on an even keel. The choice of Sir Archibald Sinclair as Liberal leader was natural. He has been drilled and disciplined in the school of Sir Herbert Samuel and may be counted on breathing a little life into the dry bones of Liberalism. Mr. Lloyd George will sit on the front Opposition Bench, an arresting figure with his white mane and leonine head. His direction of the Council of Action Group ought to provide the House with spasms of more than usual intensity and frequency.

The London discount market was not surprised at the result of this week's tenders for Treasury Bills at the Bank of England. The average rate of discount was 10s. 9.99d. per cent., compared with 10s. 9.95d. last week. Fears, that large tenders might be received from foreign banks, proved unfounded. A proportion of the bills went to outside circles, but not more than usually. Tenders for bills, dated Monday to Friday inclusive, at £99-17-3, received about 73 per cent. of their requirements, compared with 74 per cent. a week earlier, higher tenders being allotted in full. Total applications for this week's bills were £61,745,000, a small increase over the previous week ; the full £45,000,000 offered were allotted, so that payments for bills will exceed maturities by £5,000,000 next week. A maximum of £45,000,000 of bills will again be offered on Friday next, against maturities of £40,000,000.

A ray of hope, not quite bright, is glimmering in the gloom of the coal mines negotiations. The three parties involved—miners, owners and Government—are jointly and severally apprehensive of the disaster of a deadlock ; and a more intensive search for a settlement has been proceeding during the week. The Minister of Mines has been conferring with both owners and miners, and, after Government has again considered the position, a final conference will take place. It is understood that a tentative settlement may be possible on a "payment on account" basis to augment wages in the intervening period before the benefits of promised re-organisation schemes actually accrue. The Lancashire scheme has achieved some success, and the owners there were prepared to make an offer to the miners, who however insisted on a national settlement. The miners would probably accept a smaller rise than the two shillings a day officially claimed, if it were given at once. An increase of six pence a day in wages would cost more than £5,000,000 a year. The expenditure of public money would not, in itself, solve the industry's problems, and it is likely that such a suggestion at the moment, divorced from guarantees of expeditious re-organisation on agreed lines, may harden the resistence of owners to fundamental changes, contemplated in the Act of 1930.

The complaints, recently brought by motor manufacturers against the iron and steel industry, of raising prices under the shelter of a tariff are not regarded by Government as justified. The Government is keeping in the closest touch with the steel industry, which gave a pledge to the Import Duties Advisory Committee not to raise prices as a consequence of the protection afforded, and it is satisfied that this pledge is being kept. Naturally, any increase in the price of coal, raw materials, or scrap iron is another matter, which may necessitate higher prices. Steel producers are fully aware both of the moral responsibility and the commercial advantages of keeping prices as low as possible. They are in close communication with the motor manufacturers, and there is no likelihood of any dispute developing between the two interests.

Even the lay public are evincing an informed interest in the five Power Naval Conference that will meet in London next week. The issues of the Conference involve the security of the Empire, and, with the experience of past Disarmament Conferences, the public are by no means optimistic about next week's Conference. The naval situation has deteriorated since the Washington Conference of 1921-22 and the London Conference of 1930. It seemed five years ago that a comprehensive agreement for the limitation of naval agmaments of all categories on agreed ratios would form the basis of an international understanding with France and Italy. The illusions of five years ago no longer exist. The collapse of the edifice of naval limitation started with Japan's repudiation of the Washington and London ratios, both in principle and practice, resulting in the Japanese-American armament race on the Pacific. Preliminary pourparlers have crystallised two facts. One is that Japan will not acquiesce in the present ratios after the existing treaties have run out : the other is that the United States will not surrender their five to three ratio as against Japan. Great Britain will adhere to the present ratios against Japan's claim of parity, a triangular contest of irreconcilable interests. Already, coming events have thrown long shadows ahead. In the Pacific area, the opening of the Conference has been preceded by an attempt by Japan, probably successful, to convert North China into a Japanese protectorate and by the inauguration by the United States of the trans-Pacific air route fron California to the Philippines. France is restive under her ratio on the Meditterranean where Franco-Italian

rivalry is giving place to Anglo-Italian rivalry. With these significant movements, it does not seem likely that the next week's Conference will unmesh the tangled web of rival armaments.

U. S. A.

NEW DEAL IN COURT

The crucial test of the constitutionality of the New Deal will come in the present session of the Supreme Court, with the implicit reactions of a duel between the Legislature and the Judiciary. Most of the National Recovery Act codes have been set aside by the Federal Courts, and the time is drawing near when these codes will have to surrender to, or survive from, the onslaught of the Courts. The rice processing tax has been provisionally made inoperative, which throws grave doubt on the status of the Agricultural Adjustment Act, probably the most useful of the New Deal Codes. The Security Exchange Commission has been inhibited from giving publicity to the earnings from the patent royalties of the Mesta Machine Company—a test case of the legality of the Commission's authority to publish trade facts. The Public Utility Act is being flouted by utility companies, confident of its unconstitutionality. The Guffey Act, which set up a pocket N.R.A., has not been immune from judicial attack. The battle of injunctions is developing on all fronts, while the tone of the most recent decisions of the Supreme Court suggests an adverse verdict in crucial cases. In the face of this near contingency, the national economy of the States has a natural feeling of disquietude.

The jettisoning of the A.A.A. would, for instance, be a serious setback to the farmer, and, indirectly, to the steel-maker and the retailer. The death of the Security and Exchange Commission would be unfortunate, as it is performing a useful service, which is appreciated by Wall Sreet. Of the Utility Act, it is difficult to write with accuracy. All is not well with the utility industry ; whether the Act can materially restore the industry is debatable, the main point being whether its existence hinders utility companies from carrying through the necessary work of expansion. At the same time, there is no point in suggesting that mere registration is a crushing drag on development. American industry and Wall Street have definitely turned the corner to recovery. Now that the Judiciary is busy in making nugatory the work of the Legislature, the situation cannot but be dangerous. A grave constitutional crisis will be precipitated by impending decisions in the Supreme Court, which will supplement its declaration that the National Recovery Act is unconstitutional.

The direct economic effect of these decisions would, however, not be so serious as their political implication. With the Recovery edifice tottering to its fall from judicial undermining, the next Presidential elections would be fought, not on a "Recovery" ticket, but on a "Change the Constitution" programme. If the A.A.A. and the Utility Act go, President Roosevelt will be standing midst the ruins of his laboured legislation. He will have no alternative but to take up the challenge. The perspective of such a contest is not attractive to the country. The "traditional Democrats" of the South, who are working for the destruction of the New Deal, would oppose the programme vehemently, perhaps violently ; though it would appeal to the more progressive Republicans. Chaos would reign inside the party organisation, with resultant bifurcations. Instability and uncertainty would submerge the country—the worst thing for business at the moment. And, conceivably, the conflict might usher in a minority President of a different political complexion or in a vote for an extreme Federal control.

On the whole, business is good. In keeping with the progressive returns of the third quarter of this year, the early weeks of the fourth quarter have shown an upward movement corresponding to that of the fourth quarter of 1934, but starting from a much higher level. This movement is largely a result of the displacement of the seasonal trend in the motor industry, which made its transition to new models in September-October without depressing the general level of business, while suggesting that the country's economy has broadened its base beyond minor fluctuations. Another fact, that bodes well, is that building is beginning to occupy a position comparable to that of the motor industry. Total building contracts for the first ten months of 1935 were almost even with those of 1934. While total building so far has not been greater than in 1934, the proportion representing private undertakings is probably substantially greater. This recent trend bears intimately on American economy.

Foreign buying in the security markets is a new feature, which has interested the authorities to the extent of a discussion with the President. The feature has three aspects First, realised capital gains are more heavily taxed than ever, which discourages profit-taking by large investors. Second, while capital gains are taxed, capital losses are deductable for tax purposes from total income only to the amount of 2,000 dollars. Third, capital profits realised within six months of purchase by officers or directors of a corporation may, under uncertain circumstances, be forfeited wholly to the treasury of the corporation. The net effect of these three factors seems to prevent or defer frequent tests of the market position—a factor noted in 1928 and 1929, but in a different form. At that time investors, wishing to avoid taxation on realised capital gains, capitalised their profits by borrowing against them. This is recognised to have been a major factor both in the bull market of 1928-29 and of the ensuing debacle. At the present time, while the taxation on capital profits is more severe, the limitations on collateral loans effectively restrain the pyramiding of speculative commitments, though at the same time they narrow the market.

It is too early to generalise on the six or seven hundred manufactured articles enumerated in the trade agreement with Canada. Substantial reductions in the United States tariff have been made on certain agricultural commodities, such as cattle, cream, potatoes ; but these along with lumber, are subject to a quota limitation. On the other side, the widening of the Canadian market to United States grape-fruit and oranges has offset some disadvantage to American producers, caused by the importation of fruit from Cuba, under the agreement with that country. The 50 per cent. reduction on whisky (from $5.00 to $2.50 a gallon) is also noteworthy ; under the "most-favoured-nation" clause this is of wider application.

One may doubt if the agreement will be followed by sensational changes in the trade figures ; but such doubts should not belittle its importance. It represents more than a gesture in the direction of increased freedom of international trade ; and, taken in conjunction with the other agreements in force or in preparation, represents a programme, not so much broadcast as many others, but thoughtfully conceived, persistently pursued, and technically well-handled. The expected protests were of course instantly forthcoming, but on the whole were less vociferous than was anticipated.

Air Mail Week

FRANCE

SIGN OF VICTORY

Paris is still in the throes of a politico-cum financial crisis, and though three weeks have passed in this uncertain state of affairs, the country is none nearer the solution than it was a month back. The budget deficit is there ; so also is the Fascist menace of a military coup. The Bank of France is losing gold heavily, daily, almost hourly. M. Laval's decrees have so far failed to bring prosperity. The Chamber Finance Committee has been sitting for the last two weeks and more, examining and counter-examining the situation. The devaluationists hurled down accusations against the Premier for his barren policy of deflation. The Radicals and the Socialists threatened to get this "pro-Fascist" Premier out of office. The Ex-servicemen pleaded for the "humanisation" of the majority of the decree laws. After the spirited attack on the Government on one or the other courts, the Committee cooled down, apparently leaving the Chamber to do the rest. The three weeks' debate in the Committee has revealed three factors—the strength of the Fascist organisation, and the growth of the feeling that it must be suppressed, the uselessness of carrying on the deflationary policy and the need for tempering the decree legislation. M. Laval's survival as a Premier depends on how successfully he would tackle these matters. In his broadcast, delivered on the eve of the re-assembly of the Chamber, M. Laval has summed up the situation. He claims to have safe-guarded the franc, for which task he obtained the mandate from the Chamber. The progress of recovery would have been much quicker, as a result of his decree laws, but for certain political complications. On the subject of Fascist menace, he had agreed to take steps to curtail their activities. In addition to the three laws he had already decreed, preventing the carriage of arms, etc., certain more measures are promised to be taken against private meetings. The Limoges incident is the subject of an enquiry by the Minister of the Interior and the Minister of Justice. And on the report of this administrative enquiry, the course of further action would depend. The question of the adoption of the Chairman Report, the adoption of which is being strongly urged by the Radicals, is also promised to be taken up. It was also rumoured among the Government officials that M. Laval would go even to the extent of recommending to the Chamber that the morning sittings would be devoted to the Budget and the afternoon sittings for consideration of the "leagues". The suggestion of the Finance Committee for the institution of the "caisse de pensions" having been shelved, there has been no reference to it, though M. Laval and the Finance Minister had already expressed their disapproval of this scheme.

This conciliatory spirit of Mr. Laval, and his broadcast speech, delivered before the assembly of the Parliament, have brought about a change in the situation. The Radicals and the Socialists, who, but a week ago, would not have hesitated to support a censure motion against M. Laval, are now inclined to vote with the Executive. "Will M. Laval continue to be the Premier" is no longer the question that is asked in political circles. His stock is definitely on the increase in the market. And when he scored his first round in the chamber, there was a slight wave of enthusiasm in the market. This victory, which M. Laval has gained, is nothing more than a trial of strength ; but it can serve as a pointer to the results in the subsequent rounds. When the Chamber met, M. Laval had demanded that the first debate should be on finance, and that the question of the suppression of the Fascist Leagues should be left until later on. Making it a question of confidence, he has sought full authority not only on the question of finance but also on the question of foreign policy, and he secured the vote of confidence by 345 votes to 225. Exchanges recovered at once on the Bourse. Sterling, which had stood throughout the day around 75, under strict control, declined and closed at 74.80. The dollar, which after a brief dip to 15.13 recovered to 15.19, went down to 15.18. The prevailing opinion in the lobbies of the Chamber is that M. Laval is assured of another substantial majority at the close of the debate.

That the Premier should have received the vote of confidence is a sliver lining in the cloud: for, in the midst of a tense international situation and tenser internal conditions, France could ill afford the luxury of a ministerial crisis. In spite of the victory, the financial and the economic ills are there, and how they are to be treated would be the chief problem for all concerned. The flight of gold, though arrested momentarily, is almost continuous. In the current week, the loss of gold is 1,364,365,000 francs and for the year up till now, is about 14.000 million francs. The crisis of May and June accounted for about 10,000 millions, and in spite of the persistent raising of the Bank rate, which now stands at 6 per cent., the effect is invisible. This fact tends to corroborate the thesis that this has not been a panic of small capitalists ; nor has there been an intensification of gold hoarding: the flight is due to the pressure on the franc brought by boom conditions in the New York Security market on the one hand and the probable devaluation of the franc on the other. At this rate of gold efflux, M. Laval will, sooner or later, have to consider the question of placing an embargo on gold. The Treasury position is much more insecure. It will have to perform more acrobatic feats to keep itself solvent. It is, of course, assured of the support of the Banque de France through the rediscounting of the Treasuries ; but how long can it depend upon this support? Indeed, the figure of "bills discounted" in the Bank returns, which as recently as May 10th stood at only 3949 million francs, rose at the end of June to over 8,000 million, and stood on November 15 at 8,304 millions. There has been nothing spectacular in the French business in recent months to warrant the abnormal increase in the rediscount *portfolio*—rather the production index figures register lower points except in October when they stand still. In a recent speech, M. Regnier announced that only 2,500 million of these bills go to the share of the Railway debts. The Balance 5,000 million, barring a small percentage of commercial bills, represent Treasuries. The Budget is not working up to expectations. Owing to continued fall in revenues, the ordinary budget continues to show a deficit of over 500 million up to October. There is the Extraordinary Loan Budget providing for an annual expenditure of 6,000 million francs on Public Works, etc. The economic condition of France verily has not much to be desired. Traditionally wedded to deflation, overvalued franc and the consequent maladjustment between domestic and foreign price levels, a falling revenue with a depleted Treasury, provision for increased expenditure, Fascist Menace, —even firmer premiers of the calibre of M. Clemenceau and Briand, would have found the situation hard enough. M. Laval has had an extended lease of life, no doubt ; but how far will this extension go. depends on how far he will solve the problems. Short of devaluation, it is difficult to see another remedy. The circumstances have proved themselves particularly suited for the devaluationists to push their case. Certain newspapers, which were till recently among the staunchest advocates of the maintenance of the gold parity, have begun to say that the Bank's gold must be safeguarded at any cost—even by an export embargo. And how is devaluation different in effect?

JUTE AND JUTE GOODS

JUTE

Calcutta, December 12, 1935.

The jute market during the week has been featureless. There was a fair amount of buying from abroad. Mills also took some interest. Up-country markets continue to be strong with small imports.

Feeling in the futures market has been undecided. The market fluctuated considerably, though prices do not show any appreciable change as compared with the previous week.

In the loose jute section Mills are reported to have purchased about one and a quarter lakhs maund District Jute Fours at Rs. 6-6 per maund basis and a small quantity of Jat quality at Rs. 6-8 per maund. Business was also reported earlier in the week in Jat Jute 2's at Rs. 8-8 per maund, and Rs. 7-8 was paid for 3's. Towards the close about 20,000 bales were done on the basis of Rs. 6-8 for Jat Fours.

The *Pucca* Bales section ruled firm in sympathy with the advance in the futures market. A good business was reported in Ready Firsts at Rs. 38 and Lightnings at Rs. 35 per bale. At the beginning of the week a small business has been reported by shippers in Firsts for March shipment at Rs. 39-15 per bale. At the close the market ruled quiet but steady Ready Firsts quting Rs. 38 per bale.

During the first part of the week, the *Futka* market was firm with prices steadily rising. There was considerable speculative activity and prices were pushed up to Rs. 40-2 on December 9. A slightly easier tone was witnessed thereafter as a consequence of the collapse in silver prices. At the time of writing the market is quiet at Rs. 38-13 per bale.

JUTE MANUFACTURES

Calcutta, December 12, 1935.

A quieter tendency has been in evidence in the gunny market during the week under review.

The scheme prepared by the Sub-committee of the Indian Jute Mills Association for submission to the Government of India has been the principal topic of interest in the market. The scheme aims at controlling the production and export of jute goods within stipulated limits. Each mill will receive a fixed quota for production and export.

The adoption of this scheme will mean that no new mill can be started and each mill will be able to produce only its apportioned quantity based on its total number of looms.

It is said that a deputation of the Indian Jute Mills Association is going to wait on the Commerce Member of the Government of India to discuss the proposal. Well-informed circles in the market believe that there are few chances of the scheme being adopted, especially in view of the very definite views expressed by the Government of India in their recent communication to the Association.

North America has been practically out of the market. After the large buying sometimes back it seems North American buyers are not likely to operate on any large scale unless the uncertainty regarding the future outlook is cleared.

Ready goods continue to be scare, but the premium is gradually diminishing. It is expected that by the end of this month ready and forward will be brought nearer.

North American consumption figures for the last month have not yet been received. It is expected that the November consumption will be about 10 million yards less than that of the previous month. It must be noted that last year the consumption of hessian in November by North America was 41 million yards and last month the consumption was 69 million yards.

The nervousness in the silver and cotton markets has also acted as a 'bear' factor. Business reported was very small. January-September elevens sold at Rs. 10-4, while December 40" 10 oz. were done at Rs. 10-10 and at Rs. 10-7 towards the close. Nine Porters Ready sold at Rs. 8-13 earlier in the week.

The bag market continues to be dull and easier. B. Twills December changed hands at Rs. 22, Cornsacks at Rs. 23-10 and D. W. Flour bags December at Rs. 26-12.

Due to the prospects of stocks increasing progressively from December onwards the gunny market is not likely to improve.

The following table given the total reported production of manufactured goods by the mills in the membership of the Association and also by the Adamjee Agarpara, Gagalbhai and Shree Hanuman Mills, for the month of November 1935:—

Description.	Quantity.
1. Twist and Yarn—	
(*a*) For sale	1,097 tons.
(*b*) All other, including that used in sewing bags ...	973 „
2. Canvas	51 „ 92,081 yards.
3. Gunny Bags (Tonnages exclude sewing twist)—	
(*a*) Hessian	3,737 tons. 1,36,16,646 yards. 77,92,722 number.
(*b*) Sacking	39,544 tons. 9,17,00,774 yards. 3,87,31,875 number.
4. Gunny Cloth—	
(*a*) Hessian	24,608 tons. 9,61,09,748 yards.
(*b*) Sacking	1,416 tons. 31,73,395 yards.
5. Other manufactures, including ropes	80 tons.
6. Total production (above figures combined)—	
(*i*) All kinds	71,506 tons.
(*ii*) Hessian (both as bags and cloth)	10,97,26,394 yards.
(*iii*) Sacking (both as bags and cloth)	9,48,74,169 „
(*iv*) Canvas	92,081 „

Total reported sales for the week ending Saturday, the 7th December, 1935.

JUTE BREVITIES

Calcutta, December 12, 1935.

Heavy Russian Raw Jute Purchases from U. K.

Russia has become a most important purchaser of raw jute. During the first nine months of the current year, Russia purchased 15,404 tons of raw jute, all from the United Kingdom. The total imports of raw jute into Russia during the 12 months in 1934 amounted to only 8,035. So far the purchases have doubled as compared with the figures for the corresponding period last year. The reasons for this large jute purchases has been attributed to the rising demand for jute goods on the part of the linoleum and cable industry and the increased production of agricultural products.

New Jute Mills in Jugoslavia.

Three new jute mills are expected to be started in Jugoslavia within six months, one in Belgrade with a productive capacity of about 1,000 tons a year, the second in Mladenova with a capacity of 2,000 tons and the third in Palanka with 1,000 tons capacity per year. The annual production of these mills coupled with that of the existing mills is expected to amount to 4,800 tons.

During 1934 imports of yarns amounted to 3,620 tons and imports of jute manufactures to 690 tons. It is reported that the three new mills would render Jugoslavia free from the necessity of importing jute goods.

Enormous Increase in Hungarian Exports.

During the first three quarters of the current year Hungary exported 2,900,500 kilos of jute goods as against 469,400 kilos during the corresponding period of last year The value of the exports rose to 1,700,000 P. from 300,000 P.

Scandanavian Jute Trade Prosper.

Finland, Norway and Denmark offer very attractive markets for jute goods and are increasing their purchases abroad. Finland imported 1,705 tons of raw jute during the first nine months of the current year as compared with 1,103 tons during the corresponding period of 1934 or an increase of 55 per cent. Imports of jute cloth and tissues rose from 255 tons to 291 tons, while sack importations amounted to 710 tons as against 595 in 1934. Imports of raw jute into Norway, decreased from 1,071 tons to 898 tons, but imports of grey jute cloth registered an advance of more than 30 per cent. from 3,441 tons, to 4,502 tons. Bags and sacks imported amounted to 1,263 tons against 1,014 tons in the previous year.

As regards Denmark, in spite of the rigorous import restrictions, that country increased her imports of raw jute as well as manufactured goods. Imports of grey jute cloth rose from 5,720 tons in 1934 to 5,806 tons this years. Imports of jute carpets increased from 161 tons to 204 tons, while imports of canvas showed a slight decrease of 7 tons from 411 tons in 1934.

COTTON AND COTTON GOODS

COTTON

Calcutta, December 12, 1935.

Developments in America dominated the Bombay cotton market during the week under review and, in sympathy with a declining New York market, cotton prices in Bombay suffered a sharp decline towards the close of the week. Notwithstanding a set-back in American cotton prices, a firm tone was witnessed in the Bombay market earlier in the week, Broach April-May improving to Rs. 226 on December 6. The rise was due to speculative activity, the only incentive to which was the news of insect damage and frost scares from some districts in Gujerat. A quiet but steady tone prevailed thereafter, Broach April/May fluctuating within a range of one rupee above Rs. 224-8. Following weak advices from New York, the sentiment in the market took a sudden reactionary turn on December 10. The bullish Bureau report, estimating the crop at 10,734,000 bales, was countered by other adverse factors such as the uncertainty about the Supreme Court decision and pool liquidation. As a sequel, prices suffered a sharp set-back in American cotton markets and Broach April/May dropped to Rs. 219 in sympathy. At the close Broach improved slightly and closed at Rs. 221.

Oomra Dec./Jan., after touching Rs. 207, declined to Rs. 201, but closed at Rs. 202-8. Bengal Dec./Jan. touched the highest rate of Rs. 151-4 during the week, but declined to Rs. 147-12. At the close the market was slightly better at Rs. 149-8.

The American market took a definite downward tendency during the week and ruled quiet and featureless during the early part of the week. A sharp fall was witnessed towards the close after the publication of the Bureau report. Fears regarding the possible effects of the Supreme Court decision on the legality of Processing Taxes, continued liquidation by pool interests, small demand in spot cotton and the statement by pool authorities regarding their intention to liquidate Government holdings of about 4,000,000 bales, were the factors that countered the bullish Bureau Report. The crop was estimated at 10.734,000 bales, as against the November estimate of 11,141,000 bales. Soon after the publication of the Bureau Report on December 9, rumours of early release of Government spots and liquidation of pool futures, brought about general selling of a profit-taking nature. Spinners bought very little due to the uncertainty regarding the future trend of the market. Prices declined sharply, Middling spot receding to 12.05, January to 11.62 and March to 11.41. Spot prices improved at the close to 12.10 but both January and March were unchanged.

The Liverpool market was supported by steady trade buying throughout the week and unlike other markets maintained a quiet but steady tone. The absence of selling of an aggressive nature also prevented any sharp decline. Price movements were confined to narrow ranges. At the close prices fell in sympathy with a sharp fall in New York. Middling spot closed at 6.55, January at 6.34 and March at 6.32. In the Egyptian section, Sakel spot steadied up and improved to 10.23, but closed at 10.02 in sympathy with weakness in American cotton.

U. S. Cotton Crop.

The Crop Reporting Board of the United States Department of Agriculture issues the following estimates in its sixth crop report of the 1935 season.

The Bureau of the Census of the Department of Commerce also issues its ninth Ginning Report of the season as given below :—

Season		Produtction 1,000 Bales of 500 lb.	Yield per acre pounds	Area Harvested 1,000 acres	Ginnings prior to Dec. 1, 1,000 running bales
1935	...	10,734	188.0	27,331	9,362
1934	...	9,636	170.9	26,987	9,023
1933	...	13,047	208.5	29.978	12,106
1932	...	13,001	173.3	35,939	11,635
1931	...	17,095	211.5	38,705	15,018

The November estimate of production was 11,141,000 bales. In the corresponding report of 1934 production was forecast as 9,731,000 bales.

PIECEGOODS

Calcutta, December 12, 1935.

The local piecegoods market ruled quiet and uninteresting. Demand from upcountry centres are not in any way encouraging. In the absence of any incentives buyers are few in the markt. The uncertainty regarding the outcome of the Tariff Board decision also added to the apathetic attitude of the buyers. In consequence, business was restricted.

Forward transactions in some grey dhooties and small lots of white shirtings, grey shirtings and dyed fancy sorts were reported in indigenous goods. Bazar rates were maintained at last week's level.

Very little business was transacted in the Lancashire section. Replacing prices still continue firm and stand in the way of any forward business materialising. Retail lots of better quality dhooties, fancy styles and some bleached descriptions were the transactions of the week.

In Japanese section, a moderate business was reported. A few lots of grey shirtings, white shirtings and low grade white mulls for February/April shipment were the chief transactions during the week.

The yarn section has been better during the week resulting in a good turnover in indigenous spinnings. About 6,000 bales, comprising 20s., 32s. and 40s. counts were done for December/February delivery. Business in Lancashire yarns comprise of retail lots of 70s. and 80s. Carded Egyptian rejects. Japanese shippers have been out of the market and no fresh forward business has been reported.

Conditions in Bombay are far from encouraging. The offtake was on a restricted scale and forward business has been possible only in stray lots. Possibly sellers and buyers are scared away by the pending tariff inquiry. Prices are more or less steady at last week's level.

BULLION

GOLD

Calcutta, December 12, 1935.

The gold market in Bombay was quiet and uninteresting during the past week with no appreciable movements in prices. An advance of one anna was witnessed on December 7 due to weakness in Sterling, first settlement quoting Rs. 34-14-9. A slightly easier tendency prevailed on the following days, as Sterling once again improved. At the close the market was quiet but steady, Ready and first settlement quoting Rs. 34-14 and second settlement Rs. 34-13-9.

Stocks on hand are estimated at one lakh tolas. Daily arrivals and off-take are unchanged at 10,000 and 3,000 tolas respectively. Imports during last week amounted to Rs. 31,977 in bar and coin.

The price of gold in London moved in consonance with the Sterling-Franc and Dollar rates around £7-1-0 per fine ounce. At the close the price improved to £7-1-2½ which is 3d. higher than last week's closing rate.

The Sterling-Franc rate steadily declined with the ease in the French political situation and at the close stood at 74.57, as against 74.91 a week ago. The Dollar rate also eased off to 4.92 9/16 at the close from 4.93 5/16 a week ago.

Gold Exports

Gold and sovereigns valued at Rs. 68,88,173 were exported from Bombay to Europe and America during the week ended December 7, 1935. The *Mooltan,* which sailed from Bombay on Saturday, carried bar gold worth Rs. 22,41,232 for London optional New York, Paris or Amsterdam, bar gold worth Rs. 27,38,56 for New York optional London, Paris or Amsterdam, the rest for London. The vessel carried also a consignment of sovereigns, worth Rs. 87,226, for London.

The total value of gold exported from Bombay since Great Britain went off the gold standard now amounts to Rs. 2,54,63,03,918.

Gold Output.

The following are particulars of 18 bars of gold bullion weighing 12,786.92 fine ounces valued approximately at Rs. 11,91,151 dispatched to the Bombay Mint, being the output of the mines named below for the second half of November, 1935.

London Air Mail Week ending Nov. 27.

The Bank of Engsand gold reserve against notes amounted to £197,189,063 on the 20th instant, as compared with £196,457,659 on the previous Wtdnesday.

Purchases of bir gold announced by the Bank during the week amounted to £443,216.

In the open market about £1,800,000 was disposed of at the daily fixing.

Nervousness has been apparent owing to the situation in France with regard to political and budgetary difficulties ; there has in consequence been a general demand for gold in the London Market, so that prices included a premium over gold exchange parities although they have ruled at a slightly lower level owing to the firmer tendency of sterling.

The Bank of France has suffered a severe drain of gold ; the last return issued that for November 15th showed a reduction in the gold holding of about £12,400,000 as compared with the preceding week and it is estimated that there has been a further fflux since November 15th of over £20,000,000.

The following were the United Kingdom Imports and Expots of Gold registered from mid-day on the 11th Nov. to mid-day on the 18th Nov. :—

SILVER

Calcutta, December 12, 1935.

The Silver market witnessed a catastrophic fall during the week under review. The price of silver in Bombay dropped to Rs. 57 as against last week's closing rate of Rs. 65-1 for first settlement. The market was ruling quiet and uncertain earlier in the week with very little fluctuations in prices. On December 10, advices from London came stating that America, after reducing their buying rate to 28¾d. has ceased buying silver in London. The news was a rude shock to the market and caused considerable nervousness among dealers. There was a great rush for selling and silver prices collapsed, first settlement dropping to Rs. 60-14. A further reduction in prices resulted on the following day on advices of a further recession in London spot prices to 27½d. Panicky conditions prevailed in the market and first settlement touched the low level of Rs. 57.

The Board of Directors of the Bombay Bullion Exchange viewed the situation with grave concern. An emergency meeting was called and a resolution was adopted prohibiting trading in silver below Rs. 58-8 for first settlement and Rs. 58-11 for second settlement. This decision of the Board Rs. 58-11 for second settlement. This decision of the Board proved, Ready quoting Rs. 58, first settlement Rs. 58-8 and second settlement Rs. 58-11.

Stocks on hand are estimated at 33,000 bars. Arrivals are negligible. Imports during last week amounted to 2,41,621 in coin.

The price of silver has been rising from the beginning of this year owing to the purchasing policy of the United States, who wanted to raise the price to 1.29 dollars per ounce. The heavy purchases by America in London gave rise to violent fluctuations throughout the world and the silver price in India shot up to Rs. 86-12 in April 1935. Since then the pricec has been falling steadily with occasional collapses and partial recoveries owing to the uncertainly of the American policy. The programme of the United States Government was to purchase silver to the extent of one quarter of their gold reserves. According to the weekly statement of the Federal Reserve Board, the gold stocks have reached the record figure of 10,000 million dollars. The enormous increase in the gold reserves means a corresponding increase in the silver purchases. The United States Treasury has been purchasing silver in London for the last three months at steady rates. The present indications raise serious doubts that the United States Treasury may have to give up this expensive policy.

The London market has been steady during the early part of the week, spot rate remaining at 29 3/16d. America has been absorbing all sales at this rate. Speculators were the chief sellers. China and India also sold, though the latter was a small buyer at times. There was a stampede for selling on December 9, China, India and speculators flooding the market with selling orders, when America reduced its buying limit to 28¾d. Considerable nervousness and panic prevailed in the market on the following day, when silver remained unquoted. Buyers were totally absent. The spot rate receded to 27½d. at the close.

The spot rate of silver in New York, which has been steady at 65 3/8c. for the last 4 months has declined towards the close to 63¾ cents. The London/Shanghai T. T., after improving to 1-2 9/16 closed easier at 1-2 15/32.

London—Air Mail week ending November 20.

Owing to the firmness of sterling in terms of the dollar, the limit at which the American Treasury was willing to purchase silver in the London Market, which had been unchanged at 29.5/16d. since November, 5th, declined to 29.1/4d. on the 22nd instant and to 29.3/16d. the following day. Although the decline was only a reflection of exchange movements, it caused nervousness and there were further liquidating sales by the Indian Bazaars and speculators ; China also sold and the pressure of forward offerings caused the difference between the cash and two months' quotations to widen to 7/16d. although this narrowed to 5/16d. to-day.

The following were the Unittd Kingdom imports and expirts of silver registered from mid-day on the 18th Nov. to mid-day on the 25th November.

TEA

CALCUTTA AUCTIONS

Calcutta, December 12, 1935.

The total offerings at the auctions of teas for export amounted to about 26,400 packages, of which 21,700 packages sold at 9 annas per lb. The selection generally was somewhat disappointing for the time of year though one or two useful liquoring invoices were included in the catalogue. Any change in prices was in buyers' favour and there was a good general demand. Medium teas were irregular and easier, particularly Broken Orange Pekoes and Orange Fannings with tip.

At the sales for internal consumption on December 10 the total offerings amounted to 16,100 packages, of which about 8,800 packages were Dusts, the remaining being leaf and other grades. There was a good demand for all grades of dusts and prices were fully firm to occasionally dearer. Leaf teas sold well with good competition among buyers. Fannings were dearer, though leaf grades containing stalk were sometimes a pie or two easier.

Crop.—At the end of November, the crop totalled 310.25 millions as compared with 320.25 millions for the same period last year.

The following are the full particulars of sale No. 26.

LONDON AUCTIONS

The total offerings at the London Auctions for the week ending December 12, Comprise 48,300 packages of Indian, 18,700 of Ceylon and 5,300 packages of Java teas.

Indian Tea.

At the auctions of Indian tea on December 9, the total offerings amounted to 28,300 packages. There was a strong and active market and all descriptions of teas met with keen competition, with prices ruling very firm. More interest was in evidence for whole leaf grades suitabse for export.

Ceylon Tea.

At the Ceylon Auctions on December 10, the market opened fairly active but eased off slightly towards the close. Teas up to 12½d. met with a strong demand. Prices for teas up to 13½d. showed little change. Otherwise there was some irregularity and teas were fractionally lower occasionally. Export teas were very firm.

Java & Other Teas.

The total number of packages submitted at the auctions of Java and other teas on December 5, amounted to 3,100. The market was quieter. Tippy teas were irregular with prices slightly easier. Other sorts were steady.

Tea Average.

The following were the average prices of teas in the London market for the week ending December 5, as compared with the presious week :—

	Week Ending Nov. 28 lb.	Week Ending Dec. 5. lb.
Indian Tea (Northern) ...	12.74d.	12.61d.
Indian Tea (Southern) ...	12.40d.	12.31d.
Ceylon Tea	13.71d.	13.65d.
Java Tea	12.76d.	12.01d.
Sumatra Tea	10.04d.	10.27d.

Total deliveries from 1st January to 30th November ...	412.75	398.75	422.50
Stocks at the end of November	227.75	260.75	254.50

Tea Exports.

The following figures of tea exports taken from the Calcutta Customs daily entries and received periodically from Chittagong are issued by the Indian Tea Association.

Quantity of tea entered for export to the United Kingdom for the second half of November, 1935.

Calcutta, Black 12,664,521 lbs., Green Nil, Chittagong, Black 4,385,737 lbs., Green Nil.

Quantity entered during the corresponding period last year.

Calcutta, Black 3,321,875 lbs., Green Nil. Chittagong, Black 8,630206 lbs., Green Nil.

Total from April 1 to November 30, 1935.

Calcutta, Black 121,220,925 lbs., Green Nil. Chittagong, Black 62,455,749 lbs., Green Nil. Total 183,676,674 lbs.

Total from April 1 to November 30, 1934, 191,677,862 lbs.

SUGAR

Calcutta, December 12, 1935.

The local sugar market continued dull and lifeless. Demand from consuming centres is at a standstill. Prices are easier on balance at the close. Java Refined Ready and Steamer have declined at the close to Rs. 10-5 and Rs. 10-2 respectively. Java White Ready was quoted at the close at Rs. 9-13, while Steamer stood at Rs. 9-12.

A further set-back was witnessed in the prices of Desi sugars which are easier at the close. Desi White 1st Crystal was quoting Rs. 9-8 to Rs. 9-12. Brown sugars are unquoted as stocks of same are exhausted.

Quiet and easy conditions continued in Bombay. With the advent of the crushing campaign, demand for spot sugars from Bombay to upcountry has greatly diminished. Dealers and outsiders who are holding contracts for near months are anxious to sell off before arrival in view of the uncertainty regarding the future trend of the market. Last week's sales amounted to about 1,300 tons.

The Cawnpore market ruled steady with prices unchanged after the decline last week. Considerable business was transacted and several bargains of whole productions were made by some Millers.

The Java market is unchanged with no change in prices. Nivas limits stand at F 4.20 and very little business passed.

Arrivals. The s. s. Takliva, s. s. Kohinoor and s. s. Taneld arrived with 1,750 700 and 1,000 tons of Mozambique and Java sugars respectively.

The stocks in the main ports are:—

(In bags: 10 bags=1 ton)

	1935		1934	
Calcutta ...	(5th Dec.)	62,807	(7th Dec.)	20,220
Bombay ...	(6th Dec.)	140,000	(24th Nov.)	58,000

MISCELLANEOUS

WHEAT

Calcutta, December 12, 1935.

The local wheat market remained steady during the past week. Better advices from the districts and some amount of buying were the chief factors to impart steadiness. A scarcity of ready wheat still continues and ready rates are at a premium of 2 annas over the futures. A slight set-back was witnessed on December 10 on weak foreign advices and falling off in demand, and towards the close prices eased off. Cawnpore and Punjab Ready closed at Rs. 3-9-6 while May Beta was quoted Rs. 3-7-6 at the close.

In Bombay the market was quiet but steady earlier in the week, with very little fluctuations in prices. The latter half of the week witnessed some selling on lower Chicago advices and prices as a consequence dropped down about 2 annas. At the close Delhi-Cawnpore January was quoted at Rs. 4-8-3 and May Rs. 4-8.

In Karachi the market was steady, January quoting roundabout Rs. 25. Stocks are estimated at 2,25,000 bags. Arrvials averaged 2,000 bags per day and last week's shipments totalled 1,225 bags. Spot sales last week amounted to 25,000 bags, of which about 15,000 bags were purchased by Calcutta shippers and the balance by local mills.

The import and export figures of wheat for the three main British Indian ports as given in the *Indian Trade Journal* from April 1 to December 7, 1935, as compared with the corresponding period of last year are:—

Imports—

	(In tons) 1935 Indian	Foreign	(In tons) 1934 Indian	Foreign
Calcutta ...	152,257	...	163,944	2,768
Bombay ...	110,215	...	123,942	...
Karachi ...	211,436	34	310,830	...

Exports

	1935	1934
Calcutta	12	100
Bombay	1,162	904
Karachi	7,685	9,097

Regarding overseas markets, the announcement made by the Canadian Board to dispose of its surplus stocks in the world markets at competitive prices, discouraged the Chicago market, which steadily declined during the week. As compared with the closing quotation of last week, prices have dropped by 2 to 3 cents, to 94 7/8 cents for December and 94 7/8 cents for May. At the close prices improved by more than one cent. According to the revised estimate the Canadian crop now stands at 276 million bushels, of which 60 million bushels are regarded as unmillable. On August 1, Canada had a stock of 214 million bushels. Considering the current year's crop, Canada may have an exportable surplus of about 280 million bushels this season. Since there is a considerable shortage of high-grade wheat in the United States, Canada would be exporting an increased quantity to that country, which should relieve Canada's position to some extent. Reports from France state that the Ministry of Agriculture had decided to export the emergency stocks of about 20 million bushels of wheat. Latest advices from Australia places the current year's yield at 140 million bushels as against the previous estimate of 135 million bushels and the final outturn of 134.4 million bushels in 1934.

MADRAS MARKETS.

Madras, December 12.

PIECE-GOODS AND YARNS :

The slight improvement noticed last week has not been maintained, though retail inquiry from up-country centres shows signs of broadening in anticipation of PONGAL demand. There have been some inquiries about for forward business, but the possibility of a reduction in import duties as a result of the recommendations of the Special Textile Tariff Board and higher Manchester prices tend to restrict business. The Yarn section is quiet with poor up-country demand, but prices are steady except in the case of Japanese yarns.

METALS

The local market for Yellow Metal and Copper remains ning of the week at £13-6-3 December Sellers and £12-18-9 and Rs. 175 for Copper sheets. Demand from consuming centres is poor and stocks in Madras are on the heavy side. Sterling quotations show no change on last week.

GROUNDNUTS

The market has ruled steady during the week. London quotations for Coromandel machined opened at the beginning of the week at £13-6-3 December Sellers and £12-18-9 January Paid. The quotation for January position improved to £13 and that for December remained unchanged in mid-week. Subsequently, there was slight reaction with a decline of 1s. 3d. per ton in the quotations for December and January positions. Towards the close, the market steadied to £13-6-3 December Paid and £13-3-9 January Paid. Shippers' buying limits opened at Rs. 31-12 for Machined and Rs. 27-12 for Ordinary (Per French Candy of 531 lbs. ex-coast godowns), and declined to Rs. 32-4 and Rs. 27-4 respectively in mid-week. Subsequently, prices steadily improved and at the close stood at Rs. 33-4 to Rs. 34 for Machined and Rs. 24 for Ordinary (Per French candy ex-coast godowns). Rangoon and Singapore buyers have been buying in Madras and up the coast, and they are reported to have bought about 50 tons in Madras during the week at rates ranging from Rs. 32-8 to Rs. 33 for Machined per French candy, ex-Harbour godowns. At Vizagapatam, the market is firm at Rs. 10-8 for Machined per bag of 164 lbs. ex-port godowns for December 15 delivery. At Pollachi, ROSE variety Machined is quoted at Rs. 29 to Rs. 29-6 and RED variety Machined at Rs. 28 to Rs. 28-4 per French candy, ex-Pollachi godowns. Arrivals of the Main crop have begun in the southern centres, and with the advent of the flood of new crop arrivals there is little prospect of the market improved in the near future.

Arrivals of Groundnut kernels into Madras for the week ended December 7, 1935 amounted to 29,445 bags or 2,318 tons, against 21,145 bags or 1,664 tons ni the preceding week, and 12,081 bags or 951 tons at the corresponding week of last year.

Mail advices from London report that the general feeling in the Kip market was one of apathy. Most Curriers have sufficient orders to carry them through until the end of the year, purchases against which they have already made. They are consequently disinterested in placing further orders for Kips. In the main, Curriers prefer to sit back to await further developments feeling in their minds that they will see lower prices before the end of the year. Occasional business is, however, possible, but still not at the full Madras asking prices. A certain amount of business was put through, but one cannot say that the sales have been general throughout the Trade. They are mostly confined to isolated firms who have managed to secure orders for finished leather. The heavy shipments of nearly 5,438 boles last month preclude buyers from operating with any confidence. The local Tanned Cow market remains steady to firm, and prices have generally advanced by 3 pies to 6 pies per lb. Speculators who have sold previously are covering in and these purchases materially assist in keeping the market firm. London buyers have not followed the advance here, but have slightly increased their bids here and there by about ¼d. per lb. For instance, Coconadas 7/7½ lbs. are on offer at 11¾d. or an advance of ¼d. over the last prices. Still, there is a gap of about ½d. between London's ideas and Madras asking prices. The one deterrant to any reduction in local values is the very firm and advancing market for Raw hides, which are fully 1½d. per lb. higher than the value obtainable for the tanned article. Chrome tanners and shippers are reported to be active buyers of Raw hides in North Indian markets and prices are rapidly advancnig. At present, arrivals of tanned hides into Periamet are moderate, but are likely to fall off considerably in about a fortnight, as tanners have considerably cut down soaking for the last two months and are unable to work in the face of the advance in raw hide prices. American demand for Tanned Buffalo has slackened, and no fresh business is possible at present. But locally prices are steady owing to purchases by shippers who are filling up orders previously booked. Arrivals of Tanned Buff Calf are very limited, and theere is a fair demand and shippers who have to cover sales are competing for the available supplies. A good demand continues for Tanned Cow Calf, arrivals of which are on the small side.

Contrary to expectations. Tanned Goat improved by a penny at the London auctions last week, and Tanned Sheep colsed weaker for Prime and Middle class tannages. Tanned Sheep. Prime Middle class and Best tannages declined by 2d. to 3d. Other tannages were unchanged to a penny higher. The principal demand was from the Home market. Sales closeed on Friday last when the position remained unchanged for Madras Sheep Prime and Middle class Bests whilst other tannages, however, recorded a further advance of a penny. 580,000 Madras Sheep and 60,000 Bombay Sheep were sold.

Investor's Supplement

Vol. XVI. No. 23 SATURDAY, DECEMBER 14, 1935 Price Re. 1

CHEAP MONEY BENEFITS

The giltedge market has, in the current week, occasioned mixed feelings. Fear that the collapse of prices in the silver market would disrupt giltedge prices. And relief that the government securities stood up to the shock without flinching.

London hesitated and faltered so far as India sterling stocks were concerned. The hesitation was due to apprehension that rupee giltedge would suffer a severe retrogression as a repercussion from the silver debacle. When London realised that rupee securities were unshaken, confidence in India sterling stocks revived ; and the latest quotations show rises.

Due to London advices, the Indian giltedge market was, at first, inclined to depress prices. But there is a regular famine of scrips in the entire range of terminable securities ; and, in 3½ per cent. Rupee Paper, Bombay is definitely oversold though Calcutta is slightly overbought.

UNSETTLED MARKETS

(By Special Cable)

New York, December 12.

Silver situation continues causing unsettlement in markets.

On first thoughts, 3½ per cent. Paper declined to Rs. 96 from over Rs. 96-8. On second thoughts, Bombay was afraid of bearing the market. With the disappearance of the earlier phase of quieter activity, prices bucked up. And, at the time of writing, 3½ per cent. Paper in quoting Rs. 96-5.

The general opinion is one of gratification that the market has stood its ground so splendidly. And there is general confidence that prices must be upward.

It may, however, be necessary to warn that the silver danger is not yet over. Before the upward trend asserts itself strong and irresistable, there may be yet more hesitation and longer hovering roundabout Rs. 96.

The opportunity thus offered by a famine of giltedge scrips must be utilised, wherever possible, by industrial concerns to convert debentures on a high interest basis to debentures on low interest.

We understand that one of the members of the Tata Hydro Electric Group is tackling a conversion of this nature. It is remarkable that, over the past few years, this group has saved a good many lakhs through the benefit of lower interest charges.

Turning to Calcutta, we see, for example, a good opportunity for the Empire Jute Mills.

The Company has debentures for Rs. 9 lakhs. These were originally carrying 6 per cent. In 1927, they were extended for a further period of 15 years and the rate of interest was reduced to 5½ per cent. The Company has option of redemption in whole or in part on six months notice.

The Company should easily be able to raise debentures now on 4 per cent. basis. It should give the six months notice for redemption and arrange their replacement by lower-interest debentures.

Nor is there, perhaps, any need for raising the full sum of Rs. 9 lakhs. The Company should not need to raise any debentures as the Debenture Redemption Fund stands at Rs. 7½ lakhs.

Otherwise, too, the liquid position of the Company is quite satisfactory. Liquid assets are as under:

Stocks	Rs.	12.96	lakhs.
Debts and Advances	,,	2.07	,,
Investments ...	,,	.52	,,
Cash	,,	3·23	,,
Total ...	,,	18.78	,,

With such large liquid assets, the Company should be able to arrange, when necessary, for bank overdrafts at or even below the present bank rate of 3 per cent.

MARKETS IDLE

(By Special Cable)

(From R. Gordon Cummings)

London, December 12.

Markets are idle awaiting the result of peace talks.

We consider the silver difficulties as an American attempt to frighten speculators and not as a permanent change in the policy.

In any case, the Company need not borrow more than Rs. 5 lakhs by way of debentures.

4 per cent. debentures for Rs. 5 lakhs as against the present 5½ per cent. debentures for Rs. 9 lakhs should mean a saving in interest charges adequate for increasing the dividend by at least two annas per share per half year.

The present dividend is 12 annas per share per half year. Two annas more means an increase of 15 per cent. over the present dividend distribution.

There are other concerns which could take steps, in existing conditions, for placing their capital structure on a sounder and more economical policy.

Cheap money benefits are to be communicated to industry by these and other means. Much progress in this regard has been made in England. We hope that industrialists and public bodies in India will not miss the opportunity.

Worth-While Investments :

INDIA

PROFITABLE BY-PRODUCTS INDUSTRY

THE BARAREE COKE COMPANY

(By "Watch-dog")

Another of the companies under the capable management of Messrs. Jardine Skinner & Co., which is worth the investor's attention is the Bararee Coke Co., Ltd. The latest balance sheet makes very good showing. The financial position of the Company is exceptionally strong.

The Company was formed in 1918 to build a coke-oven and by-product plant in Jherria Coalfield at Kumuda, E. I. Railway.

The coke plant consists of a battery of 35 waste-heat ovens by Simon Carves, Ltd. In addition, the Company has installed a distillation and benzol rectification plant and also plant for the manufacture of sulphuric acid. The by-products produced include coal-tar, road tars, pitch, sulphate of ammonia, motor benzol, toluol, disinfectant fluids, creosote, naphthas, naphthalene, etc.

The past record of the Company is excellent ; and though very high dividends have not been declared, the directors have concentrated their attention on consolidating the position of the Company. At the present day, the financial position of the Company is so strong that they can be more liberal in their dividend policy.

Half-year ended.	Profit. Rs.	Depreciation. Rs.	Allocation to funds. Rs.	Carry-forward Rs.	Dividend %
Mar. '30 ...	1,40,568	1,07,090	...	1,97,277	...
Sept. '30 ...	1,57,736	1,05,976	...	2,19,037	5
Mar. '31 ...	1,32,857	1,09,620	1,00,000	1,12,274	5
Sept. '31 ...	1,25,817	1,08,018	...	1,00,073	5
Mar. '32 ...	1,28,064	75,926	...	99,211	8
Sept. '32 ...	54,581	45,133	...	84,660	4
Mar. '33 ...	54,266	42,085	...	72,841	4
Sept. '33 ...	72,578	42,014	...	73,406	5
Mar. '34 ...	99,241	67,966	...	74,681	5
Sept. '34 ...	60,157	42,014	...	62,824	5
Mar. '35 ...	1,35,930	69,852	...	80,903	8
Sept. '35 ...	1,27,607	70,214	...	90,295	8

The capital authorized, issued and subscribed is Rs. 12 lakhs in 1,20,000 shares of Rs. 10 each fully paid up.

The General Reserve is Rs. 1,00,000.

Sundry liabilities are Rs. 1,48,038 against Rs. 1,06,063 in the previous half year.

On the assets side, the gross block of the value of Rs. 30,41,775 has been depreciated by Rs. 23,70,537 to Rs. 6,71,238. The depreciation has been carried out in a thorough manner and the block should be worth several times its net value.

Stocks are Rs. 1,39,691 against Rs. 1,31,223.

Outstandings are Rs. 1,57,033 against Rs. 1,88,635.

Investments are Rs. 5,19,187 against Rs. 1,98,125 an increase on the previous year's figures by more than Rs. 3 lakhs.

Cash on hand is Rs. 2,79,976 against Rs. 99,184.

The total liquid assets are Rs. 9,15,096 against Rs. 7,97,958.

The profit for the half-year ended September, 1935 is Rs. 1,27,607 against Rs. 1,35,930, which is a little lower than that of the previous half-year. These compare favourably with the more prosperous years of 1930 and 1931; and in view of the fact that the position of the Company is very strong, there can be a stepping-up in the dividend in the near future. Rs. 70,214 against Rs. 69,852 has been set aside for depreciation. The dividend has been maintained at 8 per cent. per annum. The carry-forward is higher at Rs. 90,295 against Rs. 80,903.

At the present price of around Rs. 13½, the yield on the share is 5.926 per cent. free of tax. A very good proposition.

INVESTMENT BREVITIES

The profit after depreciation of the Agarpara Company for the half-year ended September, 1935, is Rs. 4,24,394 against Rs. 5,27,461. The amount set aside for depreciation is Rs. 88,068 against Rs. 83,760. The amount transferred to Reserve is Rs. 1,00,000 against Rs. 2,50,000 and the amount set aside for Income Tax and Super Tax is Rs. 1,00,000 as against the same last half-year. The dividend declared is maintained at 20 per cent. per annum. The carry forward is Rs. 41,944 against Rs. 2,550.

* * *

The profits of the Mysore Sugar Company for the year ended September, 1935, is Rs. 5,05,989 against Rs. 3,88,310. Rs. 1,19,135 against Rs. 80,865 has been set aside for depreciation and Rs. 1,00,000 against 50,000 has been transferred to reserve. The dividend has been maintained at 10 per cent. but a bonus of 1¼ per cent. has been declared in addition. The carry forward is higher at Rs. 10,699 against Rs. 8,845. At the price of around Rs. 27½ the yield is 4.1 per cent. tax-free. In view of prospects it is worth buying.

* * *

The profit on revenue account of the Elgin Mills Company is Rs. 1,65,672 against Rs. 2,38,025 in the previous half-year. Rs. 50,000 against Rs. 75,000 has been set aside for depreciation and Rs. 25,000 the same as previously is transferred to Debenture Sinking Fund. The amount placed to Taxation Reserve is Rs. 14,200 as against Rs. 29,900. The dividend declared is Rs. 2 per share against Rs. 3 and the carry forward is lower at Rs. 10,777 against Rs. 20,305.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

Apart from a further number of tea company interim dividends, several important undertakings operating solely in India have brought out their latest annual reports during the past week.

* * *

British Burmah Petroleum.

During the last four years this company, which owns about 390 well sites in Burma, has suffered from the low competitive prices realised for its products. Apart from its own business the Company is interested in five subsidiary and associated companies, including the Rangoon Oil Company. In 1934 certain properties in South Africa were sold to the South African Torbanite Mining & Refining Company, a concern formed to develop extensive oil-bearing lands and produce petrol and other oil products. British Burmah holds a substantial share interest in the South African enterprise.

For the year-ended July 31st, 1935 the latest report discloses a net loss of £56,754, which goes against a corresponding loss of £58,379 in the previous year. The figures are struck after providing for all expenditure and £21,571 (£22,365) written off for depreciation on field and refinery assets. As for the previous three years no dividend is to be paid on the £1,216,284 issued capital, entirely comprised of 8s. ordinary shares. Owing to the past year's loss the debit balance on profit and loss account is increased from £57,045 to £113,799.

The balance-sheet reveals a strong liquid position, while investments in associated companies, mainly due to the interest in Torbanite Mining, have increased by £229,000 to £239,062.

Dealing with the year's results the directors state that the depressed state of the market in India for oil products generally and the heavy burden of taxation have continued. Prices realised for benzine and wax were approximately the same as in the previous year, but kerosene prices declined by 35 per cent. In recent months there has been a gradual improvement in prices, with the result that the outlook is now more favourable than it has been for some time past.

During the 12 months under review production of crude oil was maintained at about the same figure as in the previous year, the natural decline of older wells having been counteracted by the results of new drilling. For some time past the drilling programme has been restricted in view of the depressed state of the oil industry generally, but improvement in prices now justifies some enlargement of this programme.

Although exploratory work is being undertaken, that of the British Burmah Deep Drilling Company did not disclose commercial production. For the time being testing of deep issues is in abeyance. In partnership with the Indo-Burma Petroleum Company, an area at the Southern end of the Singu Field is being developed. Amongst the subsidiary companies, Rangoon Oil showed a profit on working and an improvement in its financial position. The directors did not, however, consider it expedient to declare a dividend on the capital of this subsidiary.

As regards prospects the discovery of further sources of oil and the improved outlook for refined products justify the Board in anticipating more satisfactory results in the near future.

* * *

Indian Public Utlity Companies.

During the year-ended July 31st last *Burma Electric Supply Company*, which owns a tramway concession and electric light and power licences for Mandalay, earned net profits of £13,722, compared with £13,548 in 1933-34. After payment of the 6 per cent. dividend on the £120,000 issued preference capital, £5,000 is again placed to general reserve and depreciation fund, making this £94,642, and £10,628 (£9,107) is carried forward. Although 7 per cent. was earned on the £120,000 ordinary capital, no dividend is to be paid, as for the previous three years. The last distribution on the ordinary shares was 4 per cent. for 1930-31.

East India Tramways operates petrol-motor services in Karachi. During the year-ended July 31st, 1935 profits again rose, by £2,527 to £14,016, representing earnings of 14 per cent. (11.5 per cent) on the £100,000 capital, entirely comprised of £1 ordinary shares. By a final payment of 6 per cent., the dividend is maintained at 10 per cent. tax free for the year. A sum of £2,507 (£1,491), is left to be carried forward. Renewal reserve now amounts to £29,170.

* * *

Tea Interim Dividends.

As indicated above a further batch of Tea Company interim dividends are now to hand. Some of these are maintained at last year's rates, while others are increased. In one case there is a reduction.

Companies under the management of Planters Stores & Agency to announce payments are: *Chokidinghi Tea Estates,* which is paying 2½ per cent. (nil) ; *Deundi* paying 5 per cent. (same) ; *Doom Dooma* distributing 5 per cent., against nothing ; and *Eastern Assam,* which is also paying 5 per cent., as against nothing a year ago. The Estates of all these concerns are situated in Assam.

In the C. A. Goodricke group, *Aibheel* is again paying 3 per cent., *Bagracote* is increasing the distribution by half per cent. to 2½ per cent., and *Chulsa* is repeating the interim at 4 per cent. The first named company owns estates in Dooars, and the other two in Bengal. *Sylhet Tea,* another member of this group is reducing the interim from 4 per cent. to 2 per cent. Last year, however, there was no final dividend.

Other announcements are: *Dooars,* 2½ per cent. (nil) ; *Singlo,* 2½ per cent. (nil) ; *Rajmai,* 10 per cent. (5 per cent.) ; *New Sylhet Tea Estates,* 5 per cent. (same) ; *British Darjeeling,* 2½ per cent. (nil) ; *Dhamai,* 2½ per cent. (same).

* * *

Mercantile Bank Change.

On December 31st next Mr. James Steuart will retire from the position of Chief Manager of the *Mercantile Bank of India.* Mr. James Bain Crichton will take his place as Chief Manager. Mr. Steuart has served the Bank for 46 years, and on his retirement from the Chief Managership he will become a Director of the Bank.

* * * *

Peninsular and Oriental Steam Navigation.

Accounts of the *Peninsular and Oriental Steam Navigation Company* for the year to June 30th, 1935 are now to hand. These show a net profit of £156,999, compared with £151,269 in the previous twelve months. The figures are struck this time, however, after crediting £450,000 from reserve and £112,445 in respect of income tax recovered. In the previous year £550,000 was credited from reserve, £16,538 from income tax, and £418,300 from part of the profit on the sale of the company's holding in William Cory ordinary shares.

Depreciation charged for the past year is £1,318,944, whereas the corresponding amount for 1933/34 was £1,783,003, but the last named sum included £385,085, part of the abovementioned share realisation profit allocated as additional depreciation.

In accordance with the previous announcement there is again to be no dividend on the deferred

(Continued on page 1837)

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Friday, Dec. 13, 1935.

The opening of the Calcutta Stock Exchange this week started with the conditions prevailing last week, but as the session progressed, the fall in silver prices and panicky conditions due to same reported from Bombay caused 3½ per cent. Government Papers to recede to Rs. 95-15 on Wednesday, but on bear covering and bull support at the reduced levels the tone of the market gradually improved, and although very little business was concluded, the rates remained stationary between Rs. 96-4 and Rs. 96-6 towards the close. This section showed wonderful power of resistance and did not succumb to depreciation in silver prices.

In Jute shares, the decline predicted in these columns last week, came into effect, and prices in almost all cases dropped down evidently due to profit taking. At the close, however, firmer conditions in more speculative issues were noticed, although the turnover was limited.

While a rather better enquiry was forthcoming in coal shares, Tea shares were neglected inspite of London advising a good demand in tea sales at higher prices. In others, strong support was in evidence for Engineering issues, but Reserve Bank shares lost their last week's ground.

The money market was a shade steadier at unchanged rates. The Reserve Bank rate continued to be 3 per cent.

Government Securities.—Had there been no sharp setback in silver rates due to uncertainty of American policy regarding purchase of silver, this section would have witnessed very firm conditions, as throughout the week London advices continued to be strong. 3½ per cent. Government Papers gave way, and from Rs. 96-14 gradually dropped down to Rs. 95-15, but was steadier again, and after minor fluctuations closed at Rs. 96-4. A slight improvement in 3 per cent. Loan 1951/54 was recorded, which closed at Rs. 102 as against Rs. 101-2 of last week. 3½ per cent. Loan 1947/50 was marked at Rs. 105-4, 4 per cent. 1960/70 at Rs. 110-8 and 5 per cent. 1945/55 at Rs. 119-5.

Debentures.—A strong demand for Debentures of Public bodies continued without any appreciable number of transactions taking place for lack of sellers. Of Calcutta Port Trusts, 4 per cent. 1914/74 changed hands at Rs. 104-10, 5 per cent. 1956-86 at Rs. 116-4 (small lot), and 3¾ per cent. 1935/36 at Rs. 102. The only transaction reported in Calcutta Municipals was a small lot of 4 per cent. 1916/46 at Rs. 104-12. Among Industrials and others, 7 per cent. Hukumchand Jute 1932-42 fetched Rs. 113, 6 per cent. Bengal Clubs 3rd Mortgage were at Rs. 103, 7 per cent. Aldih Coal 1906/45 at Rs. 102 and 4 per cent. Mymensingh-Bhairab Bazar Railways at Rs. 103-4.

Preference Shares.—There was no change in the position, and buyers in many cases were unable to obtain their requirements for scarcity of sellers. In Jute Preferences Albions closed at Rs. 149-8, Alliances at Rs. 126, Hukumchands at Rs. 113 and Unions at Rs. 148-8. Belvederes and Caledonians were both crossed at rather higher rates of Rs. 153 and Rs. 155 respectively. Among others, Bengal Telephones changed hands at Rs. 14-8, I. G. N.'s at Rs. 131, Indian Standard Wagons at Rs. 126 and Tata Iron and Steel 2nd Preferences were crossed at Rs. 167. Although there were buyers of B. I. Corporation Preferences at last week's rates, no sellers were available.

Other Investment stocks.—Bank shares were less active, the only exception being Central Banks, which firmed up to Rs. 38. Imperial Bank Fully Paids sagged in the middle of the week to Rs. 1,580, but later on higher prices were obtained, and they closed at Rs. 1,588; Contributories likewise were fluctuating between Rs. 388 and Rs. 390. Reserve Banks, which were quoted at Rs. 134 on Monday, gradually receded, and at the time of writing they were quoted at Rs. 130-4, with no sign of immediate improvement. Several transactions were reported in Railway shares, which included Arrah-Sasarams closing a bit easier at Rs. 68 after attaining Rs. 71 on Wednesday, Bukhtiarpur-Bihars closing at Rs. 63 as against Rs. 64 of last week, Darjeeling-Himalayans changing hands at Rs. 63-8, Hoshiarpur-Doabs after fluctuating between Rs. 93-8 and Rs. 95, closed at Rs. 94-8 and Shahdara-Delhi-Saharanpurs at Rs. 134. In shipping issues, I. G. N.'s continued fluctuating between Rs. 100 and Rs. 101, and we can still recommend purchase of these shares at the current rates. Bengal-Assam Steamships closed at Rs. 223-8 and Calcutta Landing and Shipping fetched Rs. 14-6.

Cottons.—There has been pronounced weakness in this section apparently on account of fears of reduction of duties in textile imports from the United Kingdom due to Imperial Preference. New Victorias after fluctuating between Re. 1-4 and Re. 1-7, closed at Re. 1-6. Dunbars were dealt in at Rs. 113, Kesorams were easy at Rs. 3-1 and a parcel of Bengal-Nagpurs came to business at Rs. 14-8 on Monday, but later on were on offer four annas below this figure, without anything doing.

Coals.—After a dull beginning, during the closing days of the session, there were more enquiries for selected issues and prices showed an inclination to improve. Bokaro and Ramgurs closed at Rs. 9-6 as against Rs. 8-12 of last week. Amalgamateds were maintaining their last week's figure of Rs. 21-2 and Burrakurs closed at Rs. 13-2 (s.l.). Bengals and Equitables were a shade easier than last week's closing figures, being at Rs. 275 and Rs. 37-4 respectively.

Jutes.—The easier feeling evidenced early in the week was somewhat checked at the close. Howrahs, which were fluctuating between Rs. 52-9 and Rs. 53-9, closed steady at Rs. 54 on Thursday. Kamarhattys went down to Rs. 527, but after fluctuating between Rs. 530 and Rs. 533, closed higher at Rs. 538. Not much change was noticeable in Clives and Nationals, the former closing at Rs. 26 and the latter at Rs. 27-6. Of higher priced denominations, they all shed a few points each during the week, and slight recovery in some cases was recorded at the close. Anglo-Indias closed at Rs. 423, Ballys at Rs. 198, Barnagores at Rs. 141 (ex. div.), Belvederes at Rs. 342 and Indias at Rs. 336.

Electricals.—Good support in this section continued. Bengal Telephones had buyers up to Rs. 19-8, Agra Electrics however shed a point when a small lot was sold which fetched Rs. 120. Jubbulpore Electrics improved to Rs. 12, and a small lot of U. P. Electrics was dealt in at Rs. 161. Cuttack Electrics continued to have a good support and firmed up to Rs. 8-8. Daccas were maintaining their last week's figure of Rs. 20, and Patnas were fluctuating between Rs. 19 and Rs. 19-4. Muttras were steady round about Rs. 11 and Upper Ganges Valleys improved to Rs. 11-8.

Engineerings.—This section ruled fairly steady over their last quotations. Bengal Irons changed hands at Rs. 4-1 and Indian Iron and Steels gradually strengthened up to Rs. 9-2, closing firm at Rs. 9-1. The outstanding feature of this section has again been Burn & Co. shares, which were as high as Rs. 295-8. Arthur Butlers were also in good demand and closed at Rs. 13-12.

Sugars.—No change in this section was noticed and the market continued uninteresting. Bulands were quoting Rs. 13-8, Champarans at Rs. 18-12, and *Murree Breweries at Rs. 191, at which price they are highly attractive.* New Savans at Rs. 10-10 and Rohtas at Rs. 13-8 were also among the other transactions.

Miscellaneous.—Paper shares again had a good market. Titaghur ordinaries closed at Rs. 25-8 and Deferreds at Rs. 10-10. India Paper Pulps, as was mentioned in these columns last week, had a further rise and closed at Rs. 186. They are still regarded as good to buy even at these prices, as there is a likelihood of their going up even over Rs. 200. Bengal Papers were dull, and no transaction could be completed even around Rs. 111-8. A further drop due to the depreciation in silver market, was recorded in Burma Corporation shares, which after fluctuating between Rs. 7-10 and Rs. 7-14 closed a little better at Rs. 8.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Friday evening.

Money.—Money was easy with interbank call quoting at ½ per cent.

Exchange.—The exchange market waas dull with banks selling T. T. at 1s. 6 1/8d. upto March 1936; and 1s. 6 3/32d. April/December 1936.

Securities.—The security market ruled firm throughout the week under review in spite of the silver crisis. 3½ Government Paper has been fluctuating around Rs. 96-8 and as in the previous weeks medium and short-dated securities are in keen demand. 1941 Loan was quoting at Rs. 103-11; 1951-54 at Rs. 101-14; 1947-50 at Rs. 105-12; 1943 at Rs. 108-12; 1960-70 at Rs. 110-12; 1955-60 at Rs. 116; 1939-44 at Rs. 109-6; 1940-43 at Rs. 110-14; 1938-40 at 108-12 and 1945-55 at Rs. 119-6.

Shares.—The share section witnessed this week a narrow market with tendency towards tower levels.

Textiles.—The weakness in this section has been accentuated by the silver crisis in our local market as well as representation made to the Tariff Board by the Lancashire Delegation for lower duties on United Kingdom imports. Bombay Dyeing improved to Rs. 740 on short covering but later on closed easy at Rs. 727-8. Centuries had a further drop from Rs. 205 to Rs. 192-8 at the close. All popular scrips have lost a considerable number of points during the last two weeks. Central India was quoting at Rs. 250-10; Colba at Rs. 137-8; Gokak at Rs. 167-8; Kohinoor at Rs. 200-10 and Swadeshi at Rs. 152-8.

Hydro-electrics.—In spite of the strength in the securities this section ruled easy in sympathy with other sections of the share market. Tata Powers were down from Rs. 1,570 to Rs. 1,555; Andhra Valleys have lost 10 points at Rs. 1,645 and Tata Hydros were quite at Rs. 167-8.

Iron and Steel.—There is nothing of importance to note in this section except that the market is evincing signs of sagging slowly in the absence of new buyers. Tata Ordinaries gradually dropped from Rs. 148-12 to Rs. 146-4. Tata Deferreds wers down from Rs. 585 to Rs. 572-8. Tata Second Preferences were done upto Rs. 165-8 and closed at Rs. 163-4.

Cements.—Compared with other sections of the market this is the only section that has remained firm throughout the week. Bundis were done upto Rs. 36-8 and closed steady at Rs. 36-2. Katni Deferreds were remarkably steady at Rs. 2,190 and Ordinaries were neglected. Okhas were in good enquiry around Rs. 253-12 and Punjab Ordinaries were done upto Rs. 25-14 and closed at Rs. 25-8. Gwaliors were steady at Rs. 125; Shahabads at Rs. 470; and Indians were lower at Rs. 455-10. We continue to favour investment purchases of Bundis, Okhas and Katni Deferreds.

THE JUPITER GENERAL INSURANCE CO., LTD.

NOTICE

NOTICE is hereby given that the 17th Ordinary General Meeting of the shareholders of the above Company will be held at the Registered Office, Ewart House, Tamarind Lane, Fort, Bombay, on Monday, the 23rd December, 1935, at 4-30 p.m. (S.T.), for the transaction of the following business:—

The Share Transfer Books of the Company will be closed from 10th December, 1935 to 19th December, 1935, both days inclusive.

OCTAVIUS STEEL & CO., LTD.,
Managing Agents.

Calcutta, 5th December, 1935.

PIRIM INDIA LIMITED

NOTICE is hereby given that the Second Ordinary General Meeting of the Shareholders will be held at the Registered Office of the Company, No. 57, Ripon Street, Calcutta, at 10 a.m. on Saturday, the 21st December, 1935, to receive the Directors' Report and the Audited Accounts for the period 29th March, 1934, to 31st March, 1935, and to transact any other business that may be properly transacted at an Ordinary General Meeting.

The Transfer Register will be closed from the 14th to 21st December, 1935, both days inclusive.

By order of the Board,
B. N. DUTT,
Manager.

Calcutta, 28th November, 1935.

Miscellaneous.—Bombay-Burmahs were marked lower at Rs. 394-6. Belapurs were round about Rs. 164-6. Bombay Steamers were neglected at Rs. 282-8. Bombay Trams were marking time at Rs. 149-12 whilst Bombay Telephones were comparatively steady at Rs. 109-4. Burmah Petrols were lower at Rs. 3-13-6. Scindias were down by about 15 annas at Rs. 14-15 and Tata Premier Constructions were steady at Rs. 73-12.

Banks and Insurance.—This section remained steady throughout the week. Imperial fully paids were quoted at Rs. 1,580 and partly paids at Rs. 386-4. Reserve Banks were slightly lower at Rs. 131. Bank of Indias closed at Rs. 126 ; Bank of Barodas at Rs. 104-8 ; Central Banks at Rs. 37-8.

MADRAS STOCK EXCHANGE

(*By Wire*)

(From Our Correspondent)

Thursday Evening.

Continued strong London advices were responsible for the firmness in giltedged which were even unaffected by the sharp decline in silver prices yesterday. 3½ per cent. Paper was quoting at Rs. 96-12. 3 per cent. 1951/54 was higher at Rs. 100-13-6 ; 3½ per cent. 1947/50 at Rs. 105-14 ; 4 per cent. 1960/70 at Rs. 110-13 ; 5 per cent. 1939-44 at Rs. 109-9 ; and 5½ per cent. 1938/40 at Rs. 108-12. Mysore Loans also were slightly higher, 4 per cent. 1953/63 being quoted at Rs. 109-8 and 5½ per cent. 1938 at Rs. 108-13.

Banks.—Reserve Banks showed a downward tendency and the price at the close was Rs. 131. Imperial Bank fully paids were unchanged at Rs. 1,580 and Contributories at Rs. 380. Indian Banks were at Rs. 26-4 and Rs. 127.

Public Utilities.—No important changes were noticeable. Madras Telephones were unchanged at Rs. 20. Vellore Electrics were higher at Rs. 15-4 ; Trichy-Srirangam new shares were done at Rs. 17-8 and South Arcot Electrics at Rs. 99.

Textiles.—After earlier strength prices were inclined to sag. Buckingham and Carnatics were slightly easier at Rs. 214. Sitarams were unchanged at Rs. 53. Kaleeswarars were a shade easier at Rs. 295.

Sugars.—This section continued firm. Deccan Sugars were higher at Rs. 92½ though the close was lower at Rs. 92. Mysore Sugars Ordinaries were quoted at Rs. 26-10 ex-div., and debentures were at Rs. 87. East India Distilleries were quoted at 24s.

LONDON STOCK EXCHANGE

Markets have been idle during the week and are apparently awaiting the development of peace talks now in progress. Giltedged were steady. Indian Loans were inclined to sag but they closed steady.

Among other sections, Teas and Rubbers were unchanged. Some advances were recorded in Oils early in the week, Burmahs and Shell Transports being quoted at 81s. 10½d. and 81s. 3d. respectively. But towards the close Shell Transports and Mexican Eagles were lower being quoted at 80s. 7½d. and 5s. and 9d. respectively. In Home Rais also L. M. S. Ordinaries and Southern deferreds went to lower levels. Silver Minings like Rio Tintos were quoted lower on account of the fall in the price of silver. Other minings like Kaffirs were steady. Industrials were featureless and inactive.

NEW YORK STOCK EXCHANGE

The silver situation continues and it is causing unsettlement in the market.

Western Union Telegraph $71¼ ; New York Central Railroad $27¾ ; Union Pacific Railroad $108 ; Bethlehem Steel $46½ ; International Nickel $43¼ ; Anaconda Copper $27 ; General Motors $54½ ; Socony $14 ; Chase Bank $41 and National City Bank $39.

IMPERIAL BANK INDIA

NOTICE

NOTICE is hereby given that the Principal Register and the Branch Registers of the Imperial Bank of India will be closed for transfer of shares from Thursday, the 2nd January, 1936 to Thursday, the 16th January, 1936, both days inclusive.

W. LAMOND,
Managing Director.

Calcutta, 27th November, 1935.

BURMA CORPORATION LIMITED (AND REDUCED).

Notice to Members

THE REDUCTION OF THE CAPITAL of the Company authorised by the Resolution which was passed and confirmed at Meetings of the Members of the Company held respectively on the 2nd and 17th May, 1935, has now been sanctioned by an Order of The High Court of Judicature at Rangoon.

The Transfer Books of the Company in London and Rangoon will therefore be closed from the 8th January, 1936 to the 21st January, 1936 inclusive, for the purpose of preparation of Lists of Members entitled to the One Rupee per Share return of Capital and cheques will be made out to those Members who are registered at the close of business on the 7th January, 1936.

On the reopening of the Books on the 22nd January, 1936, only Transfers of Shares of the nominal value of Rs. 9 will be accepted for registration.

The return of Capital will be payable in Indian currency, and cheques will be posted to Shareholders on or about the 21st January, 1936.

Instructions already received from Members for the payment of dividends to their Bankers or other Agents cannot be taken as applying to Capital repayment ; consequently the Circular enclosing the cheque and containing instructions as to forwarding of Certificates to the London and/or Rangoon Office of the Company for enfacement with a memorandum as to the return of Capital will be sent to the registered addresses of those Members entitled to the return of Capital.

By Order of the Board,
HENRY PONSFORD,
Secretary.

104, Strand Road,
Rangoon, 4th December, 1935.

RESERVE BANK OF INDIA

NOTICE.

Notice is hereby given that the Share Registers of the Bank shall be closed and the registration of transfers shall be suspended from Thursday, the 2nd January 1936 to Saturday, the 18th January 1936 (both days inclusive).

By Order of the Central
Board of the Reserve Bank
of India.
K. G. AMBEGAONKAR,
Secretary.

Calcutta, the 12th December, 1935.

DISTURBED CONDITIONS ABROAD STILL AFFECT BUSINESS

THE ANNOUNCEMENT OF A £300,000,000 CONVERSION SCHEME

By R. Gordon Cummings

By Air Mail

Special for **"INDIAN FINANCE"**

London, December 2nd, 1935.

The new Stock Exchange account which opened to-day brought little alleviation from the quiet conditions prevailing throughout the whole of the period since I last wrote. Foreign political affairs and the uncertainties regarding the future of the French franc have been factors which even the most optimistic market operators could not ignore.

Business, as a result, has been on a small scale with prices in most markets tending to sag. There has, however, been little in the way of heavy, or even forced selling.

Gilt-edged stocks are somewhat above the worst, but are still lower than a week ago, 2½ *per cent. Consols* being 84½, 3½ *per cent. War Loan* 105¼, 3½ *per cent. Conversion* 106¾, and *Local Loans* 95⅜. One of the supporting factors in this market has been the decision of the British Treasury to redeem the entire outstanding balance of 3 per cent. Treasury bonds, amounting to £44,000,000. Repercussions arising from the new Government loans, discussed below, cannot be judged until the market opens—after these notes have been mailed.

Municipal stocks and certain Colonial and Indian loans have followed the trend of British Government stocks. On the election of a Labour Government, *New Zealand* issues fell sharply, but are now much steadier in tone. *India* 2½ per cent. closes at 74, the 3 per cent. at 96½, the 3½ per cent. at 97½, and the new 3 per cent. at ½ premium.

Arising out of the revolution *Brazilian* loans have been marked down and still look uncertain. *Japanese* stocks have also fallen.

At one time Home Railway issues firmed up on the hope that the decision on the Southern Company's rating appeal would be known before the weekend. The Lords having decided to defer their decision the market went easier. *London Midland and Scottish* are 17½, *Southern* deferred 21, and *London and North Eastern* second preference 20. Business in Foreign Rails has fallen to negligible proportions.

The outstanding feature in the Industrial section has again been *Crompton Parkinson* 5s. shares, which have risen to 116s. Other electrical manufacturing shares have kept very firm, *Associated Electrical* being 41s., *Electric Construction* 31s. 6d., and *General Electric* 71s. 6d.

Business in the Iron and Steel market has been dull, little movement being shown in prices. *John Brown* are 19s. 3d., *Dorman Long* 21s. 6d., *Staveley Iron* 46s. 6d., *Stewarts and Lloyds* 34s., *Richard Thomas* 11s. 6d., *United Steel* 32s., and *Vickers* 18s.

Miscellaneous industrials are little changed, the brightest features being *Amalgamated Metal* at 27s. 3d., *Radiation* at 75s., *Sudan Plantations* at 34s., and *Turner and Newall* at 63s. Building, Brewery and Tobacco shares keep reasonably firm.

Textile shares have hardened slightly, *Patons and Baldwins* being outstanding at 61s. Despite the good monthly output figures, Rayon issues have suffered from profit-taking, *Courtaulds* having eased to 55s. 6d., and *British Celanese* second preference to 22s. 9d. There has been some selective buying of stores shares on the view that Christmas business will break all records. *Harrods* are firm at 84s.

Until to-day Oil shares had been firm, but on lack of support, most of the leaders have fallen, despite continuing satisfaction with the *Anglo-Iranian* interim dividend statement. The brightest features have been provided by *Attocks* at 26s. 6d., and *British Borneo* at 13s. 9d. *British Controlled* preference keep firm at 7s. 9d.

Turnover in the Mining markets has been small, operators confining their attention to only a few of the speculative leaders, such as *East Rand*. The West African section, apart from *Bibiani*, which have jumped to 22s. 6d., has been dull. Australian mining shares have followed a similar trend.

On expectations that the new capital scheme will soon be published De Beers have been bought. Rhodesian copper shares keep steady around last week's levels, while Tin issues are firm.

Although interest continues small, leading Rubber shares are slightly better. Teas are still suffering from lack of interest.

Big Government Loan.

The announcement this evening of a £300,000,000 Government Conversion scheme will arouse considerable interest and speculation in City and other financial circles. Two stocks are to be issued, the first being purely a money-market loan in the form of £100,000,000 1 per cent. Treasury Bonds, having redemption dates of 1939 to 1941, while the second will comprise £200,000,000 2½ per cent. Funding stock, redeemable 1956-61. The Treasury Bonds will be issued at 98, and the Funding loan at 96½.

At the present stage it is rather difficult to clearly follow the full implications of this Treasury move. The prospectuses for the two issues state, however, that the proceeds of the loans will be utilised to repay the outstanding balance of £44,000,000 3 per cent. Treasury bonds, notice of redemption on which has already been given, to repay the £150,000,000 2 per cent. 1935-38 Treasury bonds, and to retire approximately £98,000,000 of the floating debt.

Repayment of the two existing Treasury bond issues is quite easy to follow, but the decision to reduce the floating debt is not so easy of comprehension.

Two alternatives are clearly open. Either the Treasury fears that money rates will tend to harden and it wishes to take advantage of existing rates, or it intends to cover up expenditure on armaments by meeting the cost, through a future piece-meal increase in Treasury Bills, and not to publicly announce its intentions by floating a specific loan, which, in many quarters, would meet with strong disapproval.

Other New Issues.

Having returned the National Government to power, the City felt certain that expansion in the new capital issue market would be rapid. Many issues have been made during the last fortnight, but the results of some of the more recent of these have failed to come up to expectations.

Two Municipal loans have been floated, but although these were heavily over-subscribed—in one case more than fourteen times the scrips are now quoted at small discounts, the general trend in the gilt-edged market having been an upsetting influence. Many other loans are ready for issue, but will probably not make their appearance until conditions are more propitious.

A £2,000,000 3¼ per cent. debenture issue on behalf of *Edmundson's Electricity Corporation*, offered at 98½, was also over subscribed. Between the date of the offer and the commencement of dealings the market had, however, turned, and dealings commenced at a discount.

Success has been more clearly evident in industrial issues, although under-writers were left with 60 per cent. in one case and over 40 per cent. in another case. On the whole, results have been encouraging. A steadying up in the flow may now be looked for, at least until the International situation is easier.

I understand, incidentally that the Committee of the London Stock Exhange may shortly issue a statement on the much discussed question of "Introductions," about which I had a lot to say last week.

Record Rayon and Retail Trade Figures.

Latest statistics show that rayon production in Great Britain during the month of October broke all previous records at 12,520,000 lbs. The previous record output was 11,100,000 lbs. in May of this year.

The October figures compare with 9,000,000 lbs. in the same month of 1934, and 9,740,000 lbs. in September, 1935. For the ten months to-date production has risen by 25,510,000 lbs., to 102,010,000 lbs., which compares with a total of 93,100,000 lbs. for the whole of 1934.

Expansion in retail sales continued during the month of October, the latest figures published by the Bank of England giving the total sales as being 7.4 per cent. greater than in October, 1934.

For the nine months from February 1st to October 31st turnover has risen by 5.6 per cent.

With Christmas rapidly approaching interest in the shares of the leading store companies can be looked for. The majority of the companies engaged in this business close their books on January 31st. Figures for the current year will, in most cases, make a good showing, particularly as it is generally expected that turnover this Christmas will beat many records.

Dorman Long Profit Figures.

About a year ago *Dorman Long & Co.*, the big iron and steel manufacturers, carried through a very drastic capital reconstruction scheme whereby the ordinary capital was cut to only one-tenth of its previous amount. Loan creditors were also affected, while preference shareholders suffered under the scheme. Even after the cut in capital the position looked far from impressive, especially from the liquid point of view.

For some time it has been evident that the company was rapidly recovering part of its former prosperity. The report for the twelve months to September 30th last is well up to the most optimistic expectations, profits of £788,605 going against a comparable figure of £420,510 in the previous year. After crediting sundry revenue and providing for all expenses the balance of profit available is £825,173, from which is deducted £178,091 for debenture interest, £50,573 for interest on bank debts, and £205,731 for depreciation.

As already announced the full dividend, requiring £185,768, is to be paid on the 6½ per cent. non-cumulative preference shares, leaving an available balance of £205,010. This is dealt with by transferring £200,000 to general reserve and carrying forward £5,010.

The directors are guarded in their statements on the outlook. It is obvious, however, that orders in hand at the present time are such that a still bigger increase in profits can be expected during the current year.

While on the subject of iron and steel, I must mention that the offer for the purchase of part of the assets of *Ebbw Vale Steel, Iron & Coal Company* has now been made by *Richard Thomas & Co.*, which concern offers £1,025,000 in cash, providing the terms are accepted by December 9th.

United Molasses' Improvement.

I have recommended purchases of *United Molasses* 6s. 8d. ordinary shares on several occasions, on the theory that this company would make steady progress. My forecast has turned out to be correct, the preliminary statement for the twelve months to September 30th disclosing that consolidated profits have risen by £66,700 to £718,200.

The directors are pursuing their usual conservative policy, having increased the allowance for depreciation from £283,806 to £297,608. Moreover, they have provided over £160,000 for interest on and redemption of funded income stock, placed £80,000 to reserve and practically maintained the carry forward. Although the ordinary dividend is to be increased by only 2 per cent. to 8 per cent., I shall be very disappointed if the full report does not disclose that this distribution was covered more than twice by actual available profits.

The shares have eased to 19s. 3d. At this price they are an attractive speculation.

United Molasses some years ago came to an arrangement with the *Distillers' Company*, whereby certain sssets were exchanged for shares.

Distillers £1 ordinary units have recently been a firmer market, the present price of 97s. 6d. comparing with little more than 90s. some weeks ago. I understand that an important group has taken over a block of **£140,000 ordinary stock,** representing the balance of the late Lord Woolavington's estate. Now that this overhanging cloud has been removed I can safely predict a rise to over the £5 mark.

Interesting Shipping Developments.

The winding up and realisation of the assets comprised in the *Royal Mail Steam Ship Company* group looked at one time to be an almost insuperable task. After many months the position was sorted out and two companies—the *R. M. Realisation* and the *E. D. Realisation* were formed to deal with most of the marketable assets. These two companies, which were only incorporated at the end of February last, issued their stock to certain debenture holders of the R. M. S. P. and the Elder Dempster Companies.

Assets taken over by the Realisation concerns are being steadily sold, the latest transaction covering a controlling interest in MacAndrews & Co.

Arising from these various sales both companies are now in a position to redeem large portions of their 4 per cent. debenture stocks. The R. M. Company is repaying 50 per cent. of the outstanding amount and the E. D. Company 70 per cent., at premiums of 2 per cent. and 3 per cent. respectively. The total cash involved is £1,253,000.

Many months ago I drew attention to the possibilities attaching to a purchase of the debenture stocks exchanged for shares and debentures in the Realisation companies, and on later dates to the merits of the Realisation companies' shares.

R. M. Realisation £1 ordinary have since steadily risen to 37s., and *E. D. Realisation* £1 ordinary to 35s. 6d. They might both be held for 40s.

Industrial News in Brief.

The long awaited capital reconstruction scheme of *Crittall Manufacturing Company* is now to hand. The total amount to be written off assets is £897,534, which will be provided by cutting the ordinary capital from £1,000,000 to £250,000 and appropriating £147,534 from general reserve and profit and loss account.

Providing the scheme is agreed to dividend arrears on the preference shares will be paid to-date and nothing will be written off their capital. The ordinary suffer the whole of the loss, being reduced from 20s. to 5s.

If the scheme is carried arrangements have been made to ease the financial position by various issues of new capital.

The report of *Tobacco Securities Trust* for the twelve months to October 31st reflects the losses incurred on shellac. Net revenue has declined from £758,409 in 1933/34 to £527,103. Dividend on the ordinary capital is to be reduced from 19 per cent. to 15 per cent., while nothing, compared with approximately 18¾ per cent., is to be distributed on the deferred stock and shares.

Despite the sharp decline to 72s. 6d. in the £1 deferred units and to 80s. in the £1 ordinary units, they should not be parted with.

Turner & Newall, the big asbestos, etc., manufacturers, has made rapid progress in recent years. Preliminary figures for 1934/35 again show an increase in profits, of £66,000 to £780,625. The dividend of 12½ per cent. (10 per cent.) is easily covered by earnings.

The dividend announcement of *Tate & Lyle*, the sugar manufacturers, has already been dealt with. Net profits for the past financial year are now announced as being £1,264,793, compared with £1,130,868 in 1933/34, and £683,361 in 1932/33. I would sooner sell than buy the ordinary at 83s. 9d.

Reynolds Brothers, the South African sugar growers and refiners, is increasing the ordinary dividend from 3 per cent. to 3½ per cent. This partly explains the recent rise in the ordinary shares to around 30s.

Food and Motors.

The *Aerated Bread Company* operates a large number of restaurants and shops in London. Competition in this particular line of business is now intensive. The directors are therefore to be congratulated on the results for the twelve months to September 28th. Although the depreciation allowance is increased by £4,500, net profits are slightly up at £112,000. The dividend is maintained at 5 per cent.

On the other hand *Foster Clark*, manufacturers of food specialities, enjoyed much greater prosperity, trading profits of £96,380 being £12,700 higher than during the year to September 30th, 1934. A dividend of 20 per cent. is again paid on the 10s. ordinary shares, which look a good investment at 40s.

Net profits of *Associated Equipment Company*, commercial vehicle manufacturers, for the twelve months to September 30th were £129,198—an increase of £27,191. The dividend on the ordinary stock is again 8-1/16th per cent.

The *British Tyre & Rubber Company* is another concern which has made rapid progress in recent years. The latest results reveal a further rise in profits, to £132,106. In addition to the maintenance of the ordinary dividend at 8 per cent., fortunate shareholders are this time to receive a bonus of 1½ per cent. They will also be given the right to acquire additional ordinary shares at 36s. each, compared with the present price of 41s. 6d. The shares are worth buying.

Pleasant Oil Dividend Surprise.

Both the *Shell Transport* and *Royal Dutch Oil* companies having decided to defer consideration of interim dividends, the market was pleasantly surprised by the decision of the *Anglo-Iranian Oil* directors to resume interim dividends after a lapse of four years with a distribution of 5 per cent. actual. For the whole of 1934 the dividend was 12½ per cent., so that a higher total payment can be looked for in respect of the current trading period.

After rising to 70s. the £1 ordinary units have fallen to the attractive level of 68s. ex. dividend.

Burmah Oil £1 ordinary units have been well supported, it being pointed out that as this company holds a big block of Anglo-Iranian stock the accounts for the current year will include not only the higher dividend on this investment for 1934, but also the present interim distribution. I calculate that this will mean an addition of £270,000 to Burmah profits, or the equivalent of 3 per cent. on the ordinary capital.

Once again I cannot help but advise purchases of *Burmah Oil* ordinary at 82s. 6d. As a sheer speculation I am told that Attock Oil will rise to over £2, compared with the existing price of 26s. 6d.

Market Pointers.

The directors of *London Midland & Scottish Railway* have decided to pay a final dividend of 2½ per cent. on the 5 per cent. redeemable preference stock. This decision accords with market expectations.

By a final payment of 11 per cent., the ordinary dividend of *Raleigh Cycle Holdings* is made up to 15 per cent., compared with 11 per cent. for the first trading period from February 13th to November 30th, 1934.

The *Metal Box Company*, which has large interests in India, is maintaining the interim ordinary dividend at 3½ per cent. Owing to the issue of further ordinary capital in June last the amount involved in this payment is increased by 10 per cent.

Montague Burton, the large retail clothing business, is increasing the interim ordinary dividend from 3 per cent. to 3½ per cent.

Final dividend on *Sussex Brick* 5s. deferred shares is 12 per cent., again making 18 per cent. for the year.

Profits of *Kamunting Tin Dredging* have risen from £105,651 to £172,237. Total dividend of 20 per cent. for the year was easily covered, making the shares an attractive proposition at 12s.

(*Continued from page 1831*)

ordinary capital. The full preferred dividend is, however, paid, and as this takes £152,000, the credit balance to carry forward is raised by £4,999 to £158,885.

I regret that as the report only came to hand when I was completing these notes it is impossible for me to give a detailed analysis of all the figures. I will do this next week.

Incidentally, one of the subsidiary companies of the P. & O., the *Orient Steam Navigation*, issued its report some days before that of the parent company. This discloses an operating profit of £342,223, compared with £315,958 for the twelve months to June 30th, 1934. The dividend on the ordinary capital is maintained at 5 per cent. This company's fleet operates between Great Britain and Australia.

WALL STREET IN AIR MAIL WEEK

SPASMODIC TRADING

MR. ECCLES STATEMENT

By Air Mail

Special for "INDIAN FINANCE"

Spasmodic trading has taken place in Wall Street during the week. Turnover has been on a large scale but prices have fluctuated violently. Conditions similar to those on Thurday last were witnessed once again on Friday the first day of the week under review. The market opened firm but there was a sudden wave of selling in the afternoon which left prices two points, and in a number of cases more, down on balance. Anxiety about the European situation and the future of the gold bloc caused the weakness. In the Saturday short session there was a strong rally and the previous day's fears were ignored. The statement of the Governor of the Federal Reserve Board, Mr. Marriner Eccles, denying the necessity of restrictive credit action and asserting that the present stock market advance was mainly attributable to cash purchases, brought in short covering and new buying. Rails were the feature of the day. Industrials were generally strong. But on Monday there was another attack of weakness and prices moved irregularly. The same tendency continued on Tuesday and prices were further marked down on profit-taking. Oil, Metal, Aviation and Sugar shares made a good resistance to the general trend. Yesterday being holiday on account of Thanks Giving day there was a quiet pre-holiday session on Wednesday and turnoever totalled 1,860,000 shares. The general trend was definitely higher, gains of fractions to over a point being the rule. Rails and Utilities were firm. Copper, Food and Chain Store shares all made a good showing.

On the Bond market, Treasury Bonds and other Government issues were weak owing to the imminence of the December financing announcement. Utility Power and Light obligations were strong.

The Treasury's December financing plans will be announced on Monday next. It is expected that three-five year Notes for about $418,000,000 will be offered for the December 15 maturity and the 2½ per cent. Bonds will be offered for cash.

Rails have been the feature of the week being stimulated by the excellent October earnings reports which have begun to appear. Particularly good advances were recorded by Atchison, Union Pacific, Southern Railway and Southern Pacific.

Chicago, Milwaukee, St. Paul and Pacific Railroad covered all its charges in October and according to the President, November gross is running 15 per cent. ahead of last year.

The operating income of Southern Pacific Railroad for October was $3,510,697 against $2,182,692 in the corresponding period last year.

The operating income of the Missouri Pacific Railroad was $976,270 in October against $544,097 in October 1934.

Utilities were again strong during the week. The National Securities and Exchange Commission stated that it will file no criminal proceedings against holding companies refusing to register under the Utility Holding Company Act, but added that those registering would not lose their constitutional rights.

At the same time the Commission issued a statement of its policy, saying that it will proceed promptly with the administration and enforcement of the Act, but in an orderly and economical manner.

The utility industry will not be harassed with a multiplicity of suits, but at the same time the National Securities and Exchange Commission will resist any possible effort to vex the Government with innumerable causes at law or to provoke litigation with the view of presenting the issue of constitutionality on the basis of inadequate record, or record not fairly typical of the situations covered by the Act.

If there be a general failure to register, the National Securities and Exchange Commission will move promptly with civil proceedings against one or more of the large companies, with a view to enforcing compliance and seeking a decision on the subject by the Supreme Court.

Following action by the Securities and Exchange Commission, the Electric Bond and Share Co., announces the dissolution of its interlocking relationships with its holding and operating companies. At the same time a new company, Ebasco Services Incorporated, has been created completely owned by Electric Bond and Share. The new company has taken over all service contracts with operating utility companies here and abroad. Hitherto Electric Bond and Share has rendered the services under these contracts.

The Company has declined to comment on this move, but has issued a statement that it hopes that a full and prompt decision on the validity and extent of the Utility Holding Company Act will result from the action of the S. E. C. in filing a complaint in the Federal Circuit Court concerning the company's refusal to register under the terms of the Act.

The revolt against the Act is spreading. On Wednesday, Stone and Webster, Engineers Public Service, and American Waterworks took legal action to prevent its enforcement.

Oil shares were among the few groups to resist the downward trend of the market. Now that the Californian situation has cleared up the position of the oil industry is generally considered sound. Belief in the trade prevails that if the new gasoline prices hold and crude production is brought into conformity with demand a further advance in the West Coast price structure will be made later in the year. Such an advance would restore prices to the level that prevailed prior to the drastic cuts of August 29, and would obviate voluntary writedowns at the end of the year.

The daily average production of crude oil in the United States in the week ended November 23, was 2,839,950 barrels, against 2,850,250 in the previous week, according to the figures of the American Petroleum Institute.

Gasoline stocks at refineries on November 23, totalled 25,294,000 barrels.

A small increase in the mid-Continent crude price is rumoured to be likely, as a reward to the small producers for their co-operation in curtailment of output.

The Texas Railroad Commission has postponed an increase in the East Texas allowable until after the hearings in December. It will then seek a date for an equitable basis for an increase. There are now 19,205 producing wells in the area.

Domestic Copper sales on Friday totalled 9,738,000 lbs. Ordering has been stimulated by large consumption and rumours of a rise in price. But the rumours that the domestic price will be advanced from 9¼ c. to 10 c. per lb. are regarded as premature. The November statistical report is expected to make a favourable showing but until there is a heavy new buying wave, producers do not intend to alter the price.

Steel mill activity is going merrily up and according to the *Iron Age* steel mill activity was at 56 per cent. of capacity for the week against 54.5 per cent. in the previous week. Steel prices are firm on the excellent volume of orders for 1936. Motor car manufacturers are placing heavy orders, assuring capacity operation of many sheet mills until the end of the year, while a crop of orders from railways and the sustained demand for structural steel are providing a sharply enlarged output for heavier steel.

Motor vehicle production in October totalled 214,610 passenger cars and 60,410 commercial vehicles against 57,280 and 32,520 in October 1934.

Automobile sales in October were 214,609 passenger cars and 60,412 commercial vehicles nearly double the figures for October 1934.

Business Pointers

Freight car loadings in the week ended November 16, totalled 628,300 cars, a decrease of 25,200 from the previous week but an increase of 43,800 over the corresponding week last year.

Power output in the week ended November 23, totalled 1,953,119,000 kilowatt hours an increase of 14.5 per cent. over the corresponding week last year.

November 29, 1935.

BOURSES IN AIR MAIL WEEK

Paris.

Rather quiet conditions were prevalent on the Bourse during the week under review. The uncertain political conditions had a disturbing effect on the market earlier in the week and Rentes and Banks were quoted lower. The raising of the bank rate to 6 per cent. gave strength to Rentes. Internationals were unchanged and Banks recovered to some extent. Chargeurs Reunis after being quoted as high as 195 was lower at 189.

On the Coulisse, diamond shares showed slight advances and prices in most cases hardened. Shares in the Gold Mining group were quoted lower, Rands and Sub-Nigels being at 632 and 1,021 respectively.

	Nov. 22	Nov. 25	Nov. 28
4½% Rentes, 1932 "A"	81.60	81.60	82.60
4½% Rentes 1932 "B"	80.60	80.45	81.50
Banque de France	8,790.00	8,650.00	8,890.00
Credit Foncier de France	2,995.00	2,995.00	3,070.00

Rand Mines	638.00	633.00	632.00
Sub-Nigel	1,046.00	1,022.00	1,021.00

Berlin.

After ruling strong early in the week markets closed generally lower. Reichsbanks were quoted as high as 181.50 but they closed lower at 178. Farbenindustries after being as high as 150 were lower at 149.40. Siemens were the only exception being quoted higher at the close at 167.0.

	Nov. 22	Nov. 25	Nov. 28
Reichsbank	181.50	181.00	178.00
Farbenindustrie	149.50	150.00	149.40

CAWNPORE TEXTILES, LIMITED

		Rs.	A.	P.
The Audited Accounts for the half year ended 30th September 1935, show a profit on Revenue Account of ...	Rs.	4,793	1	3
Deduct Debenture and other interest	,,	40,232	3	11
Leaving a balance at debit of ...	Rs.	35,439	2	8

to be carried forward to next account.

The Directors have considered it desirable to show the item of Interest separately so that Shareholders may be able to understand what a heavy charge this is on the Revenue of the Company.

The Managing Agents have agreed to forego Rs. 1,500 per mensem of their allowance for the past half-year due to the depression in the textile industry.

Managing Agents.—Messrs. Begg Sutherland & Co., Ld.

THE TITAGHUR PAPER MILLS COMPANY, LIMITED

The Audited Accounts for the half-year ended 30th September 1935, which, after allowing for Debenture and General Interest, Commissions and Taxation, show a profit of Rs. 7,25,780-8-11. There has been set aside for Depreciation the sum of Rs. 3,21,465-5-11, whilst Rs. 90,000 has been transferred to Debenture Redemption Fund, Rs. 36,534-10-7 to Reserve Account and Rs. 20,000 to Indian Workers' Pension Fund Account. The balance remaining at the credit of Profit and Loss Account, after giving effect to these transfers, amounts to Rs. 2,57,780-8-5.

The following is a statement showing how the above balance has been allotted to the respective Dividend Accounts :—

				Rs.	A.	P.
Balance available				2,57,780	8	5
Preference Dividend 8 per cent per annum ...	46,000	0	0			
Ordinary Dividend 10 per cent per annum ...	21,875	0	0	67,875	0	0
				1,89,905	8	5
Transfer Half Share of Surplus Profits to Ordinary Shareholders Dividend Account				94,952	12	3
Transfer Balance Half Share of Surplus Profits to Deferred Shareholders Dividend Account				94,952	12	2
				1,89,905	8	5
The division of the profits for the half-year ended 30th September, 1935, is therefore as follows :—						
Preference Shareholders Dividend Account				46,000	0	0
Ordinary Shareholders Dividend Account				1,16,827	12	3
Deferred Shareholders Dividend Account ...				94,952	12	2
				2,57,780	8	5

In accordance with the terms of issue of the Deferred Shares, there is no balance brought forward or carried forward in the main Profit and Loss Account. The balance due to each class of share is shown in the respective Shareholders Dividend Accounts in the Balance Sheet.

The Directors propose that the balance at the credit of the respective Dividend accounts be disposed of as follows :—

Preference Shareholders Dividend Account—

Amount allotted as above	46,000	0	0
In paying a dividend on the Preference Shares at the rate of 8 per cent per annum, free of Income-tax	46,000	0	0

(Continued from page 1830).

The loss on revenue account of the Cawnpore Textiles for the half-year ended September, 1935, is Rs. 35,439 against a profit on revenue account of Rs. 45,142. Nothing against Rs. 7,000 has been set aside for depreciation and nothing against Rs. 38,142 has been credited to the Mortgage Debenture Sinking Fund. The debit balance carried forward is Rs. 35,439.

* * *

The profit of the Titaghur Paper Mills Company for the half-year ended September, 1935, is Rs. 7,25,781 against Rs. 7,10,986 in the previous half-year. Rs. 3,21,465 against Rs. 3,58,789 has been set aside for depreciation while Rs. 90,000 against Rs. 1,00,000 to Debenture Redemption Fund, Rs. 36,533 against nothing to Reserve Account and Rs. 20,000 against Rs. 10,000 to Indian Workers Pension Fund Account have been transferred. The dividend declared is higher at 55 per cent. per annum against 50 per cent. per annum and the carry forward is Rs. 3,021 against Rs. 2,609.

* * *

The profit of the Belapur Company for the year ended September, 1935, is Rs. 11,87,203 against Rs. 11,65,211. Rs. 1,21,651 against Rs. 1,24,916 in 1934 is set aside for depreciation and Rs. 5 lakhs against 4 lakhs is transferred to Reserve Fund. But in 1934 there was a special depreciation by a lakh of rupees of the cane milling plant. The same dividend of Rs. 10 and bonus of Rs. 2 per share have been maintained. But this year Rs. 18,79,900 from the Reserve Fund has been capitalised and 37,598 shares of Rs. 50 each have been created. One bonus share is given away free for every ordinary share held. The carry forward is Rs. 1,572 against Rs. 7,196.

That the Company has been able to show higher profits even after the payment of an excise duty of Rs. 2,81,254 against Rs. 57,391 speaks well of the concern. When we last recommended the share in these columns, the share was quoted at Rs. 304½ and I think investors would have profited by the purchase because they have received a bouns share.

* * *

The profit on revenue account of the Gwalior Cement Company for the year ended August, 1935, is Rs. 5,62,071 against Rs. 3,89,151. The amount set aside for depreciation is Rs. 1,78,120 against Rs. 2,52,792 and the amount set aside for taxation is Rs. 40,000 against Rs. 50,000. A dividend of Rs. 5 against Rs. 6 per share has been declared and the carry forward is Rs. 18,767 against Rs. 46,042.

* * *

The revenue account of the Shahjahanpur Electric Supply Company for the year ended September, 1935, shows a loss of Rs. 8,470 against a profit of Rs. 6,839 in the previous year. The debit balance carried forward is Rs. 49,898 against Rs. 41,428.

* * *

The profit on revenue account of the Bengal Coal Company for the half-year ended October, 1935, is Rs. 3,09,252 against Rs. 2,59,811 in the previous half-year. Rs. 1,00,000 the same as previously has been set aside for depreciation and the dividend is higher at Rs. 6 against Rs. 5 per share. The carry forward is Rs. 95,440 against Rs. 89,732.

* * *

The profit on revenue account of the Murree Brewery Company is Rs. 1,90,680 against Rs. 1,78,609 for the year ended August, 1935. The amount set aside for depreciation is Rs. 1,00,265 against Rs. 89,617. The dividend declared is lower at 11 per cent. against 12 per cent. and the carry forward is Rs. 15,380 against Rs. 3,678.

* * *

The loss on revenue account of the Poriapur Coal Company for the half-year ended September, 1935, is Rs. 3,601 against a profit of Rs. 10,778 in the previous half-year. Rs. 18,000 as against the same previously has been set aside for depreciation. The debit balance carried forward is increased from Rs. 2,37,715 to Rs. 2,66,013.

* * *

The loss on revenue account of the Trans-Adjai Collieries for the half-year ended September, 1935, is Rs. 5,101 against Rs. 5,341. Rs. 10,500 against Rs. 9,709 has been set aside for depreciation and the debit balance carried forward from Rs. 1,96,349 to Rs. 2,15,227.

* * *

The profit on revenue account of the Humayan Properties Limited for the year ended March, 1935, is Rs. 2,04,669 against Rs. 1,82,712. Rs. 38,957 against Rs. 38,648 has been set aside for depreciation and the dividend declared is higher at 20 per cent. against 15 per cent. previously and the carry forward is Rs. 32,366 against Rs. 48,480.

* * *

The profit on revenue account of the Ghusick and Muslia Collieries for the half-year ended September, 1935, is Rs. 20,756 against Rs. 12,409. The amount set aside for depreciation is Rs. 54,000 as against the same previously and the debit balance carried forward is Rs. 1,80,898 against Rs. 2,14,568.

* * *

The profits of the Bengal Assam Steamship Company for the year ended October, 1935, are Rs. 5,62,842 against Rs. 6,41,105. The amount set aside for depreciation is Rs. 2,80,000 as against the same previously. The amount transferred to Reserve Fund is Rs. 25,000 against Rs. 50,000 and to Fleet Replacement Fund Rs. 25,000 against Rs. 64,688. The dividend is maintained at 10 per cent. and the carry forward is higher at Rs. 1,13,683 against Rs. 1,01,841.

THE NEW MANBHOOM COAL CO., LTD.

NOTICE

NOTICE is hereby given that the Half-Yearly Ordinary General Meeting of the Shareholders will be held at the Registered Office of the Company, No. 14, Old Court House Street, Calcutta, on Thursday, the 19th day of December, 1935, at 2-45 p.m., for the purpose of receiving and passing the Directors' Report and Audited Accounts for the half-year ended 30th September, 1935, declaring a dividend and transacting such other business as may be brought forward.

The Share Transfer Books of the Company will be closed from the 12th December to the 19th December, 1935, both days inclusive.

Calcutta, Friday Evening.

No change of any kind in the money or exchange market, except that business has been slenderer than ever in the last week—is the comment of a Clive Street friend on the trends and events of this week. Money is a drug; it will be more so as the days pass on. Over Rs. 11 crores is being paid before the end of this year in respect of Treasury Bills maturities; and all the banks will be able to close their annual accounts with large cash balances. The usual window-dressing will be conspicuous by its absence in the current year. It is also noteworthy that the authorities have been able to meet the large-scale commitments on Treasury Bills maturities during December without recourse to intermediate Treasury Bills. It is even more noteworthy that after the sale on December 17, the next auction day is to be only January 2. If the Treasury had been in a tight corner for funds, they might have invited applications for next Monday, with payment to be made on December 30. The fact that the Treasury has not revived intermediate Treasuries and that it is able to do without the auction due next week, shows the extremely comfortable ways and means position. But what is most remarkable of all is that so comfortable a ways and means position has been secured even without recourse to a temporary advance from the Reserve Bank. The return of the Reserve Bank for the Banking Department for the week ended December 13 shows Government deposits at Rs. 13.93 crores, a rise of over Rs. 5 crores as compared with the earlier week. On the one hand, the Government have been borrowing only Rs. 2 crores every week in the form of Treasury Bills; and they have taken no other kind of advances. On the other hand, the Treasury has met big commitments on account of Treasury Bills maturities and also made out the payments in respect of its sterling purchases at the rate of Rs. 1 1/3 crores a week. On the face of it, the outgo of this month has been far bigger than the income and yet the cash balance of the Government with the Reserve Bank shows no appreciable rise. How are we to account for this unexpectedly comfortable development?

It is quite likely that the increase in Government's cash balance is due to the payment of the last instalment on the India sterling loan raised in the Autumn. That this is possibly the correct explanation, is indicated by the rise in the Reserve Bank's foreign balance from Rs. 12.17 crores to Rs. 18.13 crores. It may also be that revenue collections in December have been bigger than current expenditure. Between these two factors, the Treasury has been able to tide over a difficult month in the smoothest manner. Now that there has been no revival of intermediate Treasury Bills in a month as difficult as December threatened to be, it is quite possible that the large maturities in the final quarter of the financial year will also be met by sole reliance on sales of Treasuries on the auction days. January and February and, to some extent, March are 'revenue' months; and there is every indication that the total of the floating debt will, by this means, be brought down somewhat near the figure contemplated in the budget estimates. If this factor were properly understood, there are reasons to think that the closing months of this busy season will be experiencing even easier money conditions than the opening months. That authoritative quarters are preparing themselves for such a phase of cheap money, is clearly indicated by the returns of the Imperial Bank. The Imperial Bank has been investing large sums in Treasury Bills week after week. Repayment on these Treasuries will be due only in March. The returns of the Bank for November 29 showed an increase of Rs. 1 crore under Investments; that on December 6 accounted for an addition of another crore; and the latest return, which is for the week ended December 13, discloses another of Rs. 1 crore. The cash balance of the Imperial Bank is now Rs. 15½ crores; and had the Bank authorities expected a busier busy season, they would not have allowed their cash balance to go down to this level in the earlier months of the season which is usually described as busy from the point of view of trade and stringent from the point of view of money.

These intrinsic forces in the money market situation are responsible for an amazing strength in the giltedge market at a time when the cataclysm in the silver market should have brought down giltedge values in a steep decline. Short-dated and medium-dated scrips continue as scarce as ever. 3½ per cent Rupee Paper has lost a few annas but has stood the ground in a most remarkable fashion. At the time of writing, 3½ per cent Paper is quoting Rs. 95-14. At one time, it receded to Rs. 95-8. While silver has tumbled down several points, it is a matter for congratulation that the giltege market has continued to maintain its full strength. This matter can be looked at in another way. Had not silver been playing these strange tricks, what would have been the tenour of prices of rupee securities? At the moment, it is difficult to say what will be the extent and nature of the havoc caused by the silver debacle. Only the next settlement day will reveal the full facts. Meantime, it is heartening to know that the Bombay operators have had no long commitments in the giltedge market; and that, in fact, the Western Capital is oversold. Had Bombay been in an overbought position, losses in silver might have necessitated sales of such giltedge holdings as belonged to operators involved in the silver collapse. It is, therefore, possible to hope that, barring any sinister developments in the international situation, security values are likely to resume an upward trend.

It is yet too early to say whether the Government have any intention of taking advantage of these favourable influences, for putting through ambitious conversion plans. The preliminary budget discussions will take place at the next meeting of the Viceroy's Executive Council to be held a fortnight hence in Calcutta. If the Finance Member could contemplate a reduction in interest charges as a result of conversion operations that can, in these fortunate circumstances, be put through, it should help him to make a better showing with his next budget.

The silver crisis, far from promising to resolve itself, has actually deepened during the week. Prices have taken a headlong plunge; and silver at the moment shows no silver lining. Unless it be that, during the last twenty-four hours, some heartening statement has been issued from Washington, the outlook may be said to be distinctly worse than at the end of last week. For, we had at that time, the statement of Mr. Henry Morgenthau in the international sphere and the action of the Bombay Bullion Exchange in the Indian sphere. The value of the former has considerably depreciated during the days that have elapsed and the latter has proved more or less completely ineffective. Mr. Morgenthau's statement, it must be said, was calculated to remove certain fears in regard to the future of silver. Firstly, he held out the assurance that his promise to the Silver Bloc regarding the faithful execution of the silver purchase policy stood. Secondly, he let the world know that America had been effecting daily purchase of silver what time the fall in prices suggested the contrary. And, thirdly, he pointed out that the Treasury had abandoned the policy of concentrating its purchases in London and had been buying from various centres. From all this it seemed that the American Treasury was up not so much against a high price for silver as against the London market. This view seems plausible in as much as, even in August, the Treasury had shown signs of its antipathy to the London Market. On the basis of this, it was expected that America would endeavour to maintain the price of silver and that no development would be allowed which is considerably at variance with the professed aims of the silver purchase policy.

THE CENTRAL BANK OF INDIA, LTD.,

COMPLETES ITS 24TH YEAR AND ENTERS ITS SILVER JUBILEE YEAR TO-DAY.

THE BANK THANKS ITS CLIENTS, WELL-WISHERS AND THE PUBLIC FOR THEIR HELP IN MAKING THE CENTRAL BANK OF INDIA, LTD., WHAT IT IS TO-DAY.

S. N. POCHKHANAWALA
MANAGING DIRECTOR

21ST DECEMBER, 1935

Now that the price of silver has fallen within a week from 26 7/16d. to 22 3/16d. in London, and from Rs. 58-8 to Rs. 55-8 in Bombay, with the New York market failing to quote any official rate for silver, it is difficult to believe that the Treasury's defections in regard to the silver policy have not strengthened even more than we had imagined. To us, who have professed from the beginning a strong scepticism of the practicality of the silver purchase programme, the developments are hardly in the nature of a surprise. And we could well belive that the American Treasury is detered by the progress, which China is making with her currency reform, from coninuing the silver policy, which we stigmatised, even at the time of successive increases in the official American price, as crack-brained. The latest London quotation is more than two pence below the level of a year ago ; and Mr. Henry Morgenthau would be drawing a big cheque on the credulity of the public if he were again to repeat his assurance of faithfulness to the silver programme.

The current of affairs in the international silver markets has clearly been too strong for the Bombay Bullion Exchange. The fluctuations in such quotations as are available are hardly of any value as they lack official authenticity, on the one hand, and are more or less purely nominal on the other. Suffice it to say that it has been found impossible to render the official minimum effective in the market. As low a rate as Rs. 52 had been quoted. And this level, it is significant, is almost the same as that which prevailed before the American Silver Purchase Act was passed. The Board of Directors of the Bombay Bullion Exchange, it is reported, held another meeting on Thursday to consider the proposal to reduce the minimum prices fixed last week for the first and second settlements at Rs. 58-8 and Rs. 58-11 respectively. The Board decided to take no action ; and the principal consideration was that long interest is in financially sound hands and that the losses, though great, are well-distributed. This will hardly suffice to reduce the prevalent uneasiness ; and there can be no doubt that there is worse for silver in store, unless the American Treasury steps in with the resolve that, if they cannot march forward with the silver purchase policy, they can at least stage a retreat in order.

NOTICE

Owing to the Christmas holidays, there will be no issue of "Indian Finance" next week.

Editor.

LLOYDS BANK
LIMITED
INCORPORATED IN ENGLAND
1677

SECURITY

The appreciation by the public of the financial strength and integrity of this Bank is shown by its growth from 13 offices in 1865 to its present position as one of the largest Banks in the world, with over 1,900 offices in England and Wales, 16 offices in India and Burma and agents and correspondents in every country.

Branches in the East:
CALCUTTA, 101-1, Clive Street and 37, Chowringhee, DARJEELING, RANGOON, 45, Phayre Street and 75, China Street, BOMBAY, KARACHI, LAHORE, AMRITSAR, DELHI, NEW DELHI, SIMLA, RAWALPINDI, MURREE, SRINAGAR, GULMARG.

The Exchange market has been altogether rotten. No business at all. On the weekly sterling tender day, applications for £27,800,000 at 1s. 6 1/8d. were received and allotted on the basis of 4 per cent.

The closing rates are: 1s. 6 7/64d., December-May T.T., with 1s. 6⅛d. available for January 15—April no buyers of T.T. at under 1s. 6 7/64d., before June.

Bills may be quoted: 1s. 6 3/16d., against confirmed letters of credit right through to December. 1/32d. higher was demanded in respect of other bills.

Money remained very easy, with lenders plentiful at ½ per cent. in Calcutta and ¼ per cent. in Bombay.

Firms' money for call, three days' notice, seven days' notice and onemonth, twomonths and threemonths deposits quoted ¾ per cent. Twelvemonths deposits quoted 2 per cent. to 2½ per cent.

*=not quoted.

Thursday Evening.

The franc has rapidly gained in strength during the week, having gone up in terms of sterling from 74.51 at the beginning of the week to 74.35 at the end. Except for a small rise in the middle of the week, the sterling-franc rate has followed a downward trend; and it seems fair to conclude that France has weathered the storm that threatened her for the last few weeks; and that M. Laval is gaining full possession of the reins of Government, duly empowered to execute the policies which he had formed for himself from the moment of his advent to office. The improvement in the political situation is naturally reflected in the position of the franc. Less and less is heard of the gold efflux from France; and, in fact, from the time the French political groups showed themselves inclined to compromise, the gold flow has definitely abated. The latest statement of the Bank of France is not to hand. But it is certain that the improvement has been well maintained. International financiers must now be convinced that the ultimate upshot of the political disturbances is that M. Laval is firmer in the saddle than ever.

The political implications of M. Laval's triumphs have been examined in these columns on former occasions. It should, therefore, suffice here to point out its significance to the franc. Those, who have followed the trend of events in France, are aware that it is the questions relating to the franc that, more or less, decided the course of action of the political parties. The resignation of M. Laval would mean that the new Ministry will, to some extent, have to reconsider the currency problem and may have to be led by the palpable untenability of the franc in the present conditions. The mandate for a change in the parity would, of course, not be forthcoming, while, at the same time, the practical programme would have to reckon with the almost certain contingency of recurrent crises of confidence. Almost every rival group felt that it must have a free hand if it was to take office and each was conscious that such a mandate would be impossible. It is this consciousness that inclined the political groups towards the preservation of the present position. So that, it may be said that the vote of confidence in M. Laval constituted in itself an injunction of the Chamber that the Government should continue its policy of maintaining the present parity of the franc. There is no reason to think that anyone of the French political groups will be able to overcome this reluctance to take office before the next general elections. For what deters them from taking a different course is the consciousness that devaluation would be necessary, that at the same time it is unpopular and that it would be dangerous for any party to seek popular suffrage after having exposed itself to the charge that it is responsible for, or sympathetic towards, devaluation. It follows, therefore, that the abandonment of the present parity will not come within the pale of practical politics till the new elections are over. Once a new Parliament has been returned, the practical sense of French politicians may enable them to constitute a ministry which would be allowed to carry out devaluation under conditions which will, to some extent, exonerate it, in the public eye, from the blame therefor. It is, therefore, clear that, given a certain degree of freedom from those major upsets in international finance of which recent years have been only too full, the franc is assured of stability till the general elections. This reasoning, which has its basis in well established facts and which is so simple that anyone will recognise its validity, has dispelled the doubts that still lingered in the minds of many regarding the course of the French currency. It must, however, be added that M. Laval, for aught one can see, may sustain a defeat on foreign affairs.

The weakness of sterling, which is noticeable in the decline of the sterling-franc rate, has not been fully reflected so far in the changes in the sterling-dollar rate. Though in the first half of the week under review sterling declined in terms of the dollar from 4.92 13/16 to 4.92¾, there has latterly been a fractional increase in the sterling-dollar rate to 4.92 15/16. It is not clear what special factors have been at work to prevent a decline in the sterling-dollar rate corresponding to the falling off in the sterling-franc rate. It is not improbable that the lack of dollars, which was apprehended last week owing to the upsets in the silver market, has not fully materialised. This fear was due to the fact that the reduction in the America's purchases of silver might make the dollar more scarce and therefore send up its value in terms of sterling. On the strength of Mr. Morgenthau's statement that America's purchases of silver have been well maintained during this somewhat stormy period, one is inclined to think that the decline in sterling in terms of the dollar has been checked.

TREASURY BILLS

Tenders for Rs. 2 crores of 3 months Treasury Bills were opened on Tuesday, December 17. The total amount offered was Rs. 3,67,25,000. Tenders at Rs. 99-12-0 per cent. and above were accepted in full and those at Rs. 99-11-9 per cent. allotted approximately 57 per cent. Lower tenders were rejected. The total amount accepted was Rs. 2 crores, the average rate of accepted tenders being rupee one and pies nine per cent. per annum.

Tenders for Rs. 2 crores of 3 months, Treasury Bills will be received on Thursday, January 2. Successful tenderers should make payment on Friday, January 3 or Satuday, January 4 at centres where January 3 is a holidy. Other conditions are as usual.

During the week ended December 13, bills for Rs. 2,40,50,000 were renewed in favour of the Issue Department of the Reserve Bank.

STERLING TENDERS

On Wednesday, December 18 tenders to the amount of £27,800,000 at 1s. 6⅛d. were received and were allotted approximately 4 per cent.

£1 million will be offered on Thursday, January 2. Successful tenderers will have to take delivery of the allotments on Friday, January 3 or on Saturday, January 4 at centres where January 3 is a holiday.

The total amount of sterling purchased by the Reserve Bank of India during the week ended December 13 was £1,000,000 at 1s. 6⅛d.

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of bussines-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours ?

You have only to let us know your requirement and leave the rest to us.

TRADE ON THE MEND ?

Apart from his optimistic reading of current economic signs, Lord Willingdon, in opening the annual session of the Associated Chambers of Commerce, said nothing which was either of special interest in regard to Government's policy and programme or calculated to give reassurance that the authorities are responsive to the demands and plaints of commercial interests. Most of the topics chosen by the Viceroy for elucidation in the course of his address were not of topical interest nor of compelling importance. His Excellency referred to the Indian Road Congress and admitted that the funds at present available were inadequate. But there was no indication as to whether the development of roads was being viewed by the Government as a suitable component of a public works programme, the urgency of which has been urged from every quarter. For the time being, the Government are content with providing the cost, for a period of two years, of the Indian Road Congress. As regards civil aviation, Lord Willingdon dwelt on the measures taken for a greatly increased intensity of the trans-India services. But he did not indicate what facilities the Government were prepared to give for the fostering of aviation within the country itself. He referred to the setback in the programme of the Indian National Airways ; and one would have thought that this afforded an opportunity for the Viceroy to explain Government's attitude towards internal air service. It would appear that the difficulties of the jute industry have not only exercised the minds of many in Calcutta, but also the minds of those in New Delhi. But Lord Willingdon was not prepared to make any observations on the subject as a deputation from the jute industry was due to wait on the Member for Industries and Labour. Clive Street has to be content with the assurance, delightfully vague but hardly hope-inspiring, that the Government are ready to consider any sound proposals that may be put forward for assisting the industry to reach a stronger and more stable position.

* * *

The sanctions against Italy formed the peg on which the Viceroy hung the coat of his views on trade pacts. After weighing the relative advantages and disadvantages of India's traditional foreign trade policy based on reciprocal most-favoured-nation treatment and the now popular method of bilateral negotiations, Lord Willingdon comes to the conclusion—and we think, rightly—that "situated as she is, a supplier for the main part of raw materials and foodstuffs to the great commodity markets of the world, and depending upon widespread world demand rather than on particular nations or on particular customers, India can ill afford to risk the closing of any door now open to her by virtue of her most-favoured-nation rights." And he was definitely of the view that the conclusion of individual trade bargainings can hardly be to India's benefit. Turning to general economic conditions, His Excellency expressed satisfaction to be able to point to some indications of a gradual movement toward economic recovery in the country. Amongst the grounds for this optimism are the arresting of the decline in the general level of commodity prices and the recent upward tendency ; a lesser disparity between the prices of agricultural and of manufactured goods ; the progress of industrial development being well maintained ; the noticeable improvement in the volume of export as well as import trade ; material reduction in the burden of interest charges which is a matter of such deep concern to both industry and agriculture ; the reduction of the borrowing rate of the Government to 3 per cent. for the first time since 1896 ; and the maintenance of the bank rate at so low a level as 3 per cent.

* * *

Instead of enthusing over the very slight increase in the index of wholesale prices during the last few months, the Viceroy would have done well to compare the course of prices in India with the course of prices in Great Britain. Both the countries abandoned gold standard at the same time. 1932 may be said to represent the first full year of depreciated currency. The index of whole-sale prices, as calculated by the *Economist*, for the United Kingdom was 86.1 per cent. in 1932. There has been an appreciation to 96.1 per cent. by September, 1935. What is the position in relation to India ? The Calcutta index of wholesale prices was 91 per cent. in 1932 and 89 per cent. in September, 1935. In other words, there has been a rise of 10 points in the United Kingdom and a drop of 2 points in India. The disparity between India and the United Kingdom is, thus, 12 points on a basis of about 90. The actual lagging of prices in India is, therefore, over 13 per cent. Have the authorities in India tried to find out the causes which have brought about a decline in prices in India during the period when there has been a substantial rise in prices in England ? If the authorities would only be frank with themselves, they would realise that England has derived greater benefits from her depreciated currency than India has been able to do. This is due to the fact that, even after such depreciation in the rupee as has taken place in relation to gold, the rupee stands over-valued as against sterling.

* * *

We shall not deny that there has been some improvement in selected industries. But many of the major industries are still faced with acute conditions of difficulty. Nor will it be true to say that the cotton textile industry has made any great advances. It is only a handful of cotton mills that are making good showing. The balance sheets of the majority of cotton mills continue to tell a sad tale. This point must be especially stressed as the appointment of the Special Tariff Board, which is now in session, has induced the impression that there is bound to be reduction in the protection afforded to the cotton textile industry. The Indian cotton mills are not yet out of the wood. To single out this industry as being notable for recording advances more markedly than at any time in the past, is a kind of importance which the cotton mills would rather not covet. Nor can we agree with the Viceroy that the developments as regards our foreign trade are such as to give us comfort. It is said that exports and imports of merchandise have increased and that this improvement has since continued unchecked. What are the true facts ? Exports of merchandise in 1933-34 were Rs. 83.64 crores in the seven months ended October ; Rs. 86.02 crores in 1934-35 during the corresponding period and Rs. 87.79 crores in 1935-36. The improvement is hardly Rs. 4 crores between 1933-34 and 1935-36. This betterment is more than offset by the larger increase in imports of merchandise which were Rs. 65.95 crores in the first seven months of 1933-34 ;

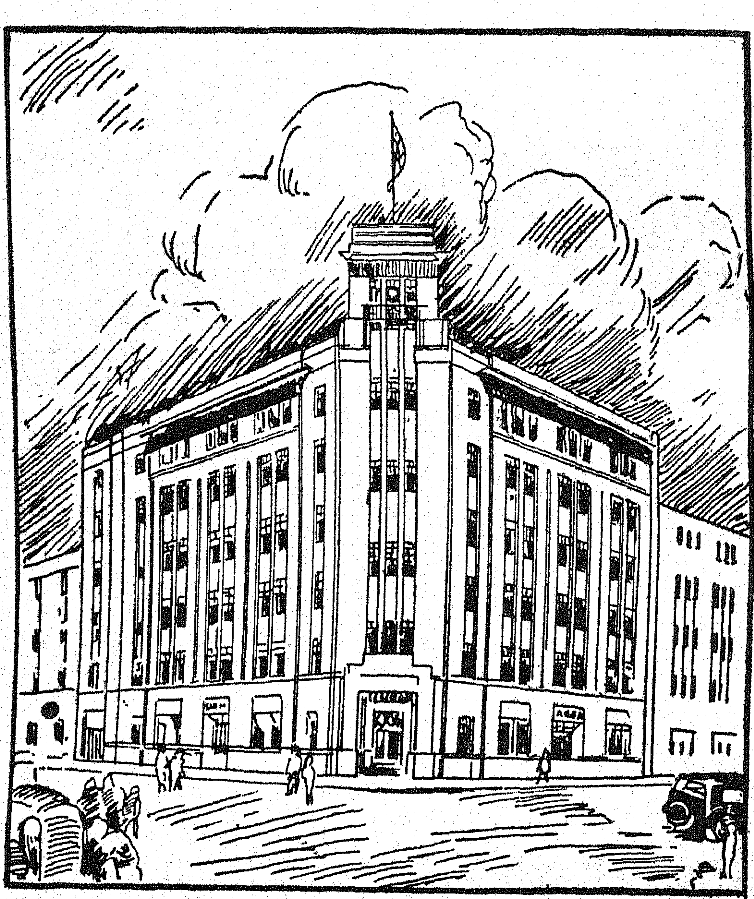
THE UNITED INDIA LIFE ASSURANCE Co., Ltd.

(Established in 1906.)

***Head Office*: MADRAS**

is probably the first business organization of South India to extend and expand its activities in other parts of India also – wherever there is scope.

The UNITED INDIA is also the first business organization of South India to acquire substantial and attractive property outside South India. The following is a picture of the Company's own building now under construction at Chittaranjan Avenue, Calcutta.



Proposed New Offices in Calcutta
for
THE UNITED INDIA LIFE ASSURANCE Co., Ltd.

BALLARDIE, THOMPSON & MATHEWS, F.E.A., A.R.I.B.A
Chartered Architects
7, Old Court House Street, Calcutta

The Company has secured before the commencement of the construction of the building, excellent tenants at attractive rents for surplus space left after location of the Company's Calcutta Offices. Among the tenants of the Company's building at Calcutta are Messrs. Siemens (India), Ltd., Messrs. Havero Trading Co., Ltd. and Messrs. Agfa Photo Co., etc.

The building has been designed and is supervised by the well-known Architects, Messrs. Ballardie, Thompson & Matthews who are already responsible for a number of noteworthy modern buildings in Calcutta including the buildings of the Calcutta Electric Supply Corporation, Limited, The Statesman, Messrs. Mackinnon Mackenzie & Co., The General Electric Co., etc.

The main general Contractors of the building are The Britannia Building & Iron Co., Ltd., Calcutta.

The building is expected to be ready by the 30th June, 1936.

Rs. 74.34 crores in 1934-35; Rs. 76.14 crores in 1935-36. The result of this slight increase in exports and the bigger increase in imports is that the balance of trade in merchandise had come down from Rs. 19.60 crores in 1933-34 to Rs. 13.34 crores in 1934-35 and Rs. 13.55 crores in 1935-36. The position in regard to the favourable balance of trade in merchandise was bad enough in 1933-34; it has become considerably worse since. But for the aid of gold shipments, India would not have been able to provide for her ordinary and extraordinary commitments. Gold exports accounted for a favourable balance of trade in 1933-34 of Rs. 31.14 crores; in 1934-35 Rs. 25.70 crores; in 1935-36 Rs. 23.97 crores. The total visible balance of trade has actually gone down year by year—from Rs. 50.74 crores in 1933-34 to Rs. 39.04 crores in 1934-35 and Rs. 37.52 crores in 1935-36. Far from seeing any cheerful omens in our foreign trade position, we believe that the Government are light-heartedly postponing the urgent task of reviewing the foreign trade factors so as to take such steps as would ensure for India a favourable balance in merchandise, adequate for the average obligations India has to discharge to foreign countries.

The fact that Government were able to borrow at 3 per cent. is a circumstance over which the Indian Government cannot appropriate credit. It is inspite of the Government that the borrowing rate has come down in India. Nor is the overdue reduction of the bank rate to 3 per cent. a factor for which the credit could go to the Government. At any rate, the poor demand for money which these factors indicate cannot be construed as evidence of the progress which has been made towards the general economic recovery. These are, in fact, the convincing index of the stagnation in trade.

* * *

Amongst the resolutions passed in the annual session, we shall be able, in this issue, to refer only to the more important. Mr. Alex Aikman moved the resolution urging the grant of a special rebate on coal for export out of India; and, in support, made a speech marked by elegance, replete with facts and developed with convincing force. In the pre-war period, India used to export 3 lakhs of tons of coal annually to the far East and 5 lakhs of tons to Ceylon. While the Indian Government enforced an embargo and weakened the position of Indian coal in the foreign markets, the South African Government made the fullest use of this golden chance. South African coal received subsidies in many forms. Mr. Aikman has proved conclusively that, but for this subsidy, Indian coal could yet regain the lost markets. Such a reduction will not affect the revenues of the railways as the quantity at present being shipped is very small. On the other hand, the increased traffic that would result will have a favourable effect on future budgets. Sir John Abercrombie asked for a revision of the customs tariffs and suggested that the first move should lie in the direction of lowering duties on goods which are not produced, or cannot be economically produced, in India; and that, secondly, the importation should be encouraged of goods which do compete with locally manufactured goods provided (a) that fair treatment is accorded to existing local industries and (b) that reciprocal consideration is received from the selling markets and India's balance of trade is favourably affected thereby. To these two principles which Sir John enunciated, we can take no exception. The real emphasis is that the changes in tariffs should not result in a worsening of the foreign trade balance position, and that the prime consideration is Indian industries. We should like to see these principles enforced in Indo-British trade too.

* * *

The resolution sponsored by Mr. J. G. Ryan refers to the evasion by Japanese manufacturers of the duty on hosiery. At the time the question of the protection of the hosiery industry was considered by the Government, the representatives of the industry pointed out that unless all knitted cotton goods, including goods containing admixtures of fibres other than cotton, were brought within the scope of the protective measures, Japanese manufacturers and exporters would easily evade the protective duty by making slight alternations in the style and make-up of undervests. The Government gave an assurance, at the time, that they possessed wide discretionary powers and that they would promptly check any moves which might be made to evade the protective duties by means of such devices. The apprehensions of the representatives of the hosiery industry have turned out to be correct: and the nimble Jap is gaily jumping over the tariff walls. The hosiery industry is both a factory industry and a cottage industry. It is the one industry in which educated men have sought employment on a cottage industry basis. If this Japanese evasion of the duties is allowed to go on unchecked, disaster awaits the hosiery manufacturers. It is up to the Government to carry out the assurance which they gave to the industry on the eve of the passing of the protective measure. As they themselves know, the Government possess wide discretionary powers. They must now exercise them. To fail to do so would be to massacre an industry which made heady expansion under the assurance of protection given by the State.

* * *

Mr. J. R. Farquharson urged that action (a) on the Road Rail Conference resolution regarding the co-ordination of motor taxation and (b) to secure the unification of the motoring laws in British India should be taken without delay. We agree with Mr. Farquharson that every taxing authority in India seems to regard the motor vehicle as fair game. The central government, the provincial governments, the local bodies—between them they take their cut off the joint in sundry ways and by curious methods. It is time that the State realised that crippling the development of the increased use of motor vehicles in India is only as wise as killing the goose that laid the golden eggs.

EDUCATION AND UNEMPLOYMENT

The coincidence of a number of university convocations has served at the moment to focuss public attention on our educational problems. Those who address the graduates are, doubtless, men of eminence in our public life, though not always of high academic distinction. Their opinions naturally become the subject of comment in the press. And public interest in problems of such obviously vital importance is heightened. So far, it is all to the good. But it is not less important that a correct lead should be given, before our legislators and our university authorities put their hands to the task of educational reconstruction. On going through the various addresses, one is left with the feeling that the educational outlook of most reformers is warped by their awareness of prevalent unemployment. Here again, the sympathy for the unemployed, which one sees so clearly in these speeches, marks a welcome change on the old attitude in which every one who had "made good" in life attributed the woes of the unemployed to their own ineptitudes. The absurdity of that view is being realised. Though the world never grows too small for men of outstanding ability, it is still true that the framework of modern economic life has no place for large numbers of people who are consequently unemployed and are denied the material requisites of life. The value of recognising this fact can hardly be under-rated. The more fortunate among us regain our natural kindliness and we are able to proffer to the desperate supplicants for jobs at least some courtesy where formerly a supercilious rudeness was the rule. But the new found sympathy can do no good to the unemployed, unless it is informed by knowledge and is manifested in energetic action.

* * *

At present, however, the only manifestation of sympathy for the unemployed is the demand for a reform of education. To most people the link between a wise system of education and sufficiency of employment is so self-evident that it seems a simple first proposition that unemployment can be cured by a reform of the educational system. And yet the idea would not bear a moment's scrutiny. For employment implies an exchange of values between the employer and the employee, and no one would employ men unless their collective output has a definite and remunerative market. The existence of such a market depends upon the distribution of purchasing power and on the resources for production. Even if the latter are taken for granted, the distribution of income may be such as to make even the production of necessaries unprofitable. The principal condition of an expansion of productive activity in a country with undeveloped resources is that the national economy should be well-balanced and that the new production should not be such as to disturb the existing balance. The preservation of equilibrium is best achieved when new production is not confined to one class, but is balanced by a similar activity in another class, so that the new goods may move into consumption on the wheels of a smooth exchange. The expansion of agricultural production should be offset by the institution of a new industry or the addition by other means to the number of industrial workers in urban areas. Similar equlibrium, it is clear, has also to be preserved in the country's foreign trade. A reduction of imports consequent on the establishment of an indigenous industry will almost invariably be followed by the reduction of exports. And when, for any reason, exports fall off, the country must be prepared to reduce its requirements of foreign goods (and services) and make up the deficiency by internal production.

* * *

It will be clear that the starting point of economic progress is a balanced economy. Though this term is not easily defined, its essential attribute is that every productive activity of reasonable efficiency should be profitable. Efficiency is relative, and it would be absurd to condemn a whole population of agricultural workers to persistent impoverishment merely on the ground that productivity in some distant land is greater. The doctrine of free trade, unquestionably sound in itself, can do little to detract the importance of balance in a country's economic structure. Public policy will have to count the human costs of unduly free competition, and where expansion of production is necessary on account of low standards of living, it is essential that agriculture and the staple industries should be restored to a profitable basis and new production should follow some clear preconceived plan.

* * *

It is only in such conditions that the problem of unemployment, such as India is now faced with, can find a progressive solution. But hardly any of these conditions is now present. We lack even the sound starting point of a balanced economy. Agriculture, the mainstay of the masses and the pillar of the national economy, is largely unprofitable. Industry is, on the one hand, subject to the vagaries of State policy and, on the other, exempt from the obligation to increase efficiency. The educated public, which is also the politically-minded, is frequently faced with the dilemma of condoning industrial inefficiency and giving a deplorable setback to the country's industrialisation. All the time the hardships of the agriculturists continue and provide a most unpromising soil for the growth of employment. For we are every day moving farther from that surfeit of profitable markets, which impels the forces of production and creates employment for all classes.

* * *

It will be clear from the foregoing analysis that employment is for the individual a question of finding his suitable place in a productive organisation which is working at a profit. When such productive organisations are lacking, unemployment is bound to be rife and is more or less wholly independent of the ability and attainments of individuals. It may, however, be conceded that a few individuals may, now and again, hit on certain lines of service to the community and

make a living thereby. Technical training may well be useful to them to render such service. But if such technical training were provided on a large scale, the employment of these technicians would impinge on the larger problems we have just examined and the resulting glut would make life impossible for the technicians.

* * *

There is, in fact, nothing which we can do inside a college or school or institute which can ensure the trained pupil a smooth economic life. The existence of many youths qualified for jobs of various kinds, academic, technical and clerical, should suffice to make our point clear. Given the demand for a certain equipment of knowledge and training, it is impossible that it should go unsatisfied over any considerable period. During the boom period, there had been to our knowledge many instances of individuals to whom work was an earlier acquisition than the ability necessary for its discharge. It may be that there is an initially wasteful process of men learning their work while in actual employment. But the requisite ability is ultimately forthcoming ; and one may venture to say that employment depends less on the ability of an individual than on the demand for it. It is to the demand rather than the supply—and economics generally assumes the satisfaction of effective demand to be more or less automatic—that we should devote our attention.

* * *

Thus education is clearly the wrong end at which to begin the solution of unemployment. This is not to deny all relation between the vocation of an individual and what he or she does during the years spent at school or college. But one ought to make a distinction between the relation of employment to education and that of unemployment to education. In a well-ordered society, in which a man's profession or vocation is not left to chance and a decision in this regard could be made at a suitably early stage of his life on the basis of observations of capacities and aptitudes, it is obviously the best thing to shape juvenile training according to the individual's calling in life. But in a society, in which a very few are, perhaps, in a position to shape their careers, the average individual has to think of a number of different vocations as being likely to come within his reach and acquire in his earlier years an equipment of training and knowledge which would stand him in stead in all of them alike. The system of education, therefore, has to impart that kind of training which will reduce to a minimum the special qualifications which would be required for the successful discharge of the duties of any normal job. It will be seen, therefore that, when the facilities for special careers are provided in institutes of various kinds, the educational system as a whole would afford little scope for any radical change. Thus those who are, consciously or unconsciously, led by the large volume of unemployment prevalent in the country to demand an overhaul of the educational system will, on coming to grips with the problem, have no practical suggestions to make. It is not that we consider the present system of education in this country to be without blemish. We are far from convinced that our schools and colleges have succeeded either in securing a high standard of

teaching for the average pupil or the best encouragement and scope for genius to blossom. The removal of defects, such as they are, raises other problems which are not germane to the question on hand. Here we are concerned only to point out the relation between education and employment and particularly to stress the fact that to allow unemployment to colour our educational outlook is not only unhelpful to the solution of unemployment but is dangerous to the ends which education, strictly speaking, should subserve.

DEATH OF THE PARIS PROPOSALS

The publication of the Paris peace proposals and the resignation of Sir Samuel Hoare have brought about in international affairs a crisis of first magnitude. The present disquiet and uncertainty are in such strong contrast to the widespread feeling of confidence at the time of the accession of Sir Samuel Hoare to the British Foreign Office and his historic statement of British policy at the League of Nations. At that time it was felt that, for once after the War, Britain had found a Foreign Minister who was keenly conscious of the international responsibilities of Great Britain and would endeavour to discharge them faithfully without undue deference to the French standpoint. Sir Samuel's record at the India Office marked him out as one who can at short notice take in the essence of a complicated and distracted situation, decide on a practical and statesmanlike policy and stand firmly by it without provoking any powerful opposition. The world, therefore, indulged the hope that Sir Samuel would, before long, have a similar achievement to his credit in the field of international politics, with the wholesome difference that in the latter he would be found to support a far more progressive policy. Though Sir Samuel's statement at the League did not a little to strengthen these hopes, his career at the Foreign Office has been cut short in circumstances which make his exit seem a distinct gain to the cause of world peace. It is, perhaps, a little premature to venture such a statement, for Sir Samuel has not had an opportunity to clear himself of the charges that have been levelled against him both by the Opposition and by the supporters of the Government. It is more than probable that Sir Samuel will be able to establish that, in the circumstances, in which he found himself at Paris a fortnight ago, he had little or no alternative to lending the weight of British support to the proposals put forward by M. Laval. One might suspend judgment on this issue and may yet be able to find that Sir Samuel was wanting in strict loyalty to the principles of the Covenant and had heedlessly dashed the high hopes he had raised by his firm stand at Geneva.

* * *

The events that led to the formulation of the Paris proposals and ultimately to the Ministerial crisis in London are by now a matter of common knowledge. After Sir Samuel's speech at Geneva led to the first step in the imposition of sanctions against Italy, the principal problem for the League and the Powers was to gauge its effects on Italy as also her possible reactions to such further measures as may be acceptable to the League members and to decide on a definite course of action. It is hardly to be expected that, when the sanctions are merely of the kind of a gesture, any tangible results would follow. While Italy was not incommoded to any considerable extent, the sanctions had the effect of increasing her resentment and stiffening her attitude to similar action on the part of the nations in respect of such essentials of warfare as oil and coal. At the same time, it was more than doubtful if an equal unanimity amongst the nations could be secured on the question of an oil or a coal embargo. The Powers, which were naturally nervous all along of being left to face Italian belligerence without adequate support, inclined

SPECIAL CARRIAGES
PROVIDED
AT
ROADSIDE STATIONS
FOR
SHOOTING FISHING
AND
CAMPING PARTIES

This Railway has two carriages, one bogie and the other a four-wheeler specially equipped to provide the following accommodation:—

1. One bogie carriage ... For 6 persons, with a separate servants' compartment, a kitchen and two bath-rooms.
2. One Four-wheeler ... For 4 persons, with a separate servants' compartment, a kitchen and a bath-room.

Each carriage is equipped with camp furniture, cutlery, crockery, cooking utensils and table linen, but not bed linen. Carriages are not provided with electric fans and electric lights but are adequately lit, and fitted with swing punkhas.

These carriages are primarily intended for parties to live in who wish to shoot, fish or camp at roadside stations. They cannot be attached to mail or express trains, but will be attached to ordinary passenger trains or to the Parcels Express.

These carriages are not intended for travelling purposes except to move from one camping station to another within limitations on payment of actual II class fare plus III class fares for servants.

The charges for the occupation of the carriages are:—
Bogie carriage Rs. 10 for 24 hours or part thereof.
Four-wheeler ,, 7-8 do do

Parties using the carriages must hold tickets as follows:—

One II Class ticket for each person and one III Class ticket for each servant or employee, the number of servants or employees being limited to one per person with one addition.

Applications for the use of the carriages should be made to and further particulars obtained from:—

toward the formulation of tentative proposals of peace which would form the basis of discussion, a means of assuaging the acerbities caused by the sanctions and an approach to a final settlement. Sir Samuel Hoare, as his recent short statement in the House of Commons shows, had been keenly alive to the possibility of Britain failing to take the rest of the world with her in the next step against Italy and was, therefore persuaded that the peace proposals formulated by M. Laval could be submitted for discussion to the parties concerned under the auspices of both France and Britain. It is possible that, if the terms of the Paris plan had been kept from the public a little longer, providing time and opportunity for its sponsors to explain its rationale and its ethics, a crisis such as is now witnessed might have been avoided. But as it is, the premature publication of the terms has caused an explosion of public opinion, which has been labouring under the fear that the secret and sinister diplomacy of pre-War days, to which the Soviet had dealt a heavy blow by the publication of the secret documents of the Tsarist regime, had again raised its ugly head in the capitals of Europe.

* * *

It is difficult to believe that the instinct of the public has not been proved right in this instance. For, it is impossible to take the Italian attitude at its face value. To assert, as Signor Mussolini has done, that Italy would regard the imposition of the oil embargo as an act of hostility justifying recourse to arms is altogether without meaning, expect on the basis that Signor Mussolini is able to count on some significant defections in the ranks of the League itself. France's attitude has never been very convincing; and if, on the strength of Signor Mussolini's speech M. Laval raises the spectre of an European conflagration and Sir Samuel Hoare is thereby persuaded to acquiesce in the postponment of fresh sanctions and the formulation of the Paris proposals, one can only say that the cause of peace and justice has been betrayed and Sir Samuel Hoare is not above all suspicion of complicity. Indeed, it would have been difficult to acquit Sir Samuel, but that France has never shied at a monopoly of blame in this regard. Her anxiety for a solid and unbroken cordon of allied nations on the Continent against Germany has all through impelled her to put support of Italy far and above her obligations to the League. One cannot find fault with France for such an attitude, so long as the fear of war continues to be rampant and the emergence of a power able to resist war and preserve peace is not in sight. This indicates roughly the different roles of France and Britain in contemporary international politics. Just as the French Government cannot rid itself of its responsibility for preserving the security of France against aggression from without, Britain cannot waver in her determination to constitute the League into an effective bulwark of European and world peace. There has been all along but a vague realisation of the mission of Great Britain on the part of her Foreign Ministers. Sir John Simon during his unfortunately long term in the Foreign Office was content to play second fiddle to France; and we, for our part, acclaimed the advent of Sir Samuel Hoare only on the ground that, like Lord Snowden before him, he would stand up against French diplomacy. But the events have shown that M. Laval has prevailed over Sir Samuel no less effectively than M. Poincare over President Wilson. Once can only hope that two decades of modern history will make a great deal of difference. In fact, they have; and the outburst of public opinion both in France and in Britain and the insistence that the peace proposals must be acceptable to the League may be deemed to have driven the last nail in the coffin of the peace proposals.

* * *

In the debate on the Labour vote of censure, Mr. Baldwin made it clear that the Paris proposals were

Time stands to-day as still as in the days of my aunt; and the Howrah Bridge stands up as bravely as ever to the unending traffic of bullock-carts. An air-minded Viceroy and an even keener air-minded Vicerene have failed to spur public interest in the utility—I may say, inevitability—of civil aviation in India. The wail of Mr. R. E. Grant Govan at the annual meeting of the Indian National Airways and the dolorous recital of the directors of the latter are less a reflection on the domestic affairs of the Company than a humiliating commentary on the apathy of the public and of the Government. Which reminds me of what befell broadcasting in this country. A backward population and an ununderstanding Government succeeded in well-nigh nipping broadcasting in the bud. Private enterprise essayed the task valiantly but had to own discomfiture and face disaster. It was almost at the last gasp that the Government stepped in and planned broadcasting as a State enterprise. The initial troubles have now been overcome; an alert and adroit official has been brought down from England, his last utterance bearing forceful testimony that he realises the identity of broadcasting with the education and amusement of the millions and means to speed up the broadcasting activities so as to diffuse their benefits over wider areas and so as to invest their service with a higher quality. Should we wait till the last gasp of private enterprise in civil aviation, before the State will realise its responsibility? Much has been done to place on a sound basis Indian aviation in so far as it is a section of Empire service. But, in the case of a country of long distances, internal services are by far of paramount importance.

Indian National Airways started with high hopes and in right businesslike fashion. In the planning of routes, the providing of amenities, the schedule of fares, and the ensuring of perfect safety, everything possible has been done. The percentage of regularity was 100 in Calcutta-Rangoon and Calcutta-Dacca services and 98 in Lahore-Karachi service. The Company typifies a wholesome blend of Indian and British talent, direction and capital. It has succeeded in imbuing its Indian pilots with zest and in cultivating in them the high sense of responsibility called for in a task of this kind. It has spared neither expense nor trouble in surveying and exploring; it has shown daring and confidence in experimenting. To the Tatas and to the Grant Govans, let us be duly grateful for the energetic start that has been given to civil aviation in India. They have begun well; and only 'half-done' is the limit of their unaided efforts. It is only Government co-operation which can make possible further progress and healthier development. As a result of its pioneer activities over the past two years, Indian National Airways is "convinced that the progress of civil aviation in this country must depend, in large measure, upon the attitude of the Government and the Legislature towards the important question of subsidy or Government contract aid". I agree that India, like all other countries in which aerial transport has been developed, requires Government assistance in the operation of regular passenger services during their transition from the initial to the self-supporting stage.

The speech of Mr. Grant Govan, which appears in the *Investors Supplement* and which should set us all thinking, refers to the withdrawal of some of the services pending the result of the detailed representations to the Government. The position as regards these negotiations is thus described in the Directors' report:

> "Although immediate ways and means of assisting the Company could not be found, the Board have the assurance of the Government of India that the many factors affecting this question are receiving their most careful attention, and that they will continue to arrange discussions with representatives of the Company as the investigation of the problem proceeds. Meantime the Board desire the shareholders to realise that the development of the Company's activities must be retarded until a final and favourable decision has been reached in this connection."

It is heartening to learn that the Government have, in all matters that have cropped up hitherto in this connection, shown sympathy and evinced a sincere desire to co-operate wherever possible. All that one need urge on the authorities in these circumstances is that time is the essence of success. There are many terse sayings which promise opportune aid to stress the plea of urgency. 'A stitch in time saves nine', is the warning underlined by the broadcasting episode. Prevention is better than cure—this may not appeal to a Government, of whom G. K. Gokhale said that delay was writ large on the portals of the Imperial Secretariat. I may add an epigram of my own: posthumous help is no help at all. To Sir Frank Noyce, of whose appreciation of aviation as a time-saver and worry-saver his own aerial tours

on official work are an eloquent expression, I commend the following passage from Mr. Grant Govan's presidential address:

> "In a country like India which lends itself freely, both geographically and climatically, to the development of civil aviation, an efficient system of internal aerial services can only be regarded as a national asset of primary importance, and the Board look forward to the future in the belief that the past has proved that the Company's organisation is capable, with some measure of initial assistance, of assuming its full responsibilities in the achievement of this object."

We may be told that if the public do appreciate air travel and its boosted benefits, they would have themselves taken more largely and more kindly to the services provided by Indian National Airways. That the services were not sufficiently patronised, is, it may be argued, a token that the public can do without them. Why force this new-fangled thing on them? Why not let them alone to those amenities they need and they care for? An attitude of this nature spells disaster to all enterprise; it fossilises conservatism; it means the death of what we call modern progress. When we started *Indian Finance,* there were hardly a hundred readers who could understand its jargon and benefit from its weekly offerings, so much so that one of our contemporaries (and a financial journal at that) welcomed us formally while doubting if the advent of *Indian Finance* could be considered as supplying a want. *Indian Finance* created the want—whetted the appetite—and cultivated a new taste; and, to-day, we have subscribers far exceeding, in number, our most sanguine expectations. What is true in a small way of *Indian Finance* and its vogue and its growth is true, in a large way, of civil aviation and its fashion and its development.

One does not look for frankness in political speeches. The successful pursuit of politics consists largely in concealing rather than revealing the inner mind. When frankness pervades a political sentiment there is a feeling among politicians that the rules of the game are broken. Such a feeling must have possessed the House of Commons after the the maiden speech of the Conservative member, Mr. Hannah, on the need of finding an outlet overseas for Indians. The Dominions, he said, did not want men of Asiatic stock for good reasons. And, speaking frankly, Mr. Hannah must have surprised, if not shocked, the House when he reminded the members that "it is not the faults, but the virtues of Asiatics that make it undesirable that we and they should live together. The Asiatic workman is just as good as ours, but requires much less to fulfil his simple wants". If "virtues" are so grave a racial disability to Asiatics that European proximity is impossible or impractical, the offence is the European's. The economic root of the "colour ban" in the Empire, fully understood tacitly by both parties, has not been, so far as I remember, so frankly put as by Mr. Hannah. Being a maiden speech the House will forget its quality of frankness. And with more experience of the game of Empire politics played by Parliament, Mr. Hannah will presumably develop the verbal discreetness that confounds, which is the flower of politics.

Abyssinia is admirably served at Geneva. In contrast with Mussolini's bombastic banalities, Abyssinia's delegates speak with a deadly precision. Throughout the diplomatic fencing since the outbreak of hostilities, Abyssinia has won easily on points, parrying Mussolini's bludgeoning with rapier thrusts, a veritable Goliath—David contest. The latest Abyssinian thrust is as good as any. In rejecting the Anglo-French peace proposals, Mr. Maryam, Abyssinia's delegate, said at the public session of the League Council that "the only thing that the Italians had given to civilisation was the incendiary bomb". The better mind of Italy must have winced. For, Italy has given to civilisation a noble setting. Roman law, Roman literature, Roman architecture, Roman painters, Roman statuary and Roman history are the core of Europe's civilisation. And Italy's fight for liberty, which spired the passionate notes of Byron and Swinburne, is unforgettable. Wherever liberty raises her laden head, Garibaldi is an honoured name. Venice, with its "bridge of sighs, a palace and a prison on either side", is as exquisite to-day as it was when Byron immortalised it in verse. The Italian Riviera is Europe's holiday spot. The "incendiary bomb" of Mussolini is a cultural calumny on Italy.

The approach of the Christmas season, when Calcutta, specially young Calcutta, spends itself in a gaiety of good will and good cheer, synchronises with a gala programme of amusement. And as the film typifies popular entertainment, cinema houses spread themselves out to cater to the demand. Madan Theatre, with its excellent sound and sight equipment, occupies a unique place in the city's amusement scheme. An admirable selection of pictures appeals to every section of public. It has begun its Christmas programme with "Redheads on Parade", a musical extravaganza with John Boles and Dixie Lee in the principal roles, supported by a novelty cast of forty-eight red-headed prize beauties, one from each State of America. The lilt of their singing and the charm of their dancing are a real ear and eye-opener. Calcutta has an exacting taste in pictures. "Redheads on Parade" whets that taste.

EAVESDROPPER.

(Continued from page 1887).

dead and Government had no intention of resurrecting them. The Government cannot take a different view, considering the unanimous opposition the proposals have evoked in the country in general and particularly in the ranks of the Conservatives. The debate has served the very useful purpose of clearing up the British view and leaving no room for doubt that no British Government can be a party to a peace which would, in the words of Major Atlee, give away "half of Abyssinia in exchange for a corridor for camels" and "immense concessions to wrong-doers at the expense of the victim." The debate has also made clear that the British Cabinet was guilty, if anything, of a grave error of judgment about the feelings of the public on these proposals and that the ministers rendered their support more out of loyalty to an absent colleague than out of disloyalty to the League. It may be said in extenuation of Sir Samuel Hoare that the manner, in which he was involuntarily led to discuss the peace terms instead of the ancillary matters, on which he had clearer instructions from his colleagues and the threat, as it seemed to him, of Britain having to face Italy single-handed forced him into a course of action which in a different setting seems so thoroughly indefensible. Those, who will not allow the unfortunate events of the last fortnight to vitiate their estimate of Sir Samuel, will, undoubtedly, regret his exit from the Foreign office. But as Lord Halifax pointed out with that combination of insight and generosity so characteristic of the late Viceroy of India, the greatest service that "Sir Samuel Hoare has rendered by his resignation may have been to strengthen afresh Britain's moral leadership before the world which it had attained in recent months."

OLYMPUS

(From Our Correspondent)

New Delhi, December 17.

The affairs of the Indian National Airways have created a problem for the Government of India, and the authorities do not know what to do, or say, in the matter. For the moment, they are only hearing the case "with an open mind." But this attitude cannot last because the Indian National Airways have reached a stage when they must know where they stand.

* * *

To-day, at the prolonged conference with the Government of India officials, they told their tale. The simple issue is: Is not promotion of aviation essential in a far-flung country like India?

* * *

If the Government wish to say "No", they may have a hundred reasons such as the Company's affairs are run expensively; that if Government gives them subsidy, it would open the door to similar applications from the other Companies, that may come into the field; that financial affairs of the Government of India do not encourage much extra expense; that postal department does not get enough profit to be able to charter aeroplanes for carrying letters without a surcharge; that the foreign mail which really will benefit by air transport is hardly 1 per cent. of the total mail carried in India. And all that.

* * *

But the point is quite different. Should India do by civil aviation, what every other country has done? Should India do what she has herself done in the matter of developing railways in India by guaranteeing profits to companies which operated them? Should India do what many countries are still doing by subsidising shipping?

* * *

Frankly, the Government of India is not made up that way. It does not like to encourage airway expansion without weighing the effect on their budgetary situation and without knowing how it will react on the Imperial Airways and the various interests connected with that line. Of course, if a solution were to be sought, it could be had in no time. The various internal air companies could be amalgamated and a big concern floated by public subscription. Government could guarantee a minimum return on the capital invested for five to ten years. This Company would have monopoly of air transport in India; its management expenses and direction shall be under the control of the Government for the period of the guarantee of interest. And then civil aviation could be developed.

* * *

Public opinion in India may welcome such a step; the Assembly could vote funds without hesitation, but the Assembly and the public cannot be blamed if they do not acclaim as "national" the Indian National Airways even though its capital is largely Indian—which, for the present, means that Indians would lose the capital, if the enterprise does not succeed.

* * *

Anyway, there is no big man in the Government of India to visualise the problem in its fullness; nor is their any big leader in the financial and industrial world who is prepared to organise national opinion on the matter. But even if the present pourparlers do not succeed, civil aviation must get a push after Federation comes into being.

* * *

A Jute Conference on the 19th and a Shipping Conference on the 20th indicate that the hands of the Finance Member and the Commerce Member will be fairly full this week. So far as the latter goes, Sir Muhamed Azfrullah has not to give a lead, but to ask the parties concerned to show the spirit of mutual accommodation, they have done in the past, and resolve the points of dispute that have arisen. He is prepared to help, if necessary, but he expects the parties concerned to find a reasonable way.

* * *

On the Jute Conference, it is difficult to say anything until the parties concerned have met. The Government of India have always held the view that the industry must help itself, and that it can do so. Scheme of restriction has not appealed to them, and will not appeal to them, until the other alternatives are exhausted. Certainly, it will be unexpected if the coming conference leads to any striking results.

* * *

The scene created by the Fazal-Ramaswami quarrel at the public sitting of the Tariff Board has caused some concern to the authorities here, as it might induce the impression that the two members were pulling in different directions. And yet it may be that, whereas Mr. Fazal is direct in his question, The Dewan Bahadur is creating confidence in the impartiality of the Board, by his leading questions. However, the fact remains that the Dewan Bahadur's questions have given the impression that he is giving the Lancashire Delegation a chance of retrieving their position. Anyway, the key is held by him and if there is to be a split in the Board, whichever side he joins, would carry the day. That was the issue with Sir Shanmukham Chetty over Ottawa.

* * *

This morning was issued a *Gazette of India Extraordinary*, giving tariff valuations for the new year. I wonder why such changes, as it contains are not explained in an official communique. It so happens that the schedule shows that valuation has been put up in respect of cocoanut both husked and unhusked and copra thereby giving indirect help to Indian produce. Considering that there has been so much agitation from South India on the point, an explanatory communique was called for. Similarly, textile industry, it is said may benefit through lowering of valuation on sodium hydrosulphite. That too might have been explained.

* * *

I hear whispers that in the re-arrangement of portfolio tariffs may be transferred to the Finance Department. At present, the Commerce Department handles them. The proposed arrangement, it is said, will be more conducive to proper working of the Government machinery, as often the Commerce Department has to state its case to the public, after ascertaining the view of the Finance Department. And as the Reserve Bank has taken away a good part of the worry from the Finance Department, it may be held that this Department can take on an extra job. There is also the opposite view that such a transfer may throw even industries of India at the mercy of a Finance Member, harrassed by financial considerations, or moved by his own theories about protection, and that the result may not be happy in the larger interests of India to make the Finance Department already powerful, too all-pervading.

(From Our Correspondent)

Bombay, December 18.

The Special Indian Tariff Board under the Chairmanship of Sir Alexander Murray began its inquiry on protection to the textile industry with an examination of the Lancashire delegation, who were led by Mr. Angus D. Campbell. Sir Joseph Key, Chairman of the Bombay Millowners Association, was present, with Mr. V. N. Chandravarker, Deputy Chairman, Mr. A. C. Short, representing the Lancashire Indian Cotton Committee and Mr. Kasturbhai Lalbhai, President, Ahmedabad Millowners' Association. I cannot here do more than give the gist of Mr. Campbell's exhaustive presentation of the Lancashire case which provoked many queries by Mr. Fazal Ibrahim Rahimtoola, a member of the Board.

* * *

The 3½ annas specific duty on Lancashire goods, which has been increased to 4¾ annas, is not only a protective duty for the Indian textile industry, but prohibitive to the United Kingdom's textile goods—this was the core of Mr. Campbell's case. He agreed with Dewan Bahadur A. Ramaswami Mudaliar, another member of the Board, that the fall in the imports of United Kingdom goods was due to three causes—world depression, boycott and import duties, though Lancashire did not attach much importance to depression which did not materially contribute to the fall. To another suggestion of Mr. Mudaliar, Mr. Campbell said that, relatively with world depression, the United Kingdom textile industry did not adjust their prices which remained high.

* * *

The total abolition of specfific duties on United Kingdom cotton goods and a reduction in the *ad valorem* duty of 25 per cent. was advocated by the members of the Lancashire delegation in their oral evidence. Mr. Rahimtoola pointed out that the terms of reference of the inquiry, as he understood them, were to review the present conditions and to level the duties to the extent of affording protection to the Indian cotton textile industry against imports from the United Kingdom. It had been specified that by "adequate protection" was meant duties which would equate the fair selling prices of United Kingdom goods with similar goods produced in India. Most of the points raised by the Lancashire Delegation in their memorandum had made him form the opinion that the terms of reference had not been fully understood by the delegation. The protection asked for was for the Indian industry ; but the anxiety of the Lancashire delegation seemed to be to protect the Lancashire industry against Indian mill made goods.

* * *

After Lancashire, the Bengal Chamber of Commerce had a hearing. In their memorandum, the Chamber submitted that the Indian mills' need for protection was not as great as the Indian industry would like the public to believe. It is the experience of the Chamber that any competition, which may exist to-day between the United Kingdom goods and Indian made goods, is to all intents and purposes entirely indirect. The Chamber's representatives (Messrs. M. W. Lowndes and I. N. L. Clements) contended that the larger share of the trade was obtained by the Indian mills and handlooms as a result of the increase of duties in 1930-31 and that the increase has been almost entirely at the expense of English goods. The present figures of imports from the U. K., since there is now no boycott in operation, clearly indicate that it is the severity of the duties that has reduced U. K. imports to less than 1/3rd of her 1926-27 total, and without an immediate reduction it is very doubtful if her figures will not continue rapidly to decrease until her trade is practically extinct. England shipped to Calcutta fair quantities of grey jacconets as long as the duty remained at 11 per cent., but here again the imposition of a specific duty killed the trade. As far as can be ascertained, no Indian mill has attampted to sell similar goods in the Calcutta market. Such goods are wanted and are in regular demand, but cannot be imported owing to the price being too high.

* * *

The Lancashire case is flimsy. Mr. Campbell's complaint is that the Indian mill industry has progressed considerably, and it should not have been allowed to progress at the expense of Lancashire—a curious argument to revise India's tariff in favour of Lancashire. Mr. Campbell was not concerned, as far as his evidence goes, with the legitimate growth of India's largest national industry. And when Mr. Campbell asserted that the Indian cotton mill industry had grown more rapidly than is good for India, there was more than the shadow of a smile on the lips of the Indian members of the Board. Lancashire as the prophet of India's textile well-being introduced a sense of unreality. Again and again, Mr. Campbell unloaded his mind on "the sharp accentuation of the upward trend of Indian mill production since 1931"—a trend that is still active. That is the purpose of protection.

* * *

Mr. Campbell's plea that "to give special and heavy protection to Indian goods" would cause a "premature and artificial development of plant before the necessary financial experience had been gained," supplemented by his suggestion that steady development was preferable to rapid progress, showed to what extremity of fatuity the Lancashire delegation was driven in search of pleas. Mr. Rahimtoola's explanation of the decline in imports of British piecegoods and of its recent improvement owing to the Ottawa Pact knocked the bottom out of Mr. Campbell's case, which does not take its stand on the Mody-Lees Pact. If India still imports piecegoods, it is because she cannot meet her home demand. So elemental an economic law had no recognition in Lancashire's representation.

* * *

Another trade delegation—the Australian—has arrived here after an intensive tour in India. The delegation came to investigate the prospects of an increase in Indo-Australian trade, and will submit its recommendations to the Government of Australia. By a series of uncompromising measures, the Commonwealth of Australia has fought successfully the economic crisis. With higher wool prices and the general trade level higher, the Australian Government is studying the possibilities of overseas expansion. India has a favourable trade balance with Australia, principally owing to jute exports. The delegation has arranged that ships, which carry gunny bags from Calcutta to Australia, will in the near future be more exclusively engaged in bringing back goods from Australia. More Australian provisions would be absorbed by India, which has been retarded by the present cumbrous and expensive shipping system.

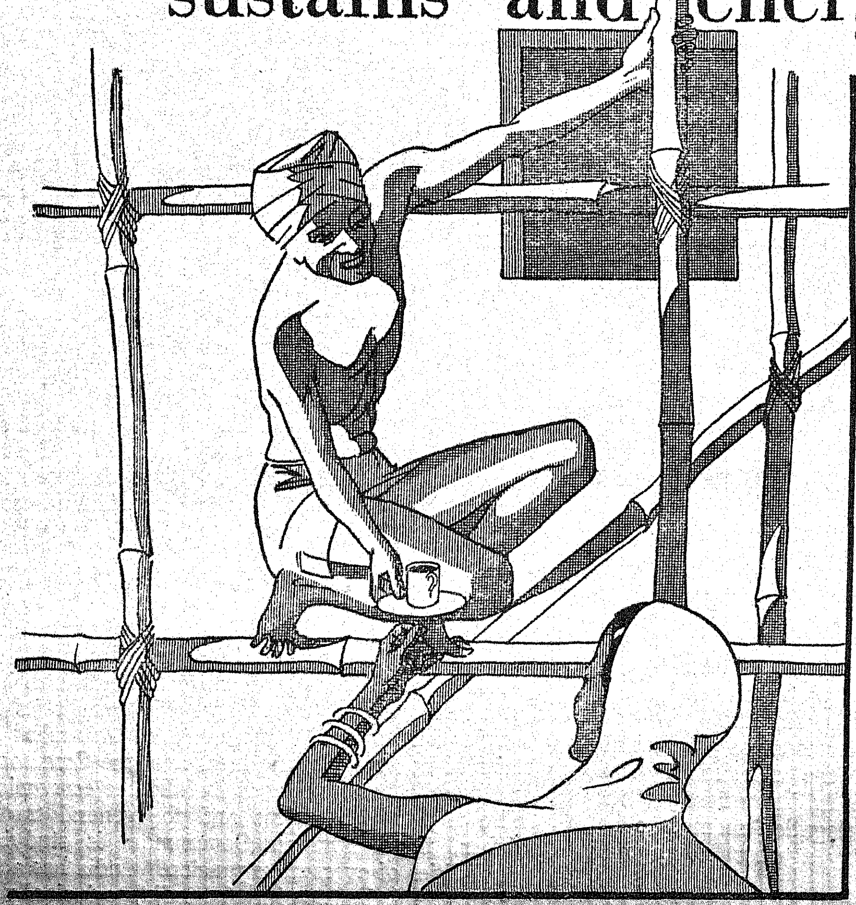
INDIAN TEA
sustains and energises



HOW TO PREPARE TEA

Tea to do you good and to taste good must be made the right way. These are only a few simple rules, but these rules must be followed :

1. Use good Indian tea.
2. Use an earthenware teapot, if possible and rinse it with boiling water before putting in the dry leaf.
3. Use one teaspoonful of dry tea for each person and one extra for the pot.
4. Use only freshly-drawn water (not water that has been boiled).
5. Be sure that water is boiling fiercely. Never use water that has been boiling over or simmering for some time.
6. Always pour on the boiling water after putting in the dry tea.
7. Allow the tea to stand for at least five minutes and then serve, adding milk and sugar to taste.

Whether your work lies in the open where constant physical strength aids you to be more successful, or if your sphere of activity and usefulness is in an office where mental energy and alertness will improve your position, you have a constant friend and helper in INDIAN TEA.

This fine healthful beverage, a product of India's soil and India's labour, can be made in a few minutes; you will find that by drinking it just when your brain and body are becoming fatigued, that you will be sustained and given greater energy to complete your work, whatever it may be. Indian Tea is the true friend of India's people, yet millions have not appreciated its value. If you have never had Indian Tea, then try a cup to-day. It's the cheapest beverage in the world and so good for you.

INDIAN TEA is refreshing and healthful

SOUTH INDIA

(From Our Correspondent)

Madras, 16th December.

The observations of Mr. Mukundan, Agent of the Government of India in the Federated Malay States, regarding Indian labour in Malay provide interesting reading. There has been a depletion in the South Indian population in the States, about 66,000 having had to be repatriated on account of the historic rubber slump. The total Indian population in the States is in the neighbourhood of six lakhs, which approximates to the figure for Madras City. Repatriation in 1932 and 1933 had certainly worked great hardship on the South Indian, as he got thoroughly used to the life on rubber estates and the change to agricultural labour in India meant practically beginning his life all over again. There is also the other familiar difficulty, that many of these men had settled in the States for generations and had never known the mother country except as a distant geographical unit from which their forbears emigrated in the halcyon days of the rubber boom. Thus the problem of repatriation is proving a thorny one. By far the most serious problem is the disparity between the number of men and women in the States which has led to great laxity in morals. Hindu marriages performed in approved sacremental fashion afforded feeble protection to a married couple and in cases where a woman is seduced by a neighbour, it is not only not possible successfully to prosecute the seducer, but there is every danger of the neighbour permanently weaning away the woman, as evidence is difficult to adduce that the complainant is the lawfully wedded spouse. There is an Act for the registration of Hindu marriages in the States, of which advantage has not been taken by the South Indian labourer, as registration seems obnoxious to his sacrament-ridden mind. Legislation must be passed making registration compulsory, if the disparity in number between men and women is not to work havoc on the morals of the married folk in the States. The present ratio of men to women is 2.1 to 1 which is decidedly disturbing. Mr. Mukundan thinks that this disparity will go down with the rubber trade turning corner.

* * *

That the Justice Party (which has no serious counterpart in any other Presidency) introduces plenty of spice and ginger into the politics of this Province is indisputable. In December 1934, the Rajah of Bobbili convened a meeting of the Party where Kumararajah M. A. Muthiah Chettiar was impeached for his esoteric affection for the Congress, was branded as a traitor and chastised for his perfidy by being turned out of the conclave of the Justice Party. The Kumararajah made a statement on that occasion which contained among other things a homely confession that he had realised what it was for a rich man to be in politics.

December 1935 has witnessed a happier spectacle, —the return of the prodigal. Across a common table met the Kumararajah and the resourceful Rajah of Bobbili. At the head of the table sat the ex-two-term Home Member and sometime Governor of Madras, Sir Mohamed Oosman, making peace and holding aloft in his substantial hand the olive branch. After the manner of an inspired Prophet, he discoursed on the virtues of brotherliness and exhorted The Rajah of Bobbili and Mr. Muthiah Chettiar to shake hands and forget past acrimonies. The Kumararajah responded with a speech. The Rajah of Bobbili followed with another. The meeting terminated with the adoption of a resolution to expunge from the Party records the unhappy proceedings of December 1934.

Presumably, in the opinion of that illustrious arch-priest of the Justice shrine, the Rajah of Bobbili, Mr. Muthiah Chettiar has been adequately punished for his indiscretion by a year's banishment into a kind of political Siberia. The Kumararajah has paid a heavy price for political flirtation and for entertaining secret political affections. The Justice Party has proved for him a jealous mistress, determined to exact from him undivided loyalty. There are those whose even slender allegiance to the Justice Party has been rewarded in a hundred subtle ways. There are those who are easily members of the Party—because they have to be in some political party—and have been pitch-forked into high political office almost unawares, for no other reason than that they can be easily led by the nose. But the Kumararajah belongs to none of these fortunate types. Loyalty is expected of him and he should not expect anything very much in return.

I am inclined to congratulate Sir Mohamed Oosman for having played a veritable Santa Claus and made a Christmas present of the Kumararajah Muthiah Chettiar to the Justice Party. The Party cannot look for a better present in the stocking.

* * *

The Government of Madras recently sought to implement the Sugar-cane Act of 1934, by declaring "controlled areas" and fixing the minimum prices at which cane should be purchased by factory owners in such areas. The imposition of a heavy import duty on foreign sugar and the assurance of this protection for a minimum fixed period by the Government of India led to the country, almost in a couple of years, being inundated by sugar factories. It was Sir George Schuster that pointed out in one of his budget speeches that the customs revenue under the head of machinery, for the preceeding year, had swelled to an unusual figure, mainly because of the heavy import of sugar manufacturing machinery by various newly started enterprises. The Government having thus afforded the protection so persistently clamoured for, felt that the sugar-cane grower had not benefited to any substantial degree by the multiplication of sugar-making concerns, as these latter dictated the terms on which they would buy the cane. This led to the imposition of a small excise duty. The Madras Government, in its anxiety to afford the cane-grower some further relief declared certain areas "controlled". But in actual practice price fixing was found exceedingly difficult. Apart from this, sugar companies in South India are just infants, with here and there a few dividend payers. The move will certainly affect the fortunes of these tenderfoot companies adversely. The Development Minister's attention was drawn to the difficult position created by the official notification. The government have cancelled the notification and it is just as well they did it in time. Mr. P. T. Rajan has broken from the official tradition of encumbering the drowning man with help after he has reached dry land; and he deserves to be congratulated for his heterodoxy.

EFFECT OF SANCTIONS

A STIMULUS TO ECONOMIC NATIONALISM

RAW MATERIAL SUPPLIES

By Dr. Paul Einzig

Special for "INDIAN FINANCE"

London, December 9.

Before the League of Nations embarked upon its policy of economic sanctions, a select committee of experts made a special study of their methods and effects. The probable results of the sanctions and their repercussions upon countries other than those against which they were to be directed were examined with much care. The report of this committee which was published in August last is a valuable document. It will be interesting to compare its conclusions with the actual results within a few months. The report confined itself, however, to the examination of the immediate effects of economic sanctions. It did not go into the question of the fundamental effects economic sanctions are likely to produce in the long run. And yet these fundamental effects are well worth examining; for, whatever may be the political result of the policy of sanctions, it is likely to lead to a thorough reorganisation of the world's economic structure.

There can be no doubt that the application of economic sanctions tends to encourage economic nationalism to a hitherto unprecedented degree. The possibility that a nation may be subject to an embargo on its imports and exports tends to encourage the movement towards economic self-sufficiency. No nation would care to expose itself to the risk of having to surrender owing to shortage of certain essential food stuffs, raw materials for manufactures. To avoid that, every nation will endeavour to produce internally as much of its essential requirements as is possible.

It may well be argued that economic sanctions will only be applied against those nations guilty of aggression, so that nations, which do not intend to attack other nations, need not trouble to become self-sufficient. But then there are nations, such as Germany and Japan, which have every intention of encroaching upon the premises of other nations. Moreover, few, if any, statesmen believe in the absolute impartiality of an organisation consisting of political representatives of other nations. It is true that there is not the least doubt about the identity of the aggressor in the case of the Italo-Abyssinian conflict. The facts are not, however, always as clear. It is conceivable that fifty nations may declare a certain nation the aggressor, while the nation itself is convinced that it is a victim of aggression. Fifty Governments may be genuinely convinced that the fifty-first is hopelessly in the wrong, while at the same time the fifty-first Government may be firmly convinced that it is absolutely in the right. It is in anticipation of such a possibility that most Governments will shape their policy in future in such a way as to encourage the tendency towards economic self-sufficiency of their countries.

This tendency had already made considerable progress during the War and still further progress during the crisis. Since 1931 the restrictions imposed upon foreign trade and transfers have led to a considerable decline in the degree of the international division of labour which was held out by nineteenth century economists as the ideal which the world should endeavour to attain. As a result of the inauguration of the system of economic sanctions, the economic and financial influences making for isolationism will now be reinforced by political influences. The latter usually prevail in shaping the policy of a country, even if they conflict with economic and financial interests. If they work in the same direction as the latter, then their victory is certain.

Industrial nations will in future concentrate their efforts upon producing as much as possible of their own food and raw material. To that end, agricultural production will be artificially encouraged and research for the invention of synthetic raw materials will be financed on a large scale. It is said that the application of sanctions against Italy has already led to the invention of synthetic cotton. There can be no doubt that the production of artificial substitutes for oil will be encouraged in every country which has no natural oil supplies. On the other hand, raw material producing countries will endeavour to establish industries which would supply them with the requirements of national defence and with other essential manufactures. The endeavours of industrial countries to increase their production of raw material and food stuffs and those of primary producer countries to become industrialised will create a vicious circle. Since the industrial countries will reduce their purchases of certain raw materials and food stuffs, the agricultural countries will have to reduce their imports of manufactures; since the agricultural countries will become increasingly industrialised, the manufacturing countries, being unable to sell their output, will be compelled to reduce their imports of raw materials and food stuffs.

What we have hitherto described is the fundamental effect of economic sanctions in the long run. Needless to say, it will take years before industrial countries can increase materially their own production of oil, cotton, etc., and before agricultural countries can make further material progress towards industrialisation. In the long run, there will be, unquestionably, a contraction of international trade as a result of the progress towards self-sufficiency. In the meantime, however, the chances are that the policy of sanctions will produce a considerable rtvival of international trade. Most industrial nations will feel they cannot afford to wait until they can increase materially their own production of food stuffs and raw materials. They will hasten to acquire large reserve supplies of their own. Already there is an increased demand for oil on the part of countries other than Italy. Before long the surplus oil stocks will have been absorbed by this extraordinary demand and there will be no need to restrict production. The same will hold good, though possibly to a less degree, concerning other essential raw materials. In particular, the metals, which can be used for armament purposes, are likely to be in strong demand, apart altogether from covering the immediate requirements of rearmament. Within a few years a large number of Governments will have acquired substantial raw material reserves.

The question is how these abnormal purchases will be financed. Some of the countries, such as France, can afford to pay for the excess imports in the form of gold. Others, however, are not in such a favourable position, even though in many instances the idea of replacing part of their inadequate gold reserves by raw material reserves will find practical application. In the case of Germany there can be no question of payment in the form of gold since the German gold reserve is negligible. She can import only if she is able to export. For this reason alone, Germany will concentrate upon stimulating her export trade. Ever since the advent of the National Socialist Government until the middle of 1935, the German economic policy aimed at stimulating home trade even at the cost of sacrificing foreign trade. During the last few months, however, this policy has suddenly become reversed. Having re-armed to a large extent and having reduced unemployment con-

EXCITEMENT IN SILVER

CHANGES IN AMERICAN POLICY ?

DEMOCRATS & THE CONSTITUTION

By Francis Williams

London, Dec. 9, '35.

We may, I think, see quite a lot of excitement in the silver market before long.

On the day of writing the silver brokers of London were later than almost ever before in fixing the silver price, in consequence of uncertainty regarding American policy. And judging by the fall which has taken place, those who have been gambling on a continued rise in silver prices are likely to burn their fingers.

Moreover, I gather from American sources that the Roosevelt Administration is now very substantially troubled regarding the outlook.

Having by their high silver price policy virtually forced China off the silver standard on to a managed currency system with paper for internal circulation, Mr. Roosevelt and his silver friends are now getting worried as to what effect China's new policy is likely to have on the international silver market.

What particularly hits them is that, if China is successful in establishing a managed currency standard, the huge silver stocks held in China will be a factor to be reckoned with.

For in such circumstances the United States will have to face the fact that China has huge quantities of silver which she can sell as freely as she wants in world markets without injury to her internal structure.

This fact has already caused the National City Bank of New York to devote a substantial amount of consideration to the problem ; and their conclusion is that, should China elect to dispose of her vast silver hoards, the effect upon silver would be catastrophic.

In their words, either the United States Treasury would be forced to hold the bag—enabling China to unload at high prices—or the whole scheme for raising silver prices would collapse.

Poor Roosevelt, who has had N. R. A. and A. A. A. forcibly taken from him by the Supreme Court, may, therefore, find his silver policy shattered by this altogether unexpected monetary independence on the part of the Chinese. Not a very pleasant outlook for a politician, who is now beginning to get prepared for the next presidential election.

Incidentally, while we are touching on America, British speculative investors are sending their money to Wall Street in increasing amounts. I think they are right, for those, who want substantial capital appreciation, are, I believe, much more likely to get it in Wall Street than in London over the next few months.

Roosevelt, I have it on pretty good authority, is now determined to let Wall Street have its head for a bit in the hope that the boom will help general industrial recovery, or, even if it does not produce actual recovery, create a general feeling that recovery is on the way and thus help him in his presidential fight.

He seems, indeed, likely to need as much help as he can get, for, so far from the political prophets expecting him to sweep the country, if he goes into the fight with an attack on the Supreme Court and a demand for an amendment of the Constitution as his principal armaments, I understand very reliably that the Republican Chiefs themselves are anxious that the Constitution issue shall be the main one at the Election believing that, as defenders of the Constitution, the Republicans would have a better chance of being returned than on any other platform.

(Continued from previous page).

siderably, here was no longer the same need artificially to stimulate internal trade. At the same time, the decline of export trade began to make itself felt. Germany was not in a position to buy a sufficient amount of butter, meat and other essential food stuffs. She was compelled to slow down her internal expansion because she was unable to buy a sufficient amount of raw materials. For this reason, Herr Hitler adopted Dr. Schacht's policy of concentrating upon export trade at the expense of internal trade. Within the next few years Germany will increase her exports by hook or by crook, not merely in order to be able to import the food and raw material for current requirements, but also in order to be able to build up large reserve supplies.

Those in favour of the policy of sanctions hoped that it would serve as a warning to other nations who may have harboured intentions of conquest. The Italian experience certainly did serve as a warning to Germany, but not quite in the sense that was expected. Unfortunately, fear of sanctions is not likely to deter Germany from pursuing a policy of aggression. All it has done is to make her realise the necessity of preparing adequately to resist the economic siege. Inadequate as the result may be, it has its use in that it tends to postpone the moment when Germany feels she is ready to strike. In addition to military rearmament, she will have to carry out economic rearmament before she is likely to use armed force to achieve her ambitions.

INDIAN OXYGEN & ACETYLENE CO., LTD.

WITH Works at Calcutta, Bombay, Lahore, Jamshedpur, Cawnpore and Colombo for the production of Oxygen and Dissolved Acetylene, and with the erection of Works in other parts of India and Burma under consideration, the Indian Oxygen & Acetylene Co., Ltd., is in a position adequately to supply the needs of local industry.

The Company compresses Industrial Gases of high purity and in conjunction with the British Oxygen Company Ltd., London, retails the Rarer Gases.

All types of welding, metal cutting, brazing and lead-burning apparatus are stocked in the various Works, and expert welders are available for the purposes of demonstration and tuition.

OVERSEAS' NEWS: By Air Mail

Week ended Dec. 7

UNITED KINGDOM

THE KING'S SPEECH

Politically the situation at home is serene. The King's speech at the opening of the New Parliament conformed to the convention of a Ministerial declaration of policy. There was little in it not known to the people from the pre-election manifesto and subsequent broadcasts of the Prime Minister. The announcement of a Bill "for promoting the further development of our Civil air communications, both in the country and throughout the Emprie" and of another Bill "for the provision by local authorities in co-ordination with voluntary associations of an organised service of salaried midwives" was a mild approach to the commercial and social schemes which were, in terms of election promises, to bring a new epoch to the electorate. The Prime Minister's elaboration of the King's speech was one of vague generalities, shot through with an undertaking to introduce in the second session of the new Parliament a Bill to revise and consolidate the law relating to the safety, health and welfare of factory workers.

There was no indication of a break with the present foreign policy, on the assurance of which the second National Government was re-elected. The preservation of peace abroad by implementing the League Covenant ; the pursuit of recovery at home by the processes of the past four years ; an increase in the defence forces, without impairing the progress in the Social Services—these, of course, were implicit both in the King's speech and the Prime Minister's commentary. The public would have liked a more precise declaration as to the pace and scope of the Government's policy. Does defence of the League Covenant mean, for instance, a deal with Mussolini or the progressive application of sanctions? How much will re-armament cost? How are the unemployment regulations to be amended?

The most urgent of the Government's new measures is that which will finance the great programme of railway improvements which has been embodied in an agreement between the Government and the four main-line railway companies. It is a programme that will cost £30,000,000. A great variety of improvements is comprised in the programme—electrification schemes, construction of new lines, re-building of stations, modernising of equipment, enlargement of railway premises and the construction of many hundreds of new locomotives and carriages. The beneficent effect on employment and the expansion of demand for material will be distributed all over the country. The scheme is to be pressed forward with the utmost dispatch. The Governments part is to guarantee the principal and interest of a loan of £26,000,000, and this requires legislative sanction.

While the British iron and steel industry is actively employed in practically all departments, there has been a slight decrease in the volume of new business. This, however, is a seasonal movement, and is generally noticeable at the approach of the end of the year. Deliveries against contracts continue to be made on a heavy scale, and in many departments the producing works are unable to keep pace with consumer's requirements. Business in the pig-iron section has been well maintained, and most users are still prepared to book for far forward delivery. The works, however, are so well off for orders that they do not care to accept business for execution after March, 1936. There is a strong demand for semi-finished steel, supplies of which are barely sufficient to satisfy consumers' needs, notwithstanding the heavy output of this class of steel. This branch of the industry is producing at full capacity, and in a number of cases works are unable to accept further orders. Business in finished steel remains active, and the consuming industries are calling for considerable quantities. The demand is principally for the home market, and, although overseas consumers have taken more interest in the market lately, this side of the trade improves only slowly.

The Treasury has announced that all sums received or to be received by the Controller of Anglo-Italian debts in respect of Italian goods imported into the United Kingdom before November 18, 1935, or in transit on that date will be paid into the sterling account referred to in Article 5 of the Anglo-Italian Payments Agreement of April 27, 1935. The sums available in the sterling account will continue to be transferred to creditors in the United Kingdom in respect of debts due from persons in Italy for United Kingdom goods exported to Italy before November 18, 1935, and freights for the carriage of goods exported before the same date between the two countries in British ships in respect of which lire have been or shall be deposited in the lire account referred to in Article 4 of the Agreement.

In order to avoid misunderstanding it is pointed out that debts from persons ordinarily resident or ordinarily carrying on business in the United Kingdom to persons ordinarily resident or ordinarily carrying on business in Italy in respect of the price of goods grown, produced or manufactured in Italy and imported into the United Kingdom must as heretofore be paid to the Bank of England for the account of the Controller of Anglo-Italian Debts and not otherwise. It is also pointed out that it is illegal to export goods to Italy against payment by deposit in the lire account unless the price has been wholly so paid by deposit into the lire account before November 18, 1935, or unless the goods were in course of transit on November 18, 1935.

There has been a small drop in British wholesale prices during the last fortnight, amounting to 0.3 per cent. in the case of the complete index number and 0.5 per cent. in the case of primary products. Wholesale prices have remained on the whole steady, excepting primary products, in which the downward trend has a parallel in the United States, where since the end of September primary products have fallen by 3.9 per cent. The impression left by recent figures is that the rapid advance of the early autumn is giving place to a moderate recession.

The final report of the Census of Production taken in 1930, just published, contains a mass of information concerning changes in the structure and organisation of British industry between 1924 and 1930. It includes, among other data, a detailed analysis of changes in the volume of production, of specialisation and of regional distribution of output, as well as of employment, wages and power equipment. The value of the net output of the textile, leather and clothing trades in 1933 showed a decline and that of chemical and food trades an increase, over 1930. But with the exception of the leather and clothing trades, the value of the net output per person registered an increase, most marked in the chemical and allied industries group. The volume of the output of the textile industry as a whole rose by 21 per cent. between 1930 and 1933. Cotton and woollen and worsted goods show rises of 10 per cent. and 27 per cent. respectively, while the output of the silk and rayon trades increased by 80 per cent. Boots and shoes rose by 8 per cent. and foodstuffs by 12 per cent. The chemical industry produced 21 per cent. more.

U. S. A.

BUDGETS AND BELLIGERENTS

Finance looms large in the political limelight at Washington. The Republican Party is demanding a balanced Budget, with a definite movement of opinion among business men against the theody of Receovery by Expenditure. The Government's neutrality policy has evoked or provoked interesting ripples. The Seccretary of State, who is chiefly responsible for the execution of the policy and, presumably, has the backing of the President, has made it clear that he intends to discourage exports to Italy and Abyssinia, against the strong pressure of commercial interests and the isolationist wing, who support isolation if for no their reason than that it irritates Europe. President Roosevelt made big claims and big promises on behalf of the New Deal in an important speech at Atlanta. "In the light of definite and continued economic improvement, we have passed (he said) the peak of budgetary appropriations. Revenues are increasing without the imposition of new taxes, and we can look forward with assurance to a decreasing deficit."

The credit of the Government, according to the President, is higher than that of any other great nation in the world, despite attacks by those few individuals and organisations who seek to dictate to the Administration and to Congress how to run the National Treassury and let the needy starve. In 1933 the great bankers told him that the national debt might safely be allowed to rise to anything between 55,000,000,000 and 70,000,000,000 dollars. So far 3,125,000 persons have been transferred from the dole to work relief, and work has been found for the remaining 375,000 of the 3½ millions it is proposed to re-employ.

The European situation continues to be the chief factor in Wall Street, despite the President's optimism. Operators took their profits, fearing that the trade improvement, which is to some extent discounted by stock prices, may not materialise if international affairs take a turn for the worse. In view of Mr. Roosevelt's speech, it is interesting to note that Mr. Harry L. Hopkins, the Relief Administrator, has announced the complete liquidation of the Federal Emergency Relief Administration.

The foreign trade figures for October showed no change of trend from those of 1934. Merchandise exports at $221 millions and imports of $189 millions resulted in an export surplus. But exports compared with $206 millions in October 1934, a minor increase; and imports with $130 millions a major increase. Gold imports amounted to $315 millions and silver imports to $49 millions. Combined gold and silver imports, $1,372 millions of 1934. That is, an export merchandise surplus of about $400 millions in the first ten months of 1934 has shrunk to one of about $100 millions.

Against this active trade balance of $100 millions must be set gold imports of $1,337 million, and silver imports of abount $220 millions, a total of $1,568 millions of gold and silver metal, compared with $591 millions in the first ten months of 1934; and an import surplus of $1471 millions in the first ten months of 1935. The figure for 1934 represented a transfer of capital of conspicuous magnitude; the figure for 1935 is more than double that of 1934. That this represents chiefly an influx of European capital rather than a repatriation of American funds is now generally agreed; there is no agreement about the proportion which has been merely left on balance compared with that invested in American securities, but it is recognised that a large amount has taken the latter course.

The continuation of gold imports on a heavy scale, with receipts for the first twenty-eight days of November totalling $161,000,000, and gold en route, or under contract for shipment, reported at $152,000,000, was largely responsible for a further increase in bank reserves and surplus funds. Reserves of member banks are reported as approximately 113 per cent. in excess of legal requirements, the amount of this excess being 3,070,000,000. The existence of this huge volume of excess has raised the issue of inflation; and if not controlled at the proper time it is believed that these excess reserves might constitute a serious menace in the future. The Federal Reserve Authorities have concluded, after a careful consideration of the situation, that the time is not yet opportune for any change of policy. November gold imports and engagements came largely from France. The position of the Bank of France is still very strong, but it is pointed out that the question of the future of the franc is not a question of gold, but of the determination and ability of the French people to effect the internal readjustments necessary to bring French costs and prices in line with cost and prices in other countries whose currencies have been devalued.

Air Mail Week

Mr. Cordell Hull, the Secretary of State, stated the other day that "there is a distinct possibility of an Anglo-American trade pact being negotiated. It appears that there have already been overtures between the two countries. Mr. Hull said formal discussions might begin in the near future, but added that the disturbed state of world affairs might make progress over the preliminary stages very slow. The United States recently negotiated a Reciprocal Trade Treaty with Canada. The possible reprecussions of this upon the Ottawa Agreements have been widely discussed, and it is thought that an Anglo-American Treaty would be regarded as complementary to the Canadian Treaty.

FRANCE

VICTORY UPON VICTORY

For all the hideous nightmare of Cabinet crises and Fascist coups that prevailed for weeks, the country is now wonderfully calm. There is even a shade of positive optimism in the outlook. The Bourse has remained almost steady: Rentes have been slowly raising and the franc has been strengthening on the exchanges. The gold drain is dying up speedily. And all this is due to the confidence that the Government is safe in spite of the Fascist Leagues and the Party intrigues. For between the Right, which regards Colonel de la Rocque as the only rallying point against the red scare, and the Left, which demand a complete suppression of the Leagues, there is the Centre group which regards the Leagues as a menace but only to be restricted and curbed and not abolished. The Communists on the one side, are willing to support a Government which promises to dissolve the Leagues ; but their interest stops at that. They are not prepared to enter the Cabinet and run the administration. The Daladier-Radicals view the Communists with misgivings and have very little zeal for concentrated action. In the face of all these disruptive forces, if the Government is able to win a preliminary vote of confidence and a decided victory in the second round, there is certainly cause for the optimism of the markets. M. Laval's financial policy has been endorsed by the Chamber by 324 votes to 247—a clear majority of 77. The Chamber, as the centre-Radical resolution puts it, observing the temporary character of measures taken, meaning the decree laws, has placed its confidence in the Government to pursue the defence of the franc and calls on it to apply without delay alleviations in favour of small Civil Servants, rentiers and ex-service men.

But the victory was won, not without vigorous debate and condemnation of the Government, as the foregoing might suggest. As it usually happens on such occasions, the Opposition had its tirade against deflation and Paul Raynaud figured prominently. His was a spirited attack, indeed. While condemnation of deflation was almost unanimous, support for devaluation is still very slender. The objection to any monetary change, sentimental though it may be, as some would like to insist, is still strong ; and in this respect the Chamber and the Government are really one. It is, perhaps, the lack of this positive support that accounts for the satisfaction evident in the reply by the Finance Minister. M. Regnier was as spirited in his sally as M. Raynaud was bold in his besiege. The much needed support of the Chamber has been secured, whatever the merits of the question may be. The Radical Socialists, though about half their number remained neutral, have rallied to the support of the Government, and the position of Laval has certainly been stabilised for his fight on the question of Fascist Leagues.

JUTE AND JUTE GOODS

JUTE

Calcutta, December 19, 1935.

There is not any appreciable change in the jute market during the week under review. The market continued quiet but steady and with the exception of a short-lived spurt on December 14, prices were more or less unchanged.

Overseas buyers have taken less interest than last week. Mills are reported to have bought a fair quantity at prices ranging from Rs. 6-6 to 6-10 for Jat Jute.

Upcountry markets are reported to be strong with small arrivals. Small fluctuations are expected during the next one month or so. From the present rate of arrivals it seems that the total arrivals by the end of the present season in Calcutta will be over 80 lakhs of bales, of which about 50 lakhs will be received by the end of December. Those who are holding jute at present seem inclined to dispose off their holdings. Fresh buying in the market is very restricted as the present level is considered high. It is only after the prospects of the next crop are definitely known that the market will take a decided course.

The loose jute section was steady at the beginning of the week when mills appeared as buyers of Indian Jat Fours on the basis of Rs. 6-8 per maund. The market assumed a quieter tone as the Mills withdrew from the market and sellers were anxious for business. Towards the close of the week mills again appeared as buyers of Jat Fours at Rs. 6-8 per maund for selected marks and at Rs. 6-6 per maund for common marks.

The Pucca Bales section ruled quiet but steady and small business was reported with shippers every day. At the beginning of the week Firsts and Lightnings sold at Rs. 37-8 and Rs. 34-8 per bale with 8 annas per bale more paid for Lightning top numbers. Tossa and Daisee for shipment to Dundee were done at Rs. 39-4 and Rs. 37-8 per bale respectively. Towards the close of the week. A small business was reported with shippers for ready shipment in Lightnings at Rs. 34-8, Tossa for Outport at Rs. 37-4 and Hearts at Rs. 29-12.

With the exception of a short-lived spurt there is very little change to report in the *Futka* market. March delivery was opened at a premium of 12 annas over December delivery. There was a sharp rise in prices on December 14, when the highest rate of Rs. 40-6 was touched. Prices subsequently dropped to normal levels and at the time of writing the quotation is Rs. 39-6. Speculators seems to be taking a bearish view.

JUTE MANUFACTURES

Calcutta, December 19, 1935.

The outcome of the deputation of the Indian Jute Mills Association that is going to wait on the Commerce Member to-day is awaited with keen interest by the market. Certain circles are very confident that the Government will give a satisfactory reply to the deputation, whilst others believe that the Government are not likely to commit themselves to any definite action. A favourable reply by the Government may cause some improvement in the situation.

North America continues to be out of the market. There is not much selling pressure in the local market at present as most of the operators are awaiting further developments resulting from the deputation.

At the end of December it is expected that stocks of hessian will be increased by about 2 crores of yards. The scarcity of ready goods is now less acute and the premium is gradually disappearing.

Whatever the outcome of the deputation may be, in view of the expected increase in stocks in the next six months, even at the present rate of production there is nothing to warrant an optimistic view of the hessian market. The only factor that can prevent a decline is a substantial rise in the price of raw jute.

There was not much business done in the market. Ready 40″ 10 oz. were done at Rs. 10-6-6 and Rs. 10-7 basis for December delivery, while Rs. 8-7 was paid for 40″ 7½ oz. for the same delivery.

The heavy goods section continues dull with very little enquiry. A small business was reported in Heavy Cees for April-September at Rs. 22. Cornsacks July/September sold at Rs. 23. At the close December Cornsacks are reported at Rs. 24-8. B. Twills and Liverpool Twills are quoted at Rs. 22 and Rs. 25-4 respectively for December shipment.

Total reported sales for the week ending Saturday, the 14th December, 1935.

COTTON AND COTTON GOODS

COTTON

Calcutta, December 19, 1935.

The course of the Bombay cotton market was easier and irregular during the week under review. Considerable nervousness was witnessed on the part of operators. At the beginning of the week the market assumed a week tone and under pressure of heavy liquidation prices gave way. Broach April/May dropped to Rs. 217 on December 12, but improved at the close to Rs. 218. On the following two days a better sentiment prevailed. Bazar operators thought that the nadir of the downward course was reached and that cotton will be heading for a rise shortly. Scattered buying on better advices from America soon imparted a rising tendency to the market and Broach improved steadily to Rs. 221-8 on December 14. But the rise was followed by a rapid decline on the following day, owing to a revulsion of feeling. Weak advices from America, where speculative activity was dormant owing to the uncertainty of the Supreme Court decision and heavy liquidation by Commission houses and exporters accelerated the downward course. On December 17, Broach April/May touched the low level of Rs. 215-12. Prices recovered slightly at the close on scattered covering, Broach April/May closing at Rs. 216-8. Speculative activity in the market is at a standstill and dealers are hesitant to enter into fresh commitments.

Oomra Dec./Jan. receded to Rs. 195-8 at the commencement of the week, but sharply recovered to Rs. 201-4 again falling down to Rs. 198-4 at the close. Bengal Dec.-Jan. improved from Rs. 149-8 to Rs. 151, but towards the close prices dropped closing at Rs. 147-8.

The uncertainty in the silver purchasing policy of the Government and the consequent debacle, coupled with the general apprehension of an adverse decision of the Supreme Court on Processing Taxes, dominated the New York Cotton market. The market was flooded with selling orders on December 11. Though there was a little amount of trade buying, prices fell sharply under pressure of heavy selling. The March option went down to 11.15, while Middling spot recorded a decline of 30 points closing at 11.80. The market seemed to recover on the following days and on better trade calling prices improved to 11.36 for March option and 12.00 for middling spot. But this recovery was short-lived. New Orleans and South appeared as heavy sellers in the market. There was considerable long liquidation. The demand was poor and was entirely insufficient to avert a recession in prices. Speculative activity was dormant and prices sharply dropped. March option touched the low level of 11.03 and Middling spot receded to 11.65 on December 16. At the close the market was slightly better Middling spot quoting 11.80 and March 11.15, but the outlook is still uncertain, the majority of traders awaiting fresh developments in Washington.

The Liverpool market followed the development in America. Heavy liquidation forced down prices. Though there was a certain amount of trade calling under heavy selling prices declined. Middling spot dropped from 6.57 to 6.39 at the close, while January and March recorded a loss of 20 points declining to 6.16 and 6.15 respectively on December 16. At the close an improvement of 5 points was registered in January and March options.

Indian Cotton Crop

The Government of India, in their third cotton forecast for 1935-36 states that the All-India figures amount to 24,130,000 acres and 5,352,000 bales, which show an increase of 7 per cent. in area and 18 per cent. in yield, as compared with the corresponding forecast (revised) of last year.

PIECEGOODS

Calcutta, December 19, 1935.

Conditions in the local piecegoods market were in no way better than the previous week. The market was dull and uninteresting and the off-take has been on a moderate scale, but was mostly confined to indigenous goods. There was practically no support from upcountry centres. Dealers are, however, hopeful of an improvement in demand. Bazar rates have remained steady on last week's levels.

Indigenous goods are said to have received a fair amount of attention. Mills have booked a good lot of greys, whites and dhooties for delivery from February to April. Stocks with mills are heavy and unless clearances are satisfactory during the next few weeks, the position will be grave.

Fresh business in Japanese goods has been very small. Sales comprise retail lots of grey shirtings and fancy seasonal lines from stocks at current bazar rates.

Lancashire goods received very little attention and transactions of the week were some retail lots of white yarn dhooties, dyed fancy styles and some specialities. Forward business is at a standstill owing to the firm replacing costs.

The yarn section has been active, though the turnover was smaller than last week. The bulk of the business was received by Indian spinners, in which satisfactory sales have been reported in 20s./32s. and 40s. counts single grey for January-February deliver. Spinners have reduced prices in order to attract buyers. Japanese importers have to be content with a small business in 40s. counts grey yarns at reduced rates, while Lancashire spinnings have been practically neglected.

The Bombay market has been weak and demand has been restricted. Prices remained more or less steady. Indian mill made goods received a moderate attention. Demand for Japanese goods has been hardly satisfactory, clearances being confined to retail lots from stocks in white shirtings, white mulls,, shirting prints and some grey Bow and Arrow shirtings. The off-take in British goods has slackened.

BULLION

GOLD

Calcutta, December 19, 1935.

The gold market witnessed an uneventful session. The tense situation in silver and the absence of any encouraging advices from foreign centres were the factors that influened the situation. Trading was totally colourless and no appreciable movement in prices was witnessed. At the close the market was quiet, Ready quoting Rs. 34-13-9, first settlement Rs. 34-13-3 and second settlement Rs. 34-12-3.

The price of gold in London fluctuated within narrow limits. After receding to £7-1-1 from £7-1-2 at the commencement of the week, the price improved at the close to £7-1-3.

The Sterling-Franc rate improved from 74.43 at the beginning of the week to 74.54 and closed at 74.35. The Sterling-Dollar rate improved steadily from 4.92 9/16 to 4.92 15/16 at the close.

Gold Exports

Bar gold and sovereigns valued at Rs. 80,92,806 and Rs. 1,09,333 respectively were shipped from Bombay to America and Europe on December 14 by the s. s. Corfu. Of the bar gold Rs. 30,76,544 worth was for London optional New York, Paris, Amsterdam; Rs. 1,71,654 worth was for New York optional London, Paris, Amsterdam; and Rs. 8,39,958 worth was for New York via London. The balance of Rs. 40,04,560 worth bar gold was shipped to London. The consignment of sovereigns was for London.

The total value of gold exported from Bombay since Great Britain went off the gold standard is Rs. 2,55,45,06,057.

The total exports of gold from the United Kingdom for the week ended December 6, 1935 amounted to £1,350,000 of which £1,064,000 was shipped to France and £243,000 to the Netherlands. The total imports of gold into the United Kingdom for the same week amounted to £4,881,000 of which £1,798,000 was shipped from South Africa and £2,104,000 from France.

London—Air Mail week ended December 4.

The Bank of England gold reserve against notes amounted, amounted to £197,632,279 on the 27th November as compared with £197,189,063 on the previous Wednesday.

Purchases of bar gold announced by the Bank during the week amounted to £776,891.

About £1,500,000 of bar gold was dealt with at the daily fixing during the week ; there were one or two special orders in the market and prices have been maintained at a premium over gold exchange parties.

Although the political crisis in France is not yet at an end, there has been an abatement of the drain of gold from the Bank of France. As compared with the return for November 15th, that for November 22nd shows a reduction in the gold holding of about £18,200,000, but withdrawals since have been on a very much smaller scale.

The following were the United Kingdom imports and exports of gold registered from mid-day on the 25 November to mid-day on the 2nd December :—

Imports.	£
British South Africa	1,432,950
British West Africa	148,203

SILVER

Calcutta, December 19, 1935.

The uncertainty regarding the silver purchasing policy of America is a conundrum to the market. No important change has taken place in the situation and the deadlock continues. Mr. Morgenthau's statement that the silver purchasing policy of the American Treasury is on a twenty-four hour basis and that the price question will be a factor in the Treasury's present tactics, has addded to the nervous disposition on the part of operators in London as well as in Bombay. America has been buying only a fraction of the offerings in London, thus forcing down prices every day. Throughout the past week London fixations had no forward rates to quote.

As a result of the emergency measures taken by the Board of Directors of the Bombay Bullion Exchange prohibiting transactions in silver below Rs 58-8 for first settlement and Rs. 58-11 for second settlement, quotations remained at the above levels on the 12th and 13th December. Thereafter no settlement rates were quoted. The rate for ready silver was steadily dropping day by day, which was quoted as low as Rs. 52-8 towards the close. Trading was practically neglected and operators generally are unwilling to enter the market pending a definite announcement by the United States Government regarding their purchase policy. In certain quarters it is believed that pressure may be brought upon the Treasury for remonetisation of silver at the next session of the Congress in January. Absolutely no business was transacted in the market on the closing day and no official quotations were available, as the ready market has been closed.

The Bombay market is demoralised in the absence of any buying and with sellers predominating. There is a certain amount of uneasiness in the market owing to the approach of the settlement which is due on December 23. An emergency meeting of the Board of Directors of the Bullion Exchange was called on December 18 to devise ways and means to avoid a fresh crisis in the approaching settlement. After long deliberations the proposal to reduce the minimum prices fixed was rejected. The situation is still critical and the extent of losses will be revealed with the advent of the settlement date.

There was general selling in London. America was a buyer to the extent of 18 per cent. of the offerings on the 12th and 13th December at 26⅞d. per ounce for spot silver. Heavy offerings accumulated towards the latter half of the week and American Treasury restricted its buying to 5 per cent of the offerings at steadily receding prices up to 24⅞d. At the close the spot rate receded to as low as 23d.

The rate of spot silver in New York declined steadily during the week to 58¾ cents, *i.e.* a drop of 5 cents as compared with the closing rate last week. The London-Shanghai T. T. fluctuated between 1-2 15/32 and 1-2 15/16, closing at the latter rate.

A large consignment of silver was shipped by the S.S. *Corfu* on December 14. Of the 9,762 bars that were sent to London 9,336 bars were on Government account, and 426 bars on private account. Another consignment of 1,982 bars was shipped to New York by President Adams. The total value of the silver exported during the week-end is Rs. 1,71,89,789.

The total exports of silver from the United Kingdom for the week ended December 6, 1935 amounted to £2,756,000 of which £2,734,000 was shipped to the United States of America. The total imports of the metal into the United Kingdom for the same week amounted to £574,000 of which £436,000 was shipped from Japan.

London—Air Mail week ended December 4.

During the week movements in the dollar exchange influenced the price at which the American Treasury made their purchases in the London Market and the cash price varied between 29.3/16d. and 29.1/4d. The two months price was unchanged at 28.7/8d. until to-day when it declined to 28.13/16d.

Purchases for America continued steadily and there was further China selling ; re-selling by the India Bazaars was also in evidence, but there was a little buying for the same quarter as well as some carrying forward of bull commitments.

The dollar/sterling exchange may continue to be a factor, but no wide variation from the present level is anticipated in the near future.

The following were the United Kingdom imports and exports of silver registered from mid-day on the 25 November to mid-day on the 2nd December :—

Imports

TEA

CALCUTTA AUCTIONS

Calcutta, December 19, 1935.

The total offerings at the sales on December 16 of teas for export amounted to about 22,500 packages of which about 19,300 packages sold at the average rate of 9 annas 2 pies, as compared with 8 annas 6 pies during the corresponding sale of last year. The offerings included a few attractive liquoring autumnal Darjeeling invoices. Quality generally showed a little improvement. There has been a good general demand, particularly for the best liquoring teas and leaf grades free from stalks. Last week's prices were fully maintained except for medium B. O. Ps. which were slightly easier.

At the auctions of teas for internal consumption, the total quantity submitted for sale amounted to about 15,200 packages of which 6,700 were Dusts and the remaining leaf grades. There was a good demand for all descriptions of Dusts and prices for practically all descriptions were about 3 pies dearer. Leaf grades with stalk were rather easier. There was a good general enquiry for all other grades at last week's rates.

The following are the full particulars of sale No. 27.

Teas with Export Rights.

LONDON AUCTIONS

The total offerings of teas at the London auctions for the week ending December 19, 1935, comprise 43,800 packages of Indian and 18,000 of Ceylon teas. There will be no sales of Java teas for the week.

Indian Tea.

At the auctions on December 16, the total number of packages submitted for sale amounted to 28,300. There was a good general demand for all descriptions, except for low quality teas, which were easier occasionally. Prices generally did not show any change from last week.

Ceylon Tea.

The market for Ceylon teas was firm at the auctions on December 17. Quotations were unchanged as compared with last week. There was a good export demand. Good liquoring teas sold well.

The auctions have been closed from December 18 and will be resumed on January 6, when the market re-opens.

Java & Other Teas.

At the auctions of Java and other teas (including Sumatra) on December 12, the total teas submitted for sale amounted to 5,3000 packages. The market was quiet. Tippy teas were irregular and flavoury sorts were sometimes dearer. Other quantities were steady.

Tea Average.

The following were the average prices of tea in the London market during the week ending December 12, as compared with the previous week :—

	weeke nding Dee. 5	week ending Dec. 12
Indian Tea (Northern) ...	12.61d.	12.56d.
Indian Tea (Southern) ...	12.31d.	12.28d.
Ceylon Tea	13.65d.	13.46d.
Java Tea	12.04d.	12.07d.
Sumatra Tea	10.27d.	10.01d.

U. K. Tea Imports

Imports of tea of all kinds into the United Kingdom, during November, compared with the previous month and with November 1934, were as follows :—

	Nov. 1934	Oct. 1935	Nov. 1935
From British East Indies (except Ceylon)	30,852	44,825	35,128
From Ceylon	7,793	8,785	9,854
From China (including Hongkong and Macao)	2,749	368	849
From other Countries ...	3,954	2,424	2,269
Total amount in Stock ...	279,581	245,483	247,565

000's omitted.

SUGAR

Calcutta, December 19, 1935.

The local sugar market was in no way better than last week. Demand from upcountry centres was poor and the market continued dull and uninteresting with very little business passing. Java Refined Ready recorded a further decline of 1 anna as compared with a week ago and Steamer was quoted at Rs. 10 at the close. Java White Ready and Steamer closed at Rs. 9-12-0.

In the Desi section White 1st Crystal was quoting Rs. 9-8 to Rs. 9-10, while Brown 2nd Crystal was quoted from Rs. 8-12 to Rs. 9.

Imports of sugar into India continues at a rapid pace in spite of the fact that the production of indigenous concerns are almost equal to the internal consumption. In the last budget estimate the imports of sugar during 1935-36 was estimated by the Government of India at 90,000 tons. It is surprising to find that imports of sugar have far exceeded the expectations of the Government, amounting to 1,23,283 tons from April to October, 1935. At this rate the total import of sugar is expected exceed 1,50,000 tons before April 1936, which is over 65 per cent. of the Government's estimate.

The Bombay market continues quiet and easier with very little business passing. Dealers are anxious to dispose off their stocks but the demand is poor.

Stocks in the main parts are as follows :—

(In bags: 10 bags=1 ton)

	1935		1934	
Calcutta ...	(12th Dec.)	60,762	(14th Dec.)	20,980
Bombay ...	(13th Dec.)	135,000	(24th Nov.)	58,000
Karachi ...	(13th Dec.)	101,500	(14th Dec.)	38,500
Madras ...	(9th Dec.)	29,500	(10th Dec.)	3,500
Rangoon ...	(9th Dec.)	10,300	(10th Dec.)	3,240

MISCELLANEOUS

WHEAT

Calcutta, December 19. 1935.

The local wheat market declined at the beginning of the week on advices of rain in the Punjab and United Provinces, where wheat areas have been badly in need of rain. Sellers of both actuals and Beta appeared with large orders. Punjab and Cawnpore ready declined to Rs. 3-9-6 and Rs. 3-7 quoted for May Beta. Later on, strong advices from Chicago and Argentine caused some amount of buying and sellers were reserved. Prices improved by 1 to 1½ annas. At the close the market was steady, Ready quoting Rs. 3-9-6 and May Beta Rs. 3-8.

In Bombay, the market was active and on speculative buying prices flared up Delhi-Cawnpore May Beta touching the close a steady undertone was witnessed, Ready quoting Rs. 4-10-6. The market was free from selling orders. At Rs. 4-9-3 and May Beta Rs. 4-9-9.

The Karachi market was easier at the beginning of the week on weak upcountry advices and local liquidation. Later on bullish advices from abroad imparted steadiness to the market and prices improved. Spot sales last week totalled 20,000 bags, of which 10,000 bags were purchased by Calcutta merchants. Arrivals from upcountry averaged 2,500 bags a day and last week's shipments amounted to 23,005 bags, all for Calcutta. Stocks on hand are estimated at 2 lakhs of bags.

The import and export figures of wheat for the three main British Indian ports as given in the Indian Trade *Journal* from April 1 to December 14, 1935, as compared with the corresponding period of last year are :—

Imports—

	(In tons) 1935		(In tons) 1934	
	Indian	Foreign	Indian	Foreign
Calcutta ...	152,893	...	164,454	2,968
Bombay ...	111,075	...	125,659	...
Karachi ...	212,751	84	313,691	...

Exports

	1935	1934
Calcutta	12	100
Bombay	1,193	916
Karachi	7,691	9,249

Regarding the overseas market there was a sharp rise in Chicago and London. The Argentine Government passed a decree raising the minimum prices of wheat and linseed from 5.75 to 10.00 and from 1.50 to 14.00 respectively owing to failure of crops and this was responsible for the buoyancy. On receipt of the above advices prices in Chicago flared up to $1.01 5/8 for January and $1.00½ for May on December 13. The market assumed an easier tone on the following day causing a slight decline owing to profit-taking. At the close the market was steady, January quoting $1.01 3/8 and May 97 7/8 cents. Rosafe parcels in London improved from 27s. 6d. to 33s. 6d. at the close, while Australian wheat improved to 30s. but closed at 29s. 9d. The world demand for wheat is showing signs of improvement and there has been recently a fair Continental enquiry for Argentine wheat. The Argentine Ministry of Agriculture has issued an official report revising the acreages under wheat to 14,208,000 acres, as against the previous estimate of 14,085,000 acres.

MADRAS MARKETS.

Madras, December 17.

PIECE-GOODS AND YARNS :

There has been some improvement in clearances of piecegoods generally, and some upcountry demand has been in evidencee. Replacing costs show considerable advances and are well above current bazaar prices. Forward business is thus hampered by the stronger position in Manchester. Yarns continue to rule quiet though prices remain more or less unchanged.

METALS

The market for Yellow metal and Copper sheets is easier, and present quotations are Rs. 114 per candy for Yellow metal and Rs. 174 for Copper sheets.

GROUNDNUTS

The Groundnut market has rapidly advanced during the week, and the tone is very firm. London quotations for Coromandel Machined opened at the beginning of the week at £13-8-9 December Sellers and £13-5 January sellers, and spurted to £13-12-6 and £13-7-6 for December and January positions respectively in mid-week. Subsequently, there was a further advance of 5s. per ton, and at the close prices stood at £13-17-6 December sellers and £13-12-6 January sellers. Shippers' buying limits opened at Rs. 32-8 and Rs. 33 for Machined and Rs. 28 for Ordinary (Per French candy, ex-coast godowns), and advanced rapidly to Rs. 34-12 and Rs. 35 for Machined and Rs. 29-8 for Ordinary (Per French candy, ex-coast godowns) on Saturday last. There was a slight reaction yesterday when prices fell back to Rs. 34-4 and Rs. 34-8 for Machined and Rs. 28-4 for Ordinary (Per French candy, ex-coast godowns). At Pollachi, the close-season is at hand, and prices stand at Rs. 29 and Rs. 29-2 for ROSE quality Machined and Rs. 28 and Rs. 28-2 for RED quality Machined (Per French candy, ex-Pollachi godowns). The Main Winter crop has begun to move in nearly all that main centres of the Presidency and in Mysore state, except in the Kondapuram area. Dharmavaram, Hindupur, Guntur, Bezwada in the Circars, the Mysore and southern centres report free arrivals, and shippers are reported to be buying largely up the line and in the Vizianagram area. It is reported that the Kondapuram crop wlil be available for shipment about the middle of January.

There has been a marked increase in bookings on the Kernel Freight market during the week. December space to North continental ports was taken up at 25s. and 26s. 3d. (Per ton of 20 cwts), and a filling up order to Marseilles was reported at 24s. Space to Italian ports and Marseilles for January loading is quoting at 26s. 3d. per ton of 20 cwts.

Arrivals of Groundnut kernels into Madras for the week ended December 14, 1935 amounted to 37,784 bags or 2,975 tons, against 29,445 bags or 2,318 tons in the preceding week, and 19,958 bags or 1,571 tons at the corresponding week of last year.

JUTE BREVITIES

Air Mail advices from London report that since Madras offers for Kips are mostly 1½d. per lb. over minimums, buyers are not operating most Curriers having covered their requirements for the time being. Some small sales have been made probably of purchases made some time ago at 1d. over minimums. Business in Kips is not at the moment possible above the bases of 13¼d. for 5/5½ lbs.

Prime Bangalores, 11½d. for 7/7½ lbs. Pure Coconadas, 12½d. for 6/6½ lbs. and 11¼d. for 8/8½ lbs. Regarding the reported move on the part of Madras shippers and Dealers to raise the minimu mbasis, London buyers urge that the minimum prices be left alone and the market allowed to find its own level. The local Tanned Cow market continues to rule steady though a quieter tone prevails. The RAMZON month is generally marked by slack business conditions in the local Hides market, but even so there has been no dearth of buying in the bazaar. London buyers are disinclined to increase their bids and are, of course, buyers on their own terms. Arrivals of Tanned Cow hides into Periamet are none too plentiful. The Raw Hide market is very film. Dry hide season has just begun and present arrivals are weighty, probably due to the partially wet condition of the hides. Dacca dry salted are quoted at Rs. 5 to Rs. 5-8, Dharbangas at Rs. 6, Purneas at Rs. 6-8 and Kishenganj at Rs. 8-7 per 20 lbs. Chowri Chowras (9/10 lbs.) are quoted at Rs. 22 and *Murdali Firma* at Rs. 25 to Rs. 26 per maund of 80 lbs. *Pachan Halali* are quoted at Rs. 8 to 9-8 per 20 lbs. 9 pies to 7 as per lb. The fall in American demand is responsible for the decline in prices from about 8 as. to 6 as. 9 ps. There is a brisk demand for Tanned Buff Calf skins, but arrivals are scanty. Tanned Cow Calf are also in fair request with poor arrivals. There has been a better market for Tanned Goat of which Fourths and Fifths are in good demand. Arrivals are, however, poor. Tanned Sheep have, since the auctions, been a slow market, and fresh business in original bales with London is difficult to negotiate.

The following shipments of Hides and skins were made from Madras to Europe and America for the week ended December 12, 1935:—To the United Kingdom: Raw Cow hides 21 bales, Raw Goat 142 bales, anned Buffalo 113 bales, Tanned Cow hides 1,125 bales, Tanned Cow Calf skins 64 bales, Tanned Buff Calf 5 bales, Tanned Goat 272 bales and Tanned Sheep 272 bales. To France: 27 bales Tanned Goat and 8 bales anned Sheep. To Germany: 10 bales Tanned Sheep.

Indian Finance

Investor's Supplement

Vol. XVI. No. 24 SATURDAY, DECEMBER 21, 1935 Price Re. 1

YOUR INCOME
FROM 52 GREAT BRITISH
INDUSTRIAL COMPANIES

Do you know that by investing about £22 upwards in the THIRD and FOURTH BRITISH FIXED TRUSTS you can become part-owner of 52 GREAT COMPANIES and thus safeguard your capital by spreading it over the leading branches of British Industry?

The 52 Companies are divided into two groups or "Units"—28 in a "THIRD BRITISH" Trust Unit and 24 in a "FOURTH BRITISH" Trust Unit.

THE BRITISH FIXED TRUST Sub-Units provide investors abroad with :

(1) **A SOUND LONG-TERM INVESTMENT** in the form of a Bearer Certificate.
(2) **REGULAR QUARTERLY DIVIDENDS** collected and distributed by the Trustee.
(3) **EXACT KNOWLEDGE** of what they hold and its day-to-day value.
(4) **A MARKETABLE SECURITY.**—All the shares are quoted on the London Stock Exchange.
(5) **PROSPECTS** of capital appreciation and increased dividends as trade revives.
(6) **SERVICES** of : (a) The Trustee—LLOYDS BANK LIMITED
(b) Auditors—PRICE, WATERHOUSE & Company
(c) MANAGERS with limited powers.

Ten Sub-Unit Certificates and upwards (costing around £11) may be purchased in either of the Trusts. The buying and selling prices of the Sub-Units are based on the current market prices of the constituent shares. You may sell your holding at any time you may wish to do so. British subjects not resident in the United Kingdom holding British Fixed Trust Sub-Units are entitled to claim repayment of British Income Tax under certain conditions, particulars of which are given in the booklet.

Coupons may be presented for encashment at the current rate of exchange at the undermentioned Branches of Lloyds Bank Limited.

Write for explanatory booklet and daily quotations to LLOYDS BANK LIMITED at: Bombay, Calcutta, Karachi, Rangoon, Amritsar, Delhi, New Delhi, Lahore. Rawalpindi, Simla, Srinagar (Kashmir),

to the undermentioned Brokers:

Huson Tod & Co., Chartered Bank Bldgs., P.O. Box 122, Madras; Lewis & Jones, Bank of Baroda Bldgs., Apollo St., Fort, Bombay; Place Siddons & Gough, 32 Dalhousie Sq., Calcutta; Mahony & Co., Grahams Bldgs., 80 Strand Rd., Rangoon.

Indian Finance

Investor's Supplement

A HAPPY NEW YEAR TO YOU

Appropriate to the season, we wish all investors every manner of good luck in the New Year.

By all tokens, discriminating investors should do well in the New Year. They should, however, revise their earlier ideas of yields. Gone are the days—gone for ever, we think—when giltedge could yield 5 per cent. or even higher, semi-giltedge could yield roundabout 8 per cent., and good equity shares could yield roundabout 10 per cent.

For all good borrowers, particularly good governments, borrowing rates have come down permanently. Except for a world cataclysm, States of unimpeachable standing should be able to secure their loan requirements at below 3 per cent. ; and other borrowers could borrow correspondingly cheaper.

Various factors have tended to bring about this marked decline in borrowing rate. For one thing, amounts available for giltedge investments have vastly increased in recent years. Due to the vogue of States and Central Banks maintaining foreign balances (even despite reverses caused by depreciated currencies) and due to the enormous expansion in the resources of insurance companies, trusts and other investment institutions, giltedge and semi-giltedge have been in the position of demand far exceeding supply.

UNSETTLED MARKETS

(By Special Cable)

New York, December 19.

Markets are unchanged and quiet. Steels are lower.

For another thing, the technique of the authorities in their dealings with the money market has undergone considerable improvement and has gathered greater resiliency and elasticity. Treasury officials, chancellors of the exchequer and Central Bank governors have a surer grip over operations which impinge on the money market. Their intrusion into the market is no longer clumsy or calculated to run counter to intrinsic forces.

A subsidiary factor is the continued trade depression and poor demand for finance on account of trade. Banks all over the world have been witnessing gradual and continuing shrinkage in their advances and bills portfolios. They have had to turn more and more to investments in trustee stocks. Thus have trustee stocks soared higher and higher. Higher giltedge prices have meant the pulling-up of prices of all good-class stocks.

It has, therefore, been argued that, as soon as there is trade revival, there will be a large-scale transfer of investments from giltedge to industrial securities and advances. This line of reasoning overlooks the vastly swollen funds in the hands of investment institutions, Central Banks and States—funds which will be put out only in giltedge.

Even if trade revives, the expansion of credit by central banking institutions is now possible with such smoothness, efficiency and scientific accuracy that as there is demand, there will be supply. We believe that the world technique in finance has so changed that the days of high interest rates are left behind for ever—never to return.

We realise that, in this view, we have but few supporters. All the same, we have, on our part, no doubt that so far as this country is concerned, the borrowing rate of the Government will be roundabout 3 per cent. until and unless the new money which the Government ask for from the market exceeds the annual accumulation of funds earmarked for investment in giltedge and only giltedge.

Our estimate of such savings is Rs. 20 crores per year. So far as we can see ahead for the next half-decade, we cannot visualise a situation in which the Government will need to borrow more than Rs. 20 crores per year in the form of new money. In fact, the new money asked for by the Government in the last three years has been much less than Rs. 20 crores. This year, no new money was raised at all from the market.

This factor is of such fundamental importance that it overshadows every bearish forecast of Jeremiahs.

In our reading of the future in so far as it affects investors, we have this fundamental factor as the basis of our calculations and expectations.

MARKETS IDLE

(By Special Cable)

(From R. Gordon Cummings)

London, December 19.

Political developments are restraining business.

We advise buying North Charterlands. Important developments are pending.

Despite vagaries in the markets in the past two years, our faith in the ultimate destiny of giltedge stands vindicated. Of the intrinsic strength of giltedge we need adduce only two convincing signs:—

1. Two violent landslides in the current year have not prevented giltedge prices soaring, at current rates, to higher levels than have been known at any time. The New Loan issued a bare half year ago at Rs. 96-8 is quoting nearly Rs. 102. A rise of over five points in a medium-dated scrip is no small tribute to the vitality of rupee securities.

2. The debacle of the last fortnight in the silver markets of the world has left giltedge untouched.

We are confident about the future of giltedge and only wish that we can be equally confident of the credit policy and credit programme of the authorities.

The New Year opens amidst the most favourable omens for the Treasury. Let us wish that, both in their own interest and in the interest of investors, they will avail themselves of every favourable influence for the most beneficial purposes.

We wish the Government and you, our dear reader, all that is best and brightest in the year that is being rung in.

INDIA

AMAZING PROGRESS ; MORE AMAZING PROSPECTS

MYSORE SUGAR COMPANY, LTD.

(By "Watch-dog")

Mysore is well-known for its state enterprises. The active and liberal policy of the Mysore State Government has helped the growth of many an enterprise. The Mysore Sugar Company was registered in 1933 and has been working for two years. During this period, it has made amazing progress and the potentialities of the company portend a very big future. More than three important State officials are in the directorate and these guide the policy of the company. The State, besides having a vast stake in the capital, also affords credit facilities for working capital. With other facilities for a sugar factory available and with the special concessions mentioned above, the concern is already one of the leading sugar companies in India.

The capital authorised, issued and subscribed is Rs. 20 lakhs in 2,00,000 shares of Rs. 10 each fully paid up and Rs, 20 lakhs in 6 per cent. debenture bonds of Rs. 100 each, Rs. 80 paid-up, issued in 1934, repayable on 2nd December, 1944, but liable to be redeemed in whole or in part at the option of the Company on or after 2nd December, 1938, on three months' notice.

The Company owns a sugar factory and a distillery at Mandya close to the railway station on the Bangalore-Mysore line. The factory has an operating capacity approximating 1,400 tons of cane per day. The Government of Mysore have allowed the Company to manufacture country spirits, the lease being for a period of 10 years in the first instance. In addition, the Company has the leasehold of 900 acres of Mysore Government land for the raising of sugar crop.

Excellent arrangements with cane-growers have been made. The soil is rich, and the cane grown is of the best type. There can never be a question of shortage of cane. The Company commenced operations in the beginning of 1934. 14,09,558 maunds of cane were crushed and the entire production of the factory was sold.

It was decided to enlarge the capacity of the plant to one of 1,400 tons per day and for this purpose a debenture loan of Rs. 20 lakhs was raised and the entire amount was subscribed to by the shareholders. The milling with the old plant continued till June, 1935 and the erection of the additional plant to increase the capacity of the factory was going on simultaneously with the milling. 18,77,227 maunds of cane were crushed up to this period and the mill was closed down till August end to link it up with the new equipment. The total amount of cane crushed by the end of September 1935 was 22,83,676.

The distillery at Mandya commenced operations from the middle of April, 1935.

Considering the above facts, the year 1936 should prove to be a very good one. The crushing of cane should be in the neighbourhood of 50,00,000 maunds, which is more than double the crushing in 1935—and the distillery is working throughout the year instead of only for six months for the year ending September, 1935.

The profit from manufacture in 1934 was Rs 4,42,820 and in 1935 from manufacture and sale of sugar and distillery products was Rs. 6,03,123. Profits in 1936 should be easily double the profits for 1935 if the company finds out a market for the whole of its output as it has been doing hitherto. That the Company declared a 10 per cent. dividend even in the first year speaks well of the concern. In the second year, there has been a bonus of 1¼ per cent. in addition to the 10 per cent. dividend. In the third, it should be more. Even putting the depreciation charges, transfer to reserve and debenture sinking fund, etc., at the figure of Rs. 8 lakhs, there should be left for distribution Rs. 4 lakhs, out of which they can easily declare 15 per cent. dividend against 11¼ per cent. in 1935. In 1937, they may find it easier to declare a still higher dividend. At the present price of around Rs. 27½, the yield on the shares is only 4.1 per cent., tax-free, but they are worth buying on prospects, which seem definitely assured.

The balance-sheet position is given below:—

The ordinary capital paid-up is Rs. 20 lakhs in 2,00,000 shares of Rs. 10 each paid-up. The debenture capital is Rs. 20,00,000 in 6 per cent. bonds of Rs. 100 each, Rs. 80 paid-up.

Reserves are Rs. 72,015 against Rs. 22,015.

Sundry liabilities are Rs. 7,26,175 against Rs. 3,87,423.

On the assets side, the gross block value of Rs. 32,75,892 is depreciated by Rs. 2 lakhs to Rs. 30,75,892. The gross block value in 1934 was Rs. 17,61,020.

Stores and spare gear are Rs. 1,93,746. Stock-in-trade is Rs. 67,636.

Crops-in-progress at cost Rs. 3,60,021. Book debts are Rs. 87,205 and advances and deposits are Rs. 7,35,338.

Cash and other balances are Rs. 2,73,951.

The total liquid assets are Rs. 17,17,997.

The profits for the year ended September, 1935 are Rs. 6,04,417 against Rs. 4,43,471. Rs. 1,19,135 against Rs. 80,865 has been written off for depreciation and the dividend has been maintained at 10 per cent. but a bonus of 1¼ per cent. has been declared in addition, both being free of tax.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

The subject of outstanding importance for the week under review is the annual report of the Peninsular and Oriental Steam Navigation Company, and, in a smaller way, that of one of the biggest of its subsidiaries, British India Steam Navigation Company. As promised in my concluding note of last week, I am giving a detailed analysis of the P. & O. accounts.

Dividend statements of four of the Indian railways are also dealt with, together with a further batch of Tea Company interim dividends.

* * *

Peninsular and Oriental Steam Navigation.

Shortage of time last week precluded me from giving little more than the barest details from the report of the Peninsular and Oriental Steam Navigation Company for the year ended September 30th, 1935. Before giving details of the latest figures it will be well to briefly indicate the ramifications of the Company and its subsidiaries.

Although owning directly only 37 vessels, having an aggregate gross registered tonage of 459,612, the total number of steamers owned by the whole group is 257, with a gross registered tonage of 1,546,077. The subsidiaries controlled by the P. & O. are the British India Steam Navigation, Orient Steam Navigation, New Zealand Shipping, Union Steam Ship of New Zealand, Hain Steamship, and General Steam Navigation Company. The Company has a contract with the British Government for the carriage of mails between Europe and the East. During the past year three vessels were sold for breaking up, but a new and up to date vessel, the *Strathmore*, was completed in September last.

Dealing first of all with the profit and loss account this shows, in comparison with the corresponding figures for 1933-34, a fall of £147,217 to £1,054,862 in net receipts from voyages. As against this decline there is an increase of £48,488 to £647,958 in interest and dividend received, while the surplus credit on Income Tax account is higher by almost £96,000. In order to provide depreciation at the rate of 5 per cent. on the cost of steamers and to meet the 5 per cent. dividend on the £3,040,000 issued preferred stock, it is necessary to credit profit and loss account with a transfer of £450,000 from debenture redemption reserve. There is also included to the credit to profits a sum of £43,908, being the surplus on sale of steamers. In the previous year £550,000 was transferred from reserve towards depreciation, while a net sum of £33,215 was credited from profits on the sale of the Company's holding of ordinary shares in Wm. Cory and Son.

The net result of the years transactions is a credit balance of £156,999, which goes against a corresponding credit of £151,269 in the previous twelve months. The preferred dividend takes £152,000, leaving a credit of £158,885 to carry forward, compared with a balance of £153,886 brought in.

A clearer conception of the revenue position is obtainable by re-drafting the profit and loss account, showing profits before depreciation, together with the various credits from reserves, etc., for the past three years ended September 30th, 1935. The figures are as follows:

	1935	1934	1933
	£	£	£
Gross Profit	1,449,756	1,447,880	1,519,659
Less Interest, etc. ...	467,721	481,908	607,363
Profit before depreciation ...	982,035	965,972	912,296
Less depreciation ...	1,318,944	1,397,918	1,405,197
Net Loss	336,909	431,946	492,901
Less capital profits ...	43,908	33,215	13,272
Less from reserve ...	450,000	550,000	656,971
Profit per report ...	156,999	151,269	177,342

It will thus be seen that for the last three years nothing, even after allowing for the transfers from reserves, has been earned on the £4,592,518 issued deferred stock, which has not received any dividend since 6 per cent. free of tax in respect of the year to September 30th, 1931.

In one of my earlier articles, which appeared in the February 16th issue of *Indian Finance*, I drew attention to the ultra-conservative depreciation policy followed by the directors. At that time I particularly pointed out that it would be possible for the P. & O. to meet depreciation either out of reserves, or by only allowing amortisation at say 5 per cent. on the then written down value of shipping assets.

When calculating the effects of such a policy on the deferred shareholders I pointed out that it would be easy to distribute a dividend of 5 per cent. free of tax on the deferred stock. The chairman, at the last meeting, stated, in reply to the criticism of one prominent shareholder, that this matter would receive the attention of the board during the current year. Unfortunately, for deferred stockholders the directors have decided not to deviate from their previous conservative policy.

Examination of the latest balance-sheets, more especially the consolidated statement covering the affairs of the whole group, clearly demonstrates that the directors would have received praise rather than criticism if they had decided to provide only a nominal amount for depreciation during the last financial year. I append figures summarising the parent company's balance-sheet, after giving adjustment to final appropriations, and also comparative figures as at September 30th, 1934:

	1935	1934
	£	£
Assets—		
Steamers, etc.	12,636,745	13,029,406
Freehold Properties	811,525	803,840
Investment—Subsidiaries ...	10,596,401	10,592,200
Other companies	771,453	808,707
Liquid Assets	9,621,412	10,064,180
Total ...	34,437,536	35,298,333
Liabilities—		
Capital	7,632,518	7,632,518
Debentures	7,364,560	7,427,560
Loans, Creditors, etc.	15,581,573	15,934,369
Reserves	3,700,000	4,150,000
P. & L. Balance	158,885	153,886
Total ...	34,437,536	35,298,333

On the present basis of calculating depreciation, disclosed reserves would be sufficient to cover the charge for almost three years to come. Alternatively, if the reserve fund was used immediately to write down the value of steamers these would appear at under £9,000,000. Perhaps these two courses might not appear justified if applied to the above balance-sheet.

A much stronger case is provided, however, by the consolidated statement. This shows the combined fleets at a net valuation of £26,929,460, after deducting accumulated depreciation of £55,786,595, or over £6,000,000 more than would have been required to write off annual depreciation of 5 per cent. on cost price. The other side of the balance-sheet reveals free reserves and profit and loss balances of £21,253,165, all of which are applicable to the P. & O. investment, this total excluding a further £2,238,159 representing the proportion of accumulated profits attributable to ordinary capital held by the public.

A simple calculation thus demonstrates that if the first of the above mentioned reserve figures was deducted from the balance-sheet value of the fleet, this could be written down to under £5,700,000, whereas if the profits attributable to the publicly owned capital were similarly utilised we would arrive at a net figure of below £3,500,000.

Moreover, the liquid position is so strong—floating assets of £22,373,084 comparing with total outside liabilities of £10,122,844—that the payment of small deferred dividends during adverse trading periods would do little harm to the general financial position.

* * *

British India Steam Navigation.

The report of this subsidiary company of the P. & O. for the twelve months to September 30th, 1935, discloses net profits of £144,855, as against £144,951 in 1933-34.—The figures for the past year include capital receipts of £37,643 and transfers of £85,483 from provisions for liabilities not required, and are struck after providing £412,000 (£217,000) for depreciation. Profits are hardly sufficient to meet preference dividends, so that the ordinary capital goes dividendless for the third successive year.

* * * *

Indian Railway Announcements.

The report of *Assam-Bengal Railway* for the twelve months to March 31st, 1935, states that total receipts were Rs. 1,92,08,013, against Rs. 1,73,11,354 in the previous year, and working expenses were Rs. 1,42,69,939 (Rs. 1,34,95,358). Taking the company's own lines separately, net earnings were Rs. 49,38,074, or 2.11 per cent. on capital expenditure.

Net receipts in England on account of surplus profits are increased by £11 to £1,827. The £1,500,000 capital stock has not received any surplus interest, over and above the 3 per cent. per annum guaranteed by the Secretary of State, since ⅝ per cent. in respect of 1930-31.

Accounts for the half-year to September 30th of the four classes of annuities of the *East Indian Railway* disclose:—

	Class "A"	Class "B"	Class "C"	Class "D"
	£	£	£	£
Net amount from Secretary of State for India, half-year to 31st Mar., 1935 ...	89,066	312,445	58,602	111,812
To taxation	10,873	38,035	7,157	13,595
Expenses ...	687	...	...	...
Payable to registered annuitants ...	77,821	252,278	43,875	83,775
Less expenses ...	1,058	1,302	244	466
Sinking fund ...	...	20,830	7,327	13,977

A final dividend of 7 per cent., together with a 1 per cent. bonus, is declared on the ordinary stock of *Bengal and North Western Railway*. With the interim of 8 per cent. already paid, this again makes a total distribution of 16 per cent. for the fifth successive year.

The dividend on the ordinary stock of *Rohilkund and Kumaon Railway* is also brought up to 16 per cent. for the twelve months to September 30th last, by a final dividend of 6 per cent. and bonus of 4 per cent. In respect of 1933-34 the total distribution was similarly 16 per cent.

Tea Company Interim Dividends.

Little surprise was shown by those in touch with the situation by the announcement that the interim dividend on the ordinary capital of *James Finlay & Co.*, the big East India merchants having extensive interests in tea, jute, etc., was to be reduced from 5 per cent. to 4 per cent. As this company makes its accounts up to December 31st, the figures for 1935 will include the smaller final dividends receivable on its Tea company investments.

Amongst actual tea producers the following table gives the latest interim dividend announcements, together with the corresponding payments a year ago:—

Company		1935	1934
		%	%
Allynugger	...	10	10
Assam-Dooars	...	10	10
Hope Tea	...	5	5
Lankapara	...	2½	2½
Leesh River	...	5	5
Meenglas	...	5	5
Budla Beta	...	2	*Nil*
Buxa Dooars	...	5	2½
Dima	...	2½	2½
British Indian	...	2½	2½
Doolahat	...	2½	*Nil*
Harmutty	...	2½	*Nil*
Sephinjuri Bheel	...	2½	2½
Derby	...	5	5
Isa Bheel	...	5	5
Brahmapootra	...	5	5
Empire of India	...	2	*Nil*
Rajah Alli	...	2½	*Nil*

The first six companies in the above table are under the management of Walter Duncan & Co., the next three are in the R. G. Shaw & Co. group, the next four in the Alex. Lawrie group, and the Derby and Isa Bheel in the Octavius Steel group.

The directors of *East India and Ceylon Tea* announce payment of six months dividend on the 6 per cent. preference capital, thus bringing matters up to December 31st, 1934.

RESERVE BANK OF INDIA

Central Office

CALCUTTA

NOTICE

It is hereby notified that the first Annual General Meeting of the Bank will be held on Monday the 3rd February, 1936, at the Town Hall, Calcutta, at 3 p.m.

The following business will be transacted:—

(*a*) the balance sheet of the Bank made up as on and the Profit and Loss Account for the period ending the 31st December, 1935, together with the report by the Central Board on the working of the Bank and the Auditors' report on the said balance sheet and accounts will be read and considered,

(*b*) the Auditors will be elected and their remuneration fixed.

OSBORNE A. SMITH,
GOVERNOR.

Dated, the 13th December, 1935.

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Friday, Dec. 20, 1935.

During the week under review quietness prevailed in the Calcutta Stock Exchange and transactions in almost every section were on a limited scale. In Government Securities, 3½ per cent. G. P. Notes remained unchanged earlier in the week, but receded on Thursday when it became known that Sir Samuel Hoare had resigned. Anxiety was also felt in some quarters regarding the effect of the silver crisis in Bombay. But considering the fact that they have stood well the effect of the silver crisis we have no reason for alarm. Unfortunately the political situation has also changed for the worse at the present moment and it will be a difficult task for gilt-edge to hold up its own.

In Jute shares, events are being watched keenly. The turn-over was small and there were minor fluctuations in prices. The Deputation of the Indian Jute Mills Association was received by the Member for Industries and Labour and the Finance Member of the Government of India at New Delhi yesterday morning, and it is reported that after a frank discussion, Sir Frank Noyce, Member for Industries and Labour, undertook to place their views before the Government. It is apparent that the conclusions which can be reached on it, would take some time, and as the 31st of December, the time limit of the Association's "ultimatum" is drawing to a close, it is feared that if some restriction of working hours is not enforced by law at an early date, and voluntary restriction ceases in March next, unfair competition may create some kind of a crisis, particularly for the weaker firms, reacting adversely on the whole industry. This resulted in a drop in the rates of Howrah shares which were quoting around Rs. 52-10 on Thursday at 5-30 p.m.

While all the other sections were dull and uninteresting, good rise in several Engineering shares were recorded. The Money Market was reported to be steady and the Reserve Bank rate was 3 per cent.

The Rooms of the Stock Exchange will remain entirely closed from Saturday the 21st December, 1935, to Sunday the 5th January, 1936, both days inclusive, on account of X'Mas and New Year holidays.

Government Securities.—3½ per cent. Government Securities after remaining unchanged and fluctuating between Rs. 95-15 and Rs. 96-6, were quieter at the close, when the rates dropped down to Rs. 95-8. Although not much business was concluded in other loans, there was a steady enquiry and prices showed no appreciable change. 3½ per cent. Loan 1947/50 closed at Rs. 105-10, 3 per cent. Loan 1941 at Rs. 103-15, 4½ per cent. Loan 1955/60 at Rs. 116-12 (a small lot changing hands at Rs. 117-4), and 5 per cent. Loan 1945-55 at Rs. 119-6.

Debentures.—Buyers were predominant for Public Bodies, but sellers being scarce very little business was effected. 3¾ per cent. Calcutta Port Trusts 1935-65 were dealt in at Rs. 102-8, 6 per cent. Calcutta Port Trusts 1955/85 at Rs. 129-4, and 4 per cent. Calcutta Improvement Trusts 1964 at Rs. 105-4. Of Calcutta Municipals small lots of 4 per cent. 1st August, 1936 at Rs. 101, 4 per cent. 1931-91 at Rs. 102 and 4 per cent. 1908/38 at Rs. 103 were recorded. The only other transaction reported in the Municipals was a lot of 4 per cent. 1910/40 at Rs. 104-4. Among Industrials the few transactions included 5½ per cent. Chowringhee Properties at Rs. 100, 5 per cent. Dalhousie Properties at Rs. 100, and 7 per cent. Namburnadi Tea at Rs. 101-8.

Preference Shares.—No change was apparent again this week, and sellers were scarce. In Jute preferences, Caledonians were again conspicuous and closed better at Rs. 156. Small lots of Clive "A" changed hands at Rs. 139, Hastings at Rs. 119, and Howrah "A"s at Rs. 143. Of others, Associated Hotels were dealt in at Rs. 91. Demands for British India Corporations, Titaghur Papers, Cawnpore Sugars and Bengal Assam Steam ships were apparent, but with no shares on offer. No business was done.

Other Investment Stocks.—Bank Shares were weaker. Imperial Bank Fully Paids were fluctuating between Rs. 1,580 and Rs. 1,588, but no transaction was reported in Contributories. Reserve Banks after fluctuating between Rs. 129 and Rs. 131, closed at Rs. 130. Central Banks were fluctuating between Rs. 38 and Rs. 37-12, and were steady. In Insurance Companies Tritons came to business at Rs. 238-8 and Free India General at Rs. 16-4. Railway shares had some support, Arrah Sasarams were dealt in at Rs. 69 (small lot), Darjeeling Himalayans at Rs. 62-8 and Mymensingh-Bhairab (Guaranteed) at Rs. 94. Sara-Serajganjs were crossed at Rs. 97. In Shipping issues I. G. N.'s were crossed at their former rate of Rs. 100, Calcutta Landing and Shipping at Rs. 14-4, and Bengal Assam Steamships showed a further improvement at Rs. 230-4.

Cottons.—This section continued dull and no change was witnessed. Bengal Nagpurs recorded Rs. 14, Dunbars were at Rs. 115, Kesorams were dull at Rs. 3-1 and New Victorias at Re. 1-6, but Mohini Mills were steady at Rs. 10-12.

Coals.—Very little interest was displayed in this section. Bengals were marked at Rs. 276-8, Bokaro and Ramgurs at Rs. 9-4, Equitables at Rs. 37-8, Hurriladhis at Rs. 17-6, Ondals at Rs. 8 (small lot), Searsoles at Re. 1-12, and West Jamurias at Rs. 11-8.

Jutes.—Except for the speculative counters not much interest was noticeable in this section, and both buying and selling orders have been difficult of execution. Howrahs were subject to constant fluctuation between Rs. 54-12 and Rs. 53, but closed lower at Rs. 52-10 yesterday at 5-30 p.m. Kamarhattys closed at Rs. 538 as against Rs. 533 of last week. A small lot of Belvederes were done on Thursday at Rs. 345. Clives and Nationals were maintaining their last week's figures, around Rs. 26-8 and Rs. 22-15 respectively. Nuddeas were marked at Rs. 50, Albions at Rs. 199, Barnagores at Rs. 140, and Chitavalsahs were easier at Rs. 21-10.

Electricals.—Transactions reported in this section were comparatively smaller in number than last week. Agra Electrics were as high at Rs. 123, Bengal Telephones were maintaining their last week's rate of Rs. 19-8, Benares Electrics closed at Rs. 15-4, Dacca Electrics were crossed at Rs. 19-12 and a small lot of Patnas were dealt in at Rs. 18-8.

Engineerings.—This section was the only one where some interest was displayed, and Burn & Co. showed further improvement and were marked up to Rs. 301. Indian Iron and Steels had also good support and at the close were quoted at Rs. 9-2. Arthur Butlers recorded Rs. 13-8, and Bengal Irons were steady around Rs. 4.

Sugars.—Little attention was paid to this section. Purtubpores were dealt in at Rs. 12-4, South Behars at Rs. 15-4, Carews at Rs. 21, Cawnpores at Rs. 35-12, and Murree Breweries had good support, business being done up to Rs. 201-8 (a small lot having changed hands at Rs. 202-8), with buyers over at the price. During the last week or two we particularly recommended the purchase of these shares.

Miscellaneous.—Paper shares were maintaining their last week's figures, Titaghur Ordinaries were quoted around Rs. 25-6 and Deferreds were better at Rs. 11-4 (c.d.), Bengals were marked steadier at Rs. 113, and although there were buyers for India Paper Pulps, no shares were available. Burma Corporations were weaker at Rs. 7-10, but B. I. Corporations were steady at last week's rate around Rs. 4-1. Indian Wood Products were dealt in at Rs. 23-6.

Teas.—This section continued dull and disinterested and the transactions taking place were insignificant.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Thursday evening.

Money:—Money was easy with interbank call quoting at ½ per cent.

Securities:—The security market ruled quiet throughout the week and towards the close there was a pre-holiday feeling in evidence. The disturbed political situation in Britain and Europe weakened this section and prices closed lower. Transactions were on a small scale. 3½ per cent Paper was quoted lower at Rs. 95-14. Medium and short-dated loans were more or less unchanged. 1941 Loan was quoting at Rs. 103-12; 1951-54 at Rs. 101-14; 1947/50 at Rs. 105-10; 1943 at Rs. 108-11; 1960/70 at Rs. 110-4; 1955/60 at Rs. 116-6; 1945-55 at Rs. 119-6 and 1938/40 at Rs. 108-13.

Owing to the Christmas holidays, there will be no issue of "Indian Finance" next week.

Shares:—There was not anything of importance in the share section and prices moved narrowly.

Textiles:—Prices remained about last week's levels. Bombay Dyeings were at Rs. 727-8; Central Indias at Rs. 250; Colabas at Rs. 135; Gokaks at Rs. 168-12; Kohinoors at Rs. 200 and Swadeshis at Rs. 150.

Hydro-electrics:—Here also prices were a shade easier. Tata Powers were quoted at Rs. 1,540 and Tata Hydros at Rs. 166-4.

Iron & Steel:—The sagging tendency in this section is still in evidence. Tata deferreds and ordinaries after going up to Rs. 581 and Rs. 148 declined to Rs. 576 and Rs. 147-4 on scattered selling and absence of support. The second preferences were quoted at Rs. 160-8.

Cements:—This section ruled weak on bulls unloading. Bundis were quoted at Rs. 35-12; Katni Deferreds at Rs. 2,170 and Ordinaries at Rs. 367-8; Okhas were higher at Rs. 257-8; Punjabs were at Rs. 25; Gwaliors at Rs. 121-4; Indians at Rs. 448-2 and Shahabads at Rs. 467-8.

Miscellaneous:—Belapurs were lower at Rs. 155-10. Bombay-Burmahs were slightly better at Rs. 395. Bombay Steams were unwanted Rs. 280 and Scindias were further lower at Rs. 14-7. Premier Constructions were higher at Rs. 76-8.

Banks & Insurance:—Prices were a shade easier. Imperial Bank fully paids were at Rs. 1,575 and Contributories at Rs. 385. Bank of Indias were quoted at Rs. 125 and Reserve Banks were lower at Rs. 130-8. Bank of Barodas were at Rs. 105-4 and Central Banks at Rs. 76-10.

In the insurance section, Orientals were at Rs. [illegible]; New India Assurances at Rs. 44 and Vulcans at Rs. 7-2.

MADRAS STOCK EXCHANGE

(*By Wire*)

(From Our Correspondent)

Thursday evening.

After having ruled steady during the major portion of the week giltedged have rather become weak owing to disturbed political conditions in Britain. The difficulties of the silver debacle due to the approaching settlement have also been partly responsible for the effect. 3½ per cent. Paper after ruling as high as Rs. 96-14 has closed weak at Rs. 95-12. The other securities also are a shade easier. 3 per cent. 1951/54 was at Rs. 101-12 ; 3½ per cent. 1947/50 at Rs. 105-9 ; 4 per cent. 1943 at Rs. 108-14 ; 5 per cent. 1939/44 at Rs. 109-13 and 5½ per cent. 1938/40 at Rs. 108-13. 4 per cent. 1953/63 Mysore Loans were at Rs. 109-12 and 5½ per cent. 1938 at Rs. 108-13.

Banks.—This section showed some improvement. Reserve Banks after being quoted lower at Rs. 129 at the beginning of the week closed higher at Rs. 130. Imperial Banks fully paids are unchanged at Rs. 1,580 but the Contributories have improved to Rs. 385. Indo-Commercial Bank 'A' shares were quoted at Rs. 112-8 and Bank of Mysores at Rs. 275. Quilon Banks were quoted at Rs. 26-12.

Sugars.—This section closed firm. Mysore Sugars were quoted higher at Rs. 28-4 c.d. Deccan Sugars old and new shares were quoted at Rs. 365 and Rs. 92-8 respectively. India Sugars were at Rs. 6-8.

Textiles.—These were rather erratic. Buckingham and Carnatics were fluctuating between Rs. 212 and Rs. 215. Kaleewarars were unchanged at Rs. 295 ; Sitarams at Rs. 53 and Bangalores at Rs. 150.

Public Utilities.—Madras Telephones improved to Rs. 20-4. South Arcot Electrics and West Coast Electrics were quoted at par. Vellore Electrics were lower at Rs. 14-10. Vizagapatam Electrics were quoted at Rs. 50-8.

Planting.—Some transactions were reported in this section. Peermades were quoted at Rs. 20-4 and Nilgiri Neerugundis improved to Rs. 1-7. Devasholas were at Rs. 6 and Malankaras at Rs. 41.

Miscellaneous.—Coimbatore Cements closed at Rs. 175 and Burma Corporations at Rs. 8 sellers. Singareni Collieries were quoted at Rs. 6-12 and Spencer Ordinaries at Rs. 6.

LONDON STOCK EXCHANGE

After ruling quiet early in the week there was a better sentiment in evidence on the London Stock Exchange on Wednesday. Almost all sections improved, particularly Oils and giltedged. There was a general marking down in prices yesterday owing to the disturbed political situation at home and abroad. In the giltedged section Indian loans were more or less steady but Home Funds and other giltedged securities sagged. 3 per cent. Indian New Loan was quoted at 99, 3½ per cent. 1931 at 96½, 4½ per cent. 1950/55 at 114½, 4½ per cent. 1958/68 at 116 and 2½ per cent. Consols at 86¾, 3½ per cent. Conversion at 107⅜, War Loans at 105⅝ and Victory Bonds at 115⅝.

Among other sections, Teas had a lower tendency but Rubbers showed few changes. Oils showed some improvement on Wednesday but these also were marked down. Tobaccos likewise failed to maintain their improvement. Home Rails shared in the general decline and Industrials suffered from lack of support.

NEW YORK STOCK EXCHANGE

There has been no change in the silver situation. A slight improvement was witnessed during the week but prices went down on profit-taking and the breakdown of peace talks. Steels in particular were affected.

SUCCESS OF GOVERNMENT LOANS HEARTENING MARKETS

ARMAMENT SHARES HEAVILY BOUGHT

By R. Gordon Cummings

By Air Mail

Special for "INDIAN FINANCE"

London, December 9th, 1935.

For the better part of the week under review Stock Markets were distinctly heartened by the apparent success attending the latest Government Conversion operations. Buying of late has, however, been steadily becoming more selective, some peculiar movements being noticeable, more particularly in the case of what may be termed second-rate industrial shares. I propose discussing this factor in a subsequent note.

Taking markets in turn, Gilt-edged have been distinctly strong at much higher levels. The successful flotation of the two big Government loans led to a sharp marking up of prices last Tuesday morning. These levels have been fairly well held. Latest prices are ; 2½ *per cent. Consols* 86½, *War Loan* 106¼, 3½ *per cent. Conversion* 107¾, and *Local Loans* 96. Numerous Colonial, Municipal and India stocks have moved up in sympathy. *India* 3 per cent. is now 86½, the 2½ per cent. 75¾, the 3½ per cent. 97½, the 4 per cent. 109, and the new 3 per cent. 1 premium.

Uncertainty has overshadowed the greater part of the Foreign Bond market. *Japanese* and *Chinese* stocks are harder in places, but South American loans, more especially *Brazilians*, have been dull. *Greek* issues have been exceptionally firm, the view being taken that the new Government will adopt a more lenient attitude towards foreign lenders.

Following the sharp appreciation in Government stocks, buying of Insurance shares has developed. As the market was short of stock some very useful rises were witnessed to-day.

Home Railways have responded to the persistent increase in weekly traffics and the near approach of the year end. *Great Western* ordinary has risen to 51½, *London Midland and Scottish* to 18¾, *Southern* deferred to 22½, and *London and North Eastern* second preference to 21. *London Transport* C. stock is exceptionally firm at 108½. Turnover in Foreign rails has been negligible.

There have been many bright spots in the Industrial markets, but apart from individual features in the miscellaneous section, the most persistent upward movement has centred round the electrical equipment group, *Associated Electrical* having spurted to 44s. 3d., *British Insulated Cable* to 100s., *Electric Construction* to 32s., *English Electric* preference to 24s. 3d., *General Electric* to 74s. 6d., and *Siemens* to 26s. 9d.

Armament shares have been heavily bought on the near approach of heavy Government expenditure in this direction. *John Brown* are a fraction over 20s., *Hadfields* 19s., and *Vickers* 20s. 6d. In each case higher prices have been seen. Shipbuilding shares, such as *Hawthorn Leslie* at 28s., and *Swan Hunter* at 26s., have been strong. Iron and Steel shares have been well supported, the principal prices being *Allied Iron* 38s., *Baldwins* 9s., *Dorman Long* 23s. 3d., *Guest Keen* 35s. 6d., *Staveley* 47s. 6d., *Richard Thomas* 12s. 9d., and *United Steel* 32s. 9d. *Stewarts and Lloyds* have improved to 35s. 3d.

Brewery shares have been in demand, the outstanding movement being a sharp rise to over 63s. in *South African Wines*, which, however, have fallen on profit-taking to 62s. *Associated British Malsters* have been well bought at up to 11s. *Distillers* are firm at 98s. 6d.

Tobaccos have moved up on buying following the highly gratifying dividend statement of *Carreras*, whose A. shares are 177s. 6d. Textiles keep steady, while in Rayons, *Courtaulds* are 56s. 6d., and *British Celanese* second preference 23s. 6d.

The outstanding feature in the miscellaneous section has been a steady rise of over 7s. to 55s. in *British Plaster Board*. *Crittalls* have also jumped to 26s., while *Reynolds Brothers* are higher at 30s., *Sudan Plantations* at 36s., *United Molasses* at 20s., *International Nickel* at $47¾, *Turner and Newall* at 67s. 9d., and *Radiation* at 76s. *Electric and Musical Industries* keep firm at 27s. 9d.

Oil shares have been held back by the discussions on sanctions, but the tone is firm. Rubber shares have been little affected by the changes in the quota assessments and Teas remain comparatively neglected.

Base metal shares have been in demand, the outstanding rises being amongst the copper group. *Roan Antelope* are 33s. 6d., and *Rhodesian Selection Trust* 11s. 3d. Tin shares have so far not reflected the further increase in the output quota. Diamond shares have again been in demand.

Turnover in Kaffirs is falling to smaller and smaller proportions. All the same price movements are negligible, holders preferring to await the December dividend announcements before taking any serious action. In the Australian mining section, *Commonwealth* have fallen back to 10s. 3d., and *Great Boulder Mining and Finance* to 3s. 6d. Apart from a sharp spurt to 22s. 9d. in *Bibiani* there has been little going on in West African gold shares.

The New Government Loans.

I dealt last week with the details of the two big Government loans involving stock of £300,000,000. Lists for the 1 *per cent. Treasury Bonds* were closed shortly after they opened, while the 2½ *per cent. Funding Loan* was over-subscribed by noon of the day on which its subscriptions opened.

When dealings commenced both scrips fell to small discounts, but on strong Government support the prices were brought up to par. There has since, however, been a moderate reaction, both scrips being now quoted at slight discounts.

The Government never publishes any details regarding the result of applications for its loans. While there are many conjectures in the present instance, there is nothing definite to go on as regards the proportion of money put up by the general public. This is a pity, as a truer guide to the public feeling would have been obtained had the total subscriptions from this source been published.

From what I can gather various Government departments applied heavily for the Funding Loan, while the money-market took a large part of the 1 per cent. Treasury Bonds.

Apart from those directly interested in the loans, the City did not care how the money was raised, or where it came from, it being quite satisfied with the fact that over-subscription, whether small or large it did not mind, took place. As usual, satisfaction with the results was immediately translated into a minor "boomlet" throughout the Gilt-edged and Industrial markets.

The Inevitable Results.

I would be the last person to throw cold water on genuine enthusiasm. In the present instance, however, I do not honestly think that there is much cause for uncontrolled enthusiasm, for it must be remembered that, in effect, the subscription of the two new loans involved nothing in the way of new money, the proceeds being entirely used to re-pay existing indebtedness, either in the form of loans or Treasury Bills.

There has, of course, been some shifting of the type of money, by which I mean short and long term investment funds, but the net result is the same.

In *Indian Finance* of November 16th I ventured to state that there was room for further moderate recovery in British Government stocks. Prices since then have risen anything up to 4 points, 3½ *per cent. War Loan*, for instance, being now 106¼, compared with 103⅝ on October 28th, the date when the article was written.

A further rise in gilt-edged stocks can be envisaged. Caution must, however, be exercised in the light of the recent sharp improvement. The optimists must not be led away by immediate developments, but should temper their enthusiasm with thoughts of the further borrowing for armaments and other purposes, which the Government will have to make. The next loans moreover, will not be Conversion offers, but will involve the putting up of new money, which must come from somewhere.

To sum up. I anticipate appreciation of, say, a further one to two points in gilt-edged, but beyond this I cannot venture. Holders of Government stocks should be prepared to take their profits at any time.

Other Capital Issues on the Increase.

My prediction that the new capital issue market would become more and more active after the General Election is coming true. The rush anticipated in many quarters has not, however, as yet become as rapid as many people expected.

Issuing houses are feeling their feet cautiously and only bringing out the soundest of issues.

One important transaction during the past week has been the Conversion operation of the *Ceylon Government*, which has offered £4,500,000 3 per cent. stock at par for the purpose of redeeming part of the £6,210,000 6 per cent. stock which can be repaid early next year. Financial interests in London were favourably impressed by the fact that this colony finds it necessary to raise only £4,500,000, it having in hand the balance of £1,700,000 required for repayment of the entire 6 per cent. issue.

Readers will no doubt remember that when dealing with forthcoming Conversions on behalf of the colonies, I stated that Ceylon would be the next country to enter the lists.

Since last writing there has not been any further issue on the part of British municipalities. One of the smaller Local Authorities has, however, placed £250,000 3 per cent. stock at 98⅝, this being available in the market at 99¾. As the Government has now filled its immediate requirements one would have thought that the Bank of England would have given the "All Clear" signal for some of the numerous Corporation issues awaiting their turn.

I know for a fact that one municipality has been waiting since April to bring out a £1,000,000 loan.

Present State of Markets.

I have indicated broadly in my opening notes that the tendency of late has been for particular shares to be taken in hand and run sharply up. From what I can gather there are several large operators working in the markets, their technique being to accumulate big lines of shares in what one might call the second rank of industrial companies. So soon as the market is short of stock the real business commences. Public interest is attracted to the shares and big rises are seen almost every day.

In many instances there is justification for the upward movement. In other cases the reverse applies, the prices to which shares are run up meaning that prospects are certainly discounted for many years ahead.

Now, more than ever, is it essential for the short-term speculator to exercise caution before buying shares which are popular favourites.

I know for a fact that one South African millionaire is operating in several shares. He has taken substantial profits and will probably continue to do so while markets are in their present technical condition.

Sheltering under the Protection Umbrella.

There is no doubt that British industrial companies are making rapid progress, more especially those concerns favoured by tariff protection. The question naturally arises as to how long this prosperity will continue.

A continued rise in the profits of one particular industry has the effect of drawing attention to the money to be made in particular trades. The inevitable happens, fresh firms starting in the business.

Since this country has gone in whole-heartedly for protection we have got to the stage where we can say that many industries are now sheltering under the umbrellla of protection, the largest firm in each trade being the one holding the umbrella.

So soon as there is overcrowding the energies of the old-established companies are devoted to cutting out competition. Price-cutting ensues and profits fall.

For this reason investors should not be led away by immediate results. Before buying the shares of popular companies they should carefully weigh up the possibilities of competition being attracted by the present high earning capacity of the particular industry.

On the reverse side of the picture we have the case of companies like *Courtaulds*, the big artificial silk manufacturers. Although sheltering under the umbrella of protection, this big combine has pursued a persistent policy of keeping down competition by selling its products at the lowest possible price. It is, therefore, not only supplying the public at reasonable prices, but building up a strong reserve of production capacity and profit-earning power by eliminating now, at the cheapest cost, the competition attracted by the hopes of quick reward.

I would far sooner buy *Courtaulds* shares, which may not rise for many, many months, than those of companies such as *British Plaster Boards, Marks & Spencers*, and *Woolworths*.

The week's News.

There have not been many announcements of outstanding importance since last Monday.

Another Scottish banking company, the *National Bank of Scotland*, has published its report. For the year to November 1st last profits have fallen by the negligible amount of £1,324, to £270,273. The dividend is maintained at 16 per cent., while a total of £135,000 is transferred to reserves.

A deal involving companies with issued capitals aggregating almost £4,000,000 lies behind the proposal that the *Notting Hill Electric Lighting Company*, a London undertaking, should merge its interests with those of the *Metropolitan Electric Supply Company*, which also operates an extensive supply system in the London area.

Further satisfactory news from the iron and steel industry comes from two companies operating on the North-East coast. *South Durham Steel and Iron Company* trading profits for the year to September 30th, 1935 rose by £58,237 to £163,435. Dividend on the A ordinary capital is raised by 2 per cent. to 11 per cent., while the B. ordinary shares are to receive 5 per cent., compared with 2 per cent.

The *Cargo Fleet Iron Company*, which is controlled by the South Durham company, reports an increase of £56,480 to £150,636 in trading profits.

Further satisfactory recovery also took place in the trading position of *Redpath Brown & Company*, the Scottish engineers. Profits in this case for the past year are £66,469, compared with £20,281. Including the 5 per cent. interim declared in September, the dividend on the £350,000 ordinary capital is made up to 10 per cent.—the first distribution since 6 per cent. in 1931.

Of late there has been no possibility of doubt that the aircraft industry was enjoying highly prosperous conditions. The report of *Armstrong Siddeley Development Company* for the year to September 30th provides ample proof, net profits having risen by £24,724 to £175,857. The dividend on the ordinary capital, which was bought in June last by Hawker-Siddeley Aircraft, is maintained at 10 per cent.

Including a bonus of 5 per cent. the dividend on the £1 A. and 2s. 6d. B. ordinary shares of *Carreras*, the tobacco and cigarette manufacturers, is made up to 40 per cent., compared with only 35 per cent. for the previous year. A preliminary statement indicates that profits for the year ended October 31st have risen by £137,065 to £942,007.

Industrial News in Brief.

The first report of *Atlas Stone* as a public company shows net profits of £23,400. After allocating £5,000 to depreciation and leasehold sinking fund, a 10 per cent. dividend is to be paid on the old ordinary shares (the new shares ranking for only 5 per cent.), and the carry forward raised by £1,732. The directors' indicate that trade has continued satisfactory and that the number of products manufactured by the company has been increased.

At first sight these figures are not so satisfactory as might have been expected. The market has, however, shown its confidence in the future prospects of the company by maintaining the price of the 5s. shares at 10s. 9d. They should be held.

The outstanding interim dividend statements of the week are the resumption of payments, after a lapse of five years, with a distribution of 2½ per cent. on *Forestal Land Timber & Railways* ordinary shares, an increase of 2½ per cent. to 12½ per cent. on *E. K. Cole* 5s. ordinary shares, and maintenance of the distribution at 12 per cent. on *International Tea Stores* 5s. ordinary.

Gold and Diamonds.

Readers will no doubt remember that some months ago I devoted considerable space to analysing the future prospects of certain of the smaller mining finance companies. Three of these companies were in what is called the Sir Abe Bailey group.

Eastern Transvaal Consolidated Mines is maintaining the interim dividend at 5 per cent. on the 5s. shares, which are quoted at 7s. 6d.

South African Townships has also declared a 10 per cent. dividend, which goes against 5 per cent. at this time a year ago. In this case the 10s. shares are obtainable at the bargain level of 14s.

Profits of *London and Rhodesian Mining and Land*, the third company, for the year to June 30th last have fallen by £36,000 to £117,473. This decline is considered to be exceptional; and as the directors are increasing the total dividend for the year from 7½ per cent. to 10 per cent. it is obvious that they view the future with considerable hope. They have also decided to pay an interim of 5 per cent. on account of the current year. The 5s. shares have kept very firm at 6s. 3d.

Although the 5½ per cent. debenture stock of *De Beers Consolidated Mines*, the big diamond producers, are to be repaid on December 31st next, the company has not so far given any indication as to the method whereby the necessary funds will be raised for this payment. It is taken for a more or less accepted fact in the market that a 4½ per cent. stock will be created. Prospects of some settlement regarding the dividend arrears on the preference shares are understood to be near at hand, hence the persistent buying, which has raised the preference to almost £16.

Tin Quota Again Increased.

One has now become more or less used to a sudden increase in the output quota for tin. There was, therefore, little surprise when the announcement was made on Thursday last that the quota for the first quarter of 1936 will be increased by 10 per cent. to 90 per cent. For the first quarter of 1935 the quota was only 40 per cent., so that a lot has happened in less than twelve months.

Those in touch with the situation anticipate a moderate fall in the price of the metal—but not until stocks have been replaced and production begins to run well ahead of consumption. Before this can happen, however, it will be necessary for the tin mining companies to make arrangements for the necessary labour supply required to cope with a rise in output. Reports from Eastern countries indicate great difficulty in obtaining skilled labour.

For the time being, therefore, we can take it that production will not run sharply ahead of consumption. Consumption, moreover, is steadily increasing, and even if the full 90 per cent. of the quota is produced during the first three months of 1936, the effect on stocks may be negligible.

From 90 per cent. to 100 per cent. production is only a small step. If only consumption can be maintained, the "bogey" of restriction will not overhang the tin share market for very much longer. The leading companies are now making steady headway in their profit earning capacity, with the result that their shares will soon be sought after by those investors who have been held in checking by fears of restriction being suddenly abandoned.

Investors will come out far better by buying the best tin shares than by paying fancy prices for many of the popular industrial issues.

Market Pointers.

Home Railway traffics for the 48th week of the current year were again good, total receipts rising by £59,500 over those of the corresponding period in 1934. The total increase to date is £1,266,000.

Full details of the proposed Government guaranteed loan for railway construction are now available. The Government is to guarantee £26,500,000 out of the total expenditure estimated at £29,500,000.

I hear good reports on the current trading outlook for *Press Caps*, my informants anticipating a dividend of 12½ per cent. to 15 per cent. for the present year. The 5s. shares look cheap at 8s. 9d. Readers will no doubt remember that I recommended a purchase some time ago.

Ford Motors have been well absorbed at 35s. The market is going for a 10 per cent. dividend for the current year.

R. M. Realisation and *E. D. Realisation* ordinary shares have risen to 43s. 9d. and 40s. respectively. A big block of ordinary shares held by these companies in Coast Lines has been marketed at around 18s. 6d. In the light of the sharp rise during the last fortnight part at least of the substantial profits might now be taken.

The interim dividend on *Indian Copper* 2s. shares has been increased from 2½ per cent. to 4 per cent.

WALL STREET IN AIR MAIL WEEK

EUROPEAN SITUATION ARRESTING ACTIVITY

RAILS THE ONLY GOOD FEATURE

By Air Mail

Special for "INDIAN FINANCE"

Another week has passed without any important developments. Wall Street was thoroughly taken by the European situation and operators were watching the trend of peace talks. The turnover was on a small scale. Saturday's turnover was 670,000 shares against 1,819,130 shares in the previous week. With the operators taking a hopeful view of the European situation there was a slight improvement on Monday, but on Tuesday profit-taking was in evidence and prices were once more quoted lower. On Wednesday, markets were considerably more active and trading in the final hour was particularly heavy. The turnover was just under three million shares. But this rise was also followed by profit-taking the next day and prices closed irregular. Utilities and Motors were weak. Aviation and Copper shares showed some improvement occasionally and Rails moved against the market.

On the Bond market, Treasury Bonds and Government issues were strong on the success of the Conversion loan operations.

$450,000,000 2¾ per cent. 10-year Treasury Bonds and an equal amount of 1½ per cent. 5-year Treasury Notes were offered for cash subscription. An offer is made to the holders of the $418,000,000 2½ per cent. notes maturing on December 15, to convert into either of the issues. The total of these issues may be increased according to the amount of the converted issues.

Subscription for the Treasury offer of $450,000,000 2¾ per cent. 10-12 Year Bonds totalled $2,034,000,000 and for the $450,000,000 1½ per cent. 5-year Notes totalled $2,486,000,000.

Rails were strong during the week. Freight car loadings figures for the week ended November 23 showed an increase over the figures of the previous week and a substantial increase over those for the corresponding period of 1934.

Southern Railway has informed the R.F.C. that it is almost earning its fixed charges this year and will have $2,500,000 cash after paying its January 1 interest. A surplus after interest payment is expected in 1936.

It is likely that the St. Louis and South Western Railroad will not pay its January 1 interest unless the Southern Pasific Railroad advances the necessary funds or guarantee a R.F.C. loan. The management will probably decide whether or not to reorganise under section 77 B of the Bankruptcy Act during the "period of grace".

Oils were unchanged and they were not subjected to any great fluctuations.

The daily average production of crude oil in the United States in the week ended November 30 was 2,820,450 barrels against 2,839,950 in the previous week according to the figures of the American Petroleum Institute.

According to the *Iron Age* steel mill activity is at 57 per cent. of capacity against 56 per cent. last week. This is the highest rate since June 1934.

Despite the high rate of activity steel shares have made a rather poor showing. It is believed that there may be a setback early next year. Prices have not risen simultaneously with the rise in prices of scrap and semi-finished products. Short-term holders are adopting a cautious attitude. But there may not be a sudden drop in activity as the price schedule for the first quarter delivery is unchanged. There may not be any abnormal forward buying during the month.

Motor vehicle output in the United States and Canada for the week ended December 2 totalled 83,358 units against 94,723 in the previous week.

Business Pointers.

Freight car loadings in the week ended November 23, totalled 646,500 cars an increase of 18,200 over the previous week and of 85,200 over the corresponding week last year.

Pig-iron production in November totalled 2,066,000 tons against 1,978,000 tons in October.

December 6, 1935.

BOURSES IN AIR MAIL WEEK

Paris.

The political situation disturbed the sections on the Bourse and there was a weak tendency in evidence. But later developments infused more confidence into the mind of operators and prices improved.

Rentes were quoted higher there being rises of more than 70 centimes in a day. Banque de France closed at 9,100 against 8,710 at the beginning of the week, and Credit Foncier de France closed at 3,200 against 3,055. Among Internationals, Suez Canals were quoted as low as 18,060 at one time but the close was higher at 18,485. Royal Dutch were steady. Thomas Houstons were back again at 154 after a long time and Chargeurs Reunis jumped to 225.

On the coulisse, De Beers Preferred were quoted higher at 1,169 but other diamond shares moved within narrow limits. Shares in the Gold Mining group did not show any definite trend.

	Nov. 29	Dec. 2	Dec. 5
4½% Rentes, 1932 "A"	81.70	83.40	83.10
4½% Rentes 1932 "B"	80.75	82.20	81.75
Banque de France	8,710.00	8,900.00	9,100.00
Credit Foncier de France	3,055.00	3,095.00	3,200.00
Suez Canal Shares	18,325.00	18,060.00	18,485.00
Thomas Houston	141.50	144.00	154.00
Chargeurs Reunis	187.00	194.00	225.00
Raffinerie say	804.00	801.00	816.00
Central Mining	1,815.00	1,800.00	1,840.00
Rio Tinto	1,448.00	1,465.00	1,492.00
Royal Dutch	21,870.00	21,400.00	21,850.00
De Beers Preferred	1,121.00	1,114.00	1,169.00
Rand Mines	628.00	616.00	635.00
Sub-Nigel	1,014.00	1,000.00	1,024.00

Berlin.

Conditions were unchanged on the Bourse during the week. A cheerful tendency was in evidence during the first part of the week but later on markets closed irregular. Banks continued their downward trend, Reichsbanks being quoted lower at 179.25. Farbenindustries after going up to 150.25 were marked down at 149.90. Siemens continued strong and were gradually marked higher at 171.25. Shippings and Rayons were weak. Minings also showed a declining tendency, Harpeners closing at 102.50.

	Nov. 29	Dec. 2	Dec. 5
Reichsbank	179.75	179.50	179.25
Farbenindustrie	149.00	150.25	149.90
Siemen	166.50	168.50	171.25
A. K. U.	51.50	52.60	51.60
Harpener	108.75	108.00	102.50
Norddeutscher Lloyd	17.10	17.75	17.00
Westeregeln Alkali	...	120.25	120.00
Dynamit Nobel	76.10	76.75	77.75

CIVIL AVIATION AND GOVERNMENT AID

In presiding over the Second Ordinary General Meeting of the Indian National Airways Ltd., on December 16, Mr. R. E. Grant Govan said:—

Gentlemen,

I place before you the Audited Accounts and your Directors' Report for the period ended 30th June, 1935. These have been in your hands for some days and I presume you would desire me to take them as read. At our first Annual General meeting a year ago I described at some length the circumstances which had led to the formation of this Company, and the arrangements reached after much negotiation whereby we were appointed to take charge of the traffic organization and to act as Chief Booking Agents on the Empire route over India. I also gave you a full account of the progress made in the other principal branch of our activities—the development of feeder and other internal services in India.

At that time our weekly passenger and mail service between Calcutta and Rangoon and our daily passenger and mail service between Calcutta and Dacca had been in operation for 12 months, and our air mail service between Lahore and Karachi had just been inaugurated.

We had also at that time succeeded in stimulating a considerable amount of charter work both in Bengal and Northern India, and I referred to the value of this type of work as an additional aid to the creation of interest in aerial travel in the minds of the people of this country.

This was the position in regard to our public services when I last addressed you, and with your permission I should like to give you a short review of our operations since then up to the present date, and thus supplement the information contained in the report now before you.

It is with particular regret that I have to record the suspension in June and August respectively of our Calcutta-Dacca-Chittagong and Calcutta-Rangoon services. This step was only taken by the Board after the fullest consideration, which led them to the conclusion that they were not justified in continuing to operate these services on a regular basis, failing some likelihood of a satisfactory mail contract or Government assistance in some other form at an early date.

I must mention here that prior to the withdrawal of these services detailed representations were made to the Government of India in May on the necessity for some measure of financial aid to enable the Company to continue them, and in view of the considerably improved financial position of this country (as revealed in the Budget Estimates for 1935-36) it was at that time confidently hoped that the Government of India would find it possible to render some assistance. The necessary aid, however, was not secured and the Board had no alternative but to suspend the services.

The decision of the Board and the reason for it were made clear to yourselves and to the public in a widely published announcement by the Company in the Press at the time the withdrawals were effected.

Full details in connection with our Calcutta-Rangoon and Calcutta-Dacca services are given in the Report and there is no need for me to reiterate them here, but I should like to emphasise the fact that both the services were operated at 100 per cent. regularity and with complete freedom from accident involving injury to passengers or crew throughout all weathers up to the date of their suspension.

This, I am sure, you will agree, speaks very highly indeed of the able services rendered by our Bengal Managers, and the Board would like me to take this opportunity of congratulating Mr. Raynham and his staff and our pilots and engineers in Bengal on their valuable contribution to the important work of impressing the public in India with the safety and regularity of air travel.

The number of passengers carried on the Calcutta-Rangoon route indicates that there is an increasing demand for aerial transport between these two centres, and although the increased frequency on the Empire route over this sector affects our position, we think there is a possibility, provided Government find it possible to assist, of our re-opening on this route at a later date for the carriage of India-Burma mails and passengers, and to meet the internal requirements of these two countries by catering for point to point traffic.

In spite of the efforts made to advertise effectively our Calcutta-Dacca service and to popularise it by the extension to Chittagong and a reduction in fares, we were not able to raise passenger traffic to a satisfactory level, and the mail loads were almost infinitesimal.

Although we believe that the traffic is there it obviously cannot be obtained even at the reduced fares that we were charging at the time the service was withdrawn. On the suspension of the regular service we instituted in its place an "on demand" service, which received a fair measure of support, but we recently had to suspend this, as the general policy of contraction which we have been compelled to adopt has resulted in the withdrawal of our multi-engined aircraft from service and we are now only organised to carry out special charter flights on the Bengal side.

The Board do not feel that this route can be successfully developed on a regular basis until it forms part of a through route into Assam. We have carried out a considerable amount of useful survey work in connection with this Bengal-Assam route, but we do not anticipate the inauguration of a regular service until adequate ground facilities are available, and until there is some guarantee of sufficient traffic to make the service worth while.

From what I have already said you will realise that much of our future development work depends upon the attitude of Government towards civil aviation generally, and later I propose to refer more fully to the negotiations which are at present proceeding between ourselves and the Government of India.

Our two remaining activities in Bengal to which I have not yet referred are the Calcutta (Alipore) Aerodrome and the Rangoon Flying School.

The present position in regard to our aerodrome at Alipore is that the Government of India have decided to develop Dum Dum, and not Alipore, for their immediate requirements as Calcutta's aerodrome on the Empire route. This disappointing decision must naturally lead to delay in the programme of development which we had originally anticipated, but we are confident that the favourable position of this area, situated as it is so close to the heart of Calcutta, will eventually result in its extensive use for internal and local traffic, and in the meantime we are continuing its development for such purposes.

The Rangoon Flying School continues to do good work in the creation of air-mindedness in Burma, but here again our policy must be shaped by the result of our present discussions with the Government of India.

Our major operation in Northern India is our twice weekly Lahore-Karachi Air Mail Service which serves as a feeder to the Empire route, and has now been in operation for a little over a year. This service maintains an important connection between the North of India and the Empire route at Karachi, and we are operating it under a ten years' agreement with the Government of India.

It was unfortunate that we were called upon to double this service within five weeks of its inception, as this meant a substantial increase in our expenses combined with a reduction in the mail weight on each service. As a result of this increase in frequency our aircraft are carrying less than a quarter load on each service, and these loads are accordingly not sufficiently heavy to prove remunerative at the present rates. The question of a revision of rates is under consideration, and we hope it will be found possible at an early date to make a satisfactory readjustment.

Considerable difficulties were experienced at the Sukkur landing-ground, which becomes unserviceable during and after rain, and it was decided in June last to make Jacobabad, instead of Sukkur, the night halt on this route. Flightways are being constructed on the Jacobabad landing-ground and it is hoped that these will be completed early in the New Year. This should put an end to the troubles we have previously experienced during rainy weather.

A certain amount of criticism was directed at our Lahore-Karachi service at the time of the interruptions due to water-logged landing-grounds, but I should like to make it clear that these landing-grounds are the property of Government who are solely responsible for their maintenance. With our excellent record for regularity we naturally feel that we scarcely deserve to be pilloried on account of delays which occur through no fault of our own.

Efficient night flying arrangements are essential on this route if the necessary acceleration of the service is to take place and revenue earned from the carriage of passengers. Some improvement in this direction has already been made but there is still much to be done, and we are in close consultation with the Government of India on this important matter.

Looking further ahead, there is every possibility of an increase in the frequency of this service to five services a week and a considerable addition to the mileage for the purpose of feeding other important centres in the North of India under the big scheme of development and acceleration of the Empire route which is programmed to take effect in 1937. Negotiations with the Government of India in this matter are now proceeding, and we hope that we shall be able to arrange to introduce larger and faster multi-engined aircraft with dual control, capable of carrying passengers as well as mails, and thus provide a fitting accompaniment to the greatly improved aircraft which are being prepared for the Empire route under the 1937 programme.

In this connection I should like to say that an early decision on the part of Government as to the terms of the contract is essential is order to give the Company sufficient time to get its aircraft laid down, to deal with the urgent question of the extra staff that will be necessary for the efficient operation of the expanded service, and generally to carry out the large amount of organising work which must be completed before the service can be introduced.

You will, I am sure, be glad to hear of the agreement that has been reached whereby we have been entrusted with the responsibility of maintaining and operating His Excellency the Viceroy's Avro 642 "The Star of India" and that we are to continue to operate the Government of India's triple-engined Avro Ton on their behalf and for our own requirements. This decision on the part of Government can be regarded, I think, as a strong indication of the high reputation we have established and of the efficiency of our organisation. The agreement reached in respect of these two aircraft assists us in maintaining an efficient charter organization in Northern India, and as you will have seen from the Report before you this type of work at present forms an important part of our operations. The supension of our regular services in Bengal and the consequent transfer of certain personnel and aircraft to this area has to some extent reduced our ability to undertake extensive charter work on the Bengal side, but we hope to be able to make satisfactory arrangements to meet the current demand.

In Northern India the charter season has opened well and we look forward to a repetition of last year's results provided existing difficulties in regard to the use of landing-grounds can be successfully overcome. At present we are severely handicapped by the fact that all Army landing grounds are closed to civil aviation, but negotiations are proceeding in this matter and we hope for early relief to the present distressing situation.

The question of a service between the Punjab and Kashmir is receiving our close attention, and much important survey work on this route has already been completed, but before such a service can be operated with safety and regularity a number of difficulties must be overcome. It will be appreciated that this route is subject to constantly varying climatic conditions and involves flying over high mountains which are frequently envoloped in clouds. On this account the necessity for directional wireless and adequate ground facilities generally is even more than usually marked if the service is to be successfully operated under all weather conditions. We are in constant touch with the Kashmir Durbar in this important matter, and are most anxious to inaugurate a service provided this can be done on a "safety first" basis.

In connection with our general activities in Northern India I should like to refer to the excellent work performed by the whole of the Company's staff on the administrative, engineering operational and traffic sides. Mr. Maxwell, our General Manager, has displayed great energy and skill and has devoted himself assiduously to the interests of the Company during the fifteen months he has been with us, and Mr. Cary, our Chief Pilot, has undertaken heavy administrative responsibilities in addition to his flying duties, which have involved piloting over long distances on a number of occasions of Their Excellencies the Viceroy and the Countess of Willingdon, Provincial Governors, Ruling Princes, and senior officials of the Government of India.

Our pilots on the Lahore-Karachi route have often been called upon to fly both by day and night under extremely adverse weather conditions, and our Ground Engineers and Traffic Staff have consistently carried out their duties in a highly commendable and efficient manner. A pleasing feature of the Company's organisation is the marked esprit do corps displayed by European and Indian personnel alike in their joint efforts to serve the interests of the Company to the fullest extent possible.

I should also here like to refer briefly to the great assistance which is so constantly and willingly given to us by Messrs. Airwork, Ltd., Heston, our technical advisers and consultants, and by their nominee director, Mr. F. A. I. Muntz. Their long and wide experience in all matters pertaining to aviation helps us immensely on general as well as technical points, and is of the utmost value in aiding us to keep abreast of the times.

On the subject of the successful operation of our Imperial Airways and Indian Trans-Continental Airways agency, I should like to say that our cordial relations with these two companies have been fully maintained, and we possess an efficient organisation at Jodhpur, Delhi, Cawnpore, Allahabad, Calcutta and Akyab to deal with booking and traffic work. The expansion of business on the Empire Route has already necessitated the enlargement of our traffic staff, and we are glad to be able to refer to the successful manner in which our assistants have adapted themselves to this type of work. Further recruitment in this branch of our activities will be necessary in the coming year in order that trained men may be available to meet requirements by the time the 1937 Empire Route development takes place.

Debates during recent sessions of the Legislative Assembly have indicated that the national character of this Company is not fully appreciated, and as this may account to some extent for the apparent apathy of the public as a whole towards the development of internal air communications in this country, I feel I ought to give you some idea as to what the position in this respect actually is. As you are aware the Company is a rupee Company registered in India, and its present capital position indicates more forcibly than any words I am able to use how thoroughly national the Company is.

Of the total paid-up capital of Rs. 11,60,355, no less than 87 per cent., or Rs. 10,10,112, is held by Indians. There are altogether 970 shareholders of whom 885, or 91 per cent., are Indians. Shareholders are widely spread throughout the country and only 72 shareholders hold more than 500 shares each, and of these 63, or 87½ per cent., are Indians. The policy of the Company and its development work is guided by a Board of Directors, the majority of whom are prominent Indian business gentlemen, and the European members of the Board are all very closely identified with the interests of this Country.

In matters of staff we are vigorously pursuing our policy of employing Indian personnel in responsible posts in all departments, and I am glad to be able to say that in our existing organisation we have an efficient and well-trained staff totalling 91 persons, of whom 71 are Indians, 10 Anglo-Indians and 10 Europeans. In addition we have six selected Indian trainers in our engineering and traffic branches.

On the strength of those remarks you will, I am sure, agree that there is no room for doubt as to the national aspect of this Company. We must, of course, secure some expert staff and obtain guidance from countries more advanced in civil aviation than India is at present if we are to be in a position to raise our national personnel to the high standard of efficiency which aviation nowadays demands, and we trust that the result of the negotiations between ourselves and the Government of India which are now proceeding will enable us to continue our policy of employing and training Indian personnel to the fullest extent possible.

The question of the absorption of the large number of Indians who are at present training at considerable personal cost, both in England and in India, for professional careers in aviation is one which calls for the gravest consideration. Unless civil aviation is assisted the opportunities of offering responsible posts to these highly trained men, who are showing such marked aptitude for this type of work, will gradually, if not rapidly, disappear, and an extremely valuable source of employment in this country will have been lost.

I now come to the question of the necessity for Government aid in our development and operations and to the steps that we are taking to secure it, and I should like to preface my remarks on this important matter by a brief reference to our sincere appreciation of the excellent relationship which continues to exist between ourselves and those Departments of the Government of India with whom our affairs bring us constantly into touch. The Director of Civil Aviation and his staff have spared no pains to help us in the various knotty problems that we are called upon to face, and I should also like specially to mention the valuable assistance we have received from the Director-General of Observatories and the Director of Wireless.

In my remarks at our first annual general meeting I spoke at some length and adduced a number of arguments in support of our contention that air transportation companies performing an efficient public service should receive some moderate financial assistance while they are struggling in the uphill fight to make revenue meet expenditure, and I have referred to-day to our representation made in May last for aid in respect of our Bengal services, which could not at that time be granted.

By means of adequate flying activities in the form of regular services, operated under reasonably remunerative Government contracts for the carriage of passengers or mails or both, our present difficulties could be overcome, but the Board are now more than ever convinced that financial assistance in some form is essential if the Company's share in the development of air transport is to be maintained, and at a Board meeting held recently it was decided to place before Government the results of the Company's operations at Rangoon, Calcutta, Delhi and Lahore, together with a statement upon future development and our ability to maintain our existing flying operations in India and Burma.

This representation was lodged with the Government of India last month. It contained the fullest possible information in regard to the Company's affairs, and was accompanied by all details calculated to assist Government in their consideration of this vital problem.

The Hon'ble Sir Frank Noyce has kindly consented to receive a deputation from the Board to-morrow morning at which your representatives hope to have a full opportunity of supporting their case, and you will therefore realise that the matter is, as it were, *sub judice* at the present time. I do not propose, therefore, to go deeply into details, but I can assure you that no effort has been spared in the preparation of an extremely strong case. It has been sympathetically received and we sincerely hope that it will prove acceptable.

COMPANY REPORTS

THE PREMCHAND JUTE MILLS, LIMITED

The Audited Accounts for the half-year ended 13th October, 1935 :—

After providing a sum of Rs. 91,213-4-9 for Depreciation and Rs. 90,000 for Income-Tax and Super-Tax Reserve there is left a net profit of Rs. 2,86,099-4-10 which, with Rs. 45,839-7-4 brought forward from last half-year's accounts, amounts to Rs. 3,31,938-12-2. The Directors propose a distribution as follows—

	Rs.	A.	P.
Payment of Dividend at 6 per cent. per annum	1,20,000	0	0
Transfer to General Reserve	1,50,000	0	0
Balance to be carried forward ...	61,938	12	2
Total ...	3,31,938	12	2

It may be noted that in the accounts for the last preceding half-year the sum of Rs. 2,10,000 was set apart as Reserve for payment of Income-Tax and Super-Tax. After the termination of that half-year the sum of Rs. 1,66,786-4-0 was paid for such tax. The sum of Rs. 3,00,000 shown in the Accounts now presented as reserve for Income-tax and Super-tax includes the sum of Rs. 2,10,000 mentioned above.

Chairman.—Mr. Janoki Nath Roy.

Comparative statement of balance-sheets for the last three consecutive half-years :—

THE HOOGHLY DOCKING AND ENGINEERING COMPANY, LIMITED.

The Audited Accounts for the half-year ended the 30th June, 1935 :—

Accounts.—The Trading results for the half-year show an improvement on the preceding half-year, the Gross Profit amounting to Rs. 48,795-14-5 which after the deduction of all charges for Directors' and Auditors' Fees, Head Office Expenses, Interest on Loans, Debenture Interest, Debenture Trustees' Fees amounting to Rs. 48,776-6-10 and Rs. 55,308 for Depreciation, show a net working loss of Rs. 55,288-8-5.

The sale of 423 shares in the Chaparmukh-Silghat Railway Co., Ltd., during the half-year yielded a profit of Rs. 12,599-3-8 and the net working loss is thereby reduced to Rs. 42,698-4-9.

This sum added to the debit balance of Rs. 8,79,257-2-7 brought forward from the preceding half-year makes a total debit to the Profit and Loss Account of Rs. 9,21,946-7-4 to be carried forward.

General Report.—The value of all work billed during the period under review amounted to Rs. 3,93,367-10-11 against Rs. 4,99,374-5-9 for the preceding half-year.

There is consequently a decrease of Rs. 1,06,006-10-10 in the turnover as compared with the previous half-year, but the increase of approximately 144 per cent in the Trading Results indicates that more remunerative work was undertaken.

Managing Agents.—Messrs. Martin & Co.

THE INDIAN CABLE COMPANY, LIMITED

The Audited Statement of Accounts for the financial year ended 31st March, 1935:—

The net profit on the year's working is Rs. 3,78,553-5-5 and after writing off one full year's Depreciation, providing for Income-Tax, and for the Managing Agents' and Directors' commission, there remains a balance of Rs. 2,15,204-8-8.

The profits of the Company in the past having been insufficient to permit of full depreciation of the block, the Directors have now decided to write off the sum of Rs. 2,14,271 and thereby fully depreciate the Assets of the Company up to the end of March, 1935.

This leaves a credit balance of Rs. 933-8-8 which it is proposed to deduct from the debit of Rs. 42,361-15-10 brought forward from the previous year thus leaving a debit balance of 41,428-7-2 to be carried forward.

Managing Agents.—The British Insulated Cables Ltd.

* * *

The profit on revenue account of the New Manbhoom Coal Company for the half-year ended September, 1935, is Rs. 1,50,164 against Rs. 2,38,253. The amount set aside for depreciation is Rs. 20,252 against Rs. 22,137 and the dividend declared is 30 per cent. against 35 per cent. and the amount carried forward is Rs. 25,812 against Rs. 27,279.

CIVIL AVIATION AND GOVERNMENT AID

(*Continued from page 1926*)

From what I have already said you will appreciate fully that our present position is a source of considerable anxiety to the Board, and that no stone has been left unturned in our efforts to obtain the aid so urgently required. There is, however, no reason to believe that the Company has come into existence before its time. The development work which we have already completed has clearly shown that commercial aviation in India can be carried on with the same standards of safety and the same degree of efficiency that exist in other countries, and we have always known that Government would require proof of this fact before we should be justified in expecting the State to help us in our efforts.

Development in civil aviation is taking place with Government assistance either direct or indirect, in every country in which aerial services exist, and the Board are confident that the Government of India will also appreciate the necessity of closely following in its wake, and thus confer upon the people of India the benefit of the fastest and most modern means of transport.

While our future development, and, in fact, the avoidance of further constraction in our flying activities, depends upon the temporary assistance for which we have applied, the Board are confident that the public of India will realise that the progress of civil aviation in this country should at least keep pace with similar developments in other parts of the world, and that they will accordingly be prepared to approve of any reasonable measure of financial aid which the State may consider to be justified in the circumstances in which we are placed.

It has been amply demonstrated in countries which have taken advantage of air transport that the speeding up of internal mail acts as a valuable stimulus to trade, and in considering this problem the importance of accelerating the carriage of first class letter mail is paramount. By means of a long term policy on the part of Government it should be possible to ensure the gradual transfer over a period of years of all long distance internal letter mail to the air without surcharge, and in time to establish in this country a complete system of air connection for both passengers and with the Empire Route.

In a country like India which lends itself freely, both geographically and climatically, to the development of civil aviation, an efficient system of internal aerial services can only be regarded as a national asset of primary importance, and the Board look forward to the future in the belief that the past has proved that the Company's organisation is capable, with some measure of initial assistance, of assuming its full responsibilities in the achievement of this object.

I think, Gentlemen, that I have now dealt with all the more important aspects of our activities and with the question of our approach to Government, but I feel it is necessary to make it perfectly clear to you after all I have said that the future is dependent entirely upon the successful solution of the difficulties with which we are at present faced. I do not desire to be unduly pessimistic, but I feel it is my duty to point out that unless these difficulties can be overcome the picture which I may have to place before you at our next meeting will be a different one from that which I have presented to you to-day. I now beg to move "that the Report and Accounts be received and adopted."

MONTHLY REVIEW OF TRADE AND FINANCE

Vol. No. XVI. DECEMBER, 1935. December 21, 1935

Unlike the month of September, which showed decreases both in imports and in exports, October shows a good increase in exports, imports and re-exports. The total imports of foreign merchandise amounted to Rs. 11,81 lakhs as against Rs. 10,21 lakhs in the preceding month, showing thereby an increase of Rs. 1,59 lakhs or 15.6 per cent. as against Rs. 12,47 lakhs in the corresponding month last year or a decrease of Rs. 66 lakhs or 5.3 per cent. Exports also showed a rise of Rs. 2,40 lakhs from Rs. 11,99 lakhs in September, 1935, to Rs. 14,19 lakhs during the period under review and an increase of Rs. 2,12 lakhs as compared with Rs. 12,07 lakhs in October, 1934. Re-exports also rose by Rs. 8 lakhs from Rs. 23 lakhs in September to Rs. 31 lakhs in October, 1935.

With an increase of Rs. 2,40 lakhs in exports, Rs. 1,59 lakhs in imports and Rs. 8 lakhs in re-exports, the balance of trade in merchandise rose by Rs. 89 lakhs from Rs. 1,80 lakhs last month to Rs. 2,69 lakhs during the period under review. This compares very favourably with Rs. 10 lakhs in October, 1934. But the transactions in Treasure (Private) fell from Rs. 3,13 lakhs in September, 1935 to Rs. 3,11 lakhs in October as against Rs. 4,11 lakhs in October, 1935. Total visible balance of trade as such stands at the figure of Rs. 5,80 lakhs as compared with Rs. 4,94 lakhs in September, 1935 and Rs. 4,11 lakhs in October last year. Imports of gold fell from 15,881 oz. valued at Rs. 15 lakhs in September, 1935 to 7,552 oz. valued at Rs. 7 lakhs during the period under review but compare a little favourably with 6,202 oz. valued at Rs. 5 lakhs during October, 1934. Exports of gold also fell from 341,586 oz. valued at Rs. 3,17 lakhs to 326,397 oz. valued at Rs. 3,05 lakhs. Silver imports, too, fell from 157,063 oz. valued at Rs. 3 lakhs to 100,994 oz. valued at Rs. 2 lakhs. Exports of silver on the other hand, rose from 554,279 oz. valued at Rs. 10 lakhs to 723,693 oz. valued at Rs. 12 lakhs during October, 1935.

Reviewing the trade returns for the seven months of the year as a whole, *i.e.*, from April 1, to October 31, 1935, exports of Indian merchandise rose from Rs. 86,02 lakhs in 1934 to Rs. 87,79 lakhs this year. This marks an increase of Rs. 3,15 lakhs over that of 1933. Re-exports fell from Rs. 1,91 lakhs in 1933 to Rs. 1,66 lakhs in 1934 but again rose to Rs. 1,90 lakhs during the period now under review. Imports of foreign merchandise has also been on the upward trend rising from Rs. 65,95 lakhs in 1933 to Rs. 74,34 lakhs in 1934 and now stands at the figure of Rs. 76,14 lakhs. Thus the balance of trade in merchandise fell from Rs. 19,60 lakhs in 1933 to Rs. 13,34 lakhs in 1934 but has improved to Rs. 13,55 lakhs during 1935. Balance of transactions in Treasure private was also on the decline and fell from Rs. 31,14 lakhs in 1933 to Rs. 25,70 lakhs in 1934 and Rs. 23,97 lakhs in 1935. As a consequence of which the total visible balance of trade has fallen to Rs. 23,97 lakhs this year from Rs. 25,70 lakhs in the year 1934 and compares so unfavourably with Rs. 50,74 lakhs in 1933.

As compared with October, 1934, the imports of food, drink and tobacco in October, 1935, fell by Rs. 9 lakhs to Rs. 153 lakhs ; raw materials rose by Rs. 20 lakhs to Rs. 1,40 lakhs while manufactured articles decreased by Rs. 78 lakhs to Rs. 8,63 lakhs. Under food, drink and tobacco, imports of rice, not in the husk, fell by 33,000 tons to 7,000 tons in quantity and in value by Rs. 22 lakhs to Rs. 5 lakhs only. Sugar D.S. and above (ions ing beet) incr lakhs 5,300 tons tports of in quantity and by Rs. 6½ lakhs to ourlons to 3.3 in value. Under raw materialsvalue by Rs. 6 kerosene oil declined by 1.8 r mineral oils other million gallons in quantity million gallons valued lakhs to Rs. 9 lakhs. Lant a rise of 5.2 million than kerosene advance of Rs. 12 lakhs in value. at Rs. 39 lakhs, imported from Kenya Colony, gallons in quantory and Egypt) showed an increase Raw cotton quantity and of Rs. 7 lakhs in value Tanganyikat 3,100 tons valued at Rs. 27 lakhs. of 800 manufactured articles, imports of cotton and

manufactures (including yarn) fell in the aggregate by Rs. 25 lakhs to Rs. 1,88 lakhs. Twist and yarn rose from 2.5 million lbs. to 4.2 million lbs. in quantity and from Rs. 25 lakhs to Rs. 35 lakhs in value. Under cotton piecegoods all the three main descriptions of goods showed decreases. Grey goods fell from 31.6 million yards to 28.7 million yards in quantity, and from Rs. 44 lakhs to Rs. 39 lakhs in value ; white goods fell from Rs. 47 lakhs to Rs. 42 lakhs in value although the quantity remained stationary at 24 million yards ; coloured goods declined from 37.7 million yards to 29.2 million yards in quantity and from Rs. 77 lakhs to Rs. 54 lakhs in value. The number of motor cars imported, amounted to 1221, and that of motor lorries, buses and vans to 921 as against 1454 and 1244 respectively in October, 1934. The value of motor cars imported, amounted to Rs. 22 lakhs and that of motor lorries, buses and vans to Rs. 12 lakhs as compared with Rs. 28 lakhs and Rs. 15 lakhs respectively in the corresponding month of the preceding year. There were noticeable increases under carriages and wagons for railways and iron or steel sheets and plates (+Rs. 6 lakhs each), jute machinery and salt (+Rs. 5 lakhs each), and copra or coconut kernel, chemicals and electrical instruments (+Rs. 4 lakhs each) while there were decreases under woollen piecegoods (−Rs. 16 lakhs), coal tar dyes and steel bars (−Rs. 9 lakhs each), artificial silk yarn (−Rs. 5 lakhs) and copper, wrought (−Rs. 4 lakhs).

Compared with October, 1934, exports of food, drink and tobacco in October, 1935, advanced by Rs. 48 lakhs to Rs. 4,07 lakhs. Shipments of rice, not in the husk, increased from 62,000 tons to 103,000 tons in quantity and from Rs. 49 lakhs to Rs. 87 lakhs in value. Shipments of wheat rose from 1,400 tons to 3,000 tons in quantity and [illegible]m Rs. 1¼ lakhs to de3 lakhs in value. and i/s of gram experienm 7,600 tons to 1,000 tons in quantity tons in qua¼ lakhs to Rs. 1 lakh in value. Barley in value. Exptp fall from 4,600 tons to only 34 lbs. valued at R's from Rs. 3 lakhs to Rs. 2,000 valued at Rs. 2,60 [illegible] improved from 41.1 million shrank from 3.3 millionlakhs to 42.5 million lbs. quantity and from Rs. 8 lakExports of raw tobacco Exports of fruits and vegeta[illegible] 6 million lbs. in preserved, rose from 1,700 tons va[illegible]4 lakhs in value. to 1,900 tons valued at Rs. 16 lakhs.[illegible]ed, salted or and produce exported increased by Rs. 12 lakhs Rs. 5,52 lakhs. Under this group, shipm[illegible]aterials cotton advanced from 20,400 tons to 31,300 [illegible] quantity and from Rs. 1,03 lakhs to Rs. 1,76 lakhs.

value. Of the total shipments of 31,300 tons, Japan the largest purchaser, took 17,800 tons or 57 per cent., the United Kingdom and Germany 2,600 tons or 8 per cent., each, Belgium 2,200 tons, the United States and Spain 900 tons, each, Italy 800 tons, France 700 tons and the Netherlands and China 300 tons, each. Consignments of raw jute declined in quantity from 63,300 tons to 58,800 tons but the value rose from Rs. 84 lakhs to Rs. 97 lakhs. Exports of lac fell from 42,000 cwts. to 35,000 cwts. in quantity and from Rs. 24 lakhs to Rs. 11 lakhs in value.

Despatches of groundnuts dropped from 54,000 tons to 28,000 tons in quantity and from Rs. 63 lakhs to Rs. 44 lakhs in value. Linseed declined from 35,000 tons to 20,000 tons in quantity and from Rs. 43 lakhs to Rs. 26½ lakhs in value. Rapeseed dropped from 5,400 tons valued at Rs. 6¼ lakhs to only 113 tons valued at Rs. 17,000. Castor seed also decreased from 4,000 tons to 3,400 tons in quantity but the value showed a slight increase and stood at Rs. 4 2/3 lakhs. Exports of raw skins improved from 800 tons valued at Rs. 10 lakhs to 1,300 tons valued at Rs. 20 lakhs. Raw hides also showed a slight improvement of 49 tons in quantity and Rs. 1⅓ lakhs in value. Exports of raw wool almost doubled from 3.6 million lbs. valued at Rs. 14 lakhs to 7 million lbs. valued at Rs. 31 lakhs. Exports of teak wood improved from 3,100 c. tons to 4,800 c. tons in quantity and from Rs. 6 lakhs to Rs. 9¼ lakhs in value. Exports of Manganese ore rose considerably from 21,000 tons to 71,000 tons in quantity and from Rs. 3½ lakhs to Rs. 12 2/3 lakhs in value. Wolfram ore advanced from 550 tons to 830 tons in quantity and from Rs. 9½ lakhs to Rs. 17 lakhs in value. There was an improvement under raw rubber from 0.9 million lbs. to 2.4 million lbs. in quantity and from Rs. 3 lakhs to Rs. 7 lakhs in value. Oilcakes dropped from 44,000 tons to 37,000 tons in quantity and from Rs. 26⅓ lakhs to Rs. 22 2/3 lakhs in value. There was an increase of Rs. 3 lakhs under hemp, raw. Manufactured goods increased by Rs. 63 lakhs to Rs. 4,46 lakhs. The number of gunny bags exported increased from 49.7 millions to 63.9 millions and from Rs. 1,17 lakhs to Rs. 1,54 lakhs in value. Gunny cloth also advanced from 112 million yards to 145 million yards and from Rs. 1,14 lakhs to Rs. 1,37 lakhs in value. Exports of tanned hides rose by 49 tons in quantity and by Rs. 90,000 in value, while tanned skins declined by 57 tons in quantity and by Rs. 7 lakhs in value. Lead, pig, improved from 78,500 cwts. to 121,100 cwts. in quantity and from Rs. 9½ lakhs to Rs. 19 lakhs in value. Exports of paraffin wax fell from 5,200 tons to 3,800 tons in quantity and from Rs. 21 lakhs to Rs. 16 lakhs in

(a) Exclusive of the value of Railway materials (Rs. 17 lakhs, Rs. 27 lakhs and Rs. 43 lakhs in the five months from April to end of August in 1933, 1934 and 1935 respectively) imported direct by State Railways working under company management which was not paid for in the ordinary way and not, therefore taken into account in arriving at the balance of Trade.

value. A decline of Rs. 3 lakhs was registered under woollen carpets and rugs, while cotton manufactures improved by the same amount.

The share of the United Kingdom in imports fell from 40 per cent. in October, 1934, to 38 per cent. in October, 1935, and in exports from 38 per cent. to 33 per cent. The shares of Germany, Japan and the United States of America in the month under report were 8, 17, and 5 per cent. respectively under imports and 3, 10, and 11 per cent. under exports.

The tonnage of vessels that entered into British India and cleared with cargoes from and to foreign countries and British Possessions during the month of October, 1935, amounted to 670,000 and 717,000 respectively. The corresponding figures were returned at 681,000 and 585,000 in September, 1935, and 724,000 and 691,000 a year ago. During the seven months ending October, 1935, the tonnage of vessels that entered and cleared with cargoes amounted respectively to 4,739,000 and 4,779,000 as compared with 4,489,000 and 1,592,000 in the corresponding period of the preceding year.
